This short workshop is primarily designed for those new to IBL or just getting started with IBL. Participants will study and discuss video from IBL classes, examine the nuts and bolts of running an IBL class, and work on specific IBL classroom strategies. Sample course materials and other resources will also be shared. Experienced IBL practitioners are welcome to attend, as there will be some content that could be useful for those looking to refresh or needing an “IBL Booster Shot”.
