*In 2015, the Career & Professional Development (CPD) office collected career and further education outcomes data (such as internship data) from the undergraduate class of 2015. Most survey data were collected in class and online during April and May of that year. Additional data were collected by CPD staff online using LinkedIn and other sources. CPD used National Association of Colleges & Employers (NACE) First Destination Survey standards to collect and report data. Statistical percentages are based on survey knowledge rate of 94.6%, not number of graduates.*
