Self-Aware & Servant-Led

Self-Aware & Servant-Led is a three-day, overnight program designed to equip you with the foundation you need to succeed in your leadership role. Focused on Servant Leadership, Emotional Intelligence and Storytelling for Leaders, this transformational experience shapes the way in which you understand your identity, relate to team members, and achieve results. The program begins with an in-depth 360 assessment and psychometric tool, including debriefing by a certified consultant. Following the 3-day on-site, the program culminates with an Emotional Intelligence profile and a company stretch project. Learn from engaging, seasoned leaders as you explore real-life leadership challenges. Discover for yourself why multiple companies use Self-Aware & Servant-Led to develop their highest-potential leaders.

A high-impact, three-day leadership experience held in a serene setting on the Spokane River.

The days were filled with learning from start to finish. I was left with a number of tools to take away and apply in real-life situations.
