2021-2022

Mission Statement

Gonzaga University is an exemplary learning community that educates students for lives of leadership and service for the common good. In keeping with its Catholic, Jesuit, and humanistic heritage and identity, Gonzaga models and expects excellence in academic and professional pursuits and intentionally develops the whole person -- intellectually, spiritually, culturally, physically, and emotionally.

Through engagement with knowledge, wisdom, and questions informed by classical and contemporary perspectives, Gonzaga cultivates in its students the capacities and dispositions for reflective and critical thought, lifelong learning, spiritual growth, ethical discernment, creativity, and innovation.

The Gonzaga experience fosters a mature commitment to dignity of the human person, social justice, diversity, intercultural competence, global engagement, solidarity with the poor and vulnerable, and care for the planet. Grateful to God, the Gonzaga community carries out this mission with responsible stewardship of our physical, financial, and human resources.

Introduction

What's in a Name?

The University is named after the 16th-century Italian Jesuit saint, Aloysius Gonzaga. A descendant of a noble Renaissance family and a page at the court of Francesco de Medici, Aloysius Gonzaga entered the Society of Jesus (the Jesuit order) in 1585. Later, while a seminarian in plague-stricken Rome, he attended to the sick and dying; as a result of his heroic service, he died of exhaustion on June 21, 1591, only 23 years old. He was declared the patron saint of youth in 1726.

Quality That Earns National Recognition

U.S. News and World Report's most recent America's Best Colleges ranked Gonzaga in the top 21% — 80th among National Universities. Fiske Guide to Colleges, Kiplinger's Best Colleges and The Princeton Review have also consistently praised the academic strength and quality of education provided at Gonzaga University.

Spokane and the Inland Northwest

Spokane, Washington and Coeur d'Alene, Idaho, form a flourishing metropolitan area with a population of approximately 734,218. This area offers many opportunities for work, service and relaxation for Gonzaga students.

Gonzaga's campus overlooks the Spokane River, where the Washington Centennial Trail extends 39 miles between northwest Spokane and Coeur d'Alene. Students enjoy biking, rollerblading, running and walking along the trail. Downtown Spokane is just a few blocks' walk from the campus, providing easy access to shopping, dining, and entertainment. The nearby 12,000-seat Spokane Veterans Memorial Arena, a multipurpose entertainment venue, hosts concerts, sporting events, and special programs such as Gonzaga's undergraduate commencement ceremonies.

Spokane boasts many parks, including the 100-acre Riverfront Park in the heart of the city. In addition, there are 21 public golf courses within an hour's

drive, ice- and roller-skating rinks, theaters, and art galleries. A symphony orchestra, civic theatre and professional athletic teams add to the cultural and entertainment opportunities of the urban core.

Nearby recreational areas are easily accessible to students. Seventy-six lakes and five ski areas provide swimming, water skiing and winter sports activities. Spokane has consistently been lauded for its quality of life.

Students: The Center of the University

Total enrollment each semester at Gonzaga is over 7,200 of which almost 70 percent are undergraduates and over 30 percent are in graduate programs, including the School of Law and four doctoral programs. Our student body are from nearly every state and over thirty countries.

Three quarters of undergraduates are ranked in the top quarter of their graduating class.

More than half of the undergraduate student body comes from homes at least 200 hundred miles from Spokane. The result is a diverse, welcoming campus community, where cultures and friendships are shared warmly.

The academic curriculum is supported by over 700 faculty. The ratio of students to faculty is 11-to-1.

Finance: An Important Part of Your Education

As you begin your academic career, it is important to remember that although tuition at independent or private universities is typically higher than at public universities, the ultimate value of a degree from Gonzaga University is well recognized by members of business and industry.

Gonzaga is committed to assisting students in financing their college education. Over 95% of our students receive financial aid. The Financial Aid Office welcomes your inquiries and is prepared to provide assistance in the development of your financial aid award, assuring you the best package possible.

The Campus: Your Home Away From Home

Gonzaga's campus has grown from one building which housed both students and Jesuit faculty in its early years to 104 buildings spread over 150 landscaped acres. The University site is along the north bank of the Spokane River and includes its own small lake and an attractive, well-kept campus. Some highlights of the campus include the following:

The Department of Housing and Residence Life provides living options for around 3,000 undergraduate students, including men's, women's or coeducational residence halls with capacities ranging from 40 to 620. Residence halls are staffed by Professional, Graduate and Assistant Residence Directors, Resident Assistants, Resident Ministers, and Social Justice Peer Educators who collectively provide a large range of services as live in staff members. Full-time unmarried first and second year students who are under age 21, not living at home, must live in on-campus residence facilities. Upper-division students have access on a first come/first served basis to some apartment-style living units, and the University owns three apartment complexes and up to 12 houses in the neighborhood depending upon the year. At this point in time the university does not provide married or family housing in any on or off campus property, yet is happy to assist students in locating such.

John J. Hemmingson Center is over 167,000 square feet of contemporary space that supports a fun, healthy living and engaged community. It is a living and learning environment where students, faculty, staff, alumni and members of the larger community can interact with one another.

Dining options include:

The COG with two floors of diverse resident dining with six restaurant-style platforms, Starbucks, Handcrafted - gourmet sandwiches offering a build-your-own option, The Marketplace convenience store, and The Bulldog, a full-service restaurant.

A state-of-the-art rooftop hydroponic greenhouse grows organic produce that is served in resident dining. Additionally, the Hemmingson Center offers U.S. Bank, Next Gen Tech Bar, a grand ballroom, auditorium, meetings room and spaces for events, a reflection room, pop-up retail alcove, outdoor fire pit, and many places for students to meet and study.

Administrative offices within the building include:

- Mission & Ministry
- Diversity, Inclusion, and Cultural Engagement (DICE) including Unity Multicultural Education Center (UMEC) and Lincoln LGBTQ+ Resource Center
- Center for Community Engagement (CCE)
- Student Involvement and Leadership including Payne Center for Leadership Development (PCLD), Center for Student Involvement (140+clubs and student governments), Gonzaga Outdoors (including bike and ski repair shop), Gonzaga Student Body Association (GSBA), and Transfer, Veteran, and Returning Adult Services (TVRAS)
- Center for Global Engagement (CGE) including Study Abroad and International Student and Scholar Services (ISSS)
- Auxiliary Enterprises
- ZAGCARD Services
- Gonzaga University Event Service Team (GUEST)

Gonzaga University Athletic Facilities

The Charlotte Y. Martin Centre is the home of Gonzaga volleyball. The gym, which is the birthplace of the Kennel, seats 2,000 fans. As a whole, the Martin Centre is 136,000 square feet and houses the volleyball gym, but is also the location of athletic department offices and Diedrick & DeLong Sports Medicine Center. The athletic training facility is a wonder on its own, covering nearly 5,000 square feet and featuring two state-of-the-art rehabilitation whirlpools.

The Rudolf Fitness Center is a 38,000 sq. ft. facility with cardiovascular and weight areas containing a full line of Olympic benches, dumbbells, Hammer Strength equipment, treadmills, elliptical machines, rowers, versaclimber, bikes, and steppers with 14 televisions. Also available are four racquetball courts, two aerobics rooms, a field house with three full basketball or volleyball courts, a (1/11 mile) rubberized running track, a six lane 25-yard swimming pool and a smoothie snack bar. The Rudolf Fitness Center also houses a majority of the physical education classes offered by the University and is open throughout the year for use by students, staff/faculty, and spouses.

The McCarthy Athletic Center is home to the Gonzaga men's and women's basketball teams as well as the Harry A. Green Indoor Rowing Facility. The facility, which features a 6,000-seat arena, is 144,000 square feet of screaming fans come basketball season and lives and breathes the legacy of past basketball greats, such as John Stockton.

Patterson Baseball Complex and Washington Trust Field became the home of Gonzaga baseball in the spring of 2007. The completion of the facility brought GU baseball back to the campus for the first time since 2003. The complex is named after benefactor and former Chairman of the Board of Trustees Mike Patterson, while Pete Stanton and Washington Trust Bank of Spokane were also major contributors.

Luger Field is home to Gonzaga's Men's and Women's soccer programs. Phase I of the new facility was finished in fall 2008. Phase II of the facility was completed in the fall of 2015 with the addition of state of the art lighting which will allow our soccer teams to play their home games under the lights. The new facility provides not only a playing field, but a practice field for both the men's and women's teams as well as a press box and ticket booth. Phase III and IV will include the installation of permanent seating and a locker room for the home and visiting teams.

The Stevens Center, Gonzaga University's new state-of-the-art indoor tennis and golf facility, opened in January 2014. This 72,000-square-foot facility includes six regulation tennis courts and a golf practice area with putting green, chipping area and four TrackMan simulators. Other prominent features include locker rooms, training rooms, team lounge, offices and balcony seating overlooking the tennis courts.

The Volkar Center for Athletic Achievement is a 51,240-square-foot facility built directly south of the Martin Centre, and helps student-athletes succeed in competition, in the classroom and in the community. The building houses the Rian G. Oliver Student Athlete Enrichment lab, The Karen Gaffney Champions room, The Steve Hertz Practice facility, Brown court, and the Hall of Honor presented by the Wolff Family, along with multiple meeting spaces. The building provides Gonzaga student-athletes with some of the finest facilities and support services in the nation.

Campus Buildings

The Gonzaga University Campus includes 104 buildings. Among these are several new buildings, including the new Hemmingson University Center which houses the Center for Global Engagement, the Mission & Ministry offices, the Center for Community Engagement, the Diversity, Inclusion, Community, and Equity (DICE) office, the Student Involvement and Leadership Center, student government offices, multiple meeting rooms and lounges, a US Bank branch, a ballroom, as well as multiple food venues. Since 2000, fourteen other new buildings have been constructed, including the bookstore and parking facility; the Corkery and Kennedy Apartments; Coughlin, Dillon, Goller, and Twohy Residence Halls; the Law School; the McCarthey Athletic Center; the Paccar Center for Engineering; the Patterson Baseball Complex; and the Stevens Center for Tennis and Golf. The Rudolph Fitness Center was also added to the Martin Centre sports facility, and the Tilford Center for Nursing and Human Physiology, as well as Leadership Studies, was created from a purchased facility. The Magnuson Theater was also renovated during this time frame.

The Foley Center library was opened in the fall of 1992, providing sophisticated on-line computer access to libraries across the United States. It also contains one of the finest rare book rooms in the country.

In addition to the library, Foley is now the home for the Writing Center, the Center for Teaching and Advising, the Center for the Virtual Campus Digital Design and Production Center, the Center for Academic Advising and Assistance, including the Disability Access, and Academic Testing Center, and Information Technology Services (ITS).

Other new buildings as well as historic ones grace the Gonzaga campus. The Jundt Art Center and Museum was completed in 1995. The Jepson Center for the School of Business was remodeled and expanded in 2004. The Rosauer School of Education building was completed in 1994. The historic Huetter Mansion was relocated to the University Campus and houses the Office of Campus Security and Public Safety, while the graceful 1902 Monaghan Mansion continues to house offices and practice rooms for the Music department. The Alumni Association along with the Division of University Advancement is now located in the Boone Avenue Retail Center BARC.

A new Performing Arts Center, the Myrtle Woldson Performing Arts Center, opened in the Spring of 2019 and a new integrated science and engineering

facility that is nearing completion. Additionally, the Volkar Center for Athletic Achievement as well as the new the Della Strada Jesuit residence have recently been completed. The former Jesuit House has been renovated into a new facility for the Humanities and contains a new office suite for the Dean of the College of Arts and Sciences, as well as offices for the Honors Program, Women and Gender Studies, the Center for Public Humanities, and the Center for Undergraduate Research and Creative Inquiry, as well as the Science in Action outreach program, English, and Religious Studies.

St. Aloysius Church, the Student Chapel, and the spires of St. Al's Church are landmarks of the Spokane area. The chapel, located in College Hall, offers students a place for solitude and reflection as well as daily Masses.

A Century of Educational Leadership

After forty years of pioneer missionary efforts to bring Christian civilization and culture to the Pacific Northwest, the Rev. Joseph M. Cataldo, S.J., an Italian Jesuit missionary, initiated plans to build a mission school in Spokane Falls Territory. Out of the vision and courage of early Jesuits, Gonzaga College became a reality and admitted its first students in 1887, two years before Washington became a state.

The College became Gonzaga University with the opening of the School of Law in 1912. In 1916 the School of Philosophy of Letters for Jesuit Scholastics became part of the University. In 1921 the University opened the School of Business Administration and in 1928 the School of Education. The School of Engineering was established in 1934 and in 1975 the School of Continuing Education was recognized and named as the School of Professional Studies. The School of Professional Studies was renamed the School of Leadership Studies in 2018. Gonzaga is an independent, Roman Catholic and Jesuit university committed to ensuring our students an educational experience that encourages individual intellectual, moral, and spiritual development.

Accreditation: The Mark of Excellence

Gonzaga University is accredited by the Northwest Commission on Colleges and Universities (NWCCU), an institutional accrediting body recognized by the Secretary of the U.S. Department of Education. Gonzaga University holds specialized accreditations for specific degree programs through:

- The Council for Accreditation of Counseling and Related Education Program (CACREP)
- The Council on Accreditation of Nurse Anesthesia Educational Programs (COA)
- The British Columbia Ministry of Advanced Education and the Degree Quality Assessment Board (consent)
- The Alberta Ministry of Education and Technology and the Campus Alberta Quality Council (approved)
- The National Association of Schools of Music (Associate member NASM)
- The American Chemical Society
- The Washington State Professional Educator Standards Board

GU Coat of Arms - The University Seal: The Mark of Distinction

The Coat of Arms of Gonzaga University was assembled in 1914 is an adaptation of the coat of arms of the Loyola family, members of the Spanish nobility from whom the founder of the Society of Jesus descended. It combines symbols representing both the paternal and the maternal houses, Loyola and Onaz. The Coat of Arms contains:

- **Hatchment Number 1** (dexter chief): Two gray wolves leaning on a black pot and chain, all on a white field. It represents the House of Loyola, as the founder of the Jesuit Order was Inez Loyola. The pride of the House was that they fed the poor, kept the wolf from the door.
- **Hatchment Number 2** (sinister base): The arms of the House of Gonzaga, a red cross sustaining an in-escutcheon, the lions of Florence and two black for the ecclesiastical dignity of their House. The four falcons in the corners of the escutcheon represented the hunting prowess of the family. Now the faculty of Gonzaga are first, Jesuits founded by Loyola; secondly, the patron of the University is St. Aloysius Gonzaga; thirdly, the House of Onez was associated with Loyola; and lastly, the University is situated in Spokane, represented by the river, the sunburst, and the Indian symbols.
- **Hatchment Number 3** (sinister chief): The colors of Spain, seven red bars on a field of gold, given to the House of Onez by the King, because seven brothers of that House distinguished themselves in the service of Spain.
- **Hatchment Number 4** (dexter base): Sun burst over the Spokane Falls, a pine tree to the right and an Indian tepee to the left. The Spokane Indians were so called because they were in their interpretation,

children of the sun. The colors are natural, the tepee being a russet, or dun color.

- **Eagle crest:** American bald eagle of the Republic, protecting the Institution.
- **IHS:** The name of Jesus, His cross, and the three nails of His crucifixion. The nails and lettering are black, surrounded by a halo for gold.
- **In-escutcheon:** Blue and White, a royal blue field on which the letter G stands for Gonzaga, the University colors are Royal Blue and Immaculate White.
- **AMDG scroll:** Stands for “Ad Majorem Dei Gloriam”, for God’s greater glory, the motto of the Society of Jesus as given to it by its founder, St. Ignatius Loyola.
- **1887:** University was founded in 1887, and was only a college until 1912.
- **Wreath:** Bays on the right, representing classic renown, Oak on the left signifying civic pride, both in natural colors.

Our Commitment to Non-Discrimination

Gonzaga University subscribes to the principles and laws of the federal government and Washington State pertaining to civil rights and equal opportunity. The university does not discriminate against any person on the basis of race, color, religion, national origin, sex, marital status, sexual orientation, gender identity, age, disability, protected veteran status, or any other non-merit factor in employment, educational program, or activities that it operates. All university policies, practices, and procedures are consistent with Gonzaga’s Catholic, Jesuit identity and Mission Statement.

As a church-related institution, in conformity with federal and state law, Gonzaga reserves the right to take religious faith into consideration where it is deemed appropriate. As a federal contractor, Gonzaga University maintains an Affirmative Action Plan.

Gonzaga University Strategic Planning Process

Vision Statement

Approved by the Board of Trustees on July 17, 2015

Gonzaga is a premier Liberal Arts based University recognized nationally for providing an exemplary Jesuit education that empowers its graduates to lead, shape, and serve their chosen fields and the communities to which they belong.

Institutional Priorities and Strategic Objectives

Gonzaga University is a complex organization that encompasses multiple channels of accountability, functions in a shifting competitive environment, serves a variety of constituencies and pursues a wide array of goals. Additionally, the University is increasingly being asked to become more sophisticated in how it makes decisions, delivers educational content, supports students and approaches its strategic planning. Meeting these expectations currently involves the work of more than 1,200 full-time employees, involves in excess of 3.1 million square feet of facilities and operates with a gross annual operating budget surpassing one third of a billion dollars.

At the beginning of the current administration, the President set forth three institutional priorities to guide decision-making and resource allocation:

- Gonzaga University an *exemplar* of American Jesuit higher education.
- Academic and educational *excellence across the institution*.
- A commitment to *institutional viability and sustainability*.

Strategic Plan

The Vision, Institutional Priorities, and Strategic Objectives articulated above served as the foundation for the development of the Gonzaga University Strategic Plan. This Plan identifies four primary guideposts toward our vision, called “commitments” – an acknowledgment that we do our work in an active, relational context, possessed of mutual accountabilities.

Commitment 1: Foster Responsibility For Shared Mission

Commitment 2: Animate Academic Excellence Across The Institution

Commitment 3: Provide An Integrative Jesuit Educational Experience For Our Students

Commitment 4: Optimize Institutional Stewardship And Sustainability

Each commitment in turn contains strategic objectives that serve as declarations of continuous institutional improvement. The thirty-five (35) specifically identified goals provide a means of defining institutional success in achieving the objectives.

Admission

Policy

Decisions on admission to any undergraduate school or college of the University are made after a careful review of an applicant's academic achievement, scholastic aptitude, and personal characteristics which may predict success at the University. High school or college grades, course rigor, optional test scores, essays, extra-curricular activities and character play an important role in the admission process. All applicants are reviewed according to these criteria without discrimination on the basis of race, age, color, creed, national or ethnic origins, marital or financial status, disability, gender, or sexual orientation. For Admission to an undergraduate program for any term beginning in 2021, neither the SAT nor the ACT will be required.

Prerequisites

Applicants for regular admission are expected, prior to enrollment, to have graduated from an accredited high school in a college preparatory curriculum while showing evidence of ability to complete the University's requirements for graduation.

The following pattern of coursework is recommended, but not required, for admission to Gonzaga University:

English	four years;
Mathematics	three/four years;
History/social studies	three years;
Foreign language/ American Sign Language	two/three years of a single language;
Natural/physical laboratory science	three/four years

Gonzaga recommends high school calculus and physics for students seeking admission to an engineering major. For first-year applicants seeking admission to nursing, Gonzaga recommends science and math all four years of high school, including in the senior year.

As of fall 2020, Gonzaga does not require an SAT or ACT to be submitted as part of an application; students may apply with or without ACT or SAT scores and there is no penalty or preference for either. Candidates submitting SAT or ACT scores to the University are urged to take their tests no later than the first semester of their senior year in high school. Scores must be submitted through the testing agency or be posted on the high school transcript to be considered official.

Review admission requirements at www.gonzaga.edu/admissionreqs.

An application for undergraduate admission will not be considered until all required documents are received by the Office of Admission.

How to Apply for Admission:

Application for First-Year Students:

1. Students applying to Gonzaga University must submit the Common Application. Applications can be accessed online at the Common Application website www.commonapp.org.
2. Students must complete all parts of the Common Application including the Member Questions.
3. Submit the non-refundable application fee. The application fee may be submitted via the Common Application website.
4. Forward an official high school transcript to the Office of Admission. The application may be completed after the student has finished six semesters (or nine trimesters) of work in a college preparatory program.
5. Optional: Have ACT or SAT scores forwarded to the Office of Admission if they do not already appear on the high school transcript.
6. Home-schooled students are a significant part of Gonzaga University's applicant pool. Students may choose home schooling for a variety of reasons and may implement a variety of styles. Therefore, home-school applications receive highly individualized attention. The Office of Admission requests the following information:
 - a. The Common Application
 - b. Any transcript(s) of academic work
 - c. Optional: ACT and/or SAT
 - d. One letter of recommendation, by someone other than a parent, addressing academic accomplishments

- e. The Common Application School Report, which can be filled out by a parent/guardian
7. Gonzaga's Nursing Program accepts first-year applications only. Applicants interested in the Nursing Program must choose "Nursing" on their application to be considered. Students not admitted into the Nursing Program through the application process will not be permitted to change their major to nursing.
8. The School of Engineering and Applied Science has competitive, direct admission for engineering programs. This includes civil, computer, electrical, mechanical, engineering management as well as students who are undecided but desire a major in an engineering discipline.

Application for Transfer Students:

1. Submit the Transfer Application for Admission at www.gonzaga.edu/transfer.
2. Request one Academic Evaluation and/or a letter of recommendation from a college advisor or professor.
3. Request one Transfer College Report from an official at your current or most recent institution and forward it to the Office of Admission.
4. Submit an official college transcript for each institution attended.
5. Submit a final high school transcript if you have not yet earned 30 or more transferrable semester credits (or 45 quarter credits) by the time of application. ACT and/or SAT scores are not required, but applicants under 21 may choose to submit them for consideration.
6. Submit the non-refundable application fee.

Application for International Students

Gonzaga welcomes applications from international students, who make up a valued part of the University's student body. Since 1969, Gonzaga has been authorized by the Federal government to issue both I-20s and DS-2019s so that international students can secure visas and enroll in our programs. To be considered for undergraduate admission, international applicants are required to submit the following:

1. A completed application:
 - a. First-year applicants must complete the Common Application at www.commonapp.org.

- b. Transfer applicants must complete the Transfer Application at www.gonzaga.edu/transfer.
2. Transcripts:
- a. First-year applicants must provide proof of academic preparation through the submission of official academic transcripts, demonstrating satisfactory achievement in the completion of a secondary education equivalent to that offered in the United States.
 - b. Transfer applicants must submit official transcripts from any post-secondary institution attended. Please submit transcripts in both your native language and in English. If admitted, a professional course-by-course evaluation will be required.
3. School Report or College Report:
- a. First-year applicants must provide a completed Common Application School Report (completed by the high school counselor).
 - b. Transfer applicants must provide a completed Transfer College Report (completed by a school official at your current or most recent institution).
4. A letter of recommendation from a professor or school counselor, to be sent directly to Gonzaga University.
5. A copy of your current passport.
6. Proof of English language proficiency adequate for undergraduate study at Gonzaga, which may be demonstrated by any of the following:
- a. Test Scores. Official test scores must be received directly from a testing agency or reported on the official high school transcript. Test scores must be dated within two years of the application
 - 1. A TOEFL score of at least 550 written or /80 iBT. "My Best Score" and "TOEFL Home Edition" accepted.
 - 2. An IELTS score of 6.5 or higher.
 - 3. An official ACT composite of 23 or higher.
 - 4. A SAT Evidence Based Reading and Writing score of 550 or higher.
 - 5. Duolingo score of 105 or higher.
 - 6. An iTEP Academic Plus score of 4.5 or higher.
 - 7. A PTE (Pearson Test of English) score of 56 or higher.
 - 8. A TOEIC score of 695 or higher.

9. An IB English A (Higher or Standard) predicted score of 5 or higher.
10. GCSE/IGCSE/GCE O-Level in one of the following courses with a B or higher: English, English Language, English Literature or First Language English.
 - b. Successful completion of the course of study offered by Gonzaga University's ESL Program with faculty recommendation.
 - c. Completion of two U.S. college-level English composition and/or speech courses with a 3.00 or higher (on a 4.00 scale).
 - d. Applicants from the following countries are exempt from providing proof of English proficiency: Australia, Botswana, Canada (except Quebec), Ghana, Ireland, Kenya, New Zealand, Nigeria, South Africa, Uganda, United Kingdom, and any English speaking Caribbean country (Antigua and Barbuda, Bahamas, Barbados, Grenada, Jamaica, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Trinidad and Tobago).

Application fee note: Gonzaga offers an application fee waiver for international students. To receive the waiver, please select the International Student Fee Waiver on the Common Application or on the Transfer Application.

Once admission has been granted and students pay their confirmation deposits, Gonzaga University requests international applicants to provide documentation of sufficient funds for academic and living costs while studying in the United States for at least the academic year (two consecutive full-time semesters) so that immigration documents can be issued.

When to Apply for Admission

All new students may apply for admission to either the fall or spring semesters.

FIRST YEAR: Gonzaga has a first-year deadline of December 1, and will take late applications until February 1. Decisions are released by early March. Students seeking entrance into the spring semester should apply for admission by November 15.

TRANSFER: All students who wish to transfer to Gonzaga from another college or university should submit an application early in the semester preceding their intended enrollment at Gonzaga; this is especially true for

transfer students who wish to apply for financial assistance. Transfer students applying for the fall semester should apply no later than June 1, and students applying for the spring semester, no later than November 15.

Enrollment in a summer session does not imply admission for the regular academic year. Summer session students who desire regular admission to the University should submit an application to the Office of Admission.

All applicants seeking financial aid should also complete and submit the Free Application for Federal Student Aid (FAFSA). The FAFSA is available starting October 1 of the year prior to the year for which admission is sought, and families are encouraged to submit the FAFSA as soon as possible. The FAFSA priority deadline for first-year students is February 1 and for transfer students, March 1. This form can be accessed online at <https://studentaid.gov/h/apply-for-aid/fafsa>. Gonzaga's FAFSA code is 003778.

Credit Earned Elsewhere

Transfer of Credit

Applicants who have earned college credit at other regionally accredited colleges or universities should note that all credits submitted for transfer approval must have a grade of at least 2.00 (on a 4.00 point scale), must represent college-level course work, and must be academic in nature for acceptance by the University. Students may not transfer more than sixty-four semester credits or ninety-six quarter credits from a two-year college. Students transferring to Gonzaga University with sixty-four semester credits from a community college may not return to a two-year college for any additional transfer credit. All transfer students must complete at least thirty semester credits at Gonzaga immediately preceding their graduation from the University. For further information on transfer credit policies, applicants should consult the Academic Policies and Degree Requirement sections of this catalog.

Advanced Placement/International Baccalaureate Credit

The University welcomes requests for special placement evaluation for incoming students who have taken the Advanced Placement (AP) Examinations of the College Board or International Baccalaureate Examinations. Examination results should be forwarded to the Office of

Admission. Applicants may be granted credit, advanced standing, or a waiver of requirements depending on the field of study, the scores achieved, and the general regulations of the University. AP and IB Examination policies at Gonzaga University are available on the Office of Admission website, www.gonzaga.edu/creditbyexam.

Cambridge International A and AS Level Exams

Cambridge International A Level is a two-year course, and Cambridge International AS Level is a one-year course offering advanced curriculum to students preparing for colleges worldwide. The Cambridge International A and AS level curriculum is recognized as a rigorous college preparatory curriculum. Based on the results of Cambridge International Exams, students may receive 3 to 6 credits per advanced level exam. Review Gonzaga's policy for granting credit based on the advanced level exam or certificates online at www.gonzaga.edu/creditbyexam.

German Abitur (Zeugnis der Allgemeinen Hochschulreife)

The Abitur is certification that a student has successfully completed the German college-preparatory educational program and has scored passing grades on the Abitur examinations administered during the final year of secondary school. Based on the results of the Abitur exam, students may receive up to 6 semester credits per Leistungsfach subject area with a minimum grade of 10. Review Gonzaga's policy for granting credit based on the advanced level exam online at www.gonzaga.edu/creditbyexam.

Honors Program

Gonzaga University has long challenged exceptional students through its Honors Program. This interdisciplinary, competitive program seeks academically gifted and intellectually curious students who are willing to put their talents to work for the service of others.

The four-year Honors curriculum allows a student to choose any major or minor course of study. In addition to team-taught, interdisciplinary classes and close personal advising, a scholarship, a waiver of tuition fees for excess credit, an optional Honors Living Learning Community residence hall, flexible scheduling, unique study abroad opportunities and pride of place at graduation are provided.

Admission to the Honors Program is highly competitive: eighty to one hundred places are open each year. Candidates must complete a separate Honors application to be considered for admission. Acceptance is based on independent intellectual achievement and commitment, creativity, skill in effective expression, strength of curriculum, resilience through challenge, and the Honors portfolio on the Honors application form. If candidates submit test scores for their Gonzaga application for admission, they will also be considered in the Honors evaluation. If candidates don't submit test scores, strength of curriculum, GPA, and writing will be given more weight in the evaluation. Potential applicants are encouraged to visit the campus and to meet with the Honors Director or an Admission Counselor or to schedule a video or phone call to learn more about the Program.

Campus Visit

The Office of Admission offers an extensive visit program for those interested in attending Gonzaga. Pending availability, an individualized visit may include an overnight stay, class visit, faculty meeting, admission interview, information session, and campus tour. In addition to individualized visits, several Preview Days (larger open-house days), Saturday Visits, Nursing Fridays, and virtual programs are offered throughout the year. To schedule a visit, contact the Visit Office at visit@gonzaga.edu or www.gonzaga.edu/admission/visit. A notice of at least two weeks is appreciated.

Dual Enrollment

High school students who have not yet completed their graduation requirements may enroll (with certain restrictions and on a space-available basis) in a maximum of two courses per semester while still enrolled in high school. This program is reserved for juniors and seniors who present a minimum cumulative grade-point average of 3.50 (4.00 scale) and a letter of recommendation from their principal or counselor. A special tuition rate is available for all students taking Dual Enrollment courses. For more information on this program, students may contact the Office of Admission.

Non-matriculation

Non-matriculated students not seeking a degree may enroll in courses at Gonzaga on a space-available basis after matriculated students have registered. Contact the Registrar's Office for further information.

Financial Information

General Information

The University's cost of providing a Gonzaga education is not borne solely by student tuition and fees. The annual Jesuit Community gift, endowment income, and gifts of many types from individuals, firms, and foundations constitute some of the other revenue sources essential for a balanced budget.

However, revenue from student charges constitutes most of Gonzaga's income. Student charges (less verified financial aid) are payable in full in U.S. dollars on a per semester basis, no later than three weeks prior to the beginning of the term. Knowing that payment in full presents a burden for many parents and students, Gonzaga offers installment plans each semester which spread payments over four months.

4-Month Installment Payment Plan (per semester)

Gonzaga University has partnered with CASHNet to provide a completely automated and paperless 4-month semester payment plan.

Installment Payment Plan features:

- Interest free
- Real-time account balance information through CASHNet for students and their authorized payers.
- The total semester cost, less verified financial aid (excluding work study and pending outside scholarships) can be set up in 4 equal monthly installments.
- Automatic payment enrollment (optional)
- Enrollment is by semester and includes a \$50 non-refundable enrollment fee each term

Fall Semester 4 Month Plan (Enrollment Deadline August 10, 2021)

- In **mid-July**, all registered students and their authorized payers will receive email notification that the fall semester Statement of Account and payment options are ready to view in CASHNet. At this time, the option to enroll in the Installment Payment Plan for fall semester will be available.
- Sign up for the Installment Payment Plan (online only). There is a **\$50 enrollment fee**, which will be required in addition to your **first payment for August**.
- **Payments are due monthly, the tenth of each month, beginning August 10, 2021 through November 10, 2021.**

Spring Semester 4 Month Plan (Enrollment Deadline January 10, 2022)

- In **mid-December**, all registered students and their authorized payers will receive email notification that the spring semester Statement of Account and payment options are ready to view in CASHNet. At this time, the option to enroll in the Installment Payment Plan for spring semester will be available.
- Sign up for the Installment Payment Plan (online only). There is a **\$50 enrollment fee**, which will be required in addition to your **first payment for January**.
- **Payments are due monthly, the tenth of each month, beginning January 10, 2022 through April 10, 2022.**

Additional information:

- Students accepted to the University after the installment plan deadline dates may still enroll within two weeks of their acceptance, making up any missed payments and will not be assessed the additional \$25 late enrollment fee.
- Students are not eligible to enroll in an installment plan if they owe for a previous term.
- The payment plan covers only one term, so you will need to re-enroll every term.
- Students can only be enrolled in one Payment Plan each semester.

- **Note:** All charges are payable in U.S. funds. Student Accounts accepts checks for payment on account. Electronic payment is also available which includes e-Check at no charge to the student and credit card payment through American Express, MasterCard, Discover and VISA with a 2.75% convenience fee. An international payment option is available through Flywire. Billing statements are available ONLINE only. For additional information, go to: www.gonzaga.edu/studentaccounts and click on the 'Billing and Payment' link.

Third Party Sponsors

A student whose account will be paid by a corporate or foreign sponsor, a government agency, a religious institution, a scholarship foundation or trust account, requires written proof of sponsorship in the Student Accounts Office to settle their account.

Confirmation Deposit

In order to reserve a place in the student body, each first-time student is required to pay a \$ 500.00 confirmation deposit. This will apply as a credit toward first semester tuition expenses. Confirmation deposits are non-refundable unless written notification of cancellation of enrollment is received by the Admission Office prior to its deadline dates.

Room Reservation/Damage Deposit

Students are expected to make housing reservations with the Housing office prior to May 1st for fall semester and prior to December 1st for spring semester. All new students must complete and sign a Residential Living Application/Agreement. Reservations for new students must be accompanied by a \$200 advance room deposit fee which is non-refundable after June 1st for fall semester and January 1st for spring semester. This room reservation deposit converts to a room damage deposit at the time of first registration. Damage deposits are left on account until the student leaves the housing system permanently. Damage deposits are refundable when a student checks out of the residence hall or leaves the University and appropriate damage charges, if any, have been assessed.

Returning students who have been refunded their damage deposit are required to resubmit a damage deposit of \$200. Room reservation deposits are non-refundable unless written notification of cancellation of room reservation is received by the Housing office prior to the deadline dates.

Withdrawals from the University

Students completely withdrawing from the University must obtain a Complete Withdrawal form from the Registrar's Office. Tuition adjustments are calculated in Student Accounts. Final adjustments are based on the effective date of the withdrawal and exclude non-refundable fees. Room and board are pro-rated throughout the semester. Laboratory and course fees are not refunded after the first full week of classes. Financial aid funds are refunded in accordance with federal, state, and University regulations.

The withdrawal refund schedule and refund schedule for dropped classes are available at <http://www.gonzaga.edu/studentaccounts> and in the Student Financial Services Office.

Miscellaneous

The University reserves the right to change any costs and/or provisions without notice. It further reserves the right to withhold student information, including diplomas, until a student's account has been paid in full. No student will be allowed to register for an ensuing semester if a balance is owed for a prior semester. A finance charge of 12% per annum pro rata (365 days) or a rebilling fee of 1% of the total amount due or \$2.00, whichever is greater, will be added to a student's account on any amount more than 30 days past due. A "No Payment/No Arrangement Fee" of 3% of the amount due will be charged to a student not meeting the established payment deadlines.

Financial Aid

Gonzaga University consistently is ranked among the best regional comprehensive colleges and universities in the West. In addition, Gonzaga is ranked extremely high in value among regional comprehensive universities. A primary reason for this recognition is the excellent quality of financial aid awards provided Gonzaga students. In addition to the University's significant institutional grant and scholarship program, Gonzaga participates in all federal and state financial aid programs. The Financial Aid Office provides numerous services to meet the needs of those who wish to obtain a Gonzaga degree.

Applying for Admission

Students are encouraged to apply for admission and financial aid concurrently in order to expedite each important process. However, aid applicants must be admitted to the University in order to receive a financial aid award.

Applying for Financial Aid

All applicants seeking financial aid should also complete and submit the Free Application for Federal Student Aid (FAFSA). The FAFSA is available starting October 1 of the year prior to the year for which admission is sought, and families are encouraged to submit the FAFSA as soon as possible. The FAFSA priority deadline for first-year students is February 1 and for transfer students, March 1. This form can be accessed online at <https://studentaid.gov/h/apply-for-aid/fafsa> . Gonzaga's FAFSA code is 003778.

Financial Aid Process

The FAFSA data is processed by the Federal processor, and an Expected Family Contribution (EFC) is calculated utilizing a formula mandated by the federal government. The results of this calculation are forwarded to the University, and utilized to determine each applicant's financial need and eligibility for specific types of financial assistance.

The Financial Aid Award Offer

Once financial need is established, the Financial Aid Office assembles the best possible financial aid award offer for each applicant. This award offer generally combines several types of aid from sources inside and outside the University. Rarely does total student aid come from a single source. A typical financial aid offer is developed from four sources: scholarships, grants, work-study, and long-term educational loans. The proportions of aid from each of these sources vary greatly, depending upon individual circumstances and available funding. Financial aid award offers can vary from year to year, depending on changes in a student's financial need, grades, and date of filing. Students must reapply for financial aid each year by the priority date to ensure maximum eligibility. Institutional assistance covered by the Gonzaga Guarantee provides four years of Gonzaga based funds or scholarships provided the recipient maintains full-time, continuous, undergraduate enrollment and maintains good academic standing according to this University catalog.

Scholarship Aid

Gonzaga University offers scholarship assistance exceeding \$80 million on an annual basis. Eligibility for scholarships is based solely on academic merit or on a combination of merit and financial need.

Merit-Based Scholarships

By applying for admission to the University, all incoming freshmen are automatically considered for one of a series of merit-based institutional scholarships. Other merit-based scholarships require separate applications with varying deadlines. These can be found at <https://www.gonzaga.edu/undergraduate-admission/tuition-aid/scholarship-opportunities>.

Need-Based Scholarships

Students who have been admitted and who have filed the FAFSA are automatically considered for Gonzaga funding which incorporates academic achievement and financial need. These funds are renewable by maintaining a

specified grade point average and successful completion of specified credit hours.

Grants

Grants are a form of financial aid for which eligibility is based upon financial need, not academic achievement. Grants do not have to be repaid.

Federal Pell Grants

This program provides grant assistance from the federal government to needy students. The amount of the grant is determined by the federal government, and it is prorated to reflect actual enrollment status. <https://studentaid.gov/understand-aid/types/grants/pell>

Federal Supplemental Educational Opportunity Grants (SEOG)

This is another form of federal grant assistance provided to students with substantial financial need. The amount of the grant varies according to funding and need criteria. <https://studentaid.gov/understand-aid/types/grants/fseog>

Federal TEACH Grant

This annual grant/loan can be awarded to students who meet the federal academic requirements, have filed a FAFSA, and agree to teach for four years as a highly-qualified teacher in a high-need field at a low-income school after completing their degree. If the four-year service requirement is not met, the funds must be repaid by the student as an unsubsidized loan. The grant/loan amount is based on enrollment status and is determined each year by the federal government. <https://studentaid.gov/understand-aid/types/grants/teach>

Students who meet the 3.25 gpa requirement can request the Federal TEACH Grant by completing the required Agreement to Serve and Counseling online at <https://studentaid.gov/app/launchTeach.action>. Students must also meet Gonzaga's School of Education requirement of having passed the EDTE 101 course.

Washington College Grant/College Bound Grant

These state-funded programs provide financial assistance to undergraduate students who are residents of the State of Washington and who demonstrate substantial financial need. <https://readyssetgrad.wa.gov/college/washington-college-grant> <https://readyssetgrad.wa.gov/college/college-bound-scholarship-program>

University Grants

Gonzaga awards a significant number of grants from University funds. The amount of these grants varies according to an applicant's financial need and date of application. <https://www.gonzaga.edu/admission/tuition-scholarships-aid/financial-aid/types-of-aid/grants#Institutional>

Loans

Student and parent loans are available from a number of sources to assist with the financing of a college education. Federal Loan eligibility is based upon FAFSA data, and require on-line counseling and a separate promissory note. Student loans must be repaid. While Gonzaga students have demonstrated responsible loan repayment, all students are encouraged to borrow only that amount which is necessary. <https://www.gonzaga.edu/admission/tuition-scholarships-aid/financial-aid/types-of-aid/loans>

Federal Direct Subsidized Loan

This type of student loan is made available by the federal government to students with financial need. The amount you can borrow depends on your grade level and your financial need as determined by the FAFSA. The U.S. Department of Education pays the interest on this loan so long as you are enrolled at least half-time. Repayment begins six months after you graduate, withdraw, or drop below half-time enrollment.

<https://studentaid.gov/understand-aid/types/loans/subsidized-unsubsidized>

Federal Direct Unsubsidized Loans

This type of loan is not based on financial need, but a FAFSA is still required to borrow from this loan program. The loan is identical to the Federal Direct Subsidized Loan, with the exception that the borrower is responsible for the interest which accrues while the student is enrolled and during any other deferment period. Repayment begins six months after graduation or withdrawal from a degree program. <https://studentaid.gov/understand-aid/types/loans/subsidized-unsubsidized>

Federal Nursing Loans

After a student has finished their first year of Gonzaga's Undergraduate Nursing Program, they may be able to borrow this type of loan. The loan opportunity is based on available funding and a student must have financial need as determined by the FAFSA to be considered. The Federal Nursing Loan carries a fixed 5% interest rate, with no accrual of interest while enrolled at least half-time. Students have a nine month grace period after their enrollment drops below half-time before monthly payments are required. Minimum monthly payments of at least \$40 per month and interest begin after the nine month grace period. <https://www.gonzaga.edu/admission/tuition-scholarships-aid/financial-aid/types-of-aid/loans/federal-nursing-loan>

Federal Direct Plus Loans (PLUS)

The PLUS Loan is available to all credit-worthy parents of dependent undergraduate students. These loans are not based on financial need, although the student must submit a FAFSA form to receive these funds. The applicant of this loan must be the biological or adoptive parent (or in some cases, the stepparent) of a dependent undergraduate student. The maximum amount that can be borrowed is the Gonzaga "cost of attendance" minus other financial aid. <https://studentaid.gov/understand-aid/types/loans/plus/parent>

Other Loan Funds

Other loan funds have been established to assist students with expenses due to emergencies or other special circumstances. Eligibility is based on need and available funding. These funds include the Gonzaga Loan Program, the Bigelow Loan (funded by the Fred E. and Venora Bigelow Trust), the Leo J. Brockman Loan Fund, the Gonzaga loan, and the Carrie Welch Loan Fund.

Inquiries should be directed to the Financial Aid Office. <https://www.gonzaga.edu/admission/tuition-scholarships-aid/financial-aid/types-of-aid/loans>

Private or Alternative Loans

Private or Alternative Loans that are not need-based can also be obtained from private sources such as banks or credit unions. The maximum amount that can be borrowed in private or alternative educational loans is the Gonzaga “cost of attendance” minus other financial aid. <https://www.gonzaga.edu/admission/tuition-scholarships-aid/financial-aid/types-of-aid/loans/private-alternative-loans>

Student Employment

Studies done regarding the relationship between academic achievement and working show that working part-time, especially on campus, results in students more invested in their education, better able to prioritize, and use campus resources for success. The Gonzaga Financial Aid Office supports these findings and encourages students to pursue part-time employment opportunities. <https://www.gonzaga.edu/admission/tuition-scholarships-aid/student-employment/student-employment-opportunities>

Federal Work Study Program

This financial aid program, funded by the federal government and the University, provides a variety of on campus employment opportunities for students. Jobs range from assisting with research to general office work to community action projects. Students work an average of 10-12 hours per week during the semester. Eligibility for FWS is based on financial need as determined by the FAFSA.

State Work Study Program

This financial aid program is funded by the State of Washington and private employers. It allows Washington State residents to work with Spokane area employers during the academic year and summer sessions. These opportunities provide an excellent way for students to gain valuable experience in their fields of study, network, and earn money to help pay for college. Eligibility for SWS is based on financial need as determined by the FAFSA.

Satisfactory Academic Progress

The Higher Education Amendments of 1992, and the Washington Student Achievement Council, require that a student receiving federal and/or state assistance must demonstrate satisfactory academic progress (SAP). In general, SAP is defined as “proceeding toward successful completion of degree requirements.”

Full-time students who are eligible for, and receiving, financial aid must successfully complete 12 credits with a minimum GPA of 2.00 each semester. Students who fail to achieve this criterion are placed on Financial Aid Warning and may lose all financial aid if their academic performance does not reflect satisfactory progress during the next semester. Additionally, State of Washington financial aid recipients who are enrolled full-time are required to successfully complete at least six credit hours per semester or risk immediate suspension of state aid. Please note that current financial aid awarding procedures reflect the expectation that undergraduate students enrolled on a full-time basis will complete their degree requirements in eight semesters.

The policies and procedures governing SAP and its relationship to financial aid are available online at www.gonzaga.edu/SAP. Students with additional questions regarding this policy are invited to inquire at the Financial Aid Office.

Mission Statement

Grounded by the University mission, the Division of Student Affairs provides educational opportunities and services that transform student's lives.

We achieve this through priorities of:

- Finding Purpose
- Developing resilience
- Cultivating intercultural competence
- Promoting well-being and healthy living

As Student Affairs professionals we are committed to this work because we believe Gonzaga students, as individuals and in community, are on a quest for self-knowledge and character formation. We live out our calling to journey with them during this life-long transformation: **“Transforming Together”**

Student Affairs Vision Statement

We envision a community where students **LIVE** the University's mission.

Resolution Center for Student Conduct and Conflict

The Resolution Center for Student Conduct and Conflict is responsible for reconciling issues of student misconduct. Our processes provide transformative opportunities as we guide students to engage in ethical discernment, develop enhanced decision-making skills, and learn to accept ownership for actions. The Student Code of Conduct contains the University's standards of conduct and the accountability processes that address allegations of misconduct.

Gonzaga University's expectations for conduct go beyond what is minimally required for maintaining public order, both on and off-campus; and our student conduct processes are educational in nature as we actively seek to create an environment conducive to living and learning together. Our processes are not civil or criminal proceedings and our standard for determining a finding of misconduct is based upon what is "more likely than not" to have occurred.

By attending Gonzaga University, you agree to abide by University standards of conduct, expectations and policies. All students should be familiar with the Student Code of Conduct which is published at: www.gonzaga.edu/studentcodeofconduct.

Center for Cura Personalis (CCP)

The Center for Cura Personalis (CCP) exists to empower students to be their best selves. Cura Personalis means care for the whole person and our case managers are here to meet one-on-one with students, support them in dealing with life's challenges and help connect them to useful offices and resources both on and off campus. Case managers at Gonzaga operate in a non-clinical capacity which means they do not provide counseling or therapy to students, though will quickly outreach to students who are struggling and connect students to resources for additional support. Case managers aim to build self-advocacy skills and promote personal growth through individualized meetings in a comfortable, private setting. If you or a fellow student are struggling, but not sure where to start, CCP is a great place to connect.

Learn more by visiting gonzaga.edu/CCP or calling us at (509) 313-2227.

Health & Counseling Services

Gonzaga University Health and Counseling Services is here to support eligible campus-based undergraduate, graduate, and law school students physical and mental healthcare needs right on campus. Our expert staff are focused on the wellbeing of students and provide quality care just steps away from your residence hall or classroom.

Health and Counseling Services delivers your physical healthcare in a clinic setting. Providers, nurses, and other healthcare staff help diagnose and treat illnesses and injuries. Our psychiatric and mental health providers afford services that are accessible for everyday concerns and crises impacting the student experience.

We strive to offer holistic, comprehensive healthcare in partnership with you. We keep you moving toward your educational goals and maintain our focus on the wellbeing of the whole person. Please see our [Health and Counseling Services website](#) for further information.

The Office of Housing and Residence Life

The University operates 22 traditional residential communities, largely devoted to first, and second year students. These on campus options offer you a variety of housing experiences as you complete your residence requirement. Most students in their third and fourth year live off campus in the surrounding neighborhood. A few hundred beds usually exist for a few students wishing to remain on campus after the residence requirement, yet the demand significantly exceeds supply. The approximate student population in housing is 3000 students, inclusive of some off- campus spaces.

A Faculty in Residence and Visiting Scholar program exists which allow for a few opportunities for faculty to live in facilities with residents and contribute to the community.

Residential housing and dining options are open throughout the academic year with the exceptions of Christmas vacation and spring breaks. During these times there may be limited service provided. Opening and closing dates are published and decimated by various means; including the housing and residence life website, departmental publications, and community meetings. As the university may observe and publish various dates of openings and closings of numerous offices, it is important to note only those dates communicated by the Office of Housing and Residence Life pertain to their operation. You should rely on these dates when making travel and lodging arrangements. The university will not be held responsible for expenses incurred by referencing conflicting dates referenced by other offices or departments.

Living in any residential setting (on or off campus) may present risk to personal property. As such, the University does not assume responsibility for the loss or damage of personal property. You are encouraged to obtain "Renter's Insurance". Information from private insurers will be made available during summer communications and will be posted on the department's website. Additionally, a comprehensive list of residential regulations and expectations is published separately in the student

Residence Policies (overview)

The University requires all full-time first and second year students, who are unmarried and under the age of 21, to reside on campus in university

managed residential facilities. Likewise, students required to live on campus must take part in the university dining program. All students residing in housing owned, leased, or managed by the university are contractually obligated to the University for the Room and Board Fees as outlined in the “terms and conditions” portion of the Residential Living Application/Agreement. Campus dining services are operated by Zag Dining by Sodexo. For more information about meal plans and other services provided, you may visit Zag Dining’s website at <http://zagdining.sodexomyway.com> or call the Zag Dining office at (509) 313-6906.

To be eligible for University housing, you must be at least 17 years and 3 months of age prior to the first day of class. Students younger than this must reside off-campus with their parent(s) or legally recognized guardian who must be over the age of 21 (typically an immediate family member). Exceptions to this policy or special requests, including those of students who are under 21 and unmarried but want to continue living with parent(s) or immediate family members, should be made in writing to the Senior Director of Housing and Residence Life. Students who reach the required age for residency after the first day of class may request a housing assignment during term. Accommodation of these requests will be honored as appropriate vacancies exist. Note, sometimes there is confusion when referencing this residential requirement policy. This requirement refers to the actual time a student has attended Gonzaga University and not to their academic standing.

Residential Living Application/Agreement

All students who are required to live in University Housing or who wish to continue in housing after their first and second year must complete and sign a Residential Living Application/Agreement. This document serves several purposes: it serves as the room and board contract between the University and the student, and outlines some of the University’s housing policies, and refers students to where they may obtain the rest of the policies regarding on-campus living and expected behaviors, and it provides information on room and damage deposits.

It should be noted by first year students that acceptance of the Residential Living Application/Agreement does not constitute acceptance to the University as a matriculating student. Prospective students, however, are encouraged to apply for housing as early as possible prior to their expected term (fall or spring) of attendance.

If you withdraw from the University during the semester, you will be refunded room and board fees on a prorated basis.

Room Reservations

It is expected and highly recommended that you apply for housing at least five months prior to the beginning of the semester you intend to occupy an assignment. Completion of the Residential Living Application/Agreement found on-line provides the Office of Housing and Residence Life the information they need to plan for you being a part of the living community at Gonzaga University. Along with the finished application, you must submit a \$200 housing deposit, which is automatically converted to a “damage deposit” upon check-in to your assignment and will be used to defray any damages up to that amount which may have occurred while you are in residence. Any remaining balance of the \$200 will be refunded when you check out after all applicable fees and charges have been processed.

Room assignments are processed by the Office of Housing and Residence Life. As a new student, you will have the opportunity to select the space you live in. Students who do not select by the deadline will be assigned a space based on vacancy, and the profile question responses. Living-Learning Community housing options are also available each year and these options will be published on the Office of Housing and Residence Life website. Living Learning Communities requires supplemental questions on the application to be answered. Additional information on each Living Learning Community can be found on the website.

No guarantees can be made to first-year students regarding building, roommate, or Living Learning Community preferences, but all realistic attempts will be made to honor requests. Returning residential students are eligible to take part in a sign-up process during the spring semester which allows for selection of specific rooms for the following fall semester.

Sodexo Zag Dining

All students who reside in the residence halls are required to eat on campus under a board plan. Sodexo Food Service provides a full service food program to the University under the direction of the Executive Vice President.

Sodexo Food Service assists students with many health needs, including special diets when prescribed and approved in writing by a medical doctor.

The food service offers a "flex-dollar" option (Bulldog Bucks) to enhance the student's board plan. Students may use this allotment to purchase meals and/or snacks at any on-campus Sodexo food service location.

Meal Plan changes can usually be made during the first week of each semester.

Lincoln LGBTQ+ Resource Center

Guided by the University mission to honor the dignity of the human person, the Lincoln LGBTQ+ Resource Center provides a safe and affirming space for people of all sexual orientations, gender identities, and gender expressions. Through social justice programming – including speakers, artists, films, Out to Lunch with Allies, Lavender Mass, and Lavender Graduation – all Gonzaga members are welcome to participate and build community. The Center also offers Sexuality and Gender Equity (SAGE) Certification to students, staff, and faculty in an effort to expand and deepen LGBTQ+ cultural fluency. As part of the department of Diversity, Inclusion, Community, & Equity (DICE), the Lincoln LGBTQ+ Resource Center works closely with the Unity Multicultural Education Center (UMEC) and other campus partners to support students from historically underrepresented and traditionally marginalized groups following an intersectional approach. DICE works closely with the Unity Alliance of Cultural Clubs and employs approximately 35 student leaders.

Center for Community Engagement (CCE)

For over twenty years CCE has been putting Gonzaga's mission into action through a wide spectrum of volunteer and community engaged learning projects. CCE's programs offer you the opportunity to develop a personal commitment to service, social justice, and leadership. We take seriously the Jesuit mission of forming "women and men for and with others." You can find our office in the Hemmingson Center. CCE serves as a resource center for students, faculty, alumni, and community partners.

Housed within The Center are the following programs and initiatives:

Community-Engaged Learning

Gonzaga University has offered community-engaged learning (also known as service-learning) courses for over 20 years. These classes are taught across

the curriculum and offered by the various schools, including the Law School. Over 1500 students are actively engaged in community-engaged learning each year. This office coordinates service fairs each semester which invite non-profit agencies to campus to share opportunities and recruit student volunteers.

Gonzaga's Youth Programs & Initiatives

For over 20 years, the Center for Community Engagement has paired well-trained and passionate college students together with school-aged youth from the Spokane community. Started in 1995 with the creation of Campus Kids at Stevens and Logan Elementary, CCE's Youth Programs & Initiatives have expanded by leaps and bounds. Today, we run 7 distinct mentoring programs in 13 Spokane Public Schools, with approximately 350 Gonzaga students serving over 700 youth.

Weekly Student Engagement Volunteering

We have many ways for you to volunteer alongside other Gonzaga students addressing a variety of local community issues. You can serve meals with Campus Kitchens, form a community with adults with disabilities with Gonzaga University Specialized Recreation, or serve weekly at a local non-profit with your peers through the Zag Volunteer Corps Semester of Service program.

Zag Volunteer Corps (ZVC) Program

Join the ZVC Semester of Service program and serve weekly at a local non-profit organization. Partner organizations engage students in a range of projects serving youth, senior citizens, or members of the homeless community.

If you don't have the ability to serve weekly throughout the semester, consider participating in a ZVC Saturday of Service project. You can serve several times a year with a group of fellow students all over the city with our half-day Saturdays of service. This will give you a chance to work with various non-profits serving youth, helping construct homes, building trails, serving meals and much more.

Wolff Fellowship Program

Wolff Fellows co-design projects with local community-based organizations that build community capacity and strengthen partnerships between Gonzaga and the host agency. Projects are designed around CCE's six Arrupe Engagement Pathways: Advocacy & Awareness, Community-Engaged Learning & Research, Direct Service, Faith & Justice, Philanthropy, Policy & Politics, and/or Social Innovation. Through their unique projects, Wolff Fellows explore the connection between their disciplinary/career interests and public service, learn about community needs and assets, and partner with community organizations to build community capacity.

Service Immersion Programs

During winter or spring break, you can commit a week to serving in communities all over the country, from New York City to San Francisco and many in between. Our immensely popular service immersion programs, Mission: Possible and Justice in January, send groups of students across the country to serve, learn and engage in a diverse set of communities. We also provide an international immersion each summer.

Unity Multicultural Education Center (UMEC)

UMEC provides experiential learning opportunities for all students in their identity development, cultural fluency, and connection to social justice. UMEC is organized around three pillars: (1) mentoring, (2) social justice programming, and (3) intercultural development. Many students first hear about UMEC through BRIDGE, which begins with a Pre-Orientation Social Justice and Leadership Institute and continues as a first-year peer mentoring program for incoming students with underrepresented identities. UMEC also offers social justice programs that feature speakers, films, art and activism workshops, and Diversity Monologues. UMEC's third pillar on intercultural development encourages students to go even deeper through Intergroup Dialogue courses, Sustained Dialogue co-curricular groups, and Social Justice Peer Education. As part of the department of Diversity, Inclusion, Community, & Equity (DICE), UMEC works closely with the Lincoln LGBTQ+ Resource Center and other campus partners to support students from historically underrepresented and traditionally marginalized groups following an intersectional approach. DICE works closely with the Unity Alliance of Cultural Clubs and employs approximately 35 student leaders.

Transfer, Veteran, and Returning Adult Services

This office serves as your central point of information and provides you with the opportunity and resources to address any questions or concerns you may have about being a transfer, veteran, or returning adult student at Gonzaga University. We understand that transfer, veteran, and returning adult students face unique challenges when returning to college. We are committed to supporting your successful transition to college and to connecting you to the services available at Gonzaga to support your educational journey. We value and appreciate the diverse skills, talent, and knowledge that you bring to Gonzaga University.

Student Involvement and Leadership

Student Involvement and Leadership is dedicated to inspiring and empowering students! The Department of Student Involvement is home to:

- The Gonzaga Student Body Association (GSBA)
- Student Clubs and Organizations
- Gonzaga Outdoors
- Payne Center for Leadership Development
- SpikeNites
- Student Media

The Gonzaga Student Body Association (GSBA) is committed to helping students. Through programs, sponsorships, events, and other academic and social activities, GSBA strives to meet the student's needs. GSBA partners with student clubs and organizations to offer an array of events, from weekly coffeehouse artists, to guest speakers and lectures, and even big name concerts like Yellowcard and Ben Folds. GSBA also offers everyday programs like the Partnership in Education Readership Program, Safe Ride, the Wall, and much more! Most importantly, GSBA acts as the voice of the students to the administration. GSBA prides itself on a strong relationship with the faculty and administration which helps students' voice their concerns and suggestions. Need more information, a GSBA form, curious about GSBA funding or painting the wall? Visit the GSBA website at www.gonzaga.edu/gsba.

Student Clubs and Organizations: Gonzaga currently has over 130 active and recognized student clubs that cover a wide range of interest. GSBA and the office of Student Involvement and Leadership work together to provide support and services for all student clubs and their members.

Visit the Zagactivities site to view all the clubs and organizations that are available, and to learn how to sign up! Curious about starting a club? Check out Gonzaga's Student Group Policy. If you have questions about guidelines, policies, processes and/or resources for Gonzaga University Student Groups, check out the Gonzaga University Student Group Manual. For more information visit our website at www.gonzaga.edu/getinvolved

Gonzaga Outdoors strives to keep the outdoors as accessible as possible by providing inexpensive gear rentals, subsidized outdoor adventures, and educational clinics. Their goal is to give as many students as possible the opportunity to enjoy the beautiful local surroundings. A few of the activities offered by Gonzaga Outdoors focus on: Skiing/snowboarding, snowshoeing, hiking, backpacking, kayaking, biking, fishing, rock climbing, and more. The Gonzaga Outdoors office is located in lower Hemmingson. Contact us at 509-313-4189 or outdoors@gonzaga.edu

The Payne Center for Leadership Development engages and supports all students seeking to develop their leadership potential and inspire positive change on campus and in their local and global communities. Our programs, services, and resources offer students a deeper understanding of leadership in the Jesuit context of knowing self, building community, and impacting our world. We are also home to the Experiential Leadership Institute, a year-long leadership program for sophomore and junior students.

Gonzaga's Community of Leaders is comprised of over 800 student leaders who facilitate, manage and impact positive change for over 100 student clubs and organizations. The Payne Center helps students make meaning from their leadership experience and transform that learning into valuable lifelong leadership skills.

The Payne Center for Leadership Development offers a variety of services, including:

- Student Leadership Summits
- Leadership Workshops and Consulting
- Access to personal leadership inventories
- Guest speakers and professionals in the field

- Library of Leadership Resources

For more information, visit our website at <https://www.gonzaga.edu/student-life/student-groups-activities/payne-center-for-leadership-development>

The PCLD office is located in Hemmingson 203. Contact us at 509.313.5610 or pclد@gonzaga.edu.

SpikeNites is the late night programming series in Hemmingson Center. Every Friday and Saturday from 10pm-2am SpikeNites will feature free movies, video game tournaments, comedians, special events and late night food options. Learn more about SpikeNites on Zagtivities.

Student Media

Student Media provides a number of publications that feature student work. All publications are written, designed, and staffed by students under the guidance of a faculty or staff advisor. Our current publications include:

- The Gonzaga Bulletin
- One World
- Charter
- Our Voices
- Reflection
- GU Bulldog Blog
- Spires Yearbook

New Student and Family Programs

New Student & Family Programs (NSFP) is dedicated to welcoming all new students and their families into the GU community through programs such as New Student Orientation, Parent & Family Orientation, and Fall Family Weekend. We support student learning and growth through programs that support transition and engage both students and families as active partners in student success at Gonzaga University.

NSFP develops and facilitates year-long transitional programs for students such as the How to Zag series and Zaglink through which new students are provided a holistic introduction to the university, connections to students with faculty, staff, and current students and support to their development and success during their first year.

NSFP serves as a hub for information, programs and services that inform and educate families about valuable resources, critical issues, and topics relevant to student success. We design and sponsor programs that promote family involvement in the life of the university and create opportunities for participation in their student's experience.

Parent and Family Relations

Parent and Family Relations, in collaboration with the Gonzaga Parent and Family Council, promotes each student's learning experience by engaging parents and families as active partners in supporting student success at Gonzaga University.

We serve as an advocate for parents and the university internally and externally, by facilitating communication and creating a climate that fosters mutual understanding.

We develop and implement programs and services that inform and educate parents and families about valuable resources, critical issues and topics relevant to student success.

We design and sponsor programs that promote parents and family involvement in the life of the university and create opportunities for participation in their student's experience.

Career & Professional Development

Career & Professional Development (CPD) helps students clarify and attain their educational and career goals by 1) developing a collaborative, community-wide network of career educators, 2) offering relevant and meaningful services and programs to foster and support their success, and 3) teaching them how to navigate lifelong career development.

CPD Services

- Individual Career Counseling & Advising: Schedule an appointment over the phone, by email or online at www.gonzaga.edu/ZagsIgnite. Open hours: 1-4pm Monday-Friday.
- Career Assessments: Self-Directed Search, Myers Briggs Type Indicator, Card Sorts, and more.
- Career Courses: One-credit courses offered each semester that focus on the job search and applying to graduate or professional school.
- Health Professions Pathways Program (H3P): A program designed to educate, support and mentor students through the process of applying to a variety of health-related professional programs including but not

limited to medicine, dentistry, physical therapy, occupational therapy, and nursing.

- Speed Mock Interviews: An annual practice interviewing program featuring local employer and human resources representatives.
- Workshops and Presentations: Representatives from Career & Professional Development regularly conduct workshops and seminars on a variety of career-related topics around campus and in classrooms.
- Business Cards: Students can order Gonzaga-branded student business cards.
- Etiquette Dinner: An annual event highlighting proper dining and business etiquette.

Online Resources

- ZagsIgnite: Gonzaga's online career tool kit that lists job openings and employers specifically for Gonzaga students and alumni.
- ZagsConnect: An online alumni mentoring platform for students.
- CareerShift: Job and internship posting board that facilitates communication with employers and serves as a job search document repository.
- GoinGlobal: Provides country-specific career and employment information, including world-wide internship and job postings, H1B employer listings, corporate profiles, and career resources for 30 countries.
- InterviewStream: A tool designed to help students practice their interview skills by video recording themselves and answering a variety of industry-specific questions.
- What Can I do With This Major: A database of career paths related to academic majors.

Career Fairs

CPD hosts several career fairs throughout the year including:

- All Majors Career & Internship Fair
- Engineering and Computer Science Career & Internship Fair
- Post Graduate Service Fair
- FUSE Career Fair (a joint career fair in collaboration with Eastern Washington University, WSU Spokane, and Whitworth University).
- School of Education Career Fair
- Nursing Career Fair
- Graduate and Professional School Fair

Career Treks

CPD organizes regional career development and networking events in popular geographic areas. Treks include visits to employers and opportunities for students to network with alumni and parents in the following locations:

- New York City (September/October)
- Spokane (October)
- Portland (January)
- Seattle (January)
- London (March)
- San Francisco (March)
- Silicon Valley (March)
- Denver/Los Angeles (May/June alternating years)

Gonzaga Alumni Mentor Program (GAMP)

GAMP is a career development and networking resource for students and alumni. This award-winning program assists students in exploring alternative career fields and in developing a personal network of contacts by matching them with alumni mentors. The program has almost 3000 participating alumni that represent a broad range of careers, experiences, and geographical locations. These mentors are willing to help students clarify academic and career decisions with real-world knowledge and experience. By taking part in this program students will gain realistic and current information from Gonzaga graduates. They will also begin to develop the relationships they will need to help in the transition from school to the professional world of work. This

program is intended for all majors and students are encouraged to use these services throughout their college experience. Students can register at zagsconnect.gonzaga.edu.

Office of Investigation and Inquiry

This office works in conjunction with the Director of Title IX and the Office of Community Standards (OCS), to conduct inquiry and/or investigation of alleged violations of the Student Code of Conduct as related to sexual misconduct or Sexual Harassment. Investigations are conducted through trauma informed practices and are unbiased.

At times, the Office of Investigations and Inquiry is used to complete larger scale investigation not involving Title IX or sexual misconduct. These cases typically involve complex student conduct issues involving multiple parties (complainants and respondents).

Office of Health Promotion

The Office of Health Promotion (OHP) fosters the health of students through the use of proactive, non-judgmental, and inclusive public health principles and practices. Our goal is that all students will cultivate behaviors that contribute to sustainable, life-long well-being. The professional and student staff in this department lead initiatives, create programs, deliver trainings, and identify services and spaces that promote positive, holistic well-being and reduce high-risk behaviors. Contact us if you are interested in consultation for an event, project or idea you have.

Zags Help Zags – This is a program coordinated by OHP that helps develop students, faculty, and staff members to be active bystanders who step in to make a positive difference in the Gonzaga community. As a Jesuit University, we have a commitment to the dignity of the human person and strive to be in service to others. We aim to find proactive ways to establish healthy community norms, as well as identify strategies for intervening when challenging situations do arise.

Collegiate Recovery Community (CRC) - The CRC's mission is to foster a common, collective sense of purpose that helps students lead meaningful lives with the desire to stop or reduce their use of substances and other potentially harmful behaviors. This mission is supported by programmatic

efforts for recovery, alternatives to alcohol and drug use, strategies and resources for maintaining sobriety and a community of belonging promoting recovery, holistic well-being, and academic success. The space provided by Gonzaga University for the purposes of the Collegiate Recovery Community is known as **OUR House**.

Academic Events

Academic Events provides project management support for activities that foster academic engagement and promote community relationships.

Programs include:

Commencement: All students graduating in the calendar year are invited to join the one annual celebration event in May of that year, Commencement. Whereas graduation is the completion of studies resulting in a diploma, commencement is the celebratory acknowledgement of this academic achievement with ceremonies for Law, Graduate, and Undergraduate students. Collaboration and partnership with all areas of the university are necessary for successful events.

The Presidential Speaker Series: An annual event hosted by the University President featuring a high-profile author with a message of social justice, particularly highlighting the value of education.

Academic Honors Convocation: An annual event hosted by the Provost to honor student achievement and faculty excellence awards, as well as recognize retiring and emeriti faculty.

Mass of the Holy Spirit: A Jesuit education tradition for blessing the opening of the academic year, hosted by Mission and Ministry. Academic events provides project planning support and manages the academic procession.

Constitution Day: Activities to honor the United States Constitution on September 17 are created in partnership with Financial Aid and Student Involvement and Leadership.

Support is also provided to First Year Experience for Undergraduate New Student Orientation and to the Parent and Family Relations team for Family Weekend. In general, any academic area hosting a program or speaker event needing assistance may receive support from the Academic Events team.

Campus Security & Public Safety

Campus Security and Public Safety (CSPS) facilitates the safety and security of students, staff, faculty, visitors and property of the University. The department operates 24 hours a day, 365 days a year. Officers make regular checks of all university buildings and grounds with an emphasis on the residence halls and areas where students gather. Other services provided from this Department are: Emergency Communications, Emergency Preparedness, Crime Prevention and Education, Behavioral Threat Assessment, Parking, safe escorts from location to location (on and near campus), jump starts, alarm response, and suspicious activity investigations. CSPS works closely with the Spokane Police Department to coordinate criminal investigations and for requests of police services outside the authority of the department. CSPS works collaboratively with all local law enforcement and emergency service providers. To contact CSPS dial (509) 313-2222.

Student Services

Mission and Ministry

Mission and Ministry supports the spiritual development of all members of the Gonzaga community, regardless of religious affiliation and tradition. Mission and Ministry provides opportunities and resources for spiritual growth and fellowship through retreats, liturgies, music ministry, small groups, spiritual direction, residence hall programs and more. These activities invite participants into a deeper understanding of Gonzaga's Jesuit and Catholic identity as well as a profound respect for other religious and spiritual traditions.

Retreats

Retreats provide an opportunity for going deeper, both as individuals and as a community. We offer an extensive retreat program throughout the academic year. The Escape Retreat (for First Year Students) is offered during the fall and spring semesters. We offer an opportunity for Sophomore students to retreat together in the fall and spring as well. Search, Gonzaga's longest-running retreat program, targeted at Juniors is held four times a year at the Bozarth Mansion and Retreat Center, an historic estate in north Spokane. For Senior students we will be offering a 5 day Ignatian Retreat during the winter prior to the start of the spring semester.

CLC/Life Groups

These are intentional small groups that meet weekly to reflect, share life, pray, laugh and grow. Each year, roughly 500 students gather in these small groups to deepen their relationship with God, form lasting relationships with others, and walk through the valleys and peaks of college life together. CLC/Life Groups also gather regularly for large-group activities, social events, and service projects.

Mass and Sacraments

As a Catholic university, we hold Masses on campus to unite us as a faith community. Two public liturgies are available each day in the Gonzaga community. People of all religious paths are welcome to join us in prayer and

worship. In addition, we help students connect with other local churches and places of worship.

Not only are students invited to come to Mass, but they are also invited to take on leadership positions, such as Eucharistic Minister, Lector, Server, or Sacristan. Mission and Ministry also offers students the Sacrament of Reconciliation through appointment or before Sunday evening Mass.

If you have questions about other Mission and Ministry events and programs, please contact the office at (509) 313-4242 or umin@gonzaga.edu. Mission and Ministry is located on the main floor of the Hemmingson Center (Suite 104) and online at www.gonzaga.edu/missionandministry.

Veterans

Gonzaga University's academic programs of study are approved by the Washington State Higher Education Coordinating Board's State Approving Agency (HECB/SAA) for enrollment of persons eligible to receive educational benefits under Title 38 and Title 10 USC.

For graduate students enrolled in academic programs offering courses in non-standard terms, the number of credits required to achieve a time status of "full time" shall be proportional to the number of weeks in that non-standard term divided by sixteen (e.g. 8 divided by 16, times 6 credits equals a full-time status of three (3) credits for a non-standard term of eight (8) weeks duration).

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch.33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to;
- Require student secure alternative or additional funding;
- Deny their access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students will be required to:

- Produce the Certificate of Eligibility by the first day of class;
- Provide written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

Satisfactory Academic Progress for Veterans

Veterans failing to achieve minimum standards of academic progress are placed on probation for the following semester and notified via email by the University's Veterans' Advisor. Should satisfactory academic progress not be achieved by the following term, certification of veteran benefits will be suspended and the VA Regional Processing Office will be notified. Certification of veteran benefits can resume once satisfactory academic progress standing is attained.

Eligible veterans needing to apply for their benefits, approved veterans needing certification of enrollment, or students with questions about possible veteran benefits should contact the University's Veterans Advisor in Room 234 of College Hall.

Military Call to Active Duty/Training

Gonzaga students in the National Guard and Reserves and some prior active duty personnel may be called/recalled to active duty. Gonzaga University recognizes and appreciates the important contributions made by men and women to our country. Gonzaga supports a policy related to our students who have been called to active duty and/or training by any branch of the United States armed forces. The policy *does not apply* to students ordered to active duty in another country's armed forces. This policy applies to all University schools and programs and is intended to recognize and make appropriate allowances for students who find themselves in such situations.

According to Federal Title X regulations, students should not be disadvantaged by being called to military service, whether for deployment or training. It is expected that everyone at the University will work together to do what is best for our students. Gonzaga has developed the following procedures to provide maximum flexibility in assisting these students. Students with activation orders or other official documentation should follow the process outline below. Dependent on when a student is called to active

military duty and/or training, various processes will differ, depending on the time of the call up and length of the call up.

1. Deployment or Training Call-Up Prior to the Start of a Semester Through the Add/Drop Period:

Students should determine if they should drop all courses in every semester/session for which they are registered that will be impacted by their call-up. Consideration should be given to the length of the call-up, the number of credits and types of courses they're registered for, and their personal assessment of their capability to make up missed classes. Should all courses be dropped, this will result in an automatic 100% refund of all tuition and related fees. The Military Call to Active Duty/Training Notification form will be submitted per the form instructions to the VA Certifying Official located in the Office of the Registrar. A copy of the deployment or training order will be provided with the form. If orders are not immediately available, submit a signed letter from your command pertaining to completion of your military obligation, sensitive information should be redacted. Student will initiate a Military Leave of Absence (MLOA). Return to Gonzaga and Reactivation/Readmission will be based on the criteria outlined in this policy.

2. Call-Up During a Term:

The Military Active Call to Duty/Training Notification form will be submitted per the form instructions to the VA Certifying Official in the Office of the Registrar. A copy of the deployment or training order is to be provided with the form. If orders are not immediately available, submit a signed letter from your command pertaining to completion of your military obligation. Sensitive information should be redacted. It may not be in the best interest of the student to withdraw from the University. Academic accommodations may be possible to allow the student to progress in the existing course of study. However, students should carefully consider if missing course work necessary to meet course/degree requirements (e.g. labs, clinicals) will be impacted.

Guiding Principles for Consideration:

1. Students activated for deployment or training are held to the same standard of academic excellence expected for all students. Documented absences for scheduled deployment or training does not relieve the student of class responsibilities, including any course material covered during missed classes. Students should consider major exams, due dates for projects/papers, and mandatory class activities.
2. It is the student's responsibility to notify instructors as soon as possible regarding their deployment. Where there are schedule conflicts, absences, or other issues, the student, along with the faculty member and the student's Chair and/or Dean, will work together to achieve the most optimal solution.
3. Faculty members should make every reasonable effort to support and accommodate the student during the call-up period.
4. Students should work with faculty to develop a plan for making up missed coursework when they don't withdraw from a course. Discussions should also be made concerning changes to the student's circumstances which would not allow completion of the plan.
5. When permissible and with the instructor's agreement if the excused course is near the end of the term and the student has completed all but a small portion of the coursework, a grade of Incomplete or In Progress may be assigned. Deadlines for removal of these grades will be in accordance with University policy. No further tuition or course fees will be charged to the student in order that a student may successfully complete courses for removal of the incomplete or in progress grade. Law students will follow Law School policy for withdrawing, incomplete/in progress grades, and returning to the university.

Room and board refunds will be pro-rated based on the date of the complete withdrawal when applicable.

A transcript notation "Student Called to Active Military Duty" will be applied to the student record outlining why the withdrawal occurred. Student will initiate a Military Leave of Absence (MLOA) when withdrawing. The Electronic document can be found here <https://my.gonzaga.edu/academics/registration-enrollment/registrar-office/resources/forms?> The student record will be coded accordingly outlining information related to the Military Leave of Absence.

Reinstatement/Readmission

Reinstatement

A student will be reinstated under a reactivation procedure through the Office of the Registrar. A Return from Military Duty form is necessary for all students wishing to re-enroll in order that the required adjustments in the student information system can be made, and so that the University can inform the student about academic advising, registration procedures, housing options, tuition charges and financial aid options. The Electronic document can be found here <https://my.gonzaga.edu/academics/registration-enrollment/registrar-office/resources/forms?>. Reinstated students will be allowed to continue with the academic requirements under the semester/session of their original entry to Gonzaga University (matriculation term) whenever possible (i.e. using the same catalog). In recognition that tours of duty frequently exceed one year in duration, every effort will be made to accommodate through exception, the special academic needs of students returning from active military duty. However, such exceptions and substitutions can be made only to the extent that they do not compromise the quality or integrity of the student's degree. The student must meet the required GPA, and financial and disciplinary requirements of any other student.

Readmission

Should it be necessary for the student to reapply for admission, policies of the Undergraduate, Graduate, and Law admission offices will be adhered to.

FINANCIAL AID IMPLICATIONS

Financial aid and payments received by these students for the term are refunded to the source, as per the Office of Student Financial Aid policies.

Students who have received a refund from financial aid sources are expected to repay the financial aid according to the terms of any promissory notes they have signed. The same standards that are applied to students who have an outstanding tuition balance with the university are applied to those called for military duty.

In addition, the University adheres to the guidance offered by the U.S. Department of Education regarding students who have received a Federal Perkins Loan or Federal Nursing Loan.

Students must contact their lender to request a loan deferment.

NOTE: It is recommended that students wishing to resume or begin collecting VA benefits should contact the Veteran Certifying Official located in the Office of the Registrar to discuss the documentation needed for veteran educational benefits to be certified.

Center for Student Academic Success

www.gonzaga.edu/csas

The Center for Student Academic Success (CSAS) is an all-inclusive academic support center designed, through programs and retention initiatives, to empower Gonzaga students to be active and independent learners in pursuit of their academic success. The Center includes three integrated areas:

Academic Advising and Assistance

Professional advisors in AAA provide developmental academic advising across all curricula at Gonzaga. They assist students on a variety of topics, including academic planning, policy clarifications, crisis management, transitional advising for students between majors, and academic skill development. AAA is responsible for academic standing and probation, freshman registration, as well as individual assistance for students and faculty on academic issues. In partnership with the Center for Cura Personalis, AAA coordinates a campus wide early alert and referral system called REFER. www.gonzaga.edu/aaa.

Learning Strategies

Students seeking strategies, tools and resources to enhance academic success can sign up for a variety of one-on-one, group tutoring and academic coaching sessions. Strategic Learning Specialists are available to work with students on developing effective academic skills that help get the most out of your courses. A few techniques include, individualized learning plans, creating accountability, develop metacognitive skills and explore opportunities to improve academic success and increase resiliency. For more information please visit www.gonzaga.edu/learningstrategies .

Disability Access

Disability Access provides access services to Gonzaga University's programs, services, activities and facilities for qualified students with disabilities in compliance with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act of 1973 and Washington State laws. Disability Access serves students with permanent or temporary disabilities. Disability Access may arrange or provide appropriate and reasonable accommodations for students with disabilities. Students should contact Disability Access to inquire about the procedure for requesting accommodations. The University recommends the student contact Disability Access at least four weeks prior to the semester for which they are requesting services (please see our website for specific deadlines). However, Disability Access continuously evaluates student documentation and requests for accommodation throughout the school year.

If at any time during the process of application, admission, and enrollment, individuals feel that they have been discriminated against because of disability, they are encouraged to notify Disability Access. Incidents which have occurred more than 120 days prior to making the complaint may or may not be given consideration. To obtain copies of GU's Informal Complaint Process for Reasonable Accommodation or the Formal Grievance Procedure, please contact the Disability Access office.

Disability Access is located in Foley Center Library, 2nd floor, Room 209 and is at extension 4134. Visit www.gonzaga.edu/disabilityaccess.

Center for Global Engagement

The Center for Global Engagement includes International Student and Scholar Services and the Study Abroad Office. We believe an engaging international experience should encompass and epitomize all the strengths of an excellent university education. Positive international experiences should offer an immersion into a new culture through rigorous academics, dynamic exchange and dialogue with diverse groups, and a broad exposure to new ideas and experiences.

Study Abroad

A critical part of any education is the growth of skills, knowledge and attitudes that nurture an active engagement with the world and the people who inhabit it. If you are looking for an education that will challenge you as well as position you for an outstanding career in our increasingly interconnected world, studying abroad is a popular option at Gonzaga. Studying abroad is part of our tradition at Gonzaga. Gonzaga allows you to use your scholarships and financial aid to pay for programs that fit into your degree plan with the goal of graduating on time.

Over 60% of Gonzaga graduates study abroad compared to less than 9% of US graduates who achieve a baccalaureate degree. CGE boasts programs in over 60 locations and there are multiple programs that will allow students to earn credit toward core curriculum, major and minor requirement. To learn more about the study abroad programs at Gonzaga, eligibility and the process, explore the Study Abroad Office website at www.gonzaga.edu/studyabroad.

Gonzaga in Florence is Gonzaga's flagship study abroad program and branch campus in Florence Italy. Please visit <https://www.gonzaga.edu/catalogs/current/undergraduate/other-schools-and-programs/gonzaga-in-florence> for more information. =

International Students

Gonzaga welcomes applications from international students to become part of Gonzaga's Global Community. Non-native English speaking students must present evidence of their ability to perform in undergraduate studies at Gonzaga, including one of the following exam results as proof of sufficient English proficiency:

Proficiency Test	Official Score
iBT / TOEFL (Test of English as a Foreign Language)	iBT: 80+
IELTS (International English Language Testing System)	6.5+

IB English A (Higher or Standard)	predicted 5+
GCSE/IGCSE/GCE O-Level in one of the courses below: <i>English/English Language/English Literature or First Language English</i>	B
PTE (Pearson Test of English)	56+
TOEIC	695
iTEP Academic Plus	4.5+
<u>Duolingo</u> English Test	105+
GaoKao	120 (94- Jiangsu & Shanghai)
ACT English and Reading sections	23+
SAT Evidence-Based Reading and Writing	550+

The following applicants are not required to submit English test scores or any other additional proof of English proficiency:

Students who have completed two years at any accredited U.S. institution of higher education and earned a B or higher in a combination of composition and/or speech classes.

Students from the following English-speaking countries are automatically exempt from any English proficiency requirement*: Australia, Botswana, Canada (except Quebec), Ghana, Ireland, Kenya, New Zealand, Nigeria, South Africa, Uganda, United Kingdom, and any English speaking Caribbean country (Antigua and Barbuda, Bahamas, Barbados, Grenada, Jamaica, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Trinidad and Tobago).

In lieu of test scores, Gonzaga will accept satisfactory completion of Gonzaga English Learning Center's Intensive English Program (IEP), or completion of Extended Accelerator (EAP), Academic Accelerator Program (AAP), and Academic English program as part of the Gonzaga Global

program. Applicants should submit transcripts in both their native language and an official English translation issued by the institution.

Once admission has been granted, Gonzaga University requests international applicants to provide documentation of sufficient funds for academic and living costs while studying in the United States for at least the academic year (two consecutive full-time semesters). On the Financial Declaration students state that they have access to a certain amount of liquid funds and indicates the source(s) of these funds. Students must provide documentation regarding the source of funding such as written notification from a sponsor or a certified bank statement.

The Financial Declaration and supporting documentation are required in order to process a U.S. immigration document known as an I-20 form. The International Admission office collects the information and accompanying documents; and when the student is accepted, prepares and mails the I-20 to the student. The student must report to the Center for Global Engagement immediately upon arrival in the United States in order to receive a travel signature and to submit immigration information.

The Center for Global Engagement provides an international student orientation prior to the new student undergraduate orientation as well as ongoing academic, cultural, and immigration support for the duration of program at Gonzaga University.

Degrees Requirements & Procedures

A. Degrees Offered

Gonzaga University offers programs leading to the degrees listed below. For specific majors within these degrees, more information can be found under the listing of the individual School or College. This document provides undergraduate degree information and references to the other divisions of the University. Information on graduate and legal studies can be found in the separate catalogs of the Graduate School and the School of Law.

The University has the following advisory programs to assist students in preparation for admission to professional schools: pre-dentistry, pre-law, and pre-medicine. The Department of Military Science also offers a program leading to a commission in the United States Army.

- **The College of Arts and Sciences** confers the degrees of Bachelor of Arts (B.A.) (Honors and General), and Bachelor of Science (B.S.) (Honors and General).
- **The School of Business Administration** confers the degree of Bachelor of Business Administration (B.B.A.) (Honors and General).
- **The School of Education** confers four degrees: Bachelor of Education (B.Ed.) (Honors and General) in Special Education, Bachelor of Education (B.Ed.) in Sport Management, Bachelor of Education (B.Ed.) in Kinesiology and Physical Education, and Bachelor of Education (B.Ed.) in Community, Culture, and Language Education. The school also provides programs leading to initial and continuing teacher certification in elementary, secondary, and special education in conjunction with the B.A. degree.
- **The School of Engineering and Applied Science** confers the degree of Bachelor of Science (B.S.) (Honors and General) in Civil, Computer, Electrical, Mechanical Engineering, Engineering Management, and Computer Science.
- **The School of Nursing and Human Physiology** confers the degree of Bachelor of Science in Nursing (B.S.N.) (Honors and General) and B.S. in Human Physiology (Honors and General).

- **The School of Law** confers the degree of Juris Doctor. In cooperation with the Graduate School of Business, a combined program is offered for the M.B.A./J.D. and MACC/J.D.

A listing of graduate programs in the above College and Schools can be found at www.gonzaga.edu/catalogs.

B. Programs Offered

1. Special University-Wide Programs

Gonzaga makes available special programs for selected students in all of its Schools and the College. Further information on the following programs can be found on the Gonzaga website.

- **Honors Program:** A distinctive curriculum for academically motivated undergraduates, featuring innovative, collaborative courses and immersive educational experiences. The program is designed to complement all majors and programs at Gonzaga. Upon graduation, students in this program receive an Honors designation as part of their degree. For further information visit www.gonzaga.edu/honors.
- **International Admission:** Gonzaga University welcomes international students and provides guidance on admission criteria and required documentation. International applicants are encouraged to contact Gonzaga at iadmissions@gonzaga.edu.
- **International Student and Scholar Services (ISSS):** International Student & Scholar Services (ISSS) offers centralized support to all international undergraduate, transfer, graduate, PhD, law, ESL, Gonzaga Global, exchange and visiting students attending Gonzaga as well as support for visiting scholars. The office specializes in immigration advising; international student, visiting professor and scholar support; international student employment authorization; tax assistance; workshops and specialized international programming.
- **Study Abroad Program:** Gonzaga University offers a multitude of different study abroad opportunities in Africa, Asia, Europe, Latin America, the Middle East, and Oceania for the academic year, semester, or summer study. Opportunities to complete internships, research, and service learning abroad are also available.

2. Pre-Professional Programs

Pre-Health Professions: Pre-health students are those interested in pursuing a career and graduate study in fields such as Dentistry, Medicine, Occupational Therapy, Optometry, Pharmacy, Physical Therapy, Physician Assistant, Public Health, Veterinary Medicine, and other health professions. Students who are matriculating in the direct-admit undergraduate nursing program are not considered pre-health.

Most health professions graduate programs do not require specific undergraduate majors. At Gonzaga, we strongly encourage students to choose a major that they are genuinely interested in studying. This will increase the likelihood of academic success, which is often a big factor in graduate school admissions.

Health professions programs each determine their own admissions prerequisite coursework, but most require a strong foundation in the basic sciences along with coursework in the humanities, which can be found in the University Core Curriculum. In consultation with their academic advisors, students can expect to complete a basic science curriculum that includes Biology, Chemistry, Physics, and Math. Additional science courses may be necessary based on specific program requirements.

Admission to health professions graduate programs is competitive. Schools look for candidates that have distinguished themselves in their academics, leadership, and service and gained the skills necessary to be effective members of their professions. Health professions graduate programs assess cognitive abilities primarily through GPA and standardized admission tests. Students have the opportunity to demonstrate a commitment to their chosen field and highlight personal attributes and experiences by submitting an application, writing several essay questions, requesting letters of recommendation, and participating in interviews. Hands-on experience in healthcare settings is vital to both the preparation and admission processes. This clinical experience exposes students to the complex duties expected of today's healthcare professionals and enables them to make informed career decisions.

The Committee on Health Science Careers provides committee letters as a service to eligible students and alumni seeking admission to health professions programs, most commonly medical and dental schools. While not required by Gonzaga University applicants, the committee letter is highly

recommended as it serves as a holistic evaluation of the candidate's proficiency in the core competencies. The committee letter often fulfills multiple letters of recommendation requirements for admission, but it is important for applicants to confirm requirements for each school to which they apply.

The Health Professions Pathway Program provides comprehensive resources and a support network for students interested in pursuing a career and graduate study in the health professions. For more information, visit www.gonzaga.edu/h3p or email h3p@gonzaga.edu.

Pre-Law: A bachelor's degree is normally required by law schools for admission. No particular major is required, but these schools look for students who have done well in their undergraduate program and on the Law School Admission Test. Further information can be found at: The School Of Law.

The best preparation for law school is a solid liberal arts education with particular emphasis on those majors and courses that develop the ability to read critically, to analyze difficult written material carefully, to think logically, and to write clear, coherent, and effective English prose. More pre-law students major in Political Science than any other field, but Gonzaga graduates have done well in law school recently with majors in all rigorous academic programs.

The pre-law program is administered by the Department of Political Science. Students can request to be assigned to the pre-law advisor, Dr. Joseph Gardner. The pre-law advisor can suggest an individually tailored minor in legal studies, upon request, or specific pre-law courses typically offered by the Political Science department. A course helping students to prepare for the LSAT examination is generally offered in the fall semester. Internships with private law firms, prosecutors and public defender offices, or the Office of the State Attorney General can be arranged for qualified students.

3. Miscellaneous Programs

The University provides students with opportunities to prepare for careers in health fitness and human performance, corporate fitness, health education, and sport and fitness business administration. For further information on preparation for careers in these fields, contact the Department of Human Physiology in the School of Nursing and Human Physiology or the Department of Sport and Physical Education in the School of Education. Students who wish to pursue degrees in agriculture, architecture, forestry, or mining are

encouraged to complete the core curriculum at Gonzaga as well as those courses which will form a foundation for further study in the field of their choice.

Degree Requirements

A. University Wide Undergraduate Degree Requirements

- Completion of a minimum of 128 semester credits.
- Completion of the core requirements of the University.
- Completion of all common curriculum from the individual school or college.
- Undergraduate courses or post baccalaureate course work may not be counted toward a graduate level degree. Graduate and doctoral level courses may not be counted toward an undergraduate or post baccalaureate degree.
- A minimum cumulative grade point average of 2.00.
- Completion of upper-division major and minor requirements with a minimum cumulative grade point average of 2.00 in those courses. At least 50% of the required upper-division degree credits must be from Gonzaga.
- Courses graded with a “P” (pass) grade mode can only be used as elective credit. Credit earned with a “P” may not be used to satisfy core, major, minor, or concentration requirements.
- Senior Residency Requirement: The last thirty semester credits immediately preceding graduation must be earned in Gonzaga University course work. Students can petition for a waiver of this requirement via the Permission to Transfer Credits/Senior Residence Waiver form available in the Registrar’s Office. Under a Senior Residence Waiver, students may petition to take up to a maximum of eighteen credits off campus. Students whose cumulative or major GPA is below a 2.00 are not eligible for a waiver.
- Formal application for graduation: Students must file an application and pay the graduation application fee according to the instructions and dates published by the University Registrar. Degrees will be awarded upon completion of all requirements in March, May, June, August,

October or December, with one public commencement ceremony held in May. Administration of honors level designations will be based on the fall semester credits earned and cumulative GPA for inclusion in the annual May commencement ceremony. The final honors designation if earned by the student, will be reflected on the transcript and the diploma for the semester of degree conferral.

- Fractional credit is never rounded up on a course nor is the total minimum credits required for a Gonzaga degree of 128 semester credits. The calculation of the cumulative GPA and major GPA is never rounded up.
- Once a student has graduated from the University and a degree has been posted, no further change can be made to the academic record (i.e. grade changes).
- Course attendance is not allowed without official registration and financial confirmation.

Note: Payment of all indebtedness to Gonzaga University, the return of all equipment to the appropriate entity, and the return of all books to Foley Library are required prior to graduation. Holds may be placed on transcripts and diplomas for any of these deficiencies.

B. University Core Curriculum

In addition to their major and minor areas of study, all undergraduate students follow a common program designed to complete their education in those areas that the University considers essential for a Catholic, Jesuit, liberal, and humanistic education. The University Core curriculum consists of forty-five credits of course work, with additional designation requirements that can be met through core, major, or elective courses.

The University Core curriculum is a four-year program, organized around one overarching question, which is progressively addressed through yearly themes and questions. Hence, core courses are best taken within the year for which they are designated. First year core courses encourage intellectual engagement and provide a broad foundation of fundamental skills. Second and third year courses examine central issues and questions in philosophy and religious studies. The fourth year course, the Core Integration Seminar, offers a culminating core experience. Taken at any time throughout the four years, broadening courses intersect with the core themes and extend students' appreciation for the humanities, arts, and social and behavioral

sciences. Finally, the designation requirements (writing enriched, global studies, and social justice) reflect important values and reinforce students' knowledge and competencies.

Overarching Core Question: As students of a Catholic, Jesuit, and Humanistic University, how do we educate ourselves to become women and men for a more just and humane global community?

Year 1 Theme and Question: Understanding and Creating: How do we pursue knowledge and cultivate understanding?

- The First-Year Seminar (DEPT 193, 3 credits): The First-Year Seminar (FYS), taken in the fall or spring of the first year, is designed to promote an intellectual shift in students as they transition to college academic life. Each small seminar is organized around an engaging topic, which students explore from multiple perspectives. The FYS is offered by multiple departments across the University.
- Writing (ENGL 101, 3 credits) and Reasoning (PHIL 101, 3 credits): The Writing and Reasoning courses are designed to help students develop the foundational skills of critical reading, thinking, analysis, and writing. They may be taken as linked sections. Writing (ENGL 101) carries one of the three required writing-enriched designations (see below).
- Communication & Speech (COMM 100, 3 credits): This course introduces students to interpersonal and small group communication and requires the application of critical thinking, reasoning, and research skills necessary to organize, write, and present several speeches.
- Scientific Inquiry (BIOL 104/104L, CHEM 104/104L, or PHYS 104/104L, 3 credits): This course explores the scientific process in the natural world through evidence-based logic and includes significant laboratory experience. Students pursuing majors that require science courses will satisfy this requirement through their major.
- Mathematics (above Math 100, 3 credits): Mathematics courses promote thinking according to the modes of the discipline—abstractly, symbolically, logically, and computationally. One course in mathematics, above Math 100, excluding MATH 193 and including any math course required for a major or minor, will fulfill this requirement. MATH 100 (College Algebra) and courses without the MATH prefix do not fulfill this requirement.

Year 2 Theme and Question: Being and Becoming: Who are we and what does it mean to be human?

- Philosophy of Human Nature (PHIL 201, 3 credits): This course provides students with a philosophical study of key figures, theories, and intellectual traditions that contribute to understanding the human condition; the meaning and dignity of human life; and the human relationship to ultimate reality.
- Christianity and Catholic Traditions (RELI, 3 credits). Religious Studies core courses approved for this requirement explore diverse topics including Christian scriptures, history, theology, and practices as well as major contributions from the Catholic intellectual and theological traditions.

Year 3 Theme and Question: Caring and Doing: What principles characterize a well lived life?

- Ethics (PHIL 301, RELI XXX, 3 credits): The Ethics courses are designed to help students develop their moral imagination by exploring and explaining the reasons humans should care about the needs and interests of others. This requirement is satisfied by an approved ethics course in either Philosophy (PHIL 301) or Religious Studies.
- World/Comparative Religion (RELI XXX, 3 credits): Religious Studies courses approved for this core requirement draw attention to the diversity that exists within and among traditions and encourage students to bring critical, analytical thinking to bear on the traditions and questions considered. These courses carry one of the required two global-studies designations (see below).

Year 4 Theme and Question: Imagining the Possible: What is our role in the world?"

- Core Integration Seminar (DEPT 432, 3 credits). The Core Integration Seminar (CIS) offers students a culminating core experience in which they integrate the principles of Jesuit education, prior components of the core, and their disciplinary expertise. Some CIS courses may also count toward a student's major or minor. The CIS is offered by multiple departments across the University.

The Broadening Courses

- Fine Arts & Design (VART, MUSC, THEA, 3 credits): Arts courses explore multiple ways the human experience can be expressed through creativity, including across different cultures and societies. One approved course in fine arts, music, theatre, or dance will fulfill this requirement.
- History (HIST, 3 credits): History courses are intended to develop students' awareness of the historical context of both the individual and the collective human experience. One approved course in History (HIST 101, HIST 102, HIST 112, HIST 201, HIST 202) will fulfill this requirement.
- Literature (3 credits): Literature courses foster reflection on how literature engages with a range of human experience. One approved course in Literature (offered by English, Classics, or Modern Languages) will fulfill this requirement.
- Social & Behavioral Sciences (3 credits): Courses in the social and behavioral sciences engage students in studying human behavior, social systems, and social issues. One approved course offered by Criminology, Critical Race and Ethnic Studies, Economics, Political Science, Psychology, Sociology, or Women and Gender Studies will fulfill this requirement.

The Designations

Designations are embedded within already existing core, major, minor, and elective courses. Students are encouraged to meet designation requirements within elective courses as their schedule allows; however, with careful planning students should be able to complete most of the designation requirements within other core, major, or minor courses.

- Writing Enriched (WE; 3 courses meeting this designation): Courses carrying the WE designation are designed to promote the humanistic and Jesuit pedagogical ideal of clear, effective communication. In addition to the required core course, Writing (ENGL 101), which carries one of the WE designations, students must take two other WE-designated courses. Ideally, students will take at least one WE course within their major.
- Global-Studies (GS; 2 courses meeting this designation): Courses carrying the GS designation are designed to challenge students to

perceive and understand human diversity by exploring diversity within a context of constantly changing global systems. In addition to the required core course, World/Comparative Religion (RELI 300-level), which carries one of the GS designations, students must take one other GS-designated course.

- Social-Justice (SJ; 1 course meeting this designation): Social justice lives at the heart of the Gonzaga mission. Courses carrying the SJ designation are designed to introduce students to one or more social justice concerns. Students must take one course that meets the SJ designation.

Each course fulfilling a core requirement is designed around a common set of learning outcomes. Therefore, only those courses approved for each core requirement will fulfill the requirement. Please consult the University Core Registration Guide posted on the University Core Website for lists of approved core courses in each area: www.gonzaga.edu/core.

Major-specific adaptations to the University Core Curriculum

All Gonzaga students, regardless of their major, will complete the University Core curriculum requirements. However, some Gonzaga students will satisfy certain core requirements through major-specific programs or courses. Any major-specific adaptations to the core are described with the requirements for the majors to which they apply.

C. Catalog Options

Students entering Gonzaga after June 1, 1981 may select the core and degree requirements from any appropriate catalog which is within **six years prior to their graduation**. Students who entered before June 1, 1981, do not have a time limit regarding the catalog they select. An appropriate catalog is one in effect when a student attends with regular status as an undergraduate in a degree program. Summer session attendance does not qualify. The complete degree requirements of only one catalog must be followed. Selections may not be made from more than one catalog. Substitutions for discontinued courses are required and must be authorized by the proper University authorities.

D. Major Area

Either at the time of entrance or by the end of their second year, undergraduates should declare the particular field in which they wish to do their major work. They are then directed to the proper department for advice in planning a program of study.

The major normally consists of at least eighteen credits of upper-division course work in the major field and such supporting courses as the department requires. The major is listed on the final transcript but not on the diploma with the exception of Engineering, Education, Human Physiology, and Nursing.

E. Minor Area: Minor Courses of Study

An optional minor study program is offered by most of the departments within the University. Specific requirements can be found under the individual departments. The minor must be officially declared and is listed on the final transcript.

F. Second Majors, Minors, and Degrees

Under a Gonzaga baccalaureate degree, a student may complete more than one major and/or minor under that degree type (i.e. Bachelor of Arts with majors in Sociology and in Psychology). Students can receive more than one baccalaureate degree at the same time (i.e. Bachelor of Arts and Bachelor of Science). This is accomplished by completing the common curriculum in both schools and major requirements in addition to completing a minimum of 158 semester credits. Students who already hold an undergraduate degree from Gonzaga or any other institution can enroll at Gonzaga for a second degree as a post baccalaureate student. Gonzaga University offers second majors, second minors, and second degrees according to the following norms:

Second Major:

- The student must fulfill all departmental requirements for the second major and all the common curriculum requirements of the school or college wherein the major is offered.
- The student must formally declare the second major.
- At least during the third and fourth years, the student should utilize the advice of a faculty member in the department of the second major.

Second Minor:

- The student must fulfill the requirements of the department. If the minor is in a school other than the major, the second school common curriculum requirements need not be fulfilled.
- The student must formally declare a second minor.
- The diploma does not indicate a minor, but it is listed on the transcript.

Second Degree (Undergraduate):

- The student must fulfill thirty Gonzaga credits beyond the 128 completed for the first degree.
- The student must fulfill all University core requirements, individual school curriculum requirements and departmental requirements for the second degree; credit and requirements fulfilled under the first degree cannot be repeated in the second degree.
- The student must formally declare the second degree and apply for the second degree prior to graduation.
- A second diploma is awarded only when the second degree is distinctly different from the first.

Second Degree (Post Baccalaureate):

- The student must be admitted to the University by the Office of Undergraduate Admission.
- The student will enter under the academic curriculum of the current catalog and be subject to the current academic policies. This will require the student to take all courses that are new requirements for the school/college since his/her original degree.

- The minimum GPA requirement to receive the degree is a 2.00.
- Students must complete a minimum of thirty credits at Gonzaga University. Any course work considered transferable toward the second degree would require a student to adhere to the course substitution petition process.
- Courses used to complete another degree either through Gonzaga University or another institution cannot be used toward the second degree.

G. Activity Courses

No more than **eight** (8) activity credits can be counted toward a baccalaureate degree.

The following courses, which may be repeated, are designated as activity courses: Dance (DANC): 301; Journalism (JOUR): 220 & 230; Music (MUSC): 131A-131Z, 132A; 133-134, 136-137, 143-154, 156-157, 331A-331Z, 332A; 358; Theatre Arts (THEA): 124-125, 226, 260-261, 320, 324; Physical Education (EDPE): 101-188

Exceptions to these limitations:

- Kinesiology Majors (B. Ed.) are, with the permission of the Chairperson of the Kinesiology department, allowed a total of four (4) EDPE activity courses beyond the eight (8) credit limit for all activity courses. **(twelve (12) credit maximum)**
- Majors and minors in Music or Music Education and Theatre Arts and Dance may exceed the eight (8) credit limit.

H. Multiple Usage of Courses for Meeting Degree Requirements

1. A course may be used to fulfill any number of MAJOR, MINOR, AND CONCENTRATION requirements while also fulfilling a University Core requirement. Using a course to meet more than one core requirement is not allowed with the exception of the designation requirements (i.e., Writing Enriched (WE), Global Studies (GS), Social Justice (SJ)).
2. When multiple usage of a course occurs in meeting degree requirements, the course credit is counted only once. The grade is used in determining the major and minor grade point averages.
3. The 128 credits required as a minimum for degree completion (and the additional 30 credits required for a second degree) are not reduced by a multiple count toward meeting a major, minor, concentration or core requirement.

I. Pass/Fail Grade Course Limit

No more than five (5) Pass/Fail graded courses can count toward a baccalaureate degree, and no more than two (2) can be taken in any one department. This grading option only applies to courses taken as general elective credit.

Academic Policies

A. Disclaimer for Academic Policy and Program Changes

The University reserves the right to make changes in courses, programs, faculty, calendar, tuition and fees, grading procedures, graduation requirements, admission criteria, and any other information contained in this catalog at any time without notification. Changes become effective when the University so determines, and applies to prospective students as well as students currently enrolled. The University will make an effort to notify students of changes through publications and notices.

B. Disclaimer for Course Availability

All reasonable care is taken to ensure that both course offerings and degree requirements contain no erroneous, deceptive, or misleading information by omission, actual statement, or implication. Every effort will be made by the University to offer at least the courses listed in this catalog during the period in which it is in effect; student enrollment and faculty availability, however, may affect the courses offered. Some courses listed in this catalog are offered only as needed. The decision to offer such courses rests with the Chairperson in consultation with the appropriate Dean. Final course information is published on ZAGWEB.

C. Course Numbering System

Lower Division Courses:

Below 100 - Remedial in nature; University credit is granted for no more than two courses numbered below 100 and they do not fulfill any core or major requirements.

100-199 - Primarily first and second year courses for which there are normally no prerequisites.

200-299 - Courses with usually one prerequisite; primarily for first and second year undergraduates.

Upper Division Courses:

300-399 - Courses usually with prerequisites; primarily for third and fourth year undergraduates.

400-499 - Courses with prerequisites; primarily fourth year undergraduates.

500-599 - Graduate courses which may be taken by third and fourth year undergraduates with Dean's permission (these courses do not count toward a baccalaureate degree).

600-699 - Graduate courses for graduate students only.

700-799 - Graduate courses for doctoral students only.

D. Classification of Students

An undergraduate student is classified as a First Year, Second Year, Third Year or Fourth Year based upon the cumulative number of semester credits he/she has earned.

Cumulative Credits Earned	Classification
0 - 25	First Year
26 - 59	Second Year
60 - 95	Third Year
96+	Fourth Year

A post baccalaureate student holds a bachelor's degree from an accredited university and has not been admitted to a graduate program. They may be pursuing a second bachelor's degree or attending for personal enrichment.

E. Transfer and Evaluation of Credits

Gonzaga aims to award all eligible transfer credit for coursework completed at regionally accredited institutions, while maintaining the high standards of a Gonzaga degree. To be eligible for transfer credit, an official college transcript must be delivered to the Office of Admission. Applicants with credit earned at other colleges and universities should note the following conditions regarding the transfer of college credit:

- Transfer credit from a U.S. institution must have been completed at a regionally accredited college or university.
- College credit earned outside of the U.S. must generally be accompanied by a professional foreign credential evaluation, unless credit was earned through an approved study abroad program.
- Transfer credit may not be technical or vocational in nature.
- Transfer credit must be at or above college level (100-level or above).
- Transfer credit is evaluated on a course-by-course basis.
- Transfer credit must be completed with a minimum of 2.0 (or “C”) grade.
- Pass (P) grades, or the equivalent, will be accepted as elective credit only and will not fulfill any core, major, minor or concentration requirements.
- Transfer course grades are not calculated into the Gonzaga University GPA.
- Transfer coursework may have a specific Gonzaga equivalency if the courses are similar in content and depth. In order to fulfill a specific core, major or minor requirement at Gonzaga, the transfer course syllabus must be presented to the department Chairperson and/or the Dean of the College/School for review. Upon approval, the initial transfer credit equivalency may be updated to reflect the faculty’s decision. At least 50% of required upper-division degree credits must be earned at Gonzaga.
- When transfer credit is posted as the equivalent of a Gonzaga course and the student elects to retake that course at Gonzaga, the transfer credit will be removed from the student’s academic record.
- Quarter credit hours can be converted to semester credit hours when multiplied by 0.66.

- Transfer credit from a two-year institution (community or junior college) is limited to a maximum of 64 semester credits (96 quarter credits) that can be applied to a baccalaureate degree at Gonzaga.
- Students transferring with a maximum of 64 semester credits from a community or junior college are not permitted to further enroll at a two-year institution for additional transfer credit.
- There is no limit to the amount of credit that may be transferred from another baccalaureate institution. However, all transfer and post-baccalaureate students must complete a minimum of 30 semester credits at Gonzaga immediately preceding graduation from the University.
- Students may not register in courses through any other institution while on a Leave of Absence status at Gonzaga (with the exception of non-sponsored study abroad programs).
- Transfer students in the School of Business Administration must earn at least 50% of their business core and major coursework at Gonzaga University.

F. Transfer Degrees

Students enrolling at the University with an earned associate degree as identified below, are generally given junior credit standing (a minimum of 60 semester credits) and will have fulfilled many of the requirements within the University Core curriculum. University Core requirements to be completed upon matriculation with an approved transfer degree include: First-Year Seminar, Christianity & Catholic Traditions, and the Core Integration Seminar. Students will also take a major-appropriate college Mathematics, Reasoning, Human Nature, and Ethics, unless they have already fulfilled these requirements with approved transfer credit. Communication & Speech is recommended, but not required, for students who have not completed a course in public speaking.

Degrees that transfer directly to Gonzaga University are as follows:

Arizona State Community Colleges:

Associate in Arts with Arizona General Education Curriculum A (AA with AGEC-A)

California State Community Colleges:

Associate in Arts with Intersegmental General Education Transfer Curriculum (AA with IGETC)

North Idaho College:

Associate of Arts (AA)

Associate of Science (AS)

Oregon State Community Colleges:

Associate of Arts Oregon Transfer (AAOT)

Washington State Community Colleges:

Associate of/in Arts – Direct Transfer Agreement (AA-DTA), including DTA's for Major-Related Programs in Business and Computer Science.

Associate of Science Transfer (AS-T), including the AS-T for Major-Related Programs for Engineering – Track 2.

Gonzaga's acceptance of the DTA is part of an interinstitutional transfer agreement upheld by the Intercollege Relations Commission (ICRC) for Washington State.

Acceptance of a transfer degree does not guarantee admission to the University. Prospective students are encouraged to contact the Office of Admission for advice in advance of an application for admission.

Reverse Transfer Degrees:

Gonzaga does not currently participate in Reverse Transfer partnerships and will not recognize an approved transfer degree that is obtained using Gonzaga coursework. Therefore, former Gonzaga students who re-enter the University from a two-year college to complete their undergraduate degree will not benefit from the core waiver privileges offered to an approved associate degree holder from a community college in Washington, Oregon, California, Arizona, or North Idaho College. All readmitted Gonzaga students must fulfill the University's core requirements in its entirety. Eligible transfer credit completed by a reapplying student, however, will be evaluated and accepted on a course-by-course basis.

Associate of Applied Science Degrees:

Gonzaga does not currently accept the associate of applied science degrees from the community and technical colleges. Eligible transfer credit completed by a student matriculating with an earned applied science degree will be evaluated on a course by course basis.

Post Baccalaureate Students:

Post-baccalaureate students matriculating to Gonzaga University for a second bachelor degree may benefit from the same policy that Gonzaga affords a transfer student with an approved AA-DTA or AS-T from a Washington State community college.

Post-baccalaureate students who had earned their first undergraduate degree from Gonzaga will be considered as having completed the core in its entirety, including the designations, regardless of when the student completed their first degree.

All other requirements within a student's post-baccalaureate degree would be waived (such as a lower division major, minor, concentration requirement) if completed as a requirement of the first degree earned, or if completed at Gonzaga.

Any waiver of upper division major requirements would be at the discretion of the department chair for which the student is completing the post-baccalaureate major.

Post-baccalaureate students will be required to complete a minimum of thirty semester credits in residence to earn a second bachelor degree from Gonzaga along with completion of any outstanding major, minor, or concentration courses required for the degree.

University Core Waivers

- Students transferring to Gonzaga with 30 or more earned semester credits are permitted to waive the College of Arts and Sciences language requirement.
- Students transferring to Gonzaga with 45 to 59 earned semester credits are permitted to waive the following University Core requirements: World or Comparative Religion and its corresponding Global Studies designation, one Writing-Enriched designation, and one of the additional

three designation requirements (either Writing Enriched, Global Studies or Social Justice).

- Students transferring to Gonzaga with 60 or more earned semester credits are permitted to waive World or Comparative Religion and all designation requirements.

Transfer of Credit from the Military

Gonzaga University may offer up to twenty-five elective credits for successfully completed educational experience in the Armed Forces. Credit must be supported by an official military transcript, such as the Joint-Services Transcript or the Army/American Council on Education Registry transcript. Gonzaga uses credit recommendations from the American Council on Education's (ACE) guidelines for baccalaureate institutions. Up to eight (8) elective credits may be granted for physical fitness courses and training. Graded coursework from accredited institutions such as the Community College of the Air Force or the Defense Language Institute, is evaluated in the same manner as credit from regionally accredited institutions. Technical and vocational level coursework is not transferrable.

Permission for Transfer of Credits by Current Students

Consistent with University policy and existing articulation agreements, courses accepted in transfer must be similar in content and depth to courses taught at Gonzaga. Courses should generally align with the course/designation descriptions and learning outcomes.

For students entering the University prior to Fall of 2016, in order to fulfill a core, a major-specific requirement, or elective credit at Gonzaga, the transferred course must receive the approval of the department chairperson and dean of the college/school by way of the Permission to Transfer Credits/Senior Residency Waiver form.

For students entering the University in Fall of 2016 and forward, course syllabi detailing course requirements must be provided; course titles and descriptions are not sufficient. AP courses will not be accepted in fulfillment of designation requirements (eg., GS, SJ, WE).

For current students irrespective of the semester of entry, the following applies:

- Students must obtain permission to transfer credits *prior* to taking these credits from department chairpersons and the deans or the core curriculum director.
- Pass (P) grades, or the equivalent, will be accepted as elective credit only and will not fulfill any core, major, minor, or concentration requirements.
- Transfer course grades are not calculated into the Gonzaga University cumulative GPA.
- When transfer credit has been posted to a student record that has equivalency to a Gonzaga course and a student elects to complete the same course at Gonzaga, the transfer credit entry will be removed from the student's academic record. If a student elects to complete a transfer course deemed equivalent to a course previously taken at Gonzaga after the Gonzaga course has been completed with a D grade and credit earned, the transfer course will not be accepted in transfer at Gonzaga.
- Taking a course in transfer in order to replace a grade earned at Gonzaga (excluding W, V or F grade) does not qualify under Gonzaga's Repeat of Credit Policy.
- Quarter credit hours are convertible to semester credit hours when multiplied by 0.66.
- Transfer credit from a two-year institution (community or junior college) is limited to a maximum of 64 semester credits (96 quarter hours) that can be applied toward a baccalaureate degree at Gonzaga.
- It is not permissible for students who transfer to Gonzaga with a maximum of 64 semester credits from a community or junior college to further enroll at a two-year institution to complete additional transfer credit.
- There is no limitation to the number of credits that may be transferred from a baccalaureate institution. However, all transfer and post-baccalaureate students must complete a minimum of 30 semester credits at Gonzaga immediately preceding graduation from the University.
- Students may not register into courses through any other institution while on a Leave of Absence status through Gonzaga (with the exception of non-sponsored study abroad programs.) Doing so will

invalidate the Leave of Absence request and students will be required to reapply for admission.

- Credit earned from transfer courses is not rounded up. Current students may view the Transfer Guide on the Admissions website as a guideline for courses previously approved in transfer from other universities; individual approval is still required by way of the Permission to Transfer Credits/Waiver of Senior Year in Residency form.
- As soon as credit is completed from another institution, students must request official transcripts be forwarded to the Registrar's Office AD Box 83, Gonzaga University, 502 E Boone Ave, Spokane, WA, 99258-0083. Official electronic transcripts will be accepted, but only when sent directly from the transfer credit institution to Gonzaga. Electronic transcripts forwarded from students will be considered unofficial.
- A student wishing to register simultaneously at Gonzaga and another college or university must obtain prior written permission from the appropriate academic dean.
- Transfer students in the School of Business Administration must earn at least 50% of their business core and major coursework at Gonzaga University.

G. Transfer Transcripts

Based on standard institutional practice, copies of transcripts from other educational institutions attended by Gonzaga students are housed in student files and will not be provided back to the student upon their request. Students are asked to contact the issuing transfer institutions directly to obtain further copies of their transfer transcript records.

H. Registration Procedures

Every semester, a Student/Advisor Action Guide, providing a detailed registration timeline can be found on the Registrar Office [web pages](#). If a student attends a course section in which he or she is not registered or financially confirmed, no credit or grade will be recorded. Attendance in a course without registration is not permissible.

I. Change in Course Registration

Courses may be changed only during the period listed under Important Dates and Deadlines on the web pages of the Registrar's Office.

Courses dropped during the official change of registration period do not appear on the student's record; courses officially withdrawn after that period will appear on the transcript with a designation of "W" (Official Withdrawal).

J. Course Overload

Students in good academic standing may petition their School's Dean to take more than the maximum of eighteen credits. Additional tuition charges apply for the extra credits. Students in the Honors Program, the Comprehensive Leadership Program, the ROTC Program, or the Hogan Entrepreneurial Leadership Program, however, with the approval of the respective Program Director, may take extra credits without charge.

K. Audit a Course

Audit grading option (AU grade assigned):

Auditors are students who register for a course under the 'Audit' grading option by signing the audit form in the Registrar's Office. Regular tuition is charged. Activity courses (e.g., physical education, music, art, etc.) are not permitted to be taken under the Audit grading option. Auditors will not be allowed access to individual instruction, to equipment, or to supplies in conjunction with the course. Once a course is registered for under the 'Audit' grading option, students who fail to attend the class according to the regular attendance requirements of the class are liable to receive a "V" grade at the discretion of the professor.

- Registration is available through the add/drop period. The auditor registers for a lecture method course under the Audit grading option and pays tuition based on this option and course credits. A designation of "AU" is recorded on the auditor's academic transcript if the auditor satisfactorily attended the course. An "AU" on a student's transcript reflects no academic credits earned and indicates that the person has received exposure to the course content for an academic

semester/term. The “AU” designation does not apply toward meeting degree requirements.

- A professor may assign a “V” grade for unofficial withdrawal when attendance is unsatisfactory.
- Under this option, audited course credits are not counted toward meeting full-time credit requirements for financial aid eligibility, student loans, VA benefits, etc., although standard tuition is paid for the credits. Auditors should be very cautious about registering using the 'Audit' grading option.

L. Course Challenge Program

Students who have completed at least twelve credits at Gonzaga who are matriculated students may be able to take advantage of the Course Challenge option. Detailed information and regulations regarding this program can be obtained from the Registrar’s Office. There is a fee charged per credit challenged and credit taken under the program may not exceed the maximum credit allowed of 18 credits in a semester.

M. Complete Withdrawal from the University

Undergraduate students who register but decide not to attend the University should contact the Registrar’s Office. The complete withdrawal process requires approvals and an interview with a professional in the Registrar's Office. Tuition adjustments are based on the date a University official is notified by the student that he/she wishes to withdraw. The tuition adjustment schedule for a complete withdrawal is posted on the Student Accounts webpage at <https://www.gonzaga.edu/admission/tuition-scholarships-aid/student-accounts/refunds>. Refunds for room and board will be prorated throughout the semester. Financial aid funds will be refunded in accordance with University and governmental regulations.

N. Leave of Absence

Students who are pursuing a bachelor’s degree at Gonzaga and must interrupt their education for a period of not more than two semesters (summer not included) may be eligible for a Leave of Absence (LOA) from the University. To be eligible for a LOA, a student must have a minimum G.P.A. of 2.00 in the preceding fall or spring semester and a cumulative grade point

average of 2.00 or higher, as well as obtain approval from the Office of the Registrar and the Resolution Center for Conduct and Conflict.

Students are not eligible to reside on campus, attend classes, or participate in regular campus activities during their absence. Students who attend another school during their LOA will have that status voided and they must apply for re-admission to the University. The LOA will not extend beyond two semesters. Students who wish to return to the University after the termination date of their LOA must apply for re-admission to the University.

Any LOA request completed by a student while allegations of misconduct are pending will have their LOA status revoked.

Students who have been suspended through the Resolution Center for Conduct and Conflict do not qualify for a LOA and must apply for re-admission to the University.

Grading Policies

A. Grading Procedures

A student's scholastic standing is based on the GPA earned each semester. This is determined by the combined results of examinations, assignments, class attendance, and general evidence of regular and consistent participation. Due weight will be given to mastery of the subject and the ability to communicate clearly, effectively, and accurately in both oral and written form. There are several GPA's including the semester GPA, the cumulative GPA, and the upper division major GPA.

Specific information on the grading policy of any course is typically provided via the course syllabus. To indicate a student's quality of achievement in a given subject, final grades in the form of letters and plus/minus indicators are used by all instructors in the University's undergraduate programs. The letter grades A, A-, B+, B, B-, C+, C, C-, D+, D, F, V, and NS are assigned a "quality point value" for purposes of cumulative grade point average calculations, certification, and convenience in reporting.

The GPA is calculated by dividing the total quality points earned by the total credits graded.

The letter grades AU, I, IP, P, RD, S, and W do not count as credits graded and quality points are not awarded. Grades of “S” and “P” do not calculate into the GPA but count as credits earned.

A minimum cumulative and upper division major grade point average of 2.00 is required for completion of an undergraduate degree. Transfer credits accepted by Gonzaga may count toward degree completion; however, grades associated with transfer credits are not used in the calculation of the cumulative GPA at Gonzaga.

Letter Grades	Description	Quality Points
A	Excellent	4.0
A-		3.7
B+		3.3
B	Good	3.0
B-		2.7
C+		2.3
C	Average	2.0
C-		1.7
D+	Poor	1.3

Letter Grades	Description	Quality Points
D		1.0
F	Failing	0.0 (computed in GPA)
	Grade awarded to students who complete the term and the course but fail to achieve course objectives.	
V	Failing	0.0 (computed in GPA)
	Grade awarded to students who have not officially dropped or withdrawn from a course and consequently have not met class attendance requirements or participation in the course through the end of a semester. The grade is given at the discretion of the professor. Students should not assume that professors will automatically initiate course drops/withdrawals for non-attendance.	
S (Satisfactory)	Passing grade of C or higher	(not computed in GPA)
P (Pass)	Passing grade of C or higher	(not computed in GPA)
NS (C- or lower)	Failing grade of C- or lower	(computed in GPA)
W (Withdrawal)		(not computed in GPA)
RD (Report Delayed)		(not computed in GPA)

AU - Audit grading option: The “AU” grade is assigned by the Registrar’s Office and is not an option of the instructor. Students must register for this grade mode no later than the close of the add/drop period. A complete description of this option is given earlier in the Academic Policies section.

I - Incomplete: Given when a student with a legitimate reason as determined by the instructor, does not complete all the work for the course within the semester that he/she is registered for the course. A provisional grade should be what the student would earn if no additional work is submitted. The faculty member may assign a provisional grade through ZAGWEB’s Faculty Services tab and the “Email Provisional Grades” block which will initiate an automated email to the Registrar’s Office. The provisional grade received will be applied to a student’s academic record thirty (30) calendar days into the following semester (summer sessions are not included) as outlined every semester on the Academic Calendar. Date extensions beyond this date may be requested and must be approved through the appropriate Deans' Office and the Office of the Provost. Forms for this action can be obtained from the Registrar's Office.

If the instructor does not submit a Change of Grade form before the Academic Calendar’s grade conversion date occurs or an approved date extension lapses, a provisional grade received will be recorded on the student’s transcript. If no provisional grade has been provided, the "I" grade automatically becomes an "F" grade and is recorded on the transcript as an "I/F". Whenever an "I" grade has been assigned, the "I" grade becomes part of the permanent record. i.e. "I/B", etc.

IP- In Progress: Assigned only for courses in Internships, Research, and Comprehensive Exams as well as courses that Deans recognize as eligible due to the nature of the course and the need for more than a semester to complete the work. An “IP” may remain for one calendar year. If a grade is not submitted within one year, an “IP” automatically becomes a “W” (official withdrawal). Requests for an extension beyond the deadline must be submitted by the instructor to the Registrar’s Office by completing the Extension form and obtaining signatures from the Dean of the School the course falls under as well as the Provost & Senior Vice President. Once the course has been completed and graded, the Change of Grade form needs to be processed and the grade will be entered on the student's academic record by the Registrar’s Office.

P - Pass: Designated elective courses may be taken on the Pass/Fail grading option by student request, not that of the instructor. Students select this option prior to the last published date to Withdraw from courses and may not revoke

their decision after this date, by completing the appropriate paperwork in the Registrar's Office. Letter grades assigned by instructors that are "C" or higher are converted to "P" grades at the end of the semester and grades below "C" are converted to "F" grades. The "P" grade does not calculate into the grade point average and the credits earned count toward the minimum number of credits required to graduate. The "F" (fail) grade affects the cumulative GPA as a standard "F" grade. **Courses taken under the Pass/Fail grading option do not satisfy any university core, major, minor, or concentration requirement and can only be used as elective credit toward the overall credit total required for graduation.** A complete description of this option is given later in this section of the catalog under the heading of "Pass/Fail Option."

RD - Report of Grade Delayed: If an instructor fails to assign a grade for a course and the grade entry is left blank, the Registrar's Office will assign an "RD" and the "RD" will remain a part of the student record until the earned grade has been received by the Registrar's Office. To submit the grade, a Change of Grade form is required along with the Dean's signature.

S/NS - Satisfactory/Non-Satisfactory: Some courses are designated by academic departments for Satisfactory (S)/Non-Satisfactory (NS) grading only. This is not a grading option that students can choose. This grading option can only be determined by a department/school. The NS grade has the same effect as an "F" (Fail) on the grade point average. An "S" grade does not affect the GPA, and the credits earned are counted toward total credits needed to graduate. Courses graded using this grade mode will not be converted to a standard letter grade.

V - Unofficial Withdrawal: This grade has the same effect as "F" (Fail) on the grade point average (GPA) and is awarded by the instructor for excessive absences or failure to withdraw officially from a course.

W - Official Withdrawal: No penalties incurred. Not included in the attempted or earned GPA.

B. Grade Reports

Students receive their mid-semester grade reports electronically via their personal ZAGWEB accounts. Final grades are obtained by the student over ZAGWEB or through the Registrar's Office.

C. Grade Point Averages

The GPA is calculated by dividing the total quality points earned by the total graded credits. The letter grades AU, I, IP, P, RD, S, and W do not count as credits graded and quality points are not awarded. There are several GPA's including the semester GPA, cumulative GPA, major GPA, and graduation GPA. A minimum cumulative and major grade point average of 2.00 is required for an undergraduate degree. Transfer credits are not used in calculating the grade point average at Gonzaga University.

D. Removal of Incompletes

When an incomplete grade (I) has been officially awarded and a provisional grade has been recorded by the instructor, the provisional grade will become final after thirty days have elapsed in the subsequent semester, unless the student fulfills the missing requirements and the instructor informs the Registrar on an official Change of Grade form that the course requirements have been fulfilled. Students must observe this thirty-day grace period. If no provisional grade was submitted, the "I" grade becomes an "F" grade and is recorded on the transcript at this time. The "I" (Incomplete) grade remains on the transcript along with the earned grade.

E. Extension of Incomplete Grades

Students who are unable to meet the deadline for the removal of an incomplete grade for a serious and legitimate reason may petition the Dean of their School for an extension of the deadline. If the Dean approves the petition, he or she will forward it to the Provost & Senior Vice President for approval.

F. Change of Grade

A change of grade requires a Change of Grade form signed by both the instructor and the Dean of the school in which the course was offered. Grades are normally changed only because of calculation error or failure to consider a significant amount of student work.

G. Repeating Courses for Improved Grade

In an effort to improve the GPA, an undergraduate student can repeat any course with another course of the same designation. The original course and grade will remain recorded on the student's transcript but will not be counted into the student's GPA. The cumulative credits and GPA will be adjusted to reflect the last credits and grade earned. Courses for which a student received a grade carrying no quality point value, such as W, (X prior to Fall 1996), and AU, may be re-taken in subsequent semesters; these grades are not included in the repeat course policy jurisdiction. **Courses retaken as an independent study or directed reading do not qualify under this policy. Only courses re-taken at Gonzaga University qualify to improve the GPA under the University's Repeat Policy.**

Academic departments are permitted to have more restrictive policies regarding repeating and/or withdrawing from courses. Students are advised to work carefully with their academic advisors and departments regarding these departmental policies.

H. Pass/Fail Grading Option (selected by undergraduate students)

Designated elective courses may be taken on a pass or fail basis at the option of the student, not of the instructor. The Pass/Fail option by a student should not be confused with the Satisfactory/Non-Satisfactory option offered and graded for courses predetermined by academic departments.

1. A course with a "P" grade earned at the option of the student does not fulfill any course requirement for a core, major, minor, or concentration requirement.
2. The credits earned for a "P" grade count toward the 128 minimum credits necessary for a degree. A "P" (pass) grade will not affect the grade-point average; a fail will have the same effect as any "F" (fail) grade.
3. A student's level of performance to earn a "P" grade must correspond to the letter grade of "C" or better.
4. Undergraduate students wishing to exercise the Pass/Fail option must fill out the Pass/Fail Grade Option form in the Registrar's Office prior to the last published date to Withdraw from courses and may not revoke their decision after this date.

5. Students are allowed to designate at most six (6) credits as Pass/Fail each Academic Year.
6. Any course failed ("F" grade) may not be repeated on a Pass/Fail basis.

Academic Citizenship

Academic Freedom of Students

Freedom of Expression: Students are free to take reasoned exception to the views offered in particular courses of study. They may, however, be required to know thoroughly the particulars set out by the instructor, but are free to reserve personal judgment as to the truth or falsity of what is presented. Knowledge and academic performance should be the norms by which students are graded.

Academic Integrity

Gonzaga University is committed to supporting and protecting academic integrity in all aspects of what we do. Our [Academic Integrity Policy](#) was developed with that commitment in mind. We encourage all students, faculty and staff to familiarize themselves with the policy.

Integrity Formation

The institution's mission statement expresses Gonzaga University's self-understanding through its Catholic, Jesuit and humanistic heritage and identity. These spiritual and intellectual traditions are expressed in the ideals of reflective and critical thought, ethical discernment, innovation, and commitment to social justice. The ideals imply a deeply held, rigorously maintained, and clearly articulated standard of academic integrity. We believe that a commitment to academic integrity contributes, not only to a campus climate of trust and community, but also to individual integrity, honesty and well-being. Conversely, violations of academic integrity are detrimental to both the community and to the individual. This belief entails just sanctions for violations of these ideals, the details of which are contained herein. Just sanctions require that all students and faculty be aware both of the sanctions and of the policies that they enforce.

Resources for faculty and students can be found at www.gonzaga.edu/academicintegrity.

Grade Appeal

Students must maintain standards of academic performance set forth by the University if they are to receive the certificate of competence implied by course credits and degrees. The instructor is the usual and competent judge of these matters. But students must be protected against the rare case of unjust grading and evaluation. Allegations of unfair or prejudiced grading may be brought to the attention of and reviewed by the department Chair, by the Dean of the appropriate school and, if necessary, by the Provost & Senior Vice President, whose decision is final.

Minimum/Maximum Course Loads

Full-Time Status: The normal course load of a regular full-time undergraduate student is sixteen (16) semester credits. For academic purposes, the minimum full-time course load is twelve (12) credits. The maximum load for students in good standing is eighteen (18) semester credits in one semester; for students on probation, the maximum is fifteen (15) credits or five courses.

Part-Time Status: Undergraduate students are considered to be enrolled at three-quarters time if enrolled in nine (9) to eleven (11) credits, half-time if enrolled in six (6) to eight (8) credits, and less than half time if enrolled in five (5) credits or less per semester.

Good Academic Standing, Unsatisfactory Academic Progress, Probation, and Academic Dismissal

Students are on **Academic Probation** whenever the *term and/or cumulative GPA* earned falls below a 2.00. To be in **Good Academic Standing** with the University, students must maintain a *cumulative GPA* of 2.00 as determined at the end of every semester, beginning with the completion of the student's second regular (non-summer) semester at Gonzaga University. Good Academic Standing is required for all graduating students, and it may affect a

student's ability to receive financial aid, scholarships, or to represent Gonzaga in extra-curricular activities.

Any student on academic probation will have his/her student status reviewed by the Committee on Academic Standing. The conditions of academic probation are specified in a letter sent through Zagsmail to the student from the Committee. Students are expected to comply with all stipulations made in the letter and any additional requirements placed upon them as a result of academic probation.

Students on academic probation, regardless of their academic standing, may be subject to academic dismissal from the University. A notation of "Academic Dismissal" will appear on transcripts. Dismissed students have an opportunity for appeal. Directions for this process are indicated in the dismissal letter sent to the student.

Those receiving financial aid also may be subject to Financial Aid Satisfactory Academic Progress Probation and/or Suspension, which may result in additional financial consequences. Further information can be found in the Financial Aid section of this catalog.

Class Attendance Policy

Gonzaga University presumes that students have sufficient maturity to recognize their responsibility for regular class attendance. Gonzaga University has this policy on absences because illness or other good reasons may prevent attendance, and because the intensive nature of some courses dictates that attendance may be a factor in the student evaluation process. Individual instructors are not required to enforce the University Class Attendance Policy but may do so at their own discretion. Therefore, students should check with the syllabus for each course to confirm the instructor's specific attendance policy, which should be clearly delineated within each syllabus. No instructor may enforce an attendance policy that is more restrictive than the standard university policy:

Gonzaga's standard policy on absences stipulates that the maximum allowable absence is two class hours (100 minutes) for each class credit. For three-credit classes, the maximum absence is, therefore, six class hours (300 minutes). Classes scheduled to meet for more than 50 minutes have more than one class hour for each meeting; for example, a class which meets for 75 minutes has one and one-half class hours for

each scheduled meeting. Instructors may report absences to the Registrar's Office, which will in turn notify the students. The grade given for excessive absences is a "V," which has the same effect as "F" (Fail) and is counted in the GPA. Faculty are encouraged to work with individual students to ensure academic success.

When students are required to be absent from class for activities sanctioned by the University, the University should help students resolve these conflicting commitments. Students who will be absent due to University-sanctioned activities are responsible for providing to faculty written documentation of the travel dates from the University staff directing or advising the activity. This documentation should be provided as far in advance as reasonably possible (ideally at the beginning of the semester). On receipt of proper documentation, instructors should make efforts to both satisfy the course objectives and meet the students' needs due to absences related to University-sanctioned activities.

The University Class Attendance Policy may be modified for qualified students with documented short- or long-term disabilities and/or for religious accommodations. For more information or case consultation, contact the Disability Access Office or, for matters related to religious accommodations, the Office of Diversity Equity & Inclusion. Additionally, students who feel that they have experienced a misuse of the University Class Attendance Policy, or who feel they have unfairly received a "V" grade, may appeal to the Dean of the College/School in which the course is offered.

Approval of University-Sanctioned Activities

Any group wishing to have activities sanctioned under the scope of the University Class Attendance Policy must submit their rationale in writing to the Provost's office for approval. That submission must include written support from the chief administrator of the division wherein the activity is housed (e.g. Academic Dean, Athletics Director, Associate Provost for Student Development, etc...). A list of university-sanctioned activities will be maintained by the Provost's office. Modification of this list will take place as needed at the Provost's discretion and will not require amendments to the University Class Attendance Policy. The University staff responsible for directing or advising approved activities must provide written documentation of potential student absences as outlined in the University Class Attendance Policy.

Faculty Initiated Drop Policy

Students should contact professors or academic departments prior to the first class session if they plan to be absent. If a student misses the first class meeting without notifying the instructor or academic department, the student may be dropped from the course at the discretion of the instructor and provided that the course is closed. Professors will report absences to the Dean, who, upon approval, will notify the Registrar's Office to drop students from course sections. For further information about unexcused absences, please refer to Gonzaga's "Class Attendance Policy."

Final Examinations

Final examinations are held at the end of each semester, and, at the option of the instructor, examinations are held at mid-semester. Final examination times are listed for each semester on the Registrar's Office web pages. Students making their travel arrangements for the end of each semester must take into account these final examination times.

Final examinations or their equivalent can be administered by instructors only on the day and at the time indicated in the Final Exam Schedule; any exceptions to this procedure must have the explicit approval of the appropriate Dean.

Enrollment Verifications

Once a month the Registrar's Office transmits enrollment data to the National Student Clearinghouse. This data is used to provide enrollment verification of students that can be accessed by a third party including lenders of federal and state loans. The Registrar's Office, upon timely notice, will also provide to any student a letter verifying his/her enrollment status to any agency. Students may print out their verification for insurance providers by accessing the National Student Loan Clearinghouse link through ZagWeb.

University Honors

Academic Recognition

An undergraduate student whose grade-point average for a semester is 3.50 through 3.84 will be placed on the Dean's List. An undergraduate student whose grade point average for a semester is 3.85 through 4.00 will be placed on the President's List. Students must be enrolled in 12 or more academic credits to be eligible for the above lists and courses in which the department has predetermined with the Satisfactory/Non Satisfactory (S/NS) grading option will count in the 12 credits.

Graduation Honors

The academic achievements of graduating students at the baccalaureate level are formally recognized at the public Commencement exercises, appear in published lists of graduates, and are recorded on transcripts. Only Gonzaga University credits are used in computing graduation honors. To calculate a student's achieved honors designation, grade point averages are truncated two decimal spaces and are not rounded up.

Students who have earned 64 Gonzaga University credits are graduated Cum Laude with a cumulative grade-point average between 3.50 and 3.69, Magna Cum Laude between 3.70 and 3.89, Summa Cum Laude of 3.90 or higher. For recognition purposes at Commencement, eligibility for these honors is determined based on the cumulative GPA as of the end of the fall semester.

Students who have earned at least 48, but less than 64, Gonzaga University credits are graduated 'With Distinction' if the cumulative grade-point average is 3.50 or higher.

University Leadership Programs

Hogan Entrepreneurial Leadership Program: The Hogan Entrepreneurial Leadership Program is a three-year undergraduate minor founded on the Jesuit educational philosophy of educating the whole person. Its purpose is to prepare students to create new ventures that make a positive difference in society. This student-centered program is designed for promising individuals from any major who demonstrate academic excellence, leadership, creativity, and a commitment to serve others.

Comprehensive Leadership Program: The Comprehensive Leadership Program at Gonzaga University is a formal, for-credit academic leadership program intended to complement students' academic goals through theoretical study and experiential learning culminating in the Minor in Leadership Studies. The program was inaugurated in 2002 in an effort to support the University mission of creating leaders, in a variety of fields, dedicated to the common good. The CLP offers a unique scholarly environment for students from every major, and provides transformational and reflective experiences focused on three dimensions: self-awareness, relationship with others, and community action for the common good. Undergraduates take the Minor in Leadership Studies in conjunction with their chosen major in any academic field, including business, engineering, nursing, computer science, biology, chemistry, education and the liberal arts. Admission to the Comprehensive Leadership Program is competitive and the application takes place during the fall of a student's first year, and is based on demonstrated leadership and desire to study leadership through written essays, individual interviews, group interviews, and student's grade point average. The CLP prepares students for real-life leadership as it strives to produce graduates with a deep and holistic understanding of leadership, the meaning of moral character, and an ethic of care and service.

University Honor Societies

Alpha Sigma Lambda: Devoted to advancement of scholarship and to the recognition of non-traditional students continuing their higher education. For the non-traditional student, the society stands as an inspiration for continued scholastic growth, a builder of pride through recognition, and an incentive to associate similarly motivated students. Qualifying candidates for Alpha Sigma Lambda are academically in the top ten percent of the non-traditional student population (undergraduate 24 plus years of age), attending Gonzaga University, and who have completed a minimum of 24 credits at Gonzaga University, with a G.P.A of 3.40 or higher.

Alpha Sigma Nu: The national Jesuit honor society for third year and fourth year men and women students of outstanding academic achievement, service, and loyalty to the ideals of Jesuit education.

Beta Alpha Psi: An honorary organization for financial information students and professionals. The primary objective of Beta Alpha Psi is to encourage and give recognition to scholastic and professional excellence in the business information field. Members of Beta Alpha Psi have significant opportunities for service, networking, and personal/professional development. Membership is open to students in accounting, finance and information systems who meet the academic and service requirements. For more information, see <https://www.gonzaga.edu/school-of-business-administration/undergraduate-programs/undergraduate/accounting/beta-alpha-psi>

Beta Gamma Sigma: The national business honor society. Membership is for the top 10% of the junior and senior-year business majors, respectively, and the top 20% of the Master of Business Administration class.

Chi Alpha Sigma: A nonprofit organization established to recognize college student-athletes who excel both on and off the field of competition.

Chi Sigma Iota: CSI is an international honor society that values academic and professional excellence in counseling. We promote a strong professional identify through members (professional counselors, counselor educators, and students) who contribute to the realization of a healthy society by fostering wellness and human dignity.

Kappa Delta Pi: The national education honor society where membership is limited to third year and fourth year students enrolled in one of the phases of the education program of the School of Education, and is based on academic and professional abilities.

Lambda Pi Eta: The national communication honor society for outstanding students in any of the communication arts. Membership in Iota Rho, our local chapter, is limited to third and fourth year students who have achieved high academic achievement, leadership, and service, with a demonstrated commitment to the discipline of communication.

The National Honor Society for Dance Arts honors students of outstanding artistic merit, leadership, and academic accomplishments for those minoring in the art of dance. Membership is limited to senior dance minors who have maintained a 3.5 GPA or higher in academic dance studies and who demonstrate a commitment to the discipline of dance.

The National Honor Society for Collegiate Scholars: The National Society of Collegiate Scholars (NSCS) is an honors organization that recognizes and elevates high achievers. NSCS provides career and graduate school connections, leadership and service opportunities and gives out a million dollars in scholarships annually. NSCS members are deeply committed to scholarship, leadership, and service and as a result, are impacting their campus and local communities every day.

Omicron Delta Epsilon: This organization is the international honor society in economics. Eligibility requirements for Gonzaga's Epsilon chapter are the completion of 12 credits of economics courses with a minimum 3.2 average in those courses and a minimum 3.0 gpa in all college courses.

Phi Alpha Theta: Founded in 1921, Phi Alpha Theta is the national honor society in history, whose mission is to promote the study of history through the encouragement of research, good teaching, publication and the exchange of learning and ideas among historians. Since the foundation of the Xi-Gamma Chapter of Phi Alpha Theta at Gonzaga University, hundreds of Gonzaga's top students in history have joined the 350,000 members in 900 chapters across the U.S.

Phi Sigma Iota: Phi Sigma Iota recognizes outstanding accomplishment in the study or teaching of any of the academic fields related to foreign language, literature, or culture. These fields include not only modern foreign

languages, but also other fields with a significant foreign language component.

Phi Sigma Tau: The national honor society in philosophy founded in 1930 which recognizes philosophy students for their academic achievement. Now an international honor society, it is open to all Gonzaga students who have completed a minimum of twelve philosophy credits and have met particular grade requirements.

Pi Mu Epsilon: Incorporated at Syracuse University in 1914, Pi Mu Epsilon is a national mathematics honor society dedicated to the promotion and recognition of scholarly activity in the mathematical sciences. WA Epsilon, the local chapter at Gonzaga University is one of over 380 chapters throughout the country. Established in 1968, WA Epsilon has been an active chapter since 2014. Events are held throughout the academic year, often in conjunction with other activities in the mathematics department. Students are invited to join WA Epsilon each spring if they satisfy the eligibility requirements. An induction ceremony is held in April of each year.

Pi Sigma Alpha: The national honor society for students majoring in political science at the undergraduate and graduate levels. Gonzaga's Chapter, Alpha Beta Xi is open to students in the junior and senior year. Membership is attained through academic achievement at the highest level in both the discipline and in overall academic work.

Psi Chi: The national honor society in psychology, founded in 1929 for the purposes of encouraging and maintaining excellence in scholarship, and advancing the science of psychology.

Sigma Tau Delta: The international English honor society. A member of the Association of College Honor Societies, it was founded in 1924 at Dakota Wesleyan University. With over 750 active chapters located in Europe, the Caribbean, and the United States, there are more than 1,000 faculty sponsors, and approximately 8,500 members inducted annually. Sigma Tau Delta's central purpose is to confer distinction upon students of the English language and literature in undergraduate, graduate, and professional studies.

Sigma Theta Tau International (STTI): This organization is one of the largest and most prestigious nursing organizations in the world. The name of the organization was chosen from the Greek words meaning love, courage, and honor. STTI's mission is to "support the learning, knowledge and professional development of nurses committed to making a difference in health

worldwide." As the international honor society of nursing, it recognizes superior achievement, fosters high professional standards and the development of leadership, encourages creative work, and seeks to strengthen commitment to the ideals and purposes of the profession.

Tau Beta Pi: The national honor society for undergraduate engineering (all disciplines) majors of outstanding academic achievement, leadership, and community service.

Theta Alpha Kappa: Established in 1976 in New York for the purpose of recognizing the academic achievements of religion and theology students, Theta Alpha Kappa has grown to more than two hundred chapters nationally in four-year educational institutions ranging from small religiously affiliated colleges to large public research institutions. It is the only national honor society dedicated to recognizing academic excellence in baccalaureate and post-baccalaureate students and in scholars in the fields of religious studies and theology. It publishes the Journal of Theta Alpha Kappa featuring student scholarship, in which former Gonzaga students have been published.

Upsilon Pi Epsilon: Upsilon Pi Epsilon is the International Honor Society for the computing and information sciences. The mission of Upsilon Pi Epsilon is to recognize academic excellence in computer science and engineering at both the undergraduate and graduate levels, and is endorsed by the Association for Computing Machinery and the IEEE Computer Society.

University Academic Awards

Each spring the faculties of the University meet in convocation to recognize the academic achievements of individual members of the University community. Among others, these awards include:

The Alumni Association Award: The gift of the Gonzaga Alumni Association to a member of the graduating class who has shown excellence in his or her field of study and involvement in University and student affairs, and who has created an impact on the community of Spokane.

The William A. Garrigan, S.J., Award: The gift of the University in memory of Father Garrigan to the member of the graduating class who has achieved the highest cumulative grade point average for four years of undergraduate work at Gonzaga.

Fourth Year, Third Year, Second Year, and First Year Awards: Each one of the first year, second year, third year, and fourth year awards will be granted to the undergraduate student who had the highest GPA calculated for the fall and spring semesters, and who was enrolled for 30 more academic credits in the academic year. If there is a tie, the award will be granted to the student who earned the highest (total) cumulative GPA. Only Gonzaga grades are considered in the GPA. Courses predetermined or mandated by academic departments as Satisfactory/Non-Satisfactory (S/NS) grading only will be counted in the 30 credits.

University Confidentiality of Records Policy

The Family Educational Rights and Privacy Act of 1974 (FERPA), also known as the Buckley Amendment, is a federal law regarding the privacy of student education records and the obligations of the institution, primarily in the areas of release of records and access provided to these records.

The intent of the legislation is to protect the rights of students, and to ensure the privacy and accuracy of education records. The Act applies to all institutions that are recipients of federal aid administered by the Secretary of Education.

Education Records

Any record maintained by Gonzaga that contains information that is personally identifiable to a student (in whatever format or medium) is considered to be an education record with some narrowly defined exceptions to include the following:

- Sole possession records or private notes held by a school official that are not accessible or released to other personnel.
- Law enforcement or campus security records created and maintained by a law enforcement agency for a law enforcement purpose.
- Employment records of an individual who is employed by the institution unless the employment is contingent on student status.
- Medical/psychological treatment records.
- Alumni records created after the student has graduated or left the institution.

Student Rights

At Gonzaga, FERPA rights belong to the student who is in attendance beginning with his/her first day of class regardless of age. The definition of a student applies to all students including continuing education students, students auditing a class, distance education students, and former students.

FERPA affords students the following basic rights in respect to their education record:

- Right to inspect and review their education record maintained by the school.
- Right to request an amendment to the record that the student believes are inaccurate or misleading.
- Right to consent to disclosure of personally identifiable information.
- Right to file a complaint with the U.S. Department of Education concerning alleged failures to comply with the requirements of FERPA.

Challenging the Content of Education Records

A student who wishes to challenge information in their records must submit, in writing, a request for a hearing to the appropriate office maintaining the record, listing the specific information in question and the reasons for the challenge.

Hearings will be conducted by a university official who has no direct interest in the outcome of the hearing.

Students shall be afforded a full and fair opportunity to present evidence relevant to the reasons for the challenge.

The hearing officer will render a decision, in writing, noting the reason and summarizing all evidence presented within a reasonable time frame after the challenge is filed.

Should the hearing be in favor of the student, the record shall be amended accordingly. Should the request be denied, an appeal may be made in writing, and submitted to the University Registrar within 10 days of the student's notification of the decision of the hearing officer. The appeal shall be heard by

an appeals board of three senior University officials and a decision rendered, in writing, within a reasonable period of time.

Parent Rights

Once a student reaches the age of 18 or begins their attendance at a postsecondary institution regardless of age, FERPA rights transfer from the parent to the student. Parents can obtain information from their child's education record if the student has submitted a signed consent form to the Registrar's Office or if proof of dependency status has been provided through the receipt of a copy of the most recent income tax statement by the Registrar's Office.

School Official

A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, or collection agent); a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. Upon request, the University also discloses education records without consent to officials of another school in which a student seeks or intends to enroll.

Legitimate Educational Interest

When a school official requires access to a student's record in order to perform their instructional, supervisory, advisory, or administrative duties. FERPA allows universities to give school officials who have legitimate educational interest access to education records without the written and signed consent of the student.

Directory Information

Those data items that are generally not considered harmful or an invasion of privacy if disclosed. Each institution establishes what it considers to be directory information. Gonzaga University does not authorize distribution of listings of student names with addresses and/or telephone numbers to any entity outside of the University unless it is required by law or otherwise allowed by FERPA. Gonzaga has deemed the following information as directory information:

- Student name
- Addresses & phone numbers
- E-mail addresses
- Place of birth
- Major field of study
- Dates of attendance
- Full or part time enrollment status
- Year in school (class)
- Degree(s) received and date(s) conferred
- Scholastic honors and awards received
- Other educational institutions attended
- Visual images (through photographs or videos)
- Height and weight of athletic team members

Directory information may be published in a student directory or event program and released to the media and to the public for enrolled students.

Every student is given the opportunity to have directory information suppressed from public release through their signed consent on a form available from the Registrar's Office. With this agreement, the information will not be disclosed unless authorized under the Family Educational Rights and Privacy Act of 1974 (FERPA).

Annual Notification

Gonzaga notifies eligible students annually of their rights under FERPA. Gonzaga provides this notification to each student via e-mail and through publications such as the University catalogs.

College of Arts and Sciences

Dean: Annmarie Caño

Associate Deans: Matt Bahr, Patricia Terry

The College of Arts and Sciences develops women and men for others, ready to face the intellectual, vocational, and spiritual challenges of today and tomorrow.

The College is primarily responsible for delivering courses in the University Core curriculum, the center of Gonzaga's humanistic, Jesuit, Catholic education. The departments and programs that make up the College also offer students majors, minors and concentrations in liberal arts, humanities, and specialized fields, preparing them for immediate careers or for further studies. For students pursuing Arts and Sciences majors, the College also has a secondary language requirement.

Degree Programs in the College of Arts and Sciences

Bachelor of Arts, General: This is the regular B.A. degree offered by the College; it also is available with a teaching option in some majors.

Bachelor of Science, General: This is the regular B.S. degree offered by the College.

Bachelor of Arts, Honors: This degree is awarded to students who pursue their basic undergraduate education under the direction of the Honors Program. A specific core Honors curriculum, accomplished primarily through colloquia and seminars, satisfies university core requirements for those students who obtain this degree. The degree is available in all majors within the College that offer the B.A.

Bachelor of Science, Honors: This degree is awarded to students who complete the requirements for a major in a field which offers the B.S. and who pursue their basic undergraduate education under the direction of the Honors Program; a specific Honors curriculum satisfies the university core requirements for those students who obtain this degree.

College of Arts and Sciences Degree Requirements

In addition to the general degree requirements of the University, including the University Core curriculum, students earning all Bachelor's degrees offered by the College of Arts and Sciences must complete the following requirements:

1. Completion of the requirements for a major within the College.
2. Completion of a senior thesis, comprehensive exam, capstone, or other culminating experience designed by the major department.
3. Language Requirement: Competency in a second language (classical or modern) at the intermediate level (courses numbered 201-202) is required for students continuing in the study of a language. Students beginning study in a language they have not previously studied can fulfill the requirement by completing one year at the beginning level (courses numbered 101-102). Non-native speakers of English who have completed the required English core credits at Gonzaga may petition the Associate Dean of Arts and Sciences for a waiver of this requirement.

Please note: Every degree requires a minimum of 128 completed semester credits. No core, major, minor, or concentration courses may be taken under the Pass/Fail option.

Teacher Certification

In order to obtain a teaching certificate, students need to complete a degree with an appropriate major and also to complete professional educational requirements. Since most future teachers obtain their degree in the College of Arts and Sciences, they have an academic advisor in that college. In addition, they need an advisor from the Teacher Education Department, who is usually assigned to them when they register for EDTE 101L.

Art

Chairperson: Shalon Parker

Leo Kreielsheimer Professor of Fine Arts: M. Rude

Professors: M. Farrell (Emerita), T. Gieber (Emeritus), S. Parker

Assistant Professors: R. Gil Zambrano, M. McCormick, L. Truitt

Gonzaga's Art Department offers students the opportunity to investigate a variety of visual experiences through a study of both the studio arts and art history.

The department offers one major and two minors:

Bachelor of Arts, Art major

Bachelor of Fine Arts, Art major

Minor in Art

Minor in Art History

The Bachelor of Fine Arts (B.F.A.) in Art is a professional degree in the fine arts intended to provide art majors with greater technical expertise and conceptual proficiency in studio art. It gives students a much more competitive edge when entering the job market for positions in design or media production, applying to graduate programs in the visual arts, or pursuing a career as a practicing fine artist.

The Bachelor of Arts (B.A.) in Art provides students a comprehensive education in the visual arts and art history. It requires fewer credits in art than the B.F.A. and thus allows greater flexibility for students to pursue additional academic interests or a second major in another area of study.

The department is located in the Jundt Art Center. The Jundt Art Center maintains studios in ceramics, design, drawing, painting, and printmaking. Courses in photography and filmmaking are offered in the Journalism/Broadcast and Electronic Media Studies Building. A theatre-style lecture hall in the Jundt Art Center provides space for art history, visiting artist

lectures, and video/film presentations. Some of the department's courses are offered at Gonzaga-in-Florence.

The Jundt Art Museum provides storage and exhibition areas for Gonzaga University's permanent art collection, plus changing exhibits of local, regional, national, and international artwork. Students and faculty regularly take advantage of the many opportunities to study and learn directly from artworks in the Jundt Art Museum.

The Gonzaga University Urban Arts Center (GUUAC) in downtown Spokane provides exhibit space for Gonzaga art students and faculty, local artists, and visiting artists from outside the region. The GUUAC brings the experience of contemporary art directly to the broader Spokane community.

VART 101 Drawing I credit(s): 3

The graphic representation of visual reality in a variety of media; emphasis is directed toward an understanding of observation, form, line, value, composition, and space. Fall and Spring.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

Restriction(s):

Must be the following Class(es): Freshman, Sophomore

VART 112 Digital Art Foundations credit(s): 3

An introduction to basic design and digital art, using the computer as a primary tool and Adobe Photoshop, as well as drawing and painting materials. Fall and Spring.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

Restriction(s):

Must be the following Class(es): Freshman, Sophomore

VART 115 Art Appreciation credit(s): 3

An introduction to the visual arts of the Western world. The basic premise of the course stems from a conviction that painting, sculpture, and architecture reflect the times and places that produced them. Fall and Spring.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

VART 121 Painting Methods and Materials credit(s): 3

An introduction to a variety of methods and mediums that are used in basic painting. Students will learn how to prepare different surfaces for painting, including paper, panel and canvas.

Intended for the non-art major/minor. Fall and Spring. Fulfills the following degree requirement(s): Core: Fine Arts and Design.

VART 140 Ceramics: Hand Building credit(s): 3

This course will focus on hand-building techniques such as coiling and slab construction as well as an introduction to the potter's wheel. Fall and Spring.

- VART 141 Ceramics I** **credit(s): 3**
 A basic experience with clay. Emphasis on hand building techniques with an introduction to wheel forming. Secondary emphasis on developing fundamentals of clay and glaze technology. Fall and Spring.
 Fulfills the following degree requirement(s): Core: Fine Arts and Design
- VART 170 Photographic Art** **credit(s): 3**
 A survey of the role of photography in media and art as well as contemporary human experience. The course emphasizes creative control of digital cameras and an understanding of the principles of photography in creating images with technical and high aesthetic value.
 Fulfills the following degree requirement(s): SOSJ - Block D, Core: Fine Arts and Design
Equivalent(s): JOUR 170, SOSJ 170
- VART 180 Special Topics** **credit(s): 1-3**
 Course repeatable for 9 credit(s).
 Topics to be determined by instructor.
- VART 190 Art Survey: Prehistoric to Medieval** **credit(s): 3**
 A study of art and architecture from the Prehistoric era to the late Middle Ages. Fall.
 Fulfills the following degree requirement(s): Core: Fine Arts and Design
- VART 191 Art Survey: Renaissance to Modern** **credit(s): 3**
 A study of art and architecture from the late Middle Ages to modern times. Spring.
 Fulfills the following degree requirement(s): Core: Fine Arts and Design
- VART 192 Independent Study** **credit(s): 1-3**
 Course repeatable for 15 credit(s).
 Topic to be determined by faculty.
- VART 193 First Year Seminar:** **credit(s): 3**
 The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.
 Fulfills the following degree requirement(s): Core: First Year Seminar
Restriction(s):
 Must be the following Class(es): Freshman
- VART 201 Drawing II** **credit(s): 3**
 A continuation of VART 101. Spring.
Prerequisite(s): VART 101
- VART 202 Figure Drawing in Florence** **credit(s): 3**
 Course repeatable for 6 credit(s).
 Focuses on traditional drawing techniques and methods for depicting the physicality of the body and of space. VART 101 recommended as a pre-requisite but not required. Florence campus only.
 Fulfills the following degree requirement(s): Core: Fine Arts and Design
- VART 212 Sculpture Materials and Design I** **credit(s): 3**
 Explores the principal elements of design through sculpture and drawing projects. Students will develop their structural and perceptual senses, with a special emphasis on 3-D perception. Florence campus only.
 Fulfills the following degree requirement(s): Core: Fine Arts and Design

- VART 221 Oil Painting** **credit(s): 3**
 Basic problems in oil techniques, explorations in still life, landscape, and expression. Fall and Spring.
Prerequisite(s): VART 101 (or concurrent) or VART 112 (or concurrent)
- VART 230 3-D Design** **credit(s): 3**
 A foundational course focused on the principles and elements of design for three-dimensional/sculptural art. Students learn how to turn a concept/idea into a three-dimensional work of art. Fall and Spring.
 Fulfills the following degree requirement(s): Core: Fine Arts and Design
- VART 241 Ceramics II** **credit(s): 3**
 Qualities of form, function, and style are explored by means of wheel forming. Glaze development and approaches to firing techniques are introduced. Spring only.
Prerequisite(s): VART 141
- VART 292 Directed Studio** **credit(s): 1-3**
 Course repeatable for 6 credit(s).
 Variable credit, directed study for the student with a limited schedule. Studio work by arrangement. Fall and Spring.
- VART 293 Introduction to Florence** **credit(s): 3**
 A survey of Florentine history from its origins to 1400, with special reference to the artistic, social, and literary developments of the 13th and 14th centuries. Florence campus only.
 Fulfills the following degree requirement(s): Core: Fine Arts and Design
- VART 294 Florence of the Medici** **credit(s): 3**
 A study of the artistic, social, and literary developments in Florence from the time of Savonarola through the Florence of Michelangelo, Cosimo I, Galileo, and the Grand Dukes. Florence campus only.
 Fulfills the following degree requirement(s): Core: Fine Arts and Design
- VART 295 Spanish Art-Modern and Contemporary** **credit(s): 3**
 Granada campus only.
- VART 296 Spanish Art-Ancient, Medieval** **credit(s): 3**
 Granada campus only.
- VART 312 Sculpture Materials and Design II** **credit(s): 4**
 for 8 credit(s).
 Explores the principal elements of design through sculpture and drawing projects. Students will develop their structural and perceptual senses, with a special emphasis on 3-D perception. Florence campus only.
Prerequisite(s): VART 101 or VART 212
- VART 322 Fresco** **credit(s): 4**
 Exploration of Fresco techniques. Both buon and fresco secco are introduced. Students have hands-on experience and produce a fresco image during the course. Florence campus only.
- VART 323 Painting: Narrative/Figuration** **credit(s): 4**
 Focuses on the human figure and creating narrative in painting. Students work partly from direct observation, crafting works that explore imagery, symbolism, and setting. Fall only.
 Prerequisite: VART 221.
- Prerequisite(s):** VART 221
- VART 324 Painting: Theory and Practice** **credit(s): 4**
 Course repeatable for 8 credit(s).
 Focuses on contemporary theory in painting. Students create works on a single theme using different materials and processes.
Prerequisite(s): VART 221

- VART 341 Intermediate Ceramics Projects** **credit(s): 4**
 Course repeatable for 16 credit(s).
 A directed study of specific throwing and/or hand building techniques. Studio processes of glaze development and firing practices will be introduced.
Prerequisite(s): VART 241
- VART 349 Special Topics in Studio Art** **credit(s): 4**
 Course repeatable for 12 credit(s).
 Topics to be determined by instructor.
Restriction(s):
 Must be the following Class(es): Sophomore, Junior, Senior
- VART 350 Beginning Printmaking** **credit(s): 4**
 Introduces students to the development of imagery through a variety of etching and relief processes. Fall.
Prerequisite(s): VART 101
- VART 351 Beginning Screen Printing** **credit(s): 4**
 Introduces students to the development of imagery through the screen printing process. Spring.
Prerequisite(s): VART 101
- VART 352 Intermediate Printmaking** **credit(s): 4**
 Course repeatable for 8 credit(s).
 This course adds new printmaking techniques to the processes learned in beginning printmaking, refines the abilities already learned and expands the student's knowledge about image development through the printmaking process. Fall and Spring.
Prerequisite(s): VART 350 or VART 351
- VART 360 Museum Studies** **credit(s): 3**
 An exploration of the value and function of museums. History of Italian museums as outstanding examples of European Culture from the Renaissance to the 20th Century. Florence campus only. Can be substituted for one Art History requirement for Art majors.
 Fulfills the following degree requirement(s): ITAL - upper division elec
- VART 385 Figure Drawing I** **credit(s): 4**
 Course repeatable for 8 credit(s).
 Basic problems in developing the human figure and experiments with a variety of drawing media. Florence campus and main campus. Fall and Spring.
Prerequisite(s): VART 101 or VART 201 or VART 202
- VART 386 Figure Drawing II** **credit(s): 4**
 Course repeatable for 12 credit(s).
 A continuation of VART 385. Fall and Spring.
Prerequisite(s): VART 385
- VART 393 Special Topics Study Abroad** **credit(s): 3**
 Topic determined by instructor.
 Fulfills the following degree requirement(s): ITAL - upper division elec
Restriction(s):
 Must be the following Class(es): Sophomore, Junior, Senior
- VART 394 Special Topics in Art History** **credit(s): 3**
 Course repeatable for 9 credit(s).
 Consult instructor for topic as it will vary each semester. May be repeated for credit.
 Fulfills the following degree requirement(s): VART -History
Restriction(s):
 Must be the following Class(es): Sophomore, Junior, Senior
- VART 395 Art in The 19th Century** **credit(s): 3**
 A survey of European and American art from c. 1789 to 1914. Special emphasis placed on the relationship between art and political revolution, Orientalism and "Primitivism" in the visual arts,

the rise of landscape painting, the invention of photography, and the formation of an avant-garde identity in the nineteenth century. Fall.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

Restriction(s): Must be the following Class(es): Sophomore, Junior, Senior

VART 396 Art in the 20th Century credit(s): 3

A survey of European and American art from the 1890's to 1990's. Course topics include: the relationship between avant-garde culture and political radicalism; "Primitivism" in western art; the machine aesthetic; abstraction and its meanings; the influence and role of photography in modern culture; and the emergence of alternative and experimental visual media in the 1960's and 1970's. Spring.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

Restriction(s):

Must be the following Class(es): Sophomore, Junior, Senior

VART 397 Renaissance Art credit(s): 3

A survey of the painting, sculpture, and architecture of Italy, 1400-1600. Florence campus only.

Fulfills the following degree requirement(s): ITAL - upper division elec, Core: Fine Arts and Design

Restriction(s):

Must be the following Class(es): Sophomore, Junior, Senior

VART 401 Renaissance Architecture credit(s): 3

Renaissance Architecture, civil engineering, and design from Brunelleschi to Leonardo and Michelangelo and the interdependence of such fields to Florentine humanism and the development of European modernity. Florence campus only.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

VART 402 The Image of God credit(s): 3

A comparative study in religious art and architecture between the Western world and traditional Far Eastern aesthetics (Chinese and Japanese), focusing on the basic element of spirituality. Florence campus only.

VART 403 The Ancient City credit(s): 3

This course is a survey of the development of the city in the ancient world. Students will explore urban forms and processes as they are shaped by - and as they shape - their social, cultural, economic and physical contexts. The course will focus on representative urban centers of the ancient Near East, Egypt, and the Mediterranean world, tracing the evolution of ancient urbanism from the Near East to the classical worlds of Greece and Rome.

Fulfills the following degree requirement(s): VART - History, CLAS - Elective course, CLAS - Greek course, HIST - Pre

Equivalent(s): HIST 302

Prerequisite(s): HIST 101 or WGST 271C

VART 404 Archaeology of Ancient Greece credit(s): 3

This course examines the techniques and methods of Classical Archaeology as revealed through an examination of the major monuments and artifacts of Ancient Greece and its neighbors. Architecture, sculpture, vase and fresco painting, and the minor arts are all examined, from the Bronze Age through the Hellenistic period. We consider the nature of this archaeological evidence, and the relationship of classical archaeology to other disciplines such as history, art history, and the classical languages.

Fulfills the following degree requirement(s): VART - History, CLAS - Elective course, CLAS - Greek course, HIST - Pre

Equivalent(s): HIST 307 **Prerequisite(s):** HIST 101 or WGST 271C

VART 405 Archaeology of Ancient Rome credit(s): 3

This course examines the techniques and methods of classical archaeology as revealed through an examination of the major monuments and artifacts of ancient Rome and its neighbors. Architecture, sculpture, vase and fresco painting, and the minor arts are all examined, from the Early Iron Age through the Late Roman period. We consider the nature of this archaeological evidence, and the relationship of classical archaeology to other disciplines such as history, art history, and the classical languages.

Fulfills the following degree requirement(s): VART - History, CLAS - Elective course, CLAS - Rome course

Equivalent(s): HIST 308

Prerequisite(s): HIST 101 or WGST 271C

VART 406 American Cultures and Ideas credit(s): 3

This course will examine American history through an exploration of its culture. Throughout this course we will work towards defining what culture is, how it shapes expectations and assumption, how it motivates human actions and interactions, and how it is bound by time and place. Each student's ability to critically read cultural sources from an appropriately historical frame of reference will be tested in a variety of assignments, including weekly readings, writing assignments, and active class participation.

Fulfills the following degree requirement(s): VART - History

Equivalent(s): HIST 366

VART 407 Women Artists credit(s): 3

An introduction to women as creators of fine and decorative art within North America and Europe from the late 18th C. to today. The course also addresses how women have been represented in art by men and other women.

Fulfills the following degree requirement(s): VART - History, Core: Fine Arts and Design

Equivalent(s): WGST 350

Restriction(s): Must be the following Class(es): Sophomore, Junior, Senior

VART 408 History of Photography credit(s): 3

An introduction to the origins and history of photography from the 1830's to today. Spring, even-numbered years.

Fulfills the following degree requirement(s): VART - History

Restriction(s): Must be the following Class(es): Sophomore, Junior, Senior

VART 421 Advanced Painting Projects credit(s): 4

Course repeatable for 16 credit(s).

Advanced oil painting problems in still-life, figure and landscape. Fall and Spring.

Prerequisite(s): VART 324 or VART 323

VART 432 Core Integration Seminar: credit(s): 3

The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

- VART 441 Advanced Ceramics Projects** **credit(s): 4**
 Course repeatable for 12 credit(s).
 Exploration of advanced glazing and firing techniques. Emphasis is on developing individual expression in ceramic form.
Prerequisite(s): VART 341
- VART 442 Ceramic Materials** **credit(s): 4**
 A study of glaze theory and empirical formulation methods. Coursework is designed for the advanced student contemplating graduate school or a professional career in the studio. Upon sufficient demand.
Prerequisite(s): VART 241
- VART 443 Kiln Design and Construction** **credit(s): 4**
 An exploration of kiln types, firing methods, and chamber designs. A kiln will be constructed and fired. Upon sufficient demand.
Restriction(s): Must be the following Class(es): Junior, Senior
Prerequisite(s): VART 241
- VART 450 Advanced Printmaking Projects** **credit(s): 4**
 Course repeatable for 16 credit(s).
 This course continues to refine the abilities already learned and expands the student's knowledge about printmaking. The emphasis is on idea development in combination with technical skills to create a body of work through printed means. Individual exploration is encouraged and challenged through critical dialogue in combination with the teacher and fellow students.
Prerequisite(s): VART 352
- VART 466 Philosophy of Art** **credit(s): 3**
 An analysis of beauty, creativity, and taste according to the theories of Aristotle, Plato, Aquinas, and some contemporary philosophers. Several representative works from all areas of the fine arts are examined in the light of the aesthetic principles of classical philosophy.
Equivalent(s): PHIL 472
Prerequisite(s): PHIL 201
- VART 472 Creative Filmmaking** **credit(s): 4**
 An exploration of moving images and digital video as they relate to documentary films and art. Students learn how artists employ digital video and moving images in their artistic work. They also learn how to apply fundamental visual strategies of digital media and technological tools, including media editing software such as Adobe Premiere Pro and After Effects, to the creation and editing of video. Lab fee. Fall.
Equivalent(s): INMD 410
Prerequisite(s): INMD 101(and VART 170 or JOUR 170 or JOUR 270 or SOSJ 261)
- VART 480 Special Topics Studio** **credit(s): 1-4**
 Course repeatable for 16 credit(s).
 Topic to be determined by Instructor.
- VART 485 Advanced Drawing Projects** **credit(s): 4**
 Course repeatable for 16 credit(s).
 Exploration of advanced drawing techniques.
Restriction(s): Must be the following Class(es): Sophomore, Junior, Senior
Prerequisite(s): VART 386
- VART 492 Independent Study** **credit(s): 1-4**
 Course repeatable for 16 credit(s).
 Specialized study by arrangement with individual studio faculty.

VART 493 Studio Practice credit(s): 1
for 1 credit(s).

Students begin a body of work that launches them towards their larger group of works to be shown in April of their senior year as part of the senior exhibition. Students discuss and learn about various forms of studio practice and how artists create spaces, projects, and situations for themselves. Group critiques of work-in-progress will take place on a weekly basis. Fall and spring.

Restriction(s):

Must be in the following Major(s) or Minor(s): Art, B.F.A., Art History

Must be the following Class(es): Junior, Senior

VART 494 BFA Solo/Two-Person Exhibit credit(s): 0

Students will exhibit a body of work in the local area, on or off campus. Students will be responsible for the planning, marketing, and installation of their solo or two-person show. Fall and spring.

Restriction(s):

Must be in the following Major(s): B.F.A.

Must be the following Class(es): Senior

VART 497 Art Internship credit(s): 0-6

Course repeatable for 6 credit(s).

Professional work experience in an art-related field.

VART 498 Research credit(s): 1-3

Course repeatable for 15 credit(s).

Individual research on an art topic approved by and arranged with a faculty member.

Fulfills the following degree requirement(s): VART - History

VART 499 Professional Practice credit(s): 2

Required of Art Majors. Open to art minors by departmental invitation only. A seminar designed to prepare the graduating student for vocations in art or postgraduate studies, culminating with a public exhibition of the senior's portfolio demonstrating learned skills. Enrollment by permission of instructor. Spring.

Restriction(s):

Must be the following Class(es): Senior

The department offers two degrees, one major and one minor:

Bachelor of Science, Biology major (optional Biology Research concentration)

Bachelor of Arts, Biology major (optional Biology Research concentration)

Minor in Biology

Biology is the study of living organisms and the environment in which they live. As such, the Biology Department emphasizes a broad education within the field to help students develop a comprehensive understanding of how life works. To prepare students to pursue biology-oriented careers, in fields such as medicine, dentistry, biotechnology, conservation science, environmental science, sustainability, research and teaching, the Biology Department offers a selection of courses and experiences that help students understand the unity, diversity and complexity of life using evolutionary principles as the unifying theme. Students in the biology program are first introduced to foundational themes and concepts and then pursue their area of interest through elective courses. In general, our elective courses fall into the main categories of comparative physiology, genetics, cell and molecular biology, and ecology. Students are free to explore their interests in any or all of these areas. Through inquiry-based laboratory experiences and opportunities to participate in research projects, Biology majors also acquire problem solving and critical thinking skills and are therefore well prepared for their next step whether it be graduate or professional programs, specific training in health care fields, work in a lab or field station, or combining their scientific training with another interest such as business, law or even the arts.

Biology majors can choose a Bachelor of Science (B.S.) or a Bachelor of Arts (B.A.) degree. The B.S. in Biology provides excellent preparation for students

pursuing continued training in graduate programs in a broad range of sub-disciplines, as well as medical, dental, and veterinary school. The B.A. in Biology allows more time for students to get a second major or take additional courses in other departments at the university, thus gaining a broader liberal arts education. For example, Biology majors who want to teach biology at the secondary level can participate in the teacher certification program. Many of our majors and students who minor in Biology are interested in opportunities to integrate biological principles with other fields, such as those that focus on the environment and sustainability, law, engineering, business, or scientific journalism. We encourage interdisciplinary studies and work closely with other departments at the university to develop and promote these kinds of opportunities for our students.

The Research Concentration within the Biology major is designed for students who want to explore graduate level training in science. Biology faculty members are committed to mentoring undergraduate students in their research labs and also support Gonzaga students who are interested in doing summer research at other institutions.

Biology majors from Gonzaga University are well prepared for a variety of careers or post-graduate education. Some go on to medical or dental school - recently our graduates have been accepted to Colorado State University, Creighton University, Georgetown University, Marquette University, Oregon Health & Science University, Tulane University, University of Colorado, University of Hawaii, and University of Washington, to name a few. Many of our graduates go on to graduate school—students have been accepted into programs at schools such as the University of California at Berkeley, Yale University, University of California at San Francisco, University of California at Irvine, Oregon State University, University of New Mexico, and University of Wisconsin–Madison, to name a few. Many of our students choose to participate in the Peace Corps or the Jesuit Volunteer Corps prior to pursuing post-graduate education. Others work in biotech or nature conservation fields after graduation, or earn their teaching credentials and work to make the world a more scientifically literate place.

Science impacts everyone in our society. To help promote an understanding of the nature of science and issues that affect us all, the department offers courses that specifically fulfill the Scientific Inquiry requirement of the University Core curriculum: Scientific Inquiry (BIOL 104 and 104L), Biological Systems (BIOL 181 and BIOL 181L), and Field Studies in Biodiversity (BIOL 159L, taught each summer in either Zambia or Ecuador).

*Students must earn a C- grade or better in BIOL 105/105L and BIOL 106 in order to take BIOL 205, 206, or 207. Students must also earn a C- grade or better in BIOL 205/205L, 206/206L, 207/207L and 399 in order to take BIOL 499. For upper division biology electives, a minimum of 10 credits (BS), 6 credits (BA), or 4 credits (Minor) must be biology courses taken from Gonzaga

faculty: students participating in School for Field Studies programs or other study abroad programs should make note. Credits from BIOL 497, Biology Internship, do not satisfy any requirements for the Biology Major or Minor.

All courses should be chosen in consultation with a faculty advisor.

B.S. or B.A. in Biology with Research Concentration

The Research Concentration is a challenging path within the Biology major. Its goals are to make research experiences available to more students, to show students the value of science education outreach through experiential learning, and to provide students with a more solid foundation in biological mathematics and science communication. It consists of a number of courses and experiences designed to prepare students to pursue research in some venue (graduate school, industry, government, medical school, or science education) after graduation. Students can enter the program at any time, although we anticipate most students will enter the program as sophomores and juniors.

To complete the Research Concentration, the following requirements are added to the requirements for the B.S. or B.A. degree in biology:

1. Participate in a significant research experience. This means working on an independent research project for the equivalent of 4 credits. Most students can fulfill this requirement in one summer of full-time research or four academic semesters of research while enrolled in other classes. Enrolling in the Research Concentration does not guarantee a research experience. It is the student's responsibility to secure a research position. This requirement can be fulfilled in the lab of a GU faculty member or with prior permission, at a different institution.
2. Present the results from the independent research (in oral or poster format) to the scientific community at a venue outside of the Gonzaga campus.
3. Write up the research results under advisement with your research mentor. Final papers will be turned in to the Research Coordinator the last month of the final semester you are enrolled at Gonzaga. If you did research off campus, see the Research Coordinator to arrange a local writing mentor.
4. Participate in science education outreach for 16 hours one semester (BIOL 295/CHEM 295).

5. Take BIOL 484 Research Seminar (1 credit) and attend a minimum of 12 biology-related seminars (including those in BIOL 484), and write and submit a seminar reflection for each seminar.
6. Take a college calculus course, Survey of Calculus (MATH 148) or Calculus and Analytic Geometry I (MATH 157).
7. Complete a statistics course (MATH 121 or MATH 321) or biological mathematics course, Biological Data Analysis (BIOL 305).

Courses:

BIOL 104 Scientific Inquiry credit(s): 2

This lecture and laboratory course content will be determined by the instructor to meet the learning objectives of the Scientific Inquiry requirement of the University Core. Fall and Spring.

Fulfills the following degree requirement(s): Core: Science Inquiry

Corequisite(s): BIOL 104L

Restriction(s):

Must be the following Class(es): Freshman

BIOL 104L Scientific Inquiry Lab credit(s): 1

Taken concurrently with BIOL 104.

Fulfills the following degree requirement(s): Core: Science Inquiry

Corequisite(s): BIOL 104

BIOL 105 Info Flow in Biology Systems credit(s): 3

This course provides a foundation in the principles of biology by examining the fundamental role of information in generating the properties of life. The course explores the molecular basis of biological information (codes, signals, structures) and its role in growth, development, communication, regulation, reproduction and evolution of living things. Fall and Spring.

Corequisite(s): BIOL 105L

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biochemistry, Biology, Biology, Biology, Comp Sci & Computation Think, Computer Science, Human Physiology, Nursing

BIOL 105L Info Flow in Biology Systems Lab credit(s): 1

Designed to provide students with an authentic scientific discovery experience, this laboratory involves the isolation, identification, and characterization of novel bacteriophages from local soil samples. Students learn how to approach scientific questions, make observations, record, analyze and report data. Taken concurrently with BIOL 105.

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biochemistry, Biology, Biology, Biology, Comp Sci & Computation Think, Computer Science, Human Physiology, Nursing

Prerequisite(s): BIOL 105, minimum grade: C- (or concurrent)

BIOL 106 Energy Flow in Biological Systems credit(s): 3

This course focuses on the biological processes of energy acquisition, how energy is used in biological systems, and how energy is transferred between organisms and through ecosystems. Human impacts to energy transfer will be covered and topics will integrate energy concepts from

cells to organisms to ecosystems. There is no laboratory associated with this course. Fall and Spring.

Prerequisite(s): BIOL 105, minimum grade: C- and BIOL 105L, minimum grade: C- (or concurrent) and CHEM 101, minimum grade: C- and CHEM 101L, minimum grade: C-

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biochemistry, Biology, Biology, Biology, Comp Sci & Computation Think, Computer Science, Human Physiology

Prerequisite(s): BIOL 105, minimum grade: C- and BIOL 105L, minimum grade: C- (or concurrent) and CHEM 101, minimum grade: C- and CHEM 101L, minimum grade: C- and CHEM 101L, minimum grade: C-

BIOL 159 Studies in Biodiversity credit(s): 1

Course repeatable for 2 credit(s).

This course is an optional continuation of BIOL 159L Field Studies in Biodiversity. Research projects initiated in the field in BIOL 159L will be concluded with further library research, completion of a technical or popular press article, drafting and editing a poster, and a presentation at a local or regional event. Fall.

Equivalent(s): BIOL 359

Prerequisite(s): BIOL 159L

BIOL 159L Field Studies in Biodiversity credit(s): 3

Course repeatable for 6 credit(s).

This course uses a field experience as a backdrop to learn about evolutionary, ecological and biogeographical processes that determine the ranges and biodiversity of organisms. The course begins with class work on the Gonzaga campus and is followed by 3-4 weeks in the field, where Gonzaga faculty and local experts will mentor students. Field locations vary by year and include Ecuador, Belize, Zambia, Costa Rica, or domestic locations. This course is designed for non-science majors. The class meets together with the students enrolled in BIOL 359L for biology majors. Summer.

Fulfills the following degree requirement(s): Core: Science Inquiry

Equivalent(s): BIOL 359L

BIOL 170 Introduction to Microbiology credit(s): 3

An introduction to microbiology for students in Nursing or other allied health professions who will not be majoring in Biology. The course includes basic cellular chemistry and genetics, as well as a survey of topics of clinical importance. Fall and Spring.

Corequisite(s): BIOL 170L

Restriction(s):

Must not be in the following Major(s): Biology, Biology

Prerequisite(s): (BIOL 105, minimum grade: C- or TRAN GBIO, minimum grade: T) and BIOL 105L, minimum grade: C- (and CHEM 101, minimum grade: C- or TRAN GCHM, minimum grade: T)

BIOL 170L Introduction to Microbiology Lab credit(s): 1

An introduction to methods of microbial analysis including the culture, safe handling, and genetic analysis of microbes. Taken concurrently with BIOL 170.

Corequisite(s): BIOL 170

BIOL 181 Biological Systems credit(s): 2

This course provides an exploration of the basic systems in biology from plants to animals and from cells to ecosystems for non-science majors. Additionally, this course provides elementary teacher candidates with the basic content knowledge needed to teach life science at the

elementary school level. Lab is required. Fall.
Fulfills the following degree requirement(s): Core: Science Inquiry

Corequisite(s): BIOL 181L

Restriction(s):

Must not be in the following Major(s): Biology, Biology

BIOL 181L Biological Systems Lab

credit(s): 1

Taken concurrently with BIOL 181.

Fulfills the following degree requirement(s): Core: Science Inquiry

Corequisite(s): BIOL 181

Restriction(s):

Must not be in the following Major(s): Biology, Biology

BIOL 190 Special Topics

credit(s): 0-3

Course repeatable for 6 credit(s).

Topic to be determined by instructor.

BIOL 193 First Year Seminar:

credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must be the following Class(es): Freshman

BIOL 199 Investigations in Biology

credit(s): 2

Course repeatable 3 time.

Designed for non-science majors; this fulfills the core Scientific Inquiry requirement. Lectures and laboratory sessions emphasize science as an inquiry based process. Laboratory is required when offered.

Fulfills the following degree requirement(s): Core: Science Inquiry

Corequisite(s): BIOL 199L

Restriction(s):

Must not be in the following Major(s): Biochemistry, Biology, Biology, Chemistry, Chemistry

BIOL 199L Investigations in Biology Lab

credit(s): 1

Taken concurrently with BIOL 199.

Fulfills the following degree requirement(s): Core: Science Inquiry

Corequisite(s): BIOL 199

Restriction(s):

Must not be in the following Major(s): Biochemistry, Biology, Biology, Chemistry, Chemistry

BIOL 205 Physiology and Biodiversity

credit(s): 3

This course focuses on understanding the diversity of life on earth and the physiological mechanisms that allow organisms to live in a wide array of environments. A framework of physiology is used to compare and contrast clades of organisms. A prerequisite for most upper division biology elective courses. Fall.

Corequisite(s): BIOL 205L

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biology, Biology, Biology, Comp Sci & Computation Think

Prerequisite(s): BIOL 105, minimum grade: C- and BIOL 105L, minimum grade: C- and BIOL 106, minimum grade: C-

BIOL 205L Physiology and Biodiversity Lab credit(s): 1

Students are introduced to the diversity of organisms and physiological processes that allow organisms to live in a wide array of environments.

Fulfills the following degree requirement(s): Core: Writing Enriched

Corequisite(s): BIOL 205

BIOL 206 Ecology credit(s): 3

This course examines the ecological and evolutionary mechanisms that determine the distribution and abundance of species. Students will explore interactions between organisms and their environments at levels from individuals through ecosystems. A prerequisite for most upper division biology elective courses, and a prerequisite for BIOL 499. Must be taken Sophomore or Junior year, and cannot be taken Senior year. Spring.

Corequisite(s): BIOL 206L

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biology, Biology, Biology, Comp Sci & Computation Think

Prerequisite(s): BIOL 105, minimum grade: C- and BIOL 105L, minimum grade: C- and BIOL 106, minimum grade: C-

BIOL 206L Ecology Lab credit(s): 1

Field and laboratory experiments are used to investigate ecological mechanisms that determine the distribution and abundance of species. Taken concurrently with BIOL 206.

Corequisite(s): BIOL 206

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biology, Biology, Biology, Comp Sci & Computation Think

BIOL 207 Genetics credit(s): 3

This course promotes an understanding of genes and genomes – their molecular properties, how they are expressed and regulated, how they contribute to inheritance, and how they are shaped by evolutionary forces. A prerequisite for most upper division biology elective courses. Fall and Spring.

Corequisite(s): BIOL 207L

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biochemistry, Biology, Biology, Biology, Comp Sci & Computation Think

Prerequisite(s): BIOL 105, minimum grade: C- and BIOL 105L, minimum grade: C- and BIOL 106, minimum grade: C-

BIOL 207L Genetics Lab credit(s): 1

This course provides students with hands-on experimental investigations of molecular mechanisms in genetics. Taken concurrently with BIOL 207.

Corequisite(s): BIOL 207

Restriction(s):

Must not be in the following Major(s):

BIOL 290 Directed Readings credit(s): 1-3

Course repeatable for 6 credit(s).

Topic to be decided by faculty.

BIOL 295 Science Outreach credit(s): 0

Course repeatable 8 time.

The Biology and Chemistry/Biochemistry departments run a variety of outreach programs that include class visits, field trip tours, special summer programs and more. All of our programs strive to engage participants with opportunities for hands-on scientific discovery and inspiration. Fall and Spring.

Equivalent(s): CHEM 295

BIOL 301L Cell Techniques Lab credit(s): 2

This course is designed to be an intensive introduction to methods of analysis of prokaryotic and eukaryotic cell structure, composition, and behavior. Microscopy (brightfield and fluorescence), protein studies, enzyme kinetics, bacterial growth, cell signaling, and development are just some of the areas of research students will be exposed to. This course will also be scientific writing and reading intensive, developing student expertise in these critical areas in the field of biological research. Offered upon sufficient demand.

Restriction(s):

Must be in the following Major(s): Biology, Biology, Biology

Prerequisite(s): CHEM 230 and CHEM 230L and BIOL 106 and (BIOL 205 or BIOL 207)

BIOL 303 Population Ecology credit(s): 3

An in-depth look at the interactions that control the distribution and abundance of organisms at the population level. Topics such as life-history strategies, population dynamics, competition, predation, parasitism, and mutualism will be explored through the research literature, and quantitative approaches. Fall, even years.

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biology, Biology, Biology

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 303L Population Ecology Laboratory credit(s): 1

Taken concurrently with BIOL 303 when the laboratory is offered.

Corequisite(s): BIOL 303

Restriction(s):

Must not be in the following Major(s):

BIOL 304 Practice in Laboratory Teaching credit(s): 1-2

Course repeatable for 8 credit(s).

Students gain teaching experience by assisting laboratory instructors as a teaching assistant (TA) in a laboratory course. Duties may include laboratory set-up, in-class mentoring, grading, and quiz preparation. May be repeated. A maximum of two credits may be applied to Biology electives. Usually limited to students who have earned an A or B in the lecture portion of the course for which the student is a candidate to TA the laboratory. By permission only. Fall and Spring.

Prerequisite(s): BIOL 106, minimum grade: C-

BIOL 305 Biological Data Analysis credit(s): 4

An applied study of statistical methods used to investigate biological questions. Emphasis will be on applications using software to investigate biological data sets generated by student and instructor research. The course will survey descriptive statistics, sampling, experimental design, estimation, hypothesis testing, and model building (e.g. analysis of variance, regression, multivariate). This course does not fulfill the University Core Math requirement. Spring, odd years.

Prerequisite(s): BIOL 106, minimum grade: C- (and BIOL 205, minimum grade: C- or BIOL 206, minimum grade: C- (or concurrent) or BIOL 207, minimum grade: C-)

BIOL 313 Animal Behavior credit(s): 3

This course explores how behavioral processes affect ecological patterns. The behavioral adaptations of animals to their environment including the evolution of behavior, foraging, competition for resources, reproductive ecology, mating systems, parental care, and cooperative behavior. Fall, odd years.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 313L Animal Behavior Lab credit(s): 1

Taken concurrently with BIOL 313 when the laboratory is offered.

Corequisite(s): BIOL 313

BIOL 323 Conservation Biology credit(s): 3

This course covers the biological concepts important for the conservation of natural populations, communities, and ecosystems. Both theoretical and empirical studies will be applied to such topics as: the genetics and ecology of small populations, consequences of habitat fragmentation, the impact of introduced species, and the ecological value of biological diversity. Spring.

Equivalent(s): ENVS 303

Prerequisite(s): BIOL 106, minimum grade: C- (and BIOL 206, minimum grade: C- or BIOL 207, minimum grade: C-)

BIOL 323L Conservation Biology Lab credit(s): 1

This laboratory includes field trips. Taken concurrently with BIOL 323.

Equivalent(s): ENVS 303L

Corequisite(s): BIOL 323

BIOL 330 Invertebrate Biology credit(s): 4

An examination of the major invertebrate phyla, including an overview of the structural and functional characteristics of each group. The evolutionary relationships between various invertebrate groups will also be examined. Emphasis will be placed on the interaction of marine species with their environment. Taught in a combined lecture/laboratory format. Offered upon sufficient demand.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C-

BIOL 331 Parasitology credit(s): 3

Explores the medical, physiological, ecological, and historical effects of parasites. The course concentrates on human parasites and ranges from viruses and bacteria through helminthes and arthropods. Fall.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 331L Parasitology Lab credit(s): 1

Taken concurrently with BIOL 331 when laboratory is offered.

Corequisite(s): BIOL 331

BIOL 333 Community Ecology credit(s): 3

This course explores details of the major processes that have created and are operating within biological communities, including species diversity, competition, predation, herbivory, island biogeography, and succession. Students will explore the theories and experimental evidence of these processes and conduct ecology projects. Fall, odd years.

Equivalent(s): BIOL 343

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 334 Advanced Evolution credit(s): 3

Course repeatable 1 time.

An in-depth study of the mechanisms responsible for the diversity of life on earth. Topics covered include speciation, adaptation, systematics, extinction, natural selection, genetic drift, mutation, and gene flow. Examples are chosen from all types of organisms. This course may be repeated once as long as the content is different than the first occurrence of enrollment. Spring, odd years.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C- (or concurrent)

BIOL 335 Advanced Genetics: credit(s): 3

Course repeatable for 9 credit(s).

An advanced study of genetics within the context of a selected topic in biology. Past topics have included an examination of human race and racism and the study of genomes. This course may

be repeated once as long as the content is different than the first occurrence of enrollment.
Spring, even years.

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biology, Biology, Biology

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 207, minimum grade: C-

BIOL 335L Advanced Genetics Lab

credit(s): 1

Course repeatable for 3 credit(s).

Taken concurrently with BIOL 335 when laboratory is offered.

Corequisite(s): BIOL 335

BIOL 337 Developmental Biology

credit(s): 3

A study of the principles and mechanisms that underlie the development of plants and animals, using approaches that integrate cell biology, genetics, molecular biology, and evolution. Spring, odd years.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 207, minimum grade: C-

BIOL 337L Developmental Biology Lab

credit(s): 1

Taken concurrently with BIOL 337.

Corequisite(s): BIOL 337

BIOL 338 Histology

credit(s): 3

A study of the microscopic structure of animal (mostly mammalian) tissues and organs. Topics include: histology, cytology, and microscopic anatomy as exemplified in animal tissue. Material will emphasize the relationship between structure and function in tissues and organs. Fall.

Corequisite(s): BIOL 338L

Restriction(s):

Must be in the following College/School(s): College of Arts and Sciences

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 207, minimum grade: C-

BIOL 338L Histology Lab

credit(s): 1

Labs will combine the study of tissue structure using a collection of prepared slides, and the processing and sectioning of tissue samples. Lab assignments will include the production of personal digital atlases.

Taken concurrently with BIOL 338.

Corequisite(s): BIOL 338

BIOL 340 Field Botany

credit(s): 3

Course includes systematics of flowering plants, plant communities of the Inland Northwest, sight identification of major plant families and selected topics in plant ecology. A plant collection is required as well as a field project in the area of plant systematics or plant ecology. Two four-hour lectures/laboratory meetings per week and three, ten-hour field trips on Saturdays.

Summer. Offered upon sufficient demand.

Corequisite(s): BIOL 340L

Restriction(s):

Must be in the following Major(s): App Math - Biology, Biology, Biology, Comp Sci & Computation Think

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 340L Field Botany Lab

credit(s): 1

Taken concurrently with BIOL 340.

Corequisite(s): BIOL 340

BIOL 341 Human Physiology credit(s): 3

Examines the function of human physiological systems including: metabolic, nervous, cardiovascular, respiratory, renal, muscular, and immunological. Systems are examined through case studies focused on human disease and human performance. Spring, odd years.

Corequisite(s): BIOL 341L

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 341L Human Physiology Lab credit(s): 1

Taken concurrently with BIOL 341. May require weekend field trips.

Corequisite(s): BIOL 341

BIOL 343 Plant Community Ecology credit(s): 3

This class meets with and covers the same topics as BIOL 333 (Community Ecology), but is designed for biology majors who need a plant ecology-focused course. Students will explore the theories and experimental evidence of community ecology and conduct ecology projects with a specific focus on plant processes. Fall, odd years. Offered upon sufficient demand.

Equivalent(s): BIOL 333 **Prerequisite(s):** BIOL 106, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 344 GIS and Ecological Techniques credit(s): 3

This course will introduce students to geographic information systems (GIS) and focus on how GIS can be used to address research and management questions in ecology. Student will use existing GIS databases from area resource agencies and learn how to create new GIS databases from field exercises. Field techniques will include vegetation sampling, small mammal trapping, amphibian/reptile monitoring, distance sampling, wildlife habitat assessment, and mapping exercises using compass and global position systems (GPS). Spring, even years.

Corequisite(s): BIOL 344L

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 344L GIS and Ecological Techniques Lab credit(s): 1

Taken concurrently with BIOL 344.

Corequisite(s): BIOL 344

BIOL 351 Advanced Cell Biology credit(s): 3

An advanced study of cell structure and function with an emphasis on selected topics in cell biology. Topics vary with instructor, but may include cell signaling, cell cycle, plant cells, and the cell biology of cancer. Spring.

Corequisite(s): BIOL 351L

Prerequisite(s): CHEM 230 and BIOL 106, minimum grade: C- and BIOL 207, minimum grade: C-

BIOL 351L Advanced Cell Biology Lab credit(s): 1

Taken concurrently with BIOL 351 when laboratory is offered.

Corequisite(s): BIOL 351

BIOL 357 Principles of Wildlife Management credit(s): 3

The ecology, theory, methods, and philosophy of wildlife management emphasizing game, nongame, and endangered species. Students gain an understanding of the roles and responsibilities of various government agencies and non-governmental organizations. Fall, even years.

Fulfills the following degree requirement(s): ENV5 - elective

Equivalent(s): ENV5 387

Corequisite(s): BIOL 357L

Prerequisite(s): BIOL 106, minimum grade: C-(and BIOL 206, minimum grade: C- or BIOL 207, minimum grade: C-)

BIOL 357L Wildlife Management Lab **credit(s): 1**

This laboratory includes field trips. Taken concurrently with BIOL 357.

Fulfills the following degree requirement(s): ENVS - elective

Equivalent(s): ENVS 387L

Corequisite(s): BIOL 357

BIOL 359 Studies in Biodiversity **credit(s): 1**

Course repeatable for 2 credit(s).

This course is a continuation of BIOL 359L Field Studies in Biodiversity. Research projects initiated in the field in BIOL 359L will be concluded with further library research, completion of a scientific article, and presentation of the research at a local or regional meeting. Fall.

Equivalent(s): BIOL 159

BIOL 374 Immunology credit(s): 3

An introduction to the cellular and molecular basis of the immune response. Topics will include structures and interactions of molecules in the immune system, generation of diversity in immune specificity, cellular immunology, and the basis of immunity and autoimmune diseases. Spring.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 207, minimum grade: C- and CHEM 230, minimum grade: C-

BIOL 374L Immunology Lab credit(s): 1

Taken concurrently with BIOL 374 when laboratory is offered.

Corequisite(s): BIOL 374

BIOL 375 Virology credit(s): 3

Viral evolution, replication, virus-host interactions, epidemiology, and lateral gene transfer are covered. Spring.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 207, minimum grade: C- and CHEM 230, minimum grade: C-

BIOL 380 Special Topics: credit(s): 0-6

Course repeatable for 8 credit(s).

This course may be repeated as long as the content is different than other occurrences of enrollment. If course is not taught by a Gonzaga faculty member, a limited number of credits can be applied to Biology electives: 5 for BS, 3 for BA, 1 for minor. Study abroad and School for Field Studies courses are examples.

- BIOL 390 Directed Reading** **credit(s): 1-4**
 Course repeatable for 6 credit(s).
 Topic to be determined by instructor.
- BIOL 395 Research Assistantship** **credit(s): 0**
 Course repeatable 5 time.
 Undergraduate research assistantships are opportunities for student to earn a stipend while performing independent research in the laboratory of a Biology or Chemistry & Biochemistry faculty member. By Department Chair permission only.
- BIOL 399 Advanced Topic:** **credit(s): 2**
 Course repeatable for 4 credit(s).
 An introduction to primary research literature on specific biological topics. Students will write a paper that has as its foundation primary literature. Students will utilize their oral communication skills to explain the background of a given biology topic and lead discussions of the primary literature. Topics will vary. Course should be taken Junior year and must be completed with a C- grade or better prior to taking BIOL 499. Prerequisites vary depending on topic. Course can only be repeated with permission from the Biology Department Chair. Fall and Spring.

 This course provides students with the opportunity to pursue research on bacterial viruses, or bacteriophages. Students will work independently or in small teams to address questions chosen collaboratively by the students and the instructor. The course is aimed at students who are interested in molecular biology or bioinformatics research and those seeking additional experience in a research setting. Interested students should contact the instructor prior to registration to plan a research proposal. This course may be taken up to four times with Department Chair permission. Fall and Spring. Offered upon sufficient demand.
Prerequisite(s): BIOL 105L, minimum grade: C- and BIOL 106, minimum grade: C- and BIOL 207, minimum grade: C- and BIOL 207L, minimum grade: C-
- BIOL 420 Physiological Ecology** **credit(s): 3**
 This course will examine the interactions between organismal function and the physical environment. Topics include: physiological and evolutionary adaptations to extreme environments (high altitudes, deep oceans, and deserts), physiological determinants of patterns of diversity, limits to performance and environmental tolerance, and physiological responses to climate change. Fall, even years.
Prerequisite(s): and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C-

BIOL 432 Core Integration Seminar: credit(s): 3

The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

BIOL 440 Biochemistry I credit(s): 3

Lectures on the structure and function of the major classes of biomolecules (carbohydrates, proteins, and nucleic acids) with an emphasis on proteins and enzymology. The central metabolic pathways of glycolysis, gluconeogenesis, and the citric acid cycle are discussed from a mechanistic, energetic, and regulatory viewpoint. Offered upon sufficient demand.

Prerequisite(s): BIOL 207 and CHEM 231 and BIOL 202

BIOL 441 Advanced Physiology credit(s): 3

Course repeatable for 6 credit(s).

Physiological mechanisms, processes and responses of animals. Physical, chemical and biochemical principles common to physiological systems, such as respiration, excretion, and metabolism, will be covered. Goals of the course are to reveal the mechanisms, adaptive significance, and evolution of physiological systems using a comparative approach. This course may be repeated once as long as the content is different than the first occurrence of enrollment. Fall, odd years.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C-

BIOL 441L Advanced Physiology Lab credit(s): 1

Course repeatable for 2 credit(s).

Taken concurrently with BIOL 441 when laboratory is offered.

Corequisite(s): BIOL 441

BIOL 443L Biochemistry Laboratory I credit(s): 2

An investigation of the techniques used to examine biomolecules and biochemical systems. Students perform integrated laboratory experiments in biochemistry. Offered upon sufficient demand.

Prerequisite(s): BIOL 440 or CHEM 440

BIOL 445 Biochemistry II credit(s): 3

Continuation of BIOL 440, including an examination of the primary processes of cellular energy production, oxidative phosphorylation and photosynthesis. The major metabolic pathways of carbohydrates, lipids, amino acids and nucleotides are covered. Offered upon sufficient demand.

Prerequisite(s): BIOL 440

BIOL 451 Comparative Endocrinology credit(s): 3

A comparative study of the structure and function of hormones across a wide variety of taxa (emphasizing vertebrates), including secretion and regulation of hormones, mechanisms of action, and integration of hormones into biological processes. Spring, even years.

Corequisite(s): BIOL 451L

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 207, minimum grade: C-

BIOL 451L Comparative Endocrinology Lab credit(s): 1

Taken concurrently with BIOL 451 when laboratory is offered.

Corequisite(s): BIOL 451

BIOL 456 Molecular Biology credit(s): 3

This course explores experimental strategies and techniques for discovering how genes function at the molecular level. The course integrates genetics and biochemistry focusing especially on the relationship between DNA, RNA and protein. Fall.

Corequisite(s): BIOL 456L

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 207, minimum grade: C- and CHEM 230, minimum grade: C-

BIOL 456L Molecular Biology Lab credit(s): 1

Labs focus on the construction, manipulation, and analysis of recombinant DNA molecules.

Taken concurrently with BIOL 456.

Corequisite(s): BIOL 456

BIOL 484 Research Seminar credit(s): 1

This class is designed to expose students to various areas of biology research and to the different communication forms of that research. Graduate school is a fundamental part of the biology research pathway and therefore this course will help students to become familiar with the graduate school process. The format of the class will include seminars and class meetings. Fall and Spring.

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): BIOL 106, minimum grade: C-(and BIOL 205, minimum grade: C- or BIOL 206, minimum grade: C- or BIOL 207, minimum grade: C-)

BIOL 490 Directed Reading credit(s): 1-4

Course repeatable for 12 credit(s).

Reading material will be selected by the student after consultation with a faculty member in the department. Course may be repeated to total not more than six credits. A maximum of six credits of any combination of BIOL 390, BIOL 490, BIOL 496, and BIOL 498 can be applied to Biology electives. By permission only.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C- and BIOL 207, minimum grade: C-

BIOL 495 Senior Evaluation credit(s): 0

Course repeatable 3 time.

Required of all majors. Students will take the Major Field Test in Biology in their senior year.

Students must score at or above the 20th percentile to pass the course. Fall and Spring.

Corequisite(s): BIOL 499

Restriction(s):

Must be in the following Major(s): Biology, Biology

Must be the following Class(es): Senior

BIOL 496 Biological Resch Techniques credit(s): 1-3

Course repeatable for 12 credit(s).

An introduction to some of the experimental techniques used in biological research. Course content will vary by instructor. A maximum of six credits of any combination of BIOL 490, BIOL 496, and BIOL 498 can be applied to Biology electives. Offered upon sufficient demand.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C- and BIOL 207, minimum grade: C-

BIOL 497 Biology Internship credit(s): 0-6

Course repeatable for 6 credit(s).

Professional work experience in a biology-related field. Students are responsible for arranging placement opportunities, and gaining approval from a supervising faculty member in the Biology

department. This course does not satisfy any requirements for the Biology major or minor. Satisfactory /Unsatisfactory grading only.

Restriction(s):

Must be in the following Major(s): Biology, Biology, Biology

Must be the following Class(es): Junior, Senior

BIOL 498 Undergraduate Research

credit(s): 0-6

Course repeatable for 12 credit(s).

This course provides the motivated student with the opportunity to conduct an independent research project under the direction of a Biology Department faculty member. A maximum of six credits of any combination of BIOL 390, BIOL 490, BIOL 496, and BIOL 498 can be applied to Biology electives. Fall and Spring.

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 206, minimum grade: C- and BIOL 207, minimum grade: C-

BIOL 499 Senior Colloquium

credit(s): 1

Required of all majors. This course meets once per week to discuss biological issues relevant to society. Students must complete all 200-level major requirements and BIOL 399 with C- grades or better to take this senior level course. Taken concurrently with BIOL 495. Fall and Spring.

Corequisite(s): BIOL 495

Restriction(s):

Must be the following Class(es): Senior

Prerequisite(s): BIOL 106, minimum grade: C- and BIOL 205, minimum grade: C- and BIOL 205L, minimum grade: C- and BIOL 206, minimum grade: C- and BIOL 206L, minimum grade: C- and BIOL 207, minimum grade: C- and BIOL 207L, minimum grade: C- and BIOL 399, minimum grade: C-

Catholic Studies

Director: Joe Mudd

Associate Director: Bryan Pham, S.J.

The program offers one minor:

Minor in Catholic Studies

The Catholic Studies minor at Gonzaga University provides students with an opportunity to enrich their undergraduate experience through a focused engagement with the historical and theological traditions, teachings, and cultural legacies of the Catholic Church. In addition to providing a rigorous interdisciplinary grounding in the history, ideals, and practices of Catholicism, the program invites students to take part in the ancient and ongoing conversation between the Church and the various cultures in which it is found. In seeking to understand and more fully appreciate the relationship between the eternal truths of the Catholic faith and their various expressions in time and place, the program faithfully and rigorously responds to Pope John Paul II's call for "a fruitful dialogue between the Gospel and culture" (*Ex Corde Ecclesiae*, Part I A.3:34). The Society of Jesus, in its most recent General Congregation, echoes this same desire: its identification and commitment for serious and rigorous research between Catholicism and the contemporary world, culture, and other religions. (General Congregation 35 Doc. 1 par.7).

The program takes as its model the Incarnation, a discrete historical event that nevertheless speaks to men and women of all times and places. The theme of incarnation, i.e., the embodiment of God in the world, pervades the program as it searches for and celebrates the eternal truths of the Catholic faith in the variety of its concrete expressions throughout history. Our explorations incorporate, but are not limited to, the disciplines of art history, literature, languages, history, philosophy, and theology.

Intellectual Methodology:

The Catholic Studies program identifies Catholicism as the body of thought and culture that both informs our University's mission and inhabits the world beyond Gonzaga as a phenomenon palpably present, but often difficult to detect, in its various modes of culture and domains of knowledge. We operate

with the idea that Catholicism, and the world it interpenetrates, can be better understood by investigating its particular and universal natures. We do this through a series of integrated courses that consider Catholicism as both the over-arching theme of the program's curriculum, and the central theme of each individual course. Accordingly, Catholic Studies will be grounded in Church doctrine since doctrine establishes the foundation for an understanding of knowledge, and offers a guide for interpreting how Catholicism has developed in the course of history and how it reveals itself in literature, science, and the visual arts. A fundamental course on Catholic Doctrine (RELI 220) will provide the distinguishing parameters for concepts such as sacramentality, incarnation, sin and redemption.

Advising:

Each student in the program will be assigned an advisor who will help students reach a comprehensive understanding of the program through periodic consultation and guidance on the capstone project.

Required Courses:

The following courses are required for the minor and may also be used to fulfill courses required by the University Core or specific major requirements where applicable.

Senior Lecturer: G. D'Ambruoso

Lecturers: A. Scruggs, S. Siegel

The Department offers two degrees, two majors and one minor:

Bachelor of Science, Chemistry major (with ACS approved option)

Bachelor of Science, Chemistry major (non-ACS)

Bachelor of Science, Biochemistry major (with ACS approved option)

Bachelor of Science, Biochemistry major (non-ACS)

Bachelor of Arts, Chemistry major

Minor in Chemistry

The Department of Chemistry and Biochemistry offers Bachelor of Science (B.S.) degrees in Chemistry and Biochemistry and a Bachelor of Arts (B.A.) degree in Chemistry. Each B.S. degree has an option of being American Chemical Society (ACS) approved. An ACS approved degree is recommended for students interested in pursuing a graduate degree in chemistry or biochemistry. The non-ACS B.S. Biochemistry option has a larger biology emphasis, and is better suited for students seeking a broad background in both biochemistry and molecular biology. The B.A. degree in Chemistry is offered for students seeking a strong background in chemistry, but with less specialization than the B.S. program. A minor in Chemistry is also offered.

Students are encouraged to visit the Departmental website to learn more about careers in chemistry and biochemistry. For those interested in teaching chemistry at the secondary level, the Department suggests the B.A. degree along with the teacher certification program in the School of Education. For students interested in environmental science, a B.A. degree combined with a minor in Environmental Studies and supporting courses from Biology and Civil Engineering is recommended.

Although Gonzaga University does not currently offer a program in chemical engineering, students interested in chemical engineering are encouraged to combine a B.S. degree in Chemistry with supporting courses from the School of Engineering and Applied Science. This plan of study would position students to further their education with an M.S. or Ph.D. in Chemical Engineering from an additional institution.

CHEM 123 Environmental Chemistry credit(s): 3

This course will cover the fundamental principles of chemistry necessary to understand the source, transport, and fate of substances in the environment due to human activity. Additional topics will be chosen by the instructor but may include the environmental implications of various energy-generation methods; the chemistry of the atmosphere, hydrosphere, and lithosphere; climate change; and water quality, pollution, and treatment of water sources. Taken concurrently with CHEM 123L. Spring.

Fulfills the following degree requirement(s): Core: Science Inquiry

Corequisite(s): CHEM 123L

CHEM 123L Environmental Chemistry Lab credit(s): 1

See CHEM 123 course description. Taken concurrently with CHEM 123. Spring.

Fulfills the following degree requirement(s): Core: Science Inquiry

Corequisite(s): CHEM 123

CHEM 190 Study Abroad Special Topics credit(s): 0-6

Course repeatable for 12 credit(s).

Topic to be determined by instructor.

CHEM 193 First Year Seminar: credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must be the following Class(es): Freshman

CHEM 198 Topics in Chemistry credit(s): 3

Course repeatable for 9 credit(s).

This lecture-only course is designed for non-science majors. Different subfields of chemistry will be explored depending on the instructor. Upon sufficient demand.

CHEM 200L Basic Inorganic Chemistry Lab credit(s): 1

CHEM 200L is designed for students who need two semesters of general or inorganic chemistry lab for specific professional programs. Spring.

Prerequisite(s): CHEM 205 (or concurrent)

CHEM 205 Inorganic Chemistry credit(s): 3

Introduction to foundational concepts in inorganic chemistry with emphasis on atomic structure, bonding, and reactivity. Topics will include nuclear chemistry, quantum mechanics, periodic trends, covalent bonding, ionic bonding, metallic bonding, coordinate covalent bonding, acid-base chemistry, electrochemistry, and thermodynamics. Three lectures per week. Fall.

Prerequisite(s): CHEM 101, minimum grade: C-

CHEM 230 Organic Chemistry I credit(s): 4

Essential concepts in bonding and structure, acid-base chemistry, reactivity and synthesis of functional groups, nomenclature, and mechanisms of fundamental organic reactions. Three lectures and one recitation per week. Taken concurrently with CHEM 230L. Spring.

Corequisite(s): CHEM 230L

Restriction(s):

Prerequisite(s): CHEM 101, minimum grade: C-

CHEM 230L Organic Chemistry I Lab **credit(s): 1**
 Preparation and analysis of representative organic compounds. One laboratory per week.
 Taken concurrently with CHEM 230. Spring.
Corequisite(s): CHEM 230
Prerequisite(s): CHEM 101L, minimum grade: C-

CHEM 231 Organic Chemistry II **credit(s): 3**
 Continuation of CHEM 230. A significant focus of the course will be on aromatic compounds and carbonyl chemistry. Other topics include organometallic chemistry, radicals, mass spectrometry and synthetic polymers. Three lectures per week. Fall.
Corequisite(s): CHEM 231L
Prerequisite(s): CHEM 230, minimum grade: C-

CHEM 231L Organic Chemistry II Lab **credit(s): 1**
 Preparation and analysis of representative organic compounds. One laboratory per week. Fall.
Corequisite(s): CHEM 231
Prerequisite(s): CHEM 230L, minimum grade: C-

CHEM 245 Biochemistry **credit(s): 3**
 Structure and function of the major classes of biomolecules (carbohydrates, lipids, proteins and nucleic acids). Fundamental concepts of protein structure and function, kinetics and enzymology, bioenergetics and thermodynamics, metabolism and regulation, will be discussed. Three lectures per week. Fall and Spring.
Corequisite(s): CHEM 245L
Prerequisite(s): CHEM 231 (or concurrent)

CHEM 245L Biochemistry Lab **credit(s): 1**
 Laboratory methods and techniques relevant to biochemistry. One laboratory per week. Fall and Spring.
Corequisite(s): CHEM 245
Prerequisite(s): CHEM 231L (or concurrent)

CHEM 270 Career Development I **credit(s): 1**
 This course will introduce Chemistry and Biochemistry majors to research and career opportunities related to their major, the use of primary literature, and scientific ethics. One lecture per week. Spring.
 Fulfills the following degree requirement(s): Core: Writing Enriched
Restriction(s):
 Must be in the following Major(s): Biochemistry, Chemistry, Chemistry

CHEM 290 Directed Reading **credit(s): 1-3**
 Topic to be determined by instructor.

CHEM 295 Science Outreach **credit(s): 0**
 Course repeatable 3 time(s).
 The Biology and Chemistry departments run a variety of outreach programs that include class visits, field trip tours, special summer programs and more. All of our programs strive to engage participants with opportunities for hands-on scientific discovery and inspiration.
Equivalent(s): BIOL 295

CHEM 304 Practice in Lab Teaching **credit(s): 0 or 1**
 Course repeatable for 4 credit(s).
 Introduction to the methods of laboratory teaching. Emphasis on safety, time management, direct student-teacher interaction, and class presentation.
Prerequisite(s): CHEM 230

CHEM 310 Analytical Chemistry **credit(s): 3**
 Principles of foundational analytical techniques and methods are presented in three lectures per week. These include gravimetric, volumetric, electrochemical, spectrometric, chromatographic,

and mass spectrometry topics as well as basic descriptive statistics. Spring.

Corequisite(s): CHEM 310L

Prerequisite(s): (CHEM 205, minimum grade: C- and CHEM 230, minimum grade: C-)

CHEM 310L Analytical Chemistry Lab credit(s): 2

Laboratory experiments including titrations, gravimetric analysis, molecular and atomic spectroscopy, potentiometry, and chromatography. Sample preparation, instrument calibration, data analysis, and reporting are emphasized. Two laboratory periods per week. Spring.

Corequisite(s): CHEM 310

Prerequisite(s): CHEM 230L, minimum grade: C-

CHEM 345L Advanced Biochemistry Lab credit(s): 3

In-depth exploration of concepts and techniques used to study biomolecules and biomolecular systems with additional emphasis on scientific writing and communication in biochemistry. Two laboratories per week. Fall and Spring.

Fulfills the following degree requirement(s): Core: Writing Enriched

Prerequisite(s): CHEM 245 and CHEM 245L

CHEM 355 Physical Chemistry credit(s): 3

Introduction to foundational concepts in physical chemistry with emphasis on quantum mechanics, gases, thermodynamics, and kinetics. Fall.

Corequisite(s): CHEM 355L

Prerequisite(s): CHEM 310, minimum grade: C- and PHYS 204 (or concurrent) and PHYS 103, minimum grade: C- and MATH 157, minimum grade: C- and MATH 258, minimum grade: C-

CHEM 355L Physical/Inorganic Chemistry Lab credit(s): 1

Experiments that emphasize synthesis and characterization of inorganic compounds, as well as physical chemistry methods ranging from spectroscopy to thermodynamics and kinetics. One laboratory period per week. Fall.

Corequisite(s): CHEM 355

Prerequisite(s): CHEM 310L, minimum grade: C- or CHEM 205 (or concurrent)

CHEM 370 Career Development II credit(s): 1

This course will focus on scientific oral presentations and scientific writing and will prepare the students for their senior project. This course will also include outside speakers from graduate schools and the chemistry and biochemistry industry to further provide educational opportunities about continued study and employment in the field. One lecture per week. Spring.

Fulfills the following degree requirement(s): Core: Writing Enriched

Restriction(s):

Must be in the following Major(s): Biochemistry, Chemistry, Chemistry

CHEM 385L Advanced Chemistry Lab credit(s): 3

In-depth laboratory course featuring projects, often interdisciplinary, within the analytical, inorganic, physical, and organic sub-disciplines of chemistry. Literature engagement and scientific writing are emphasized. Two laboratory periods per week. Spring.

Fulfills the following degree requirement(s): Core: Writing Enriched

Prerequisite(s): CHEM 355, minimum grade: C- and CHEM 355L, minimum grade: C-

CHEM 390 Directed Research credit(s): 0-3

Course repeatable for 9 credit(s).

Topic to be determined by instructor.

CHEM 395 Research Assistantship credit(s): 0

Course repeatable 5 time(s).

Undergraduate research assistantships are opportunities for student to earn a stipend while performing independent research in the laboratory of a Biology or Chemistry & Biochemistry faculty member.

CHEM 455 Special Topic in Chemistry/Biochemistry credit(s): 2

Course repeatable for 6 credit(s).

Special topics in Chemistry or Biochemistry. Fall and Spring. Additional prerequisites may be required depending on topic.

Prerequisite(s): CHEM 355, minimum grade: C-

CHEM 464 Group Theory and Spectroscopy credit(s): 2

Introduction to foundations of group theory including symmetry operations and elements, point groups, character tables, reducible and irreducible representations. Formal development of standard models to describe electronic structure of atoms, chemical bonding, as well as rotational and vibrational motion. Quantum mechanical treatment of selection rules and their application to electronic, vibrational, and rotational transitions. Application of group theory and standard quantum mechanical models to the interpretation of atomic and molecular spectra. Two lectures per week.

Prerequisite(s): CHEM 355, minimum grade: C- (and PHYS 103, minimum grade: C- or PHYS 101, minimum grade: C-)(and PHYS 204, minimum grade: C- or PHYS 102, minimum grade: C-) and MATH 157, minimum grade: C- and MATH 258, minimum grade: C-

CHEM 485 Seminar credit(s): 1

Required of all Chemistry and Biochemistry majors. Fall.

Restriction(s):

Must be the following Class(es): Junior, Senior

CHEM 488 Senior Literature Review credit(s): 1

Literature review of special chemical problem or topic under the direction of a faculty member.

Fall or Spring. By Department Chair permission only.

Fulfills the following degree requirement(s): Core: Writing Enriched

Restriction(s):

Must be the following Class(es): Senior

Prerequisite(s): CHEM 370 (or concurrent)

CHEM 490 Directed Reading credit(s): 0-3

Course repeatable for total of 12 credit(s).

Material and credit to be arranged by instructor.

CHEM 497 Internship credit(s): 0-6

Course repeatable for 6 credit(s).

Professional work experience in a chemistry-related field.

Restriction(s):

Must be in the following Major(s): Biochemistry, Chemistry

CHEM 498A Thesis I credit(s): 1

Investigation of special chemical problems and topics under the direction of a faculty member.

Required for ACS approved B.S. degrees. Fall.

Fulfills the following degree requirement(s): Core: Writing Enriched

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): CHEM 370 (or concurrent)

CHEM 498B Thesis II credit(s): 1

Required for ACS approved B.S. degrees. Continuation of CHEM 498A. Spring.

Classical Civilizations

Chairperson: Dave Oosterhuis

Professors: A. Goldman, P. Hartin (Emeritus)

Associate Professor: D. Oosterhuis

Assistant Professor: A. Pistone

The department offers one major and one minor:

Bachelor of Arts, Classical Civilizations major (with a required concentration in either Latin Language & Authors or Greco-Roman Civilization)

Minor in Classical Civilizations

The Department of Classical Civilizations – one of the oldest at our University – provides undergraduates with access to over 2,500 years of human experience drawn from the multicultural world of the ancient Mediterranean and Near East. Classical Civilizations is an interdisciplinary program devoted to the study of that world, with an emphasis on the cultures of Ancient Greece and Rome. These cultures, through their theatre, philosophy, science, and government, helped shape the modern world for good and ill; studying them brings new insight into our own era and lives.

The department offers both a B.A. major (36 credits) and a B.A. minor (23 credits) in Classical Civilizations. All majors and minors are required to complete two (2) upper division CLAS courses as part of the degree, as well as a minimum of at least three (3) language courses in either Latin or Greek up to and including the completion of a 201 level class. Students who elect to pursue a major degree in this program must choose a focus in either Latin Language & Authors or Greco-Roman Civilization and complete four (4) elective courses among those listed in the catalog as well as a senior thesis (CLAS 499; offered in the Fall semester) appropriate to the chosen concentration. Minors are required to select three (3) upper level electives from among those listed in the catalog. The electives encompass a range of disciplines, including history, archaeology, philosophy, religious studies, as well as intermediate and advanced Latin and Greek. Majors are required to include at least one (1) course in Greek culture and one (1) course in Roman culture from among the elective offerings. Participating students thus complete a balanced curriculum divided between the study of ancient languages (Latin, Greek) and their contemporary societies. Through this combined focus, students gain a more broad comprehension and appreciation

of the rich cultural and humanistic heritage stemming from the classical world. The ancients themselves embraced this model of liberal arts education. According to the Roman orator Cicero, such cultural and historical study “illumines reality, vitalizes memory, provides guidance in daily life and brings us tidings of antiquity.”

The department’s courses are by nature interdisciplinary, with application to the sciences, art, theater, literature, philosophy, religion, politics, and government. Moreover, through addressing relevant issues of gender, identity, sex, ethnicity, and interaction between cultures, the curriculum reaches well beyond the borders of Greece and Rome to embrace other civilizations, including our own. By immersing students in an examination of the languages and ethnically diverse societies of antiquity, the program prepares them for careers within a world that is increasingly diverse, interdependent, and global in outlook, in such fields as politics, ethics, business, law, sciences and education. The department meets the needs of three classes of students: (1) those who wish to pursue a major or minor in Classical Civilizations; (2) those who wish to begin or continue the study of Latin or Greek in support of other majors or in preparation for advanced work in other areas; and (3) those who wish to fulfill the College of Arts & Sciences language competency requirement by taking one of the classical languages.

CLAS 110 Introduction to the Ancient World credit(s): 3

An introductory survey to the origins of Western civilization in the Mediterranean world, with particular focus on the Classical cultures of Greece and Rome. The course will focus upon an

exploration of these ancient societies, their origins and structure, their social and political constructs, and their neighbors and worldviews. Particular emphasis will be placed upon examining the enduring legacies produced by these ancient peoples and their continuing influence upon the concepts and ideals valued by our contemporary Western culture.

CLAS 193 First Year Seminar: credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must be the following Class(es): Freshman

CLAS 220 Introduction to Classical Literature credit(s): 3

This course is a survey of the literature of the ancient Greeks and Romans. It introduces students to the important authors of Classical Antiquity, the critical issues surrounding their work, and their lasting influence. It stresses the role that ancient authors had in shaping our understanding of literature: its genres, methods, and subject matter. Spring.

Fulfills the following degree requirement(s): Core: Literature

CLAS 310 Greek Gods and Heroes credit(s): 3

A study of Greek Mythology that uses texts (in translation), architecture and archaeology to explore the most important characters and stories of Greek mythology that have become part of the art, literature and imagination of western civilization. This course gives students insight into approaches toward the understanding of myth, especially classical myth that are helpful for their own studies and interests. Fall, alternate years.

Fulfills the following degree requirement(s): CLAS - Elective course, CLAS - Greek course, RELI - Scripture

Equivalent(s): RELI 403

CLAS 320 The Iliad and the Odyssey credit(s): 3

This course explores (in translation) Homer's Iliad and Odyssey, two poems that are among the foundations of the literature of western civilization. Students will demonstrate an ability to read and analyze these two great epics of ancient Greece in a way that appreciates and unlocks their timeless beauty, depth and significance especially in a way that is helpful for their own studies and interests. Fall, alternate years.

Fulfills the following degree requirement(s): CLAS - Elective course, CLAS - Greek course

CLAS 330 Women in Antiquity credit(s): 3

An examination of the representation of women Greece and Rome through image and text, using a variety of literary, art historical, and archaeological sources. This course is intended both to illuminate the lives of women in Classical Antiquity and to demonstrate how this illumination is important for a full understanding of the societies of Greece (in particular, Athens)

and Rome. Students also gain valuable experience in thinking critically about sources, both ancient and modern. Spring, alternate years.

Fulfills the following degree requirement(s): CLAS - Elective course, CLAS - Greek course, CLAS - Rome course

CLAS 340 Roman Epic credit(s): 3

This course explores (in translation) two of Rome's great contributions to world literature: Vergil's Aeneid and Lucan's Civil War. These works are at the core of the western tradition. They have been read and reinterpreted for millennia and continue to find resonance today. Students learn to read and analyze these poems closely, to appreciate them, and to unlock their timeless beauty, depth and significance. Special attention is paid to applying the themes of these works to students' own lives and studies.

Fulfills the following degree requirement(s): CLAS - Elective course, CLAS - Rome course

CLAS 350 Love Poetry in Antiquity credit(s): 3

Is love a modern invention? This course looks at the phenomenon of love as it appears in the poetry of the ancient Greeks and Romans. Works read (in translation) will include those of Sappho, Callimachus, Catullus Ovid and others. Students will investigate ancient attitudes towards love, sex, and gender roles while developing an appreciation for the differences between time periods, authors, style, and genre. Students will also explore the long-lasting influence of this poetry and find ways to apply it to their own studies and interests.

Fulfills the following degree requirement(s): CLAS - Elective course, CLAS - Greek course, CLAS - Rome course

CLAS 360 Ancient N. Eastern Archaeology credit(s): 3

Ancient Near Eastern Archaeology will introduce the student to the archaeology of Mesopotamia, Egypt and the Levant. Archaeological methodology, the history of excavation of ancient sites and material culture will be examined as well as ancient languages, literature and history.

Fulfills the following degree requirement(s): CLAS - Elective course

CLAS 370 Peoples and Empires of Turkey credit(s): 3

This course will provide students with a comprehensive survey of major historical and cultural developments associated with ancient civilizations in Turkey. Using primary textual and archaeological sources, course content will focus upon investigating key trends and cultural movements originating in early societies and ancient empires, from the advent of our earliest known human settlements to the impact of the imperial domination within the Mediterranean basin. Offered as Study Abroad/Summer Course only.

Fulfills the following degree requirement(s): CLAS - Elective course, CLAS - Greek course, CLAS - Rome course

Prerequisite(s): HIST 101

CLAS 375 Topics in Classic Civilization credit(s): 3

A course offering the student an opportunity to study literature of the Classical world in translation.

CLAS 410 Topics in Greek Civilization credit(s): 3

A course offering the student an opportunity to study aspects of classical civilization, with a specialized focus on aspects of the Greek world and its culture.

Fulfills the following degree requirement(s): CLAS - Elective course, CLAS - Greek course

CLAS 420 Topics in Roman Civilization credit(s): 3

Course repeatable for 9 credit(s).

A course offering the student an opportunity to study aspects of classical civilization, with a specialized focus on aspects of the Roman world and its culture.

Fulfills the following degree requirement(s): CLAS - Elective course, CLAS - Rome course

CLAS 432 Core Integration Seminar credit(s): 3

The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world. Spring.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

CLAS 490 Directed Study credit(s): 1-3

Course repeatable for 6 credit(s).

Directed Study requires completion of a form and Dept. permission, and cannot be registered for via Zagweb.

CLAS 491 Independent Study credit(s): 0-7

Course repeatable 2 time.

Course content to be determined by the instructor.

CLAS 497 Internship credit(s): 0-6

Course repeatable for 6 credit(s).

Professional work experience related to classical civilizations.

CLAS 499 Senior Thesis credit(s): 3

The senior thesis is required for majors in Classical Civilizations in their fourth year. Fall.

Restriction(s):

Must be in the following Major(s): Classical Civilizations

Must be the following Class(es): Senior

Communication Studies

Chairperson: Heather Crandall

Professor: T. Osborne

Associate Professors: M. Click, H. Crandall, J. Rossing, L. Silvestri,

Assistant Professors: J. Gordon, R. Maragh-Lloyd, J. Mora, K. Petruska, C. Schmitt

Lecturers: J. Flores, K. Keener, J. Nautiyal

Post-doctoral Teaching fellow: A. Khasawnih

The department offers one major and one minor:

Bachelor of Arts, Communication Studies major

Minor in Communication Studies

The mission of the Communication Studies Department at Gonzaga University is to cultivate a sophisticated understanding of the process of communication as symbolic action. The department provides a theoretically-grounded and

experiential education that prepares students to analyze, produce, deliver, and critique human communication in its many forms. The department prepares students with rhetorical skills (*eloquentia perfecta* in the Jesuit rhetorical tradition), a refined sense of judgment and discernment, and the ability to carefully adapt communication practices to any given context and audience.

The power of communication is inescapable; it affects us everywhere and is central to all aspects of our daily, social interactions. The Communication Studies department teaches students to embrace communication as the central means of creating, maintaining, and transforming social realities. Communication Studies equips students to carefully analyze the way people co-create social realities and cultures through communication and to discern how these social realities affect our communities, for better or worse.

Majors and minors gain experience analyzing and proposing solutions to complex problems confronting the human condition because a deep understanding of communication creates limitless possibilities to improve the world. We interrogate the consequences of our communication processes and discover and produce knowledge about communication practices. We teach students to leverage the power of communication to create more just and equitable social worlds.

The department is committed to nurturing a diverse, inclusive community of scholars who think critically and engage responsibly with the problems and issues of our communities through exemplary, ethical communication via multiple modes of address. We build on an ethos of social justice to prepare graduates to address contemporary issues and challenges as leaders in the community, the public arena, and the world. Research shows that the most successful people in any profession are exceptional communicators.

Communication Studies courses help students develop the skills employers demand such as the ability to work effectively in team settings, analyze information necessary to make decisions and solve complex problems, communicate with people inside and outside an organization, and influence others. We prepare students for a broad range of careers spanning advertising, marketing, public relations, government, non-profit organizations, and other leadership positions. Our graduates also pursue advanced graduate studies in media research, law, business, education, medicine, cultural studies, and other humanities and social sciences. Communication Studies is also home to the University's nationally renowned intercollegiate Debate Program, which has its own facility, Conway House.

In short, Communication Studies provides students with a critical understanding of the reasons why people think, feel, and act in particular ways; the leadership know-how necessary to make a difference in the world; and the skills that employers seek.

Master of Arts in Communication and Leadership Studies (COML) and Master of Arts in Organizational Leadership (ORGL) 4+1 Program:

Majors interested in pursuing a Master of Arts in Communication and Leadership Studies (COML) or a Master of Arts in Organizational Leadership (ORGL) may apply to the graduate program at the end of the academic year immediately preceding their final year of undergraduate study. Those who meet the COML or ORGL admissions standards will be granted provisional acceptance. During their final year of undergraduate study, these students will be able to enroll in up to six graduate-level COML or ORGL credits in addition to their undergraduate course load, with no additional or separate charge for graduate credits. "4+ 1" students will be limited to a maximum of 18 credits per semester, including graduate credits, in each of the two semesters of their final year of undergraduate study.

COMM 401/SOSJ 464 Communication and Leadership

COMM 420 Critical/Cultural Communication

COMM210 Understanding Meaning-making credit(s): 3

We make sense of our world and the people in it through the symbols we use to communicate about our experiences. The symbols we use (e.g. language, pictures, film, music, architecture, bodies) matter because they have real effects on us, on others, and on our perceptions and understanding of the world. This course explores the theories and ways of thinking that help us understand how symbols create, maintain, and transform our social worlds. Fall and Spring.

COMM220 Understanding Power in Culture credit(s): 3

Power is everywhere and influences our relationships with others and our ability to get things done in our societies. Communication and symbolic action is a primary way that people struggle over and effect their power relationships. Power clearly reveals itself in cultural ideologies or values and beliefs that influence our social actions, and these ideologies are embedded in our daily communication practices. This course introduces a cultural studies perspective that helps students build a lexicon and critical capacity for engaging with power, ideology, and cultural influence. Fall and Spring.

COMM230 Understanding Identity credit(s): 3

Our intersecting identities emerge from an array of communicative, performative, and cultural practices and they are tied up in everyday communication contexts such as interpersonal interactions, media platforms, and social movements. Through communication we align ourselves with common interests and communities, and this course will provide a theoretical foundation for understanding audiences, our performances of self, and our negotiation of the two. The course also invites students to explore how our identities are shaped and interpreted in ways outside our control. Fall and Spring.

COMM275 Analyzing Public Texts credit(s): 3

This course introduces students to the practice of studying, analyzing, and interpreting public texts, and the work they do in constituting public culture. Students engage with methods to make critical judgements about how rhetorical/communicative texts influence public life. Students will address public texts including written, visual/aural, and embodied forms of communication such as movies and song lyrics, sports broadcasts, maps, museum spaces, political speeches, religious texts, historical writings, comedic performances, YouTube channels, and much more. Students will also engage in ethical communicative practices that produce knowledge about human communication and relationships. Fall and Spring.

Prerequisite(s): COMM 100 or HONS 100

COMM282 Special Topics credit(s): 0-3

Course repeatable for 9 credit(s).

Prerequisite(s): COMM 210 and COMM 220

COMM285 Analyzing Practices and Habits credit(s): 3

This course provides a foundation in attending to, analyzing, and reporting meaningful information about the social world through humanistic communication research methods. The course introduces ethnographic and qualitative research methods, ethics, selection of research topics and questions, ethnographic data collection methods (e.g. participant observation; un-, semi- and structured interviewing; structured observation), managing and coding field notes, and qualitative analysis. In this course, students will create field notes, analyses, and more. Fall and Spring.

Equivalent(s): SOSJ 263

Prerequisite(s): COMM 100 or HONS 100

COMM310 Politics of Popular Culture credit(s): 3

Pulling from the fields of media and cultural studies, this course explores the ways we use and are used by popular culture. This class seriously considers how popular culture influences the ways we think, feel, act, and participate in civic life. Building upon students' expertise as cultural consumers, we explore popular culture through aesthetic, ideological, social, and industrial lenses. Through our consideration of a wide range of popular culture—including film, television,

games, print and social media, advertising, and others—we explore questions of aesthetic quality and cultural value in relation to media texts, audiences, and our experiences of culture. Spring.

Fulfills the following degree requirement(s): BU - Marketing conc Req

Prerequisite(s): (COMM 210, minimum grade: C or COMM 220, minimum grade: C) and COMM 275, minimum grade: C

COMM 320 Resistance, Struggle, and Power credit(s): 3

Communication is the central means for contesting and reconfiguring structural forms of power relations among social groups, and this class focuses on power dynamics and imbalances across social institutions such as law, education, medicine, economics, media, and religion. Students engage the concepts of hegemony (the production of consent for dominant power relationships) and counter-hegemony (the struggle against dominant social arrangements). As such, the course invites students to consider the interplay of communication, culture, and social institutions in maintaining, resisting, and transforming the persistent inequalities of power and disproportionate distribution of cultural and political capital. Fall.

Fulfills the following degree requirement(s): INST - Interactions

Equivalent(s): INST 320

Restriction(s):

Must be the following Class(es): Sophomore, Junior, Senior

Prerequisite(s): COMM 210, minimum grade: C and COMM 220 (and COMM 275, minimum grade: C or COMM 285, minimum grade: C)

COMM 330 Politics of Space and Place credit(s): 3

Everyday encounters with physical surroundings guide our orientations to the world. As we wander city streets, shopping malls, stadiums, nature preserves, sacred sites, restaurants, monuments, museums, and classrooms, we examine how we move in, and are moved by the material arenas we share. Spatial organization and built environments inform our habits of perception, determine the meaning of a particular place, accent what is worth attention and what might be overlooked, and reaffirm dominant norms and power relationships in public culture. Charts, maps, apps, and other navigational tools dictate where and how we move, and how we understand our roles within a given space. Featuring the experiential dimensions of rhetoric and communication, this course presses us to consider how material spaces and places construct everyday geographies. Spring.

Fulfills the following degree requirement(s): INST - Interactions

Equivalent(s): INST 332

Prerequisite(s): COMM 210 and COMM 220 (and COMM 275 or COMM 285)

COMM 331 Argumentation and Debate credit(s): 3

Examination of the fundamentals of advocacy including argumentation theory, techniques of persuasion, refutation, and cross-examination. This course is open to both debate team members and anyone interested in improving their argumentation skills. Spring.

Equivalent(s): SOSJ 363, SPCO 331

Prerequisite(s): COMM 210

COMM 340 Encounters in Public Spheres credit(s): 3

Everyday communication practices, conventional public deliberations, and emergent media technologies shape our public life and affect human and non-human entanglements. This class explores contemporary theoretical conversations about publics and public spheres: what they look like, how they are shaped, how they arrange political bodies, and how we navigate their boundaries and borders of inclusion and exclusion. Students analyze how different modes of communication promote solidarities around common concerns and arrange difference, as well as how we form counter-publics and spaces of resistance and transformation. Topics may include propaganda and censorship, surveillance and privacy, journalism and mass media,

spheres of expertise (i.e., science and medicine), roles of rumor, and notions of cultural “buzz.”
Fall.

Fulfills the following degree requirement(s): BU - Marketing conc Req

COMM342 Debate Participation **credit(s): 1**

Course repeatable 8 time(s).

Participation on University debate teams.

Equivalent(s): SPCO 342

COMM350 Politics of Social Memory **credit(s): 3**

The ways we remember our collective past influence our present and shape our futures. This course examines how we rhetorically construct and struggle over social memory through public remembrances of historical events via war memorials, film and documentary, commemorative celebrations, reenactments, monuments, and museum exhibits. Students extend rhetorical and visual theoretical concepts and methods to evaluate sites of public memory and the social and cultural politics shaping the construction of memory. Fall.

Fulfills the following degree requirement(s): INST - Interactions

Equivalent(s): INST 351

Prerequisite(s): COMM 210, minimum grade: C and COMM 220, minimum grade: C and (COMM 275, minimum grade: C or COMM 285, minimum grade: C)

COMM360 Media Aesthetics **credit(s): 3**

Images and sounds saturate our daily lives and while we often pay attention to content, we may neglect the visual and aural dimensions of these media. As citizens and consumers, we need to develop critical visual and aural interpretive frameworks to make sense of media. This course invites students to sharpen their analytical tools to attend to the sights and sounds that animate everyday life. This course examines media aesthetics through mise-en-scene, camera and point of view, editing techniques, visual style, and sound. From still to moving images, from print to online, students will conduct detailed aesthetic analyses of movies, television, radio, advertisements, podcasts, art, photography, websites, gifs, memes, and other forms of digital media. Additional topics may include industry, genre, power, visual culture theory, and identity. Fall.

Prerequisite(s): COMM 210, minimum grade: C and COMM 230, minimum grade: C and COMM 275, minimum grade: C

COMM370 Digital Culture/Networked Self **credit(s): 3**

Online communication has both collapsed our communication contexts and expanded our potential identities and relationships. This course applies a cultural lens to understand our digital lives and the various media technologies we interact with on a daily basis. We will examine a range of contemporary theories and issues surrounding digital media including how cultural values are embedded in digital technologies and how we manage identities across multiple digital contexts. We will explore ways to successfully and critically navigate an array of personal, professional, and civic responsibilities in a globally networked world. Spring.

Prerequisite(s): COMM 230, minimum grade: C and COMM 285, minimum grade: C

COMM401 Communication and Leadership **credit(s): 3**

A critical examination of the reciprocity between effective communication and successful leadership. Includes an historical examination of leadership styles, theories, and research. Includes an analysis of motivation, power, and organizational culture. Writing and speaking assignments are designed to cultivate leadership skills. Fall.

Fulfills the following degree requirement(s): BU - Marketing conc Req, SOSJ - Block D

Equivalent(s): SOSJ 464, SPCO 401

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): COMM 210 and COMM 230

COMM420 Critical / Cultural Communication credit(s): 3

This course invites students to integrate their communication studies knowledge with a broad, interdisciplinary conversation on critical theory, and to understand how communication scholars engage with other disciplines and thinkers in struggles for social justice, social change, and solidarity. The course will address a range of critical theories that have influenced and been influenced by the study of communication such as Marxism, the Frankfurt School, postcolonial theory, feminist theory, critical race theory, and queer theory. Students explore how critical theory is linked to and emerges from socio-political struggle in different historical moments. In addition, the course invites students to apply critical theory to contemporary social debates and challenges to better understand questions of power, civic participation, identity, and social organization. Spring.

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): COMM 310, minimum grade: C or COMM 320, minimum grade: C

COMM430 Intersectional Communication credit(s): 3

The study of communication and culture in a global world cannot and must not be apolitical, ahistorical, or blind to the messy entanglements of power and privilege. Therefore, this course will focus on the intersections between critical race theory, feminist theory, and critical intercultural communication in order to interrogate and examine the ways in which our social identities and locations affect the contexts of our lives including our opportunities, relationships, and overall understanding of the world. Specifically, this course will engage the work of Black Feminist scholars and ongoing scholarly conversations on intersectionality to analyze intercultural encounters and engagement. Fall.

Fulfills the following degree requirement(s): INST - Interactions, SOSJ - Block D

Equivalent(s): INST 430, SOSJ 466

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): COMM 320, minimum grade: C or COMM 340, minimum grade: C

COMM432 Core Integration Seminar: credit(s): 3

4 time.

The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

COMM440 Rhetoric of Social Change credit(s): 3

Public expression and discourse can affirm, complicate, challenge, and even radically revolutionize our shared values and ideals over time. Arguments and symbolic actions in communal spaces prompt individuals and groups to rethink, redevelop, and reestablish potential modes of identity, participation, and interaction within a society. Students in this course will closely examine specific social movements (including, potentially, civil rights, gender rights, indigenous rights, and environmental movements) to better understand the plurality of voices and modes of public expression in dialogue and competition that contribute to, resist, and ultimately shape societal change. Students will then build upon historical knowledge and perspective to engage in an immersive study of an ongoing contemporary social controversy,

ultimately creating an informed rhetorical intervention of their own, participating in the social issues and changes of the current day. Fall.

Fulfills the following degree requirement(s): INST - Interactions

Equivalent(s): INST 440

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): COMM 320, minimum grade: C or COMM 340, minimum grade: C or COMM 350, minimum grade: C

COMM450 Justice and Arts of Civic Life credit(s): 3

Ethical communication and intentional civic engagement fosters vibrant democratic life. As civic actors, we deliberate and contest policies, advocate for justice, and attempt to foster cooperation among a multiplicity of voices. This course synthesizes theories of ethics that students grapple with to examine relationships between rhetoric, democracy, and justice. Specifically, we will address questions of how we should practice rhetoric in ways that refine our capacities for ethical discernment, build inclusive communities, promote social justice, and ultimately enrich democratic life. Spring.

Fulfills the following degree requirement(s): BU - Marketing conc Req, SOSJ - Block D

Equivalent(s): SOSJ 465

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): COMM 340, minimum grade: C

COMM480 Themes in Communication credit(s): 3

Course repeatable for 6 credit(s).

Special topics courses are one time course offerings that include courses that address a current or timely topic or a special interest which will not be made a regular on-going part of the curriculum. Occasionally, a special topics course may be used to offer an experimental or "pilot" phase course before it is subsequently proposed as a regular course. Special topics course offerings vary from term to term. See current semester course listings for topics.

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): (COMM 210 or COMM 220) and (COMM 275 or COMM 285)

COMM484 Senior Seminar credit(s): 3

In this capstone course for the Communication Studies major, students demonstrate their proficiency in oral, written, and visual communication by adapting their senior thesis to multiple communication platforms. The seminar is also designed to help students reflect on their education and develop a personal philosophy of communication. Fall and Spring.

Equivalent(s): SPCO 489

Restriction(s):

Must be the following Class(es): Senior

COMM485 Communication Abroad credit(s): 3

Course repeatable for 6 credit(s).

This course provides transfer credit for students who have arranged an intensive experience studying abroad and will be taking a humanities-based communication course that explores themes of rhetoric, media, and cultural studies that deepens their understanding of the foundation they've received at Gonzaga. Prior permission from the Department Chair is required.

COMM490 Crafting Professional Identity credit(s): 1

In this course, students connect their communication studies knowledge and skills with their civic and professional goals during and after college. Students compose narratives highlighting their proficient use of communication skills within their personal organizational experiences, at school, at work, and within their communities. Building this portfolio of materials helps students

translate and articulate their skills and ambitions into new organizational contexts post-graduation. A series of professional speakers, including alumni, will model communication in developing a career path. Students apply a social justice perspective to professional life and consider how to integrate a Catholic, Jesuit, humanistic educational experience in a professional context. Fall and Spring.

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): COMM 27 credits

COMM491 Directed Study **credit(s): 0-10**

Course repeatable for 12 credit(s).

Directed Study requires completion of a form, department permission and cannot be registered for via Zagweb.

Prerequisite(s): (SPCO 101 or SPCO 102) and COMM 101

COMM497 Internship **credit(s): 0-6**

Course repeatable for 6 credit(s).

Professional experience in a communication related field. Students must take the initiative to contact an agency or business and find a Communication Studies department faculty member willing to supervise the internship. Fall, Spring, and Summer.

Computer Science and Computational Thinking

Chairperson: Paul De Palma

Program Director: Rob Bryant

The names of the faculty teaching in this program can be found in the Undergraduate Catalog entry (School of Engineering and Applied Science) under "Computer Science."

The Department of Computer Science offers two degrees, a B.S. in Computer Science through the School of Engineering and Applied Science, and a B.A. in Computer Science and Computational Thinking through the College of Arts and Sciences. The information below pertains to the B.A. For a description of the B.S. program, see the Undergraduate Catalog entry (School of Engineering and Applied Science) under "Computer Science." The department also offers minors and concentrations in Data Science, Software Application Development, and Software Security.

Bachelor of Arts, Computer Science and Computational Thinking major

Bachelor of Science, Computer Science major

Software Security (minor and concentration)

Data Science (minor and concentration)

Software Application Development (minor and concentration)

The B.A. in Computer Science and Computational Thinking

The B.A. in Computer Science and Computational Thinking (BACSCT) serves those students with an interest in computing who would also like to study broadly in the humanities, the social sciences, or the natural sciences. For example, students interested in language and literature could explore questions that arise in computational linguistics or in computational approaches to the study of literature. Students interested in the social sciences could investigate sociological and economic questions through the increasing availability of large data repositories. Students interested in the life sciences could investigate the growing field of bioinformatics. The potential to combine computing with other disciplines makes the BACSCT an attractive option for students with diverse interests. In addition, the BACSCT degree provides background sufficient for entry level employment in many parts of the computer industry, as well as a base for further training.

The process of majoring in BACSCT begins by selecting a Discipline for Computational Thinking (DCT), chosen from Art, Biology, Communications Studies, Economics, English, Environmental Studies, Philosophy, Sociology, or Theatre Arts. Students choose at least 12 credits from their DCT. The foundation in computing is built upon 25 credits in mathematics and computer science. In consultation with their advisors, students also choose an additional 18 credits in computer science courses. These could include courses relevant to the DCT. For instance, the Department of Computer Science offers courses in human language processing and big data analytics. Students are encouraged to complete the courses in their DCT as well as the computer science courses specific to that DCT in their first three years at Gonzaga.

BACSCT students can also pursue optional concentrations in Data Science, Software Application Development, or Software Security. For a description of these, please see the Undergraduate Catalog entry (School of Engineering and Applied Science) under “Computer Science.”

Criminology

Chairperson: Naghme Morlock, Andrea Bertotti Metoyer

Professors: A. Bertotti Metoyer

Associate Professors: M. Bahr, V. Gumbhir, W. Hayes, J. Johnston,

Assistant Professors: A. Bruns, M. Deland, J. Gow, S. Lee, E. Matthews, N. Morlock, F. Rogers

Professors Emeriti: J. Rinehart, E. Vacha, G. Weatherby

The department offers one major and one minor:

Bachelor of Arts, Criminology major

Minor in Criminology

The Criminology program introduces students to sociological perspectives on the causes, consequences, and control of criminal behavior. Course work focuses on the development and organization of criminal justice institutions, especially the police, courts, and corrections. Students examine pressing social issues, such as racial profiling, mass incarceration, and prisoner re-entry.

The program fosters a commitment to social justice and the common good as students develop a sociological imagination and learn to critically consume information, theorize social contexts, create new knowledge, and communicate with and for others. In addition to providing opportunities for academic research and analysis, students gain the knowledge base and skills for pursuing careers in criminal justice institutions and related policy and non-profit fields.

Students have the opportunity to graduate with honors in the major if they have fulfilled all requirements, achieved a grade point average of at least 3.70 in their criminology courses, and written and defended a senior honors thesis (CRIM 494).

Critical Race and Ethnic Studies

Chairperson: Bernadette Calafell

Professors: B. Calafell

Assistant Professors: E. Dame-Griff

The program offers one minor:

Minor in Critical Race and Ethnic Studies

The Critical Race and Ethnic Studies program (CRES) is an interdisciplinary academic home for the study of race and ethnicity. In this program students learn about the complex interplay of race and ethnicity vis-a-vis gender, class, sexuality, and other social dimensions that shape the diverse experiences of humans over time. Students achieve this understanding by studying (1) the development of unique cultures among marginalized racial and ethnic groups and (2) the power relations which produce marginalization and injustice on the basis of race and ethnicity, among other intersecting categories of difference. As a reflection of the fifty-year intellectual tradition of ethnic studies, Gonzaga's CRES program is both student-driven and student centered. Thus, it remains in dialogue with student movements for social and racial justice in the U.S. and transnationally. This reciprocal relationship provides students with the historical and academic grounding necessary to work toward justice, but also serves to re-invigorate the program with new knowledge that emerges from social justice movements.

The minor is open to all Gonzaga undergraduate students, and students considering a minor in Critical Race and Ethnic Studies are encouraged to enroll in the required introductory course, CRES 101.

Courses fulfilling elective requirements will be approved by the Department Chair.

Courses:

CRES 101 Introduction to Race and Ethnic Studies credit(s): 3

This course will introduce students to key theories and debates within the field of race and ethnic studies. Students will analyze definitions of race and ethnicity, both inside and outside of the United States; cultural practices of resistance; various theories central to race and ethnic studies; the intersection of race with other forms of difference such as gender, class, and sexuality; and the connections between social justice and community engagement in ethnic studies. Students will read a variety of academic and cultural texts which illustrate the interdisciplinary scope in Critical Race and Ethnic Studies. Students will explore the course topics and issues through readings, discussions, lectures, films, short stories, and music.

CRES 193 First Year Seminar: credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

CRES 201 Race and Popular Culture credit(s): 3

This course will focus on the historical and contemporary popular culture representations of race in the United States. In particular, we will examine stereotypes, archetypes, and caricatures of People of Color in the U.S., in order to better understand the historical roots of these images as well as their pervasiveness in contemporary representation. We will also examine the impact of these representations, discussing how stereotypes and archetypes both shape and reflect structural inequalities.

CRES 202 Racing Space and Place credit(s): 3

This course will examine the historical and contemporary relationship among race, ethnicity, power, and space in the U.S. We will explore issues such as segregation, sub/urban planning, housing, imperialism, immigration, policing and incarceration, and others in order to better understand how race, racism, and discrimination shape the physical layout of the nation-state and the lived experiences of People of Color.

CRES 280 Special Topics credit(s): 3

Course repeatable for 6 credit(s).

Explores material of timely, special, or unusual interest not contained in the regular course offerings.

CRES 301 Intersectionality and Race credit(s): 3

Framed through the lens of intersectionality, or what key theorist Kimberle Crenshaw describes as “a heuristic term to focus attention on the vexed dynamics of difference and the solidarities of sameness in the context of antidiscrimination and social movement politics,” this course examines the impact of Intersectionality Theory as a major framework in the field of Critical Race and Ethnic Studies. While Intersectionality Theory and its theoretical and practical antecedents are used in a variety of disciplines, it has particular centrality in CRES and the intellectual and social movements that led to the development of this field. Furthermore, Intersectionality has shaped the theoretical and methodological foci of CRES, producing both pedagogy and scholarship that centralizes a critical, multi-axis approach to racial inequity.

CRES 302 Race, Resistance, and Resilience credit(s): 3

This course will examine the dual roles of resistance and resilience in historical and contemporary struggles for social change and social justice centered around race and racial inequity. Throughout the semester, we will focus on understanding, comparing, and contrasting core ideological frameworks present in social justice organizing to interpret their strengths, weaknesses and overall impact on achieving racial equity and justice. We will also consider the tactics used in various movements, again considering their utility and impact as well as how they have been replicated and modified. Finally, we will consider the possibilities of methods of resistance that did not necessarily arise as part of a social movement, but contributed to the well-being and survival of individuals and communities of Color.

CRES 380 Special Topics credit(s): 3

Course repeatable for 6 credit(s).

Selected topics in Critical Race and Ethnic Studies.

CRES 390 Independent Study credit(s): 1-4

Course repeatable for 12 credit(s).

To be determined by the faculty.

CRES 432 Core Integration Seminar: credit(s): 3

The Core Integration Seminar (CIS) engages the Year Four Question: “Imagining the possible: What is our role in the world?” by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our

students' future role in the world. The capstone course in the critical race and ethnic studies program provides an opportunity for a special kind of faculty and student conversation. Responsibility for organizing and structuring this course will rotate among CRES faculty. Topics will vary. Regardless of the text or topics, the goal will be to create a conversation in which students assume significant responsibilities. All students are expected to complete a major research project using the concepts and perspectives of CRES scholarship, and to present their work to the class and faculty evaluators. Spring.

The department offers two majors and two minors:

Bachelor of Arts, Dance major

(required concentration in either Dance Pedagogy or Performance)

Minor in Dance

Since the earliest human civilizations, theatre and dance have been integral to the fabric of human communication. The process of performance is woven into personal, community, business, artistic, and religious life - and into the dialogue among the cultures and nations of the world.

Critical examination of this process describes, interprets, and evaluates these relationships. As faculty in the Department of Theatre & Dance, we seek to assist students in becoming effective, creative, and ethically responsible communicators who can understand theoretical choices and design, express, interpret, and critically evaluate oral, written, nonverbal, and electronically mediated messages.

Theatre & Dance, as an academic discipline, draws upon the humanities, the social and natural sciences, and the professions. The curriculum is both conceptual and applied. Courses prepare students for an in-depth exploration of one or more areas of inquiry. Teaching and learning methods combine lectures, seminars, workshops, production, and performance. Theatre & Dance at Gonzaga reflects the Jesuit, Catholic character and liberal arts tradition of the institution.

Mission Statement

The Theatre & Dance Department at Gonzaga University is committed to training and developing artists who confront the important issues of our lives through their engagement with the art forms of live theatre and dance.

Students study and critically reflect on a broad range of literature, theatrical forms, and techniques in order to promote an active engagement with the foundations of our culture and to promote the formation of a character that reflects the faith and justice mission of Gonzaga University. The intended outcome of this study and reflection is to provide service to our audience and the broader community and to promote the pursuit for social justice.

Our purpose is to serve young artists hoping to apply disciplined training and thoughtful work to search for justice and the greater good of those around them.

Students interested in a minor that combines the strengths of theatre, dance, visual arts, and music should visit the [Interdisciplinary Arts](#) page for more information about the Interdisciplinary Arts Minor.

Master of Arts in Communication and Leadership Studies (COML) and Master of Arts in Organizational Leadership (ORGL) 4+1 Program:

Majors interested in pursuing a Master of Arts in Communication and Leadership Studies (COML) or a Master of Arts in Organizational Leadership (ORGL) may apply to the graduate program at the end of the academic year immediately preceding their final year of undergraduate study. Those who meet the COML or ORGL admissions standards will be granted provisional acceptance. During their final year of undergraduate study, these students will be able to enroll in up to six graduate-level COML or ORGL credits in addition to their undergraduate course load, with no additional or separate charge for graduate credits. "4+ 1" students will be limited to a maximum of 18 credits per semester, including graduate credits, in each of the two semesters of their final year of undergraduate study.

The department offers one major and two minors:

Bachelor of Arts, English major (with a required concentration in either Literature or Writing)

Minor in English

Minor in Writing

The Gonzaga University English Department is a community of scholars, readers, and writers dedicated to helping students form a deeper sense of themselves and the world through the study and composition of texts. As members of this disciplinary community, we celebrate the beauty and power of creativity, engaging with the ways language and literature reflect and explore knowledges, values, and experiences. We invite students to develop an understanding of self and others by exploring the narratives of our local and global communities; past, present, and future. Our commitment to a sophisticated understanding of a diversity of texts and literacies prepares students for success as professionals and citizens. In alignment with Gonzaga University's Mission, we develop whole persons devoted to critical thought, reflection, social justice, and life-long learning.

English Department courses fulfill the requirements of the Core curricula of the University and constitute a Bachelor of Arts degree in English; they provide majors in other disciplines with further experience in and appreciation for literature and writing; they offer majors and minors in English engagement with the literary heritage of Western and non-Western traditions; and they develop students' mastery of the conventions and nuances of written prose.

The University Core curriculum requires three semester hours of Writing (ENGL 101 or ENGL 200) and three semester hours of Literature. Many English 100- and 200-level literature courses will fulfill the University Core Literature requirement.

English majors earning a secondary teaching credential must take one 3-credit multicultural literature course and a writing pedagogy course, either ENGL 390 or ENGL 395.

Because we believe that effective writing is essential for professional, personal, and intellectual development, the English Department directs the operation of a Writing Center open to the Gonzaga community.

Founded on solid introductory writing and literature courses and covering a variety of genres, time periods, and theoretical approaches to texts, the English major offers two areas of emphasis: a Literature Concentration and a Writing Concentration. Students in both concentrations take the same foundational courses, worth a total of 12 credits: a University Core Writing course, lower-division courses on English form and English history, and an upper-division course on literature before 1660. All English majors must also take a course with a multicultural distribution. Once students decide which concentration they will pursue, they study the curriculum specific to each concentration.

ENGL 307 Typography and Book Design credit(s): 3

This course offers students an introduction to design for literary publishing. Students investigate ethical concerns related to presenting content; grow conversant with essentials of typography and print design; gain basic competency with industry-standard software; and produce content for both print and e-book formats. Major assignments will build on one another, and successful students will complete the course with a portfolio of print designs and a complete e-publication.

Fulfills the following degree requirement(s): ENGL - Writing

ENGL 308 The Art(s) of Editing credit(s): 3

We all know that good writers benefit from good editors, but we don't necessarily understand what editors do. This course offers a practicum for students who may want to go into an editorial field, who want to serve other writers, or who want to understand publishing more holistically. Students will undertake typical editorial practices, such as using a house style, shaping manuscript submissions, copyediting, and creating indexes for publications. Where possible and appropriate, students will work on-and get named credit for contributing to-active publishing projects.

Fulfills the following degree requirement(s): ENGL - Writing

ENGL 309 Writing for Social Action credit(s): 3

This course investigates current and historical social movement writing and rhetorics to determine the best practices in advocating for a social cause, producing persuasive public texts, and understanding the rhetorical foundations of advocacy writing. Students will be asked to produce materials in a range of genres associated with writing for social action (e.g., letters, essays, poetry, embodied activism) and actively participate in class discussions and writing workshops. Fall, odd-numbered years.

ENGL 418 American Indian Literatures credit(s): 3

This course is designed to introduce students to several important texts in the multifaceted genre of American Indian literature as well as to invite students into a critical discussion of contemporary issues centering on the relationship between American Indian literatures and contemporary sociopolitical and cultural realities and issues. We will examine the role of American Indian literature in the continual process of cultural maintenance as well as identity (re)construction. Through close reading of texts by writers from various tribes and regions, students will explore the heterogeneity of Native America and the complexities of all attempts to define or shape indigenous nationhood in the United States. We will contextualize these texts in discussions of social justice issues particular to Native America, including but not limited to the five definitions of genocide; geographical and cultural displacements; and "third world" living conditions. We will also be engaged in dialogues about local and national American Indian cultures in cooperation with the American Indian Studies house on campus. Spring, odd numbered years.

English Language Center

Chairperson: Christina Isabelli

Senior Lecturers: J. Akins, H. Doolittle, J. Sevedge

Gonzaga Global Academic Coordinator: J. Sevedge

Intensive English Program Academic Coordinator: J. Akins

Since 1978, the University's English Language Center (ELC) has addressed the needs of multilingual students whose primary native language is not English. Gonzaga's ELC has served nearly 10,000 international students, introducing them to academic language and culture, higher education in the United States, while providing opportunities for intercultural exchanges with students from the U.S. and more than 70 other nations. The English Language Center encompasses the Intensive English Program, Gonzaga Global, Specialized Programs, Academic Support and testing, and an affiliation with the MA-TESL Program.

Intensive English Program (IEP): The ELC offers year-round intensive classes in 10 levels of instruction in English as a Second Language (ESL). These courses are designed to meet the needs of international students seeking undergraduate and graduate studies, as well as those of international professionals in improving their English language ability. Instructional policies

and program guidelines of the Gonzaga University ESL Program are in accordance with the Commission on English Language Program Accreditation (CEA), the national professional organization in this field.

Incoming Intensive English Program students are required to take the ELC Placement test in order to enroll in IEP courses. IEP courses in levels 1-5 earn ELCT credit.

ELC Undergraduate/Gonzaga Global Courses: ELC Undergraduate courses support international and/or multilingual students with the linguistic and cultural adjustment to higher education in the U.S. through academic English and culture courses. These courses are English for Academic Purposes (EAP) courses that develop linguistic skills that support student success in freshman and Core classes and are open to all international and/or multilingual students and scholars with permission from the Gonzaga Global Academic Coordinator. All ELC undergraduate courses carry elective credits that apply toward the total 128 semester credits required to graduate.

English Placement Test: Incoming international students take the English Placement Test to verify required courses and/or recommend optional courses. All incoming international students who are not exempted of English language requirements during the admission process are required to take the placement test. Permission to enroll in all ELCT undergraduate courses is to be obtained from the Gonzaga Global Academic Coordinator.

Gonzaga Global: For students who are ready to pursue undergraduate studies, but do not currently meet Gonzaga's English proficiency requirements, admission to Gonzaga Global offers integrated academic language and culture courses that support and enrich a student's undergraduate studies. Students apply for undergraduate and graduate admission to Gonzaga through the Gonzaga Global Program. Please see Gonzaga Global - <https://global.gonzaga.edu>.

ELCT courses + Multilingual (MLC) sections: ELCT 110 and ELCT 120 classes are linked to MLC sections of the Gonzaga Core classes, COMM 100 and PHIL 101. These classes encourage the global engagement and intercultural competence of both domestic and international students. International students are placed into the ELC courses and the linked Multilingual (MLC) sections through freshman enrollment, Gonzaga Global, or their advisor upon approval by the Gonzaga Global Academic Coordinator. International students who are not required to take these courses may

indicate interest through Gonzaga's Freshman Survey or by working with their Academic Advisor.

Specialized Programs: In addition to the academic ESL Program, the ELC offers short-term Specialized Programs for contracted groups of students, faculty and international visitors, including English as a Medium of Instruction, ESL Teacher Training, and Intensive English Language Programs.

Academic Support and Testing: The ELC conducts English Placement testing for all incoming international students as well as testing and services for all multilingual students or departments at Gonzaga that require or desire focused academic English language and culture instruction or support.

ELC and MA-TESL Program Affiliation: The ELC is affiliated with the following programs in the School of Education: Master of Arts degree in Teaching English as a Second Language (MA-TESL); Teaching English to Speakers of Other Languages (TESOL) Certificate; and ELL endorsement. This important affiliation between programs includes shared faculty, curricular and programmatic integration, and opportunities for diverse student groups to collaborate in creative ways.

This class provides a strong base of integrated skills that support success in American academic and social contexts. Course objectives focus on reading broadly for varied purposes and from a variety of sources; engaging in the critical reading-into-writing process; composing texts in diverse registers and voices; engaging in short as well as more sustained recursive research; and most importantly, participating actively and sharing and integrating world perspectives into larger academic conversations.

ELCT 110 Communication Seminar credit(s): 3

Students will improve their ability to communicate orally and listen effectively in a variety of academic and social situations. Students will cultivate an understanding of interpersonal, intercultural, and small-group communication, and they will learn to apply the necessary critical thinking, reasoning, and research skills to compose and present effective presentations. This course will critically examine the readings and assignments of COMM 100.

Minor in Environmental Studies

The Environmental Studies major offers students an interdisciplinary approach toward understanding the human interaction with the environment. Drawing upon courses in the natural sciences, the social sciences, and the humanities, the Environmental Studies major offers a diverse, integrated curriculum that explores the scientific, ethical, social, economic, and political aspects of our current environmental crisis.

Likewise, the Environmental Science major offers a broad scientific knowledge base and skill set integrated with coursework focused on human culture. Environmental Science integrates three fundamental scientific disciplines: biology, chemistry, and earth science. Unification of these three disciplines uniquely positions students to use scientific inquiry to understand and care for our planet.

With our proximity to state and national parks, national forests, and open space, Gonzaga is a special place to pursue environmental studies and sciences, where students can engage both their intellectual and experiential pursuits. Students in both majors have abundant opportunities for field studies and research, outdoor service learning projects, environmental internships, and leadership positions with on-campus environmental organizations. Majors are also encouraged to pursue field courses and study abroad opportunities in places like Zambia, Costa Rica, Ecuador, and Australia.

Courses:

ENVS 101 Introduction to Environmental Studies credit(s): 3

An introduction to the field of Environmental Studies. The course provides an overview of the connections between science, politics, philosophy, history, and ethics regarding nature and the environment. The course urges students to think critically about the relationships between knowledge and judgment, humans and nature, justice and ethics, and natural and human history. Fall and Spring.

Fulfills the following degree requirement(s): Core: Writing Enriched

ENVS 102 Environmental Politics and Policy credit(s): 3

This course examines the politics and policymaking process of environmental issues. The course focuses primarily on American national policy, but also on state and local and international/global policy. The course is designed to evoke and encourage thinking about environmental issues on these various levels. Fall and Spring.

Fulfills the following degree requirement(s): Core: Social/Behavioral Sci

Restriction(s):

Must not be in the following Major(s):

ENVS 103 Environmental Biology credit(s): 3

A study of the principles of ecology (including population dynamics, diversity, and energy flow) and the impact humans have on the environment. Lab is required. Fall.

Corequisite(s): ENVS 103L

Restriction(s):

Must be in the following Major(s): CSCT - Environmental Studies, Environmental Sciences, Environmental Studies, Sustainable Business

Fulfills the following degree requirement(s): Core: Science Inquiry, when taken with the lab.

ENVS 103L Environmental Biology Lab credit(s): 1

See course description for ENVS 103. Fall.

Fulfills the following degree requirement(s): Core: Science Inquiry, when taken with the lecture

Corequisite(s): ENVS 103

Restriction(s):

Must be in the following Major(s): CSCT - Environmental Studies, Environmental Sciences, Environmental Studies, Sustainable Business

ENVS 104 Environmental Chemistry credit(s): 3

This course will cover the fundamental principles of chemistry necessary to understand the source and fate of chemical substances in the environment. Additional topics will be dependent on the instructor but may include the environmental implications of energy utilization; the chemistry of the atmosphere, hydrosphere, and lithosphere; climate change; and pollution and treatment of water sources. Spring.

Fulfills the following degree requirement(s): Core: Science Inquiry

Equivalent(s): CHEM 123

Corequisite(s): ENVS 104L

Restriction(s):

Must be in the following Major(s): CSCT - Environmental Studies, Environmental Science, Environmental Studies, Sustainable Business

ENVS 104L Environmental Chemistry Lab credit(s): 1

See course description for ENVS 104. Spring.

Fulfills the following degree requirement(s): Core: Science Inquiry

Equivalent(s): CHEM 123L

Corequisite(s): ENVS 104

Restriction(s):

Must be in the following Major(s): CSCT - Environmental Studies, Environmental Science, Environmental Studies, Sustainable Business

ENVS 110 Earth Science credit(s): 3

This course is an introduction to the basics of earth science / geology through study of mineralogy, basic rock types, rock formation/decomposition, earth processes, geologic time scales, and scientific inquiry. The course includes an introduction to the scientific method as well as the application of the geological sciences to questions of environmental sustainability

and climate change. Questions of historical evolution of concepts of the earth and the planetary sciences are also addressed.

Corequisite(s): ENVS 110L

Restriction(s):

Must be in the following Major(s): Environmental Sciences

ENVS 110L Earth Science Lab

credit(s): 1

See course description for ENVS 110L.

ENVS 190 Independent Study

credit(s): 1-3

Course repeatable for 9 credit(s).

Topic to be determined by faculty.

ENVS 193 First Year Seminar:

credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must be the following Class(es): Freshman

ENVS 200 Case Studies in Environmental Science

credit(s): 4

Course repeatable for 8 credit(s).

This course is designed to introduce students to scientific issues and concepts related to environmental problems. The course will consist of investigations of a number of specific cases of environmental impacts by humans, such as: chemical contamination of soils, air, or water; overexploitation of fisheries or other living resources; freshwater availability and quality; habitat conversion, fragmentation, and loss of biodiversity; invasive species; renewable and non-renewable energy sources; and the production and management of waste. Specific cases will vary from semester to semester, and will include examples of current local, regional and global relevance. Laboratory exercises will allow students to investigate the scientific principles important for understanding the cases, and will help students develop an appreciation for the strength and limitations of scientific knowledge in addressing environmental issues. Fall and Spring.

Restriction(s):

Must be in the following Major(s): CSCT - Environmental Studies, Environmental Sciences, Environmental Studies, Sustainable Business

Prerequisite(s): BIOL 206, minimum grade: C- or ENVS 103, minimum grade: C- or BIOL 123, minimum grade: C- or ENVS 104, minimum grade: C-

ENVS 202 Chemistry of the Environment

credit(s): 3

To understand the impact of human activities on the natural environment, environmental science majors must be familiar with the chemical, physical, and biological processes that occur in soil, water, and air. These processes determine the reactions, transport, and fates of chemicals introduced into the environment by human activities. Students will apply and build on foundational concepts introduced in CHEM 101/101L to understand the chemical and physical processes that occur in natural systems. Chemical processes include acid-base reactions,

oxidation-reduction reactions, and photochemical reactions. Physical processes include dissolution-precipitation and adsorption processes.

Restriction(s):

Must be in the following Major(s): Environmental Sciences,

Corequisite(s): ENVS 202L

Prerequisite(s): CHEM 101, minimum grade: C- and CHEM 101L, minimum grade: C- and MATH 221 (or concurrent)

ENVS 202L Chemistry of the Environment Lab credit(s): 1

See course description for ENVS 202.

Restriction(s):

Must be in the following Major(s): Environmental Sciences,

Corequisite(s): ENVS 202

Prerequisite(s): CHEM 101, minimum grade: C- and CHEM 101L, minimum grade: C- and MATH 221 (or concurrent)

ENVS 290 Independent Study credit(s): 1-3

Course repeatable for 9 credit(s).

Topic to be determined by faculty.

ENVS 303 Conservation Biology credit(s): 3

This course covers the biological concepts important for the conservation of natural populations, communities, and ecosystems. Both theoretical and empirical studies will be applied to such topics as: the genetics and ecology of small populations, consequences of habitat degradation and fragmentation, the impact of introduced species, and the ecological value of biological diversity. Students who do not have a major in the sciences are encouraged to talk to the instructor about their preparations for this course at the time of registration. Spring.

Equivalent(s): BIOL 323

Prerequisite(s): BIOL 206, minimum grade: C- or BIOL 123, minimum grade: B- or ENVS 103, minimum grade: B-

ENVS 303L Conservation Biology Lab credit(s): 1

This lab includes field trips. Taken concurrently with ENVS 303.

Equivalent(s): BIOL 323L

Corequisite(s): ENVS 303

ENVS 320 Econ of Environmental Protection credit(s): 3

Explores the economic dimensions of environmental topics such as air and water pollution, deforestation, non-renewable resource depletion, recycling, global warming. The course studies the extent of environmental problems and alternative solutions. Spring.

Equivalent(s): ECON 324

Restriction(s):

Must be in the following Major(s): Environmental Studies, Environmental Sciences

Must be the following Class(es): Sophomore, Junior, Senior

Prerequisite(s): ENVS 101

ENVS 321 Ecological Thought and Politics credit(s): 3

This Service Learning course focuses on the writings of seminal figures in American ecological thought, such as John Muir, Gifford Pinchot, and Aldo Leopold. Examines the history and politics of land use and wilderness planning. Class will go on field trips in partnership with the United States Forest Service (USFS) and local environmental groups to learn first-hand about the politics of local land use. Upon sufficient demand.

Equivalent(s): POLS 317

ENVS 324 Climate Chg, Science, Politics credit(s): 3

This course is an in-depth examination of climate change science and politics. It examines the science behind climate models, current and predicted environmental effects of a changing climate, policies, as well as the basic definitions and concepts citizens need to understand

climate change and its related political issues. In the course we will examine how scientific and political thinking on climate change has evolved.

Equivalent(s): POLS 378

ENVS 325 Native American Govt, Politics credit(s): 3

This course will see Native American government and politics in a milieu of intergovernmental relations, of community to community connections, or the lack of such relationships. Taking social justice as importantly about relationships, and doing so in respect of governing, this course will to study how (or how not) federal, state, and municipal governments interact with Native American governments. Spring, even years.

ENVS 326 Environmental Sociology credit(s): 3

This course examines human relationships with the natural environment. It explores how power structures, social norms, ideologies and politics affect our relationship and treatment of the environment. Upon sufficient demand.

Equivalent(s): SOCI 383

ENVS 329 N American Environmental Policies credit(s): 3

State and society in the Pacific Northwest: government, parties, reform movements, regionalism, and social forces in the U.S. Pacific Northwest, and British Columbia and Alberta. Regional issues such as taxation, health care, urbanization, land use, education, the environment, and resource-based economics are addressed in a comparative Canadian-U.S. context. Upon sufficient demand.

Equivalent(s): POLS 329

Restriction(s):

Must be the following Class(es): Sophomore, Junior, Senior

ENVS 330 Parks, Forests, and Wildlife credit(s): 3

In this course we explore the past, present, and future of public lands. Focusing primarily on national and state parks, national forests, and wildlife, this course traces the development and application of the U.S. conservation model, both domestically and abroad. Fall.

Prerequisite(s): ENVS 101

ENVS 341 Environmental Science Seminar credit(s): 1

This class is designed to introduce students to various careers in Environmental Science and to the environmental issues facing our local, regional, and global community. The format of the class will include seminars by visiting professionals and class meetings. Spring annually.

Prerequisite(s): ENVS 103, minimum grade: C- and CHEM 202, minimum grade: C- and ENVS 110 and ENVS 101

ENVS 343 African Environmental History credit(s): 3

This course explores the long-term history of Africans' dynamic interactions with their environments by interrogating how African environmental realities and Africans' conceptions of the environment shaped broader political, social and economic histories. Beginning in the precolonial period, we will trace how climatic variation, political and economic changes in the colonial period, and post-independence priorities transformed Africans' relationships with their environments.

Equivalent(s): HIST 345, INST 341

ENVS 350 Ethics: Global Climate Change credit(s): 3

Many have described global climate change as the defining challenge of the 21st century, noting that unless dramatic changes are made today, future generations will suffer terrible consequences, such as rising seas, wars over fresh water, tens of millions of environmental refugees, and the extinction of species such as the polar bear. This course will investigate the

complex technological, historical, economic, scientific, political, and philosophical issues surrounding this issue. Global warming skeptics are especially encouraged to enroll. Fall. Fulfills the following degree requirement(s): PHIL - Ethics or Political

Equivalent(s): PHIL 460

Prerequisite(s): PHIL 201

ENVS 352 Environmental Law and Policy credit(s): 3

This course provides students with an overview of the substance and procedures relating to environmental regulation and protection in the United States. The course provides some technical understanding of the laws governing the use of resources and the control of pollution discharges. The course addresses, among other topics: the consumption of natural resources that resulted in environmental pollution; the political and policy context in which environmental policies have been formulated and the administrative or regulatory procedures required by statutory law or judicial decisions to deal with various environmental issues.

ENVS 353 Environmental History credit(s): 3

In examining the dynamic relationship between humans and their environment over time, this course explores how nature affects cultural responses and how humans, in turn, have shaped the world around them. Employing a multidisciplinary approach this course draws upon ecological, historical, economic, or political analysis to illuminate the varied relationships between people and place. Spring.

Equivalent(s): HIST 365

ENVS 358 Environmental Ethics credit(s): 3

The detailed philosophical study of humanity's understanding of its relationship to the natural environment, concentrating on historically prominent conceptions of that relationship, and the philosophical foundation of the contemporary environment movement. Fall and Spring.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Equivalent(s): PHIL 458

Environmental Studies, Sustainable Business

Prerequisite(s): PHIL 301 or PHIL 301H

ENVS 360 Indians of Columbia Plateau credit(s): 3

This course will explore Native American groups on the Columbia Plateau, including their traditional lifestyles, traditional and colonial religions, the Salish language, and responses to settlement and government policies. We will also examine the traditions of cooperation and collaboration among these groups. We must understand the geography of the Plateau, in order to fully contextualize the importance of homeland and traditional practices, so this course represents place-based study of Native American history. Spring, odd years.

Fulfills the following degree requirement(s): HIST - U.S. History, NTAS - elective, Core: Social Justice, Core: Globa

Equivalent(s): HIST 210, **Equivalent(s):** NTAS 210

ENVS 380 Politics of the Pacific NW credit(s): 3

State and society in the Pacific Northwest: government, parties, reform movements, regionalism, and social forces in the U.S. Pacific Northwest, and British Columbia and Alberta. Regional issues such as taxation, health care, urbanization, land use, education, the environment, and resource-based economics are addressed in a comparative Canadian-U.S. context. Upon sufficient demand.

Equivalent(s): POLS 328

ENVS 381 Ethics of Eating credit(s): 3

An examination of ethical issues surrounding the consumption, production and transportation of food. Issues such as organic food, GMOs, vegetarianism, local and slow food movements, and

hunger may be covered. Ethical issues surrounding both local and international food issues are treated. Upon sufficient demand.

Fulfills the following degree requirement(s): PHIL - Ethics or Political

Equivalent(s): PHIL 459

Prerequisite(s): PHIL 201

ENVS 384 GIS and Ecological Techniques credit(s): 3

This course will introduce students to geographic information systems (GIS) and focus on how GIS can be used to address research and management questions in ecology. Students will use existing GIS databases from resource agencies and learn how to create and analyze new GIS databases. Field techniques will vary but include mapping exercises using compass and global position systems (GPS). Spring, even years.

Equivalent(s): BIOL 344

Corequisite(s): ENVS 384L

Prerequisite(s): ENVS 103, minimum grade: B- or BIOL 206, minimum grade: C-

ENVS 384L GIS and Ecological Techniques Lab credit(s): 1

ENVS 432 Core Integration Seminar: credit(s): 3

The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way

that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

ENVS 490 Independent Study credit(s): 1-3

Course repeatable for 9 credit(s).

Topic to be determined by faculty.

ENVS 497 Internship credit(s): 0-6 Course repeatable for up to 6 credit(s), although only one credit would count toward the major and the remaining credits could apply as ENVS elective credits.

Professional experience in environmental studies-related field. Students must take the initiative to contact an agency and a faculty member willing to supervise the internship.

ENVS 499A Symposium in Environmental Studies I credit(s): 1

This first portion of the capstone experience is designed to help Environmental Studies students lay the foundation for the project they will complete in 499B. Together, the courses help students integrate their experience and perspectives and apply them to a specific environmental issue. Students will be expected to produce a major written analysis of a current complex environmental issue facing the Inland Northwest. Fall and Spring.

Film Studies

Director: Matthew Bolton

The program offers one minor:

Minor in Film Studies

The Film Studies program is an interdisciplinary academic home for the study of film and media analysis. In this program students learn about the formal elements of cinema and other visual media, its history as a medium, its connection to national cultures and values, and its expressions of human experience. Students study film and media analysis through a variety of theoretical frameworks, considering the ways in which different disciplines approach the study of film and media.

Associate Professors: L. Arnold, S. Balzarini (Emeritus), K. Chambers, C. De Barra, R. Donnelly, T. Nitz (Emeritus), R. Rast, V. Schlimgen, J.

Weiskopf Assistant Professors: R. Goodrich

The department offers one major and four minors:

Bachelor of Arts, History major

Minor in History

Minor in Asian History

Minor in Latin American History

Minor in History of Race & Ethnic Communities

The Department of History offers a variety of courses that enable students to fulfill University Core requirements as well as to obtain a Bachelor of Arts with either a major or a minor in History. The goals of the department curriculum are to engender an informed, critical, and articulate sense of the past, an appreciation for the diversity of human experience, and an awareness of the role of tradition in shaping the present. The major develops a variety of practical research and communication skills and provides a foundation for graduate work, the study of law, public service, teaching, archival and library sciences, public history, and many careers in business and the professions. The department sponsors a chapter of Phi Alpha Theta, the international History honor society, and coordinates internships with community partners, Gonzaga University Archives, and Special Collections.

Majors are required to complete HIST 301 (Historical Methods), which is normally taken as the student begins the upper division courses. Majors are also required to take HIST 401 (Senior Seminar). In exceptional cases, students with an honors-level grade point average and with approval of the Department Chair, may elect to take HIST 499 (Senior Thesis) in lieu of HIST 401. Upper-division electives must include one course from four topic areas. Majors who wish to obtain teacher certification are urged to confer with the School of Education as well as their departmental adviser.

HIST 211 Introduction Native American History credit(s): 3

Hundreds of Indigenous groups made their home in North America for centuries before European colonial expansion reached these shores. Native communities might describe this occupancy as 'since time immemorial.' This class will begin with an exploration of those earlier eras and will acknowledge that each Native community was/is distinct from other communities. Thus, while we can observe commonalities in Native experiences and histories, we will also conclude that there is no 'single' Native perspective. To develop this conclusion, we will assess processes of change over time across what we now know as the United States. This course will consider social and cultural approaches to preserving and passing down Native American histories as well as U.S. history interpretations of Native Americans' societies, cultures, economies, and spiritualities. "Texts" in this course will include history books, literature, images,

and film, and we will create and respond to research questions using primary and secondary sources.

HIST 361 Post-WWII Presidency credit(s): 3

The post-1945 presidency evolved and changed drastically as consequence of domestic and foreign events and ideology. We will examine the powers and limitations of the post-1945 U.S. presidents in both foreign and domestic affairs. We will assess their relationships with Congress, the American people, the press, and other nations, and we will explore presidential power, agenda, persuasion, secrecy, and character.

Fulfills the following degree requirement(s): HIST - U.S. History

HIST 362 U.S. Foreign Policy Since 1945 credit(s): 3

HIST 362 will examine the United States' foreign policies formulated and implemented after World War II, during and immediately after the Cold War, and in the post-9/11 era. We will discuss NATO and our relationship with the European nations and evaluate U.S. policies in Asia, particularly our actions in Vietnam and our relationship with China. We will also assess the U.S. role in Latin America and Africa, and diplomacy and conflict in the Middle East.

Restriction(s):

Must not be the following Class(es): Freshman

HIST 363 Women in United States History credit(s): 3

Explores the history of American women from the colonial era to the present and investigates women's economic and political lives and social contributions through suffrage, reform, civil rights, feminism, and more. The class also explores gender roles and the ways that race, class, politics, national origin, and the passage of time alter those expectations.

Fulfills the following degree requirement(s): HIST - U.S. History

Equivalent(s): WGST 330

Restriction(s):

Must not be the following Class(es): Freshman

HIST 364 Public History credit(s): 3

Why are people drawn to the past? When they go searching for it, where do they go, and what do they find? What should they find? This course examines the practice and politics of "public history." As we will see, public historians work as museum curators, historic preservationists, historic site interpreters, archivists, film consultants, writers, and editors. In these and other roles, public historians help individuals and organizations recognize, contend with, and learn from the complexities of the past. Through weekly readings, site visits, guest speakers, and hands-on project experience, this course will introduce students to the challenges and rewards that accompany engagement with - and employment within - the field of Public History.

Fulfills the following degree requirement(s): HIST - U.S. History

HIST 365 Environmental History credit(s): 3

In examining the dynamic relationship between humans and their environment over time, this course explores how nature affects cultural responses and how humans, in turn, have shaped the world around them. Employing a multidisciplinary approach this course draws upon ecological, historical, economic, or political analysis to illuminate the varied relationships between people and place.

Fulfills the following degree requirement(s): HIST - U.S. History

Equivalent(s): ENVS 353

Restriction(s):

Must not be the following Class(es): Freshman

HIST 366 American Cultures and Ideas credit(s): 3

This course will examine American history through an exploration of its culture. Throughout this course we will work towards defining what culture is, how it shapes expectations and assumption, how it motivates human actions and interactions, and how it is bound by time and place. Each student's ability to critically read cultural sources from an appropriately historical frame of reference will be tested in a variety of assignments, including weekly readings, writing assignments, and active class participation.

Fulfills the following degree requirement(s): VART - History

Equivalent(s): VART 406

HIST 367 Rights Justice and US Citizenship credit(s): 3

This course explores the history of citizenship in the United States from its founding in the Revolutionary era to the present. We will examine how and why the rights and obligations of citizenship have changed over time. We will also consider philosophical and theoretical frameworks involved in building and in understanding citizenship. And, significantly, we will explore the ways that Americans worked to democratize institutions that treated citizens differently because of race, ethnicity, class, national origin, or gender. This course is geared towards students interested in history, law, politics, ethnic studies, women's studies, and social movements.

Fulfills the following degree requirement(s): HIST - U.S. History, SOSJ - Block C

HIST 370 Foundation of East Asian Civilization credit(s): 3

This course seeks to give students an understanding of the history and culture of pre-modern China, Japan, Korea, and Vietnam. After exploring the historical roots of Confucianism, Daoism and Buddhism in China, students will examine the ways in which these foundational philosophies helped form social, cultural, and political institutions in China and its neighbors. Students will also focus attention on the historical emergence of the Chinese imperial system, and its greatest pre-modern exemplars, the Qin, Han and T'ang dynasties. Not limiting the focus to China alone, students will also explore how the concept of China as the "middle kingdom" influenced the language, religion and political developments in Japan and Korea, leading to an authentic "macro-culture" in East Asia. The course will finish with a discussion of samurai culture and an analysis of how the Mongol conquests of Central and East Asia transformed the region, taking students to the threshold of the early modern period in Asia. It is desired, but not required, that students take HIST 112 prior to this course.

HIST 374 Maoist China credit(s): 3

This course is an in-depth study of China during the revolutionary twentieth century, focused upon the career of People's Republic of China Chairman Mao Zedong. In addition to analyzing the political, economic, social, and cultural developments of post-imperial China, the course takes a look at the theory of revolution, and examines China's historical development in the

context of imperialism, post colonialism, and international Marxist revolution. It is desired, but not required, that students take HIST 112 prior to this course.

Fulfills the following degree requirement(s): INST - Asian Studies content, HIST - Non-West/Dev Area

HIST 375 Modern East Asian Civilization credit(s): 3

This course is a focused integrated survey of East Asian civilization since the Late Ming period of China (c. 1600 A.D.). Using the standard interpretive categories of politics, economics, society, and culture, the course will explore the historical inter-relationships between the rise of the Manchu (Qing) Dynasty and the unification of Japan; the historical inter-relationships between East Asian societies and western commercial expansion, including overseas missions to China and Japan; the explosion of western imperialism in the nineteenth century, including the Opium War and Taiping Rebellion; Japanese imperialism in China and Korea; the historical inter-relationships between Chinese communism and Japanese militarism; East Asia in the Cold War, and the pop-cultural influence on East Asia on the modern west. Students who take this course for International Studies credit will be required to do an extra writing assignment that integrates the material of this course with their International Studies focus. It is desired but not required that students will have taken History 112 (World Civilizations 1500 - Present) prior to taking this course.

Information Technology & Society

Director: R. Bryant

Information and the technology that processes and stores it are of central importance in today's society. The Information Technology and Society courses at Gonzaga University provide students with the necessary skills, concepts and competencies to utilize information effectively in their careers. The courses in Information Technology and Society are designed to enhance the studies of students in all liberal arts disciplines. Technology is constantly changing at a rapid pace, and in order to stay abreast of the changes, individuals need to understand the underlying foundation of how information is organized and how the devices that access the information work. Due to the constant development of new devices and applications, society's rules and laws often lag behind dealing with ramifications of these changes. The Information Technology and Society courses examine these ramifications along with the ethical and social implications of digital technology innovations across many disciplines. Coupled with the discipline specific knowledge, information technology capabilities are integral to a fully educated citizen today.

Courses:

- ITEC 101 Fluency in Information Tech credit(s): 3**
Introduces skills, concepts and capabilities necessary to effectively use information technology. Students will become fluent with information technology through coverage of basic underlying concepts and use of common applications. Concepts will include the building blocks of computer systems and software, as well as historical perspectives and social implications of information technology.
- ITEC 102 Digital Technology and Society credit(s): 3**
This course covers the impacts of digital technologies on society. How the digital universe works from bits to the web, along with how it may affect the individual are examined. Issues related to all disciplines such as privacy, security, and how information is produced and consumed are studied. Emphasis is placed upon how to think critically about the digital information world.
- ITEC 193 FYS credit(s): 3**
The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course

highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

ITEC 201 History and Technology in a Digital Age credit(s): 3

Historical foundations of modern computing technology are covered. Topics include the technological and functional underpinnings of digital computer systems. Also examined are the societal impacts of computing and computing technology, information technology, and communication technology

ITEC 211 Algorithmic Art credit(s): 3

Algorithmic Art sits at the intersection of mathematics, programming, algorithms, and art. The primary goal of the course is to teach computational thinking to liberal arts students. Student motivation is achieved by presenting programming and math concepts in the context of the visual arts. The assignments use the programming environment called Processing which was developed specifically for visual artists.

Equivalent(s): CPSC 211

ITEC 212 Computational Modeling credit(s): 3

This course introduces students to the modeling process and computer simulations. It considers two major approaches: system dynamics models and cellular automation simulations. A variety of software tools will be explored. Applications will be chosen from ecology, medicine, chemistry, biology, and others.

Equivalent(s): CPSC 212

ITEC 280 Special Topics credit(s): 0-6

Course repeatable 2 time.

ITEC 497 Internship credit(s): 0-6

Course repeatable 2 time.

Work experience directly related to the student's Information Technology. Internship requires completion of an application form, a 3.00 GPA and permission from department. Zagweb registration is not available. Fall, Spring and Summer.

Integrated Media

Chairperson: Susan English

Associate Professors: S. English, R. Lyons, S.J., C. McMahon

Assistant Professors: D. Gracon, M. McCormick

Senior Lecturer: J. Kafentzis

Lecturer: J. Collett

The department offers three majors and four minors:

Bachelor of Arts, Broadcast and Electronic Media Studies major

Bachelor of Arts, Journalism major

Bachelor of Arts, Public Relations major

Minor in Broadcast and Electronic Media Studies

Minor in Journalism

Minor in Public Relations, Minor in Visual Literacy

Gonzaga's Integrated Media Department weaves the related disciplines of Journalism, Broadcast and Electronic Media Studies and Public Relations into an environment where students can learn and hone their writing, interviewing, strategic communications and technological skills while specializing in a path that becomes a bridge to a career or to further scholarship in graduate school.

The Integrated Media Department offers majors and minors in Broadcast and Electronic Media Studies, Journalism and Public Relations within the College of Arts and Sciences. The department also offers an interdisciplinary Visual Literacy minor.

The Integrated Media programs strive to guide students toward academic excellence and tangible career goals. The curriculum reflects the Jesuit Catholic character and liberal arts tradition of Gonzaga.

Students have many opportunities to develop and experiment with storytelling and strategic communication techniques using multiple platforms and methods, learning through the lens of social justice and Ignatian pedagogy.

The coursework in Integrated Media programs balances development of the

skills and use of technology required of professionals with philosophical grounding in ethical and proficient communications.

In addition to coursework in traditional classroom settings, students engage in hands-on work in computer labs equipped with software applications that allow students to experience a contemporary news and video-editing environment.

Students further polish the tools of skillful and responsible communication through internships in professional environments, for which academic credit is available.

Campus media outlets that include GUTV and KAGU, Gonzaga's television and radio stations, and The Gonzaga Bulletin (gonzagabulletin.com), the student newspaper, offer opportunities for students to hone media skills learned in the classroom. In addition, stories created for these media entities become substantial portfolio pieces for applications to graduate schools and for internships and employment.

Experiential learning in the broadcast, journalism and public relations arenas are hallmarks of the department.

Bachelor of Arts degrees are offered in these areas:

1. Broadcast and Electronic Media Studies
2. Journalism
3. Public Relations

Integrated Media Department foundation course work:

Majors within the Integrated Media Department are required to complete the Integrated Media foundation course work:

<u>INMD 101</u> Media Literacy	3 credits
<u>INMD 360</u> Media Law	3 credits

Minors within the Integrated Media Department are required to complete the Integrated Media foundation course work:

INMD 101 Media Literacy 3 credits

*Note: No upper-division courses except INMD 360 may be applied to two

separate majors and/or minors within the Integrated Media Department without approval of the Department Chair.

Broadcast and Electronic Media Studies

Director: S. English

The Broadcast and Electronic Media Studies Program provides students with the worldview and skills necessary for creative and responsible work in the television and radio industries. Broadcasting majors and minors learn to emphasize work that makes a positive difference in their communities and the broader world.

To master their technical skills, students put on a series of live shows that air on GUTV and are posted on its YouTube channel (<https://www.youtube.com/user/GUTVondemand>). Students engage in all aspects of the creation and production of these shows, including on-air roles, camera work, directing, mixing audio, using field cameras and non-linear editing.

Internships in broadcasting-centric workplaces allow students to transfer knowledge and experience acquired in classes to the professional world. Each semester, Spokane-area television and radio news organizations invite our students to work alongside professionals in a range of appropriate roles. University credits are available for internships.

Journalism

Director: S. English

The Journalism Program cultivates students' interests and techniques in gathering information through research and interviews, and writing for the array of media platforms. Emphasis is placed on the role and responsibilities of journalism within the context of civic and political participation, and the social justice awareness rooted in the University mission. Courses in journalism history, media law and ethics, and press theory form the philosophical foundation for the major and minor. Journalism students, in their work, focus on issues of civic and cultural importance with a traditional news stance, but there are ample opportunities for experimentation with the styles of journalism appropriate for magazines, publications with a literary bent, and emerging Internet and social media platforms. Students also hone their visual storytelling skills in courses such as photojournalism and emerging media.

Students pursuing a major or minor in journalism choose from an array of elective courses, including literary journalism, news leadership, media ethics, documentary filmmaking, and sports media.

Most Gonzaga journalism students work for the weekly student newspaper, The Gonzaga Bulletin (gonzagabulletin.com), as writers, editors or photojournalists. Credit toward the Journalism major and minor is available, as well as a stipend for editors, staff writers and photojournalists.

Many journalism students garner journalistic experience in the professional environment through internships, for which academic credit is also available.

Public Relations

Director: S. English

The Public Relations Program combines study of communication theory, speech writing and delivery, and corporate strategies with journalistic expertise. Students learn to skillfully manage communication between organizations and the people they serve. Internships with local, national and international organizations provide hands-on experience in campaign planning, corporate communication, and nonprofit organization advocacy.

As part of the Public Relations coursework, students work directly with a local organization in creating a comprehensive public relations plan and media kit. As part of the senior capstone course, public relations students develop a portfolio, articulate a philosophical statement of communication, and write a thesis.

Public relations skills also enhance other degrees. Political Science students interested in honing their political campaigning skills, students in the humanities with interests in promoting and publicizing the arts, and business students seeking to complement marketing and management concentrations often complete a Public Relations minor.

Interdisciplinary Arts

Program Director: [Suzanne Ostersmith](#)

The program offers one minor:

Minor in Interdisciplinary Arts

The study of interdisciplinary arts expands a student's problem solving, critical reflection and innovative thinking through combining the strengths of theatre, dance, visual arts, and music. The Interdisciplinary Arts minor gives students a solid foundation and knowledge in these art forms and integrates the arts in a new and exciting way. This minor also allows students, such as those in STEM (Science, Technology, Engineering, Math) majors, to integrate valuable arts experience into their skill set, increasing their creative capacity and expressiveness.

This unique minor offers arts-based research skills, focusing less on product and more on the creative process. A student will complete the minor being able to think creatively, innovatively and be confident in their ability to tackle any problem from a number of angles.

Students who wish to focus their studies in either Theatre or Dance should visit the [Theatre and Dance Department](#) page for more information on the Theatre Arts major/minor and the Dance major/minor.

International Studies

Chairperson: Torunn Haaland

The department offers one major and one minor:

Bachelor of Arts, International Studies major
(required Regional and Thematic concentrations)
Minor in International Studies

Gonzaga University's International Studies is an interdisciplinary program that focuses on the interconnected and interdependent processes shaping the contemporary world. The International Studies program promotes the College of Arts and Sciences' mission to engage in holistic, active learning and to connect our students' passions and their academic disciplines through innovative and integrative educational experiences. While students will acquire historical and cultural knowledge, they will build linguistic proficiency

relevant to a geographically defined region, and develop an understanding of the larger structures and mechanisms that organize the world.

Given its multidisciplinary orientation, the program encourages students to examine local and global issues through a diverse set of perspectives and methodologies. Students who major and minor in International Studies

learn to reflect on the socio-economic and cultural position from which they engage local and global communities. Finally, the program challenges students to assume the ethical and social responsibilities associated with global citizenship, to cultivate global perspectives and enable global engagement, and to foster an ability to analyze and engage insightfully with local and global cultures to help create a more sustainable, participatory, and equitable world.

Mission Statement:

The primary objective of the International Studies program is to develop students' capacity to recognize the increasingly interdependent nature of today's world and to assess the processes, systems, and structures that interconnect local and global communities. To this end, students must become knowledgeable about global systems as well as regional realities. They must also learn to examine complex issues through the application of interdisciplinary theories and methodologies and to communicate effectively the results of their independent research. Students are further expected to achieve proficiency in a language that augments their regional studies and are strongly encouraged to participate in experiential learning, especially through internships and study abroad/away programs. Ultimately, the program aims to prepare students to act and interact in social and professional settings with the intercultural awareness and social responsibility of global citizens.

The International Studies major and minor are composed of four main components: foundational courses; a Regional concentration; a Thematic concentration; and proficiency in a language spoken in the student's selected Regional concentration. Students should choose their language and concentrations with assistance from a faculty advisor to ensure a timely and appropriate degree completion.

Language Requirement for pursuing a major in International Studies:

Because foreign language skills are such a vital part of an International Studies education, to achieve Intermediate High proficiency in their chosen language, all International Studies majors complete language courses through (or demonstrate proficiency at) the 202-level before taking six (6) credits at the 300-level.

Language Requirement **6 credits**
300-level language courses

NOTE: If a given language is only offered through the 202 level, students may, with prior approval from the International Studies Department Chair, complete their upper-division language courses abroad or at another approved domestic institution. If no such alternative is feasible, students may, with the Department Chair's *prior* approval, take two semesters of a second language that is relevant to their course of study. Transfer students who have

not previously studied a language will be required to complete courses through the 202 level.

INST 332 Politics of Space and Place credit(s): 3

Everyday encounters with physical surroundings guide our orientations to the world. As we wander city streets, shopping malls, stadiums, nature preserves, sacred sites, restaurants, monuments, museums, and classrooms, we examine how we move in, and are moved by the material arenas we share. Spatial organization and built environments inform our habits of perception, determine the meaning of a particular place, accent what is worth attention and what might be overlooked, and reaffirm dominant norms and power relationships in public culture. Charts, maps, apps, and other navigational tools dictate where and how we move, and how we understand our roles within a given space. Featuring the experiential dimensions of rhetoric and communication, this course presses us to consider how material spaces and places construct everyday geographies. Spring.

INST 348 20th Century Northern Ireland credit(s): 3

Following its inception in May 1921, politics within the Northern Ireland state was dominated by sectarianism and religious conflict. In order to maintain Protestant hegemony, the civil rights of the minority Catholic population were eroded, both overtly and covertly. Tensions came to a head in the 1960s, but his course will demonstrate how the seeds of violence were sown much earlier. Key events of the conflict such as Bloody Sunday, internment, the murder of Lord Mountbatten, the hunger strikes, the Enniskillen and Omagh bombings, and the steps to the Peace Process will be examined. We will attempt to understand the troubled history of Northern Ireland from the perspective of the two communities that live within it, as well as that of the British and Irish governments. There will be a special emphasis on how peace has been achieved in the wake of the "Troubles" and we will examine whether the Good Friday Agreement can offer lessons to other conflict zones around the world.

This course seeks to give students an understanding of the history and culture of pre-modern China, Japan, Korea, and Vietnam. After exploring the historical roots of Confucianism, Daoism and Buddhism in China, students will examine the ways in which these foundational philosophies helped form social, cultural, and political institutions in China and its neighbors. Students will also focus attention on the historical emergence of the Chinese imperial system, and its greatest pre-modern exemplars, the Qin, Han and T'ang dynasties. Not limiting the focus to China alone, students will also explore how the concept of China as the "middle kingdom" influenced the language, religion and political developments in Japan and Korea, leading to an authentic "macro-culture" in East Asia. The course will finish with a discussion of samurai culture and an analysis of how the Mongol conquests of Central and East Asia transformed the region, taking students to the threshold of the early modern period in Asia. INST 406 Narrative Fiction in Span America credit(s): 3

The novel and short story in Spanish America during the twentieth century.

Fulfills the following degree requirement(s): INST - Difference, INST - Latin American Studies

Equivalent(s): SPAN 406

Prerequisite(s): SPAN 302

INST 414 Latin American Cinema credit(s): 3

This course will focus on a series of representative Latin American films in order to explore issues of national formation and cultural identity. Emphasis will be given to the social, political, and economic factors which affect the production and reception of these films.

Fulfills the following degree requirement(s): INST - Difference, SPAN - Culture

Equivalent(s): SPAN 416

Prerequisite(s): SPAN 302

INST 415 Spanish Cinema credit(s): 3

This course will provide an introduction to Spanish cinema through the study of film theory and representative films from different periods. Particular attention will be given to the historical, social, and cultural framework in the production and reception of those movies, as well as theories of authorship, gender, and national/cultural identity.

Fulfills the following degree requirement(s): INST - Difference, INST - European Studies, INST - Latin American Studies, Fulfills the following degree requirement(s):

INST 430 Intersectional Communication credit(s): 3

The study of communication and culture in a global world cannot and must not be apolitical, ahistorical, or blind to the messy entanglements of power and privilege. Therefore, this course will focus on the intersections between critical race theory, feminist theory, and critical intercultural communication in order to interrogate and examine the ways in which our social identities and locations affect the contexts of our lives including our opportunities, relationships, and overall understanding of the world. Specifically, this course will engage the work of Black Feminist scholars and ongoing scholarly conversations on intersectionality to analyze intercultural encounters and engagement. Fall.

INST 432 Core Integration Seminar: credit(s): 3

The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

INST 440 Rhetoric of Social Change credit(s): 3

Public expression and discourse can affirm, complicate, challenge, and even radically revolutionize our shared values and ideals over time. Arguments and symbolic actions in communal spaces prompt individuals and groups to rethink, redevelop, and reestablish potential modes of identity, participation, and interaction within a society. Students in this course will closely examine specific social movements (including, potentially, civil rights, gender rights, indigenous rights, and environmental movements) to better understand the plurality of voices and modes of public expression in dialogue and competition that contribute to, resist, and ultimately shape societal change. Students will then build upon historical knowledge and perspective to engage in an immersive study of an ongoing contemporary social controversy,

ultimately creating an informed rhetorical intervention of their own, participating in the social issues and changes of the current day. Fall.

Course repeatable for 6 credit(s).

Internship with organization with an international dimension, e.g., political or economic policy organizations, think tank or advocacy organizations; public or foreign policy organizations; human services, non-profit, or charitable organizations.

Restriction(s):

Must be the following Class(es): Sophomore, Junior, Senior

INST 498 Thesis credit(s): 3

Students may elect to substitute writing a thesis for one of their upper division electives. Thesis subject must be approved by INST Department Chair and mentor chosen by student with expertise in the subject region. Student must complete an individualized study form to register. See International Studies Department Chair to arrange.

Restriction(s):

Must be the following Class(es): Senior

INST 499 Senior Capstone credit(s): 1

Students take INST 499 in either semester of the senior year; the course involves compiling an electronic portfolio showcasing the student's academic work, service, study abroad experiences, internships and completing a problem-based research project with peers.

Italian Studies Program

Director: Torunn Haaland

Professor: G. Brooke (Emerita), T. Haaland

Associate Professors: S. Nedderman (Emerita)

Assistant Professor: E. Zammarchi

The department offers one major and one minor:

Bachelor of Arts, Italian Studies major

Minor in Italian Studies

Italian Studies is an interdisciplinary program aimed at imparting an understanding of Italian culture and competence in the Italian language.

The Bachelor of Arts degree with a major in Italian Studies includes one semester of participation in the Gonzaga-in-Florence program or comparable experience in Italy and a senior project (ITAL 498). Italian Studies majors are required to take an upper division course in Italian during their fourth year regardless of credits earned.

The Director of the Italian Studies Program is advised by a committee formed by the chairs or representatives of the departments that offer upper division electives for Italian Studies. Meetings of the advisory committee are called by the Director of Italian Studies as needed. Since the effective availability of upper level courses offered on the Spokane campus will at times be contingent upon enrollment, completion of the Italian Studies major and minor may require participation in study abroad programs and/or enrolling in summer courses.

The department offers two degrees, three majors, and two minors:

Bachelor of Science in Mathematics

Bachelor of Arts in Mathematics

Bachelor of Science in Applied Mathematics

with optional concentrations in: Actuarial Science, Biology, Biochemistry, Chemistry, Computer Science, Economics or Physics

Minor in Applied Mathematics

Minor in Mathematics

The Department of Mathematics provides training in mathematics and its applications to solve problems in business, engineering, the social sciences, and other disciplines. The curriculum offers a blend of pure mathematics and its applications. The department offers opportunities for students to grow their passion for mathematics and enrich their understanding of its role in the world through participation in conferences, community teaching, undergraduate research, and clubs. Majors are well prepared for positions in industry, government, and education, as well as for graduate studies.

All majors must take a senior comprehensive (MATH 496 or MATH 499) in the fall semester of their final year.

Prospective teachers of mathematics should consult the School of Education for the current state certification requirements.

It is recommended that all Mathematics majors take PHYS 103, CHEM 101, or BIOL 105 to satisfy their University Core Scientific Inquiry requirement. The department involves students with activities sponsored by the Mathematical Association of America (MAA), and the Society of Industrial and Applied Mathematics (SIAM). Majors may also participate in the annual William Lowell Putnam Mathematical Competition held every December.

Students pursuing a major in Mathematics or Applied Mathematics cannot pursue a minor in Mathematics or Applied Mathematics. Students are able to major or minor in Mathematics or Applied Mathematics, but not both.

Courses:

MATH 099 Intermediate Algebra credit(s): 3
 Review of basic algebraic operations and concepts for students who need additional preparation before taking other courses involving mathematics. Topics include operations on algebraic expressions, factoring, algebraic functions, linear and quadratic equations, graphing, exponents,

radicals, and linear equations in two unknowns. This course does not fulfill the math requirement in the University Core.

MATH 100 College Algebra credit(s): 3

College algebra for those students who need additional preparation before taking MATH 114, MATH 147, or MATH 148. Topics include equations, polynomials, conics, graphing, algebraic, exponential and logarithmic functions. This course does not fulfill the math requirement in the University Core. Fall and Spring.

Equivalent(s): MATH 112

MATH 103 Excursions in Mathematics credit(s): 3

An elementary survey of various mathematical areas such as algebra, geometry, counting (permutations, combinations), probability, and other topics selected by the instructor. This course is intended for the liberal arts student not pursuing business or the sciences. Fall and Spring.

Fulfills the following degree requirement(s): Core: Mathematics

MATH 104 Elements of Algebra and Stats credit(s): 3

Development and application of concepts from algebra and statistics. Topics include polynomials, solving equations, graphing, functions, modeling, counting (permutations and combinations), data representation, probability, and statistics.

Fulfills the following degree requirement(s): Core: Mathematics

MATH 114 Mathematical Analysis-Business credit(s): 3

Designed for the student majoring in business. Topics selected from: functions and models, systems of equations, optimization, and introductory calculus. The emphasis will be on examples from business, which may include: cost, revenue, profit, supply, demand, market equilibrium, interest, present-value, future-value, and consumer and producer surplus. Fall and Spring.

Prerequisite: MATH 100

Fulfills the following degree requirement(s): Core: Mathematics

Prerequisite(s): MATH 100

MATH 121 Introductory Statistics credit(s): 3

An introduction to the basic concepts of descriptive and inferential statistics and their application to the interpretation and analysis of data. Fall and Spring.

Fulfills the following degree requirement(s): Core: Mathematics

MATH 147 Precalculus credit(s): 3

Topics include advanced equations and inequalities, functions and graphs including composite and inverse functions, logarithmic and exponential functions, trigonometric functions and their graphs, right angle trigonometry, trigonometric identities, systems of equations, and conics. Fall and Spring.

Fulfills the following degree requirement(s): Core: Mathematics

MATH 148 Survey of Calculus credit(s): 3

A one semester introduction to differential and integral calculus designed to convey the significance, use and application of calculus for liberal arts students, particularly those in the behavioral, biological, and social sciences. Fall and Spring.

Prerequisite: MATH 100

Fulfills the following degree requirement(s): Core: Mathematics

Prerequisite(s): MATH 100

MATH 157 Calculus-Analytic Geometry I credit(s): 4

An introduction to calculus for engineering, science and mathematics students, with an emphasis on conceptual understanding, problem solving, and modeling. Topics covered include: limits, continuity, derivatives of algebraic, trigonometric, and transcendental functions, applications of the derivative including optimization problems and linear approximations,

antiderivatives, introduction to the definite integral, and the Fundamental Theorem of Calculus. Fall and Spring.

Prerequisite: MATH 147, minimum grade: C

Fulfills the following degree requirement(s): Core: Mathematics

Prerequisite(s): MATH 147

MATH 193 First Year Seminar credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

This course does not meet major or minor requirements.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must be the following Class(es): Freshman

MATH 221 Applied Statistics credit(s): 3

This course contains an introduction to probability and the use of statistics to solve problems in a variety of scientific disciplines. Topics include experimental design, sampling methods, confidence intervals, hypothesis tests, and linear models. The use of statistical software is integral to this course. Fall.

Prerequisite(s): MATH 148 or MATH 157

MATH 231 Discrete Structures credit(s): 3

A study of propositional logic, set theory, functions, algorithms, divisibility, introductory number theory, elementary proof techniques, counting techniques, recursive definitions, mathematical induction, and graph theory. Fall and Spring.

Prerequisite(s): MATH 148 or MATH 157

MATH 258 Calculus-Analytic Geometry II credit(s): 4

A continuation of MATH 157. Topics covered are: techniques of integration, applications of the integral, improper integrals, sequences and infinite series with an introduction to convergence tests, parametric equations, and polar coordinates.

Prerequisite(s): MATH 157, minimum grade: C-

MATH 259 Calculus-Analytic Geometry III credit(s): 4

A treatment of multivariable calculus and the calculus of vector fields. Topics include: vectors and vector-valued functions, partial derivatives, multiple integration, curl and divergence, line integrals, Green's theorem, Stokes' theorem, and the Divergence theorem.

Prerequisite(s): MATH 258, minimum grade: C-

MATH 260 Ordinary Differential Equation credit(s): 3

Solution methods for first-order equations, second-order linear equations, and linear systems of differential equations, including analytic and qualitative approaches. Topics include mathematical modeling, Laplace transforms, Taylor series solutions, and an introduction to matrix methods. Additional topics may include numerical methods, analyzing nonlinear systems, and techniques for higher-order linear equations. Fall and Spring.

Prerequisite(s): MATH 259

MATH 290 Directed Reading credit(s): 1-3

Course repeatable for 6 credit(s).

Readings and reports in selected mathematical topics. Upon sufficient demand.

Restriction(s):

Must be the following Class(es): Sophomore

Prerequisite(s): MATH 157

- MATH 362 Selected Topics credit(s): 1-3**
 Course repeatable for 9 credit(s).
 Various areas of pure and applied mathematics presented at a level accessible to those just completing calculus. Upon sufficient demand.
- MATH 363 Selected Topics credit(s): 1-3**
 Course repeatable for 6 credit(s).
 Various areas of pure and applied mathematics presented at a level accessible to those just completing calculus. Upon sufficient demand.
- MATH 390 Directed Study credit(s): 1-3**
 Course repeatable for 6 credit(s).
 Topic to be determined by faculty.
- MATH 413 Real Analysis I credit(s): 3**
 This proof-based course provides a rigorous treatment of the real number system, the topology of the real line, sequences and series of numbers and functions, continuity of functions, differentiation, and the Riemann integral. Spring and Fall, even years.
Prerequisite(s): MATH 301
- MATH 414 Real Analysis II credit(s): 3**
 Continuation of MATH 413 with topics chosen from Lebesgue theory, metric spaces, function spaces, and multivariable calculus. Spring, odd years.
Prerequisite(s): MATH 413
- MATH 417 Complex Variables credit(s): 3**
 An introduction to complex numbers and functions of one complex variable. Topics include the geometry and algebra of complex numbers, elementary functions, analytic functions, integration on the complex plane, Taylor and Laurent expansions, and the calculus of residues. Other topics selected from conformal mappings, integral transforms and inversion formulas, harmonic functions, and winding numbers, with applications to physical problems. Spring, even years.
Prerequisite(s): MATH 301
- MATH 421 Probability Theory credit(s): 3**
 A mathematical treatment of the laws of probability with emphasis on those properties fundamental to mathematical statistics. General probability spaces, combinatorial analysis, random variables, conditional probability, moment generating functions, Bayes' law, distribution theory, and law of large numbers. Fall.
Prerequisite(s): MATH 301(or MATH 259 and MATH 339)(or MATH 259 and MATH 351)
- MATH 422 Mathematical Statistics credit(s): 3**
 An examination of the mathematical principles underlying the basic statistical inference techniques of estimation, hypothesis testing, regression and correlation, nonparametric statistics, analysis of variance. Spring, even years.
Prerequisite(s): MATH 421
- MATH 423 Stochastic Processes credit(s): 3**
 An introduction to random processes and their applications in scientific inquiry, including discrete and continuous time probability models, Markov chains, Poisson processes, random walks, and simulation techniques. Additional topics selected from: queuing theory, branching processes, reliability theory, and Brownian motion. Spring, odd years.
Prerequisite(s): MATH 421
- MATH 432 Core Integration Seminar: credit(s): 3**
 The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way

that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

This course does not meet major or minor requirements.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

MATH 437 Abstract Algebra I credit(s): 3

A detailed examination of topics chosen from groups, rings, integral domains, Euclidean domains, unique factorization, fields, Galois theory, and solvability by radicals. Spring and Fall, odd years.

Prerequisite(s): MATH 301

MATH 438 Abstract Algebra II credit(s): 3

Continuation of MATH 437. Spring, even years.

Prerequisite(s): MATH 437

MATH 440 Foundations of Applied Math credit(s): 3

This course introduces advanced foundational techniques used to solve problems arising in applied mathematics, science and engineering. Topics include dimensional analysis and scaling, mathematical modeling, perturbation methods, and asymptotic expansions. Additional topics may include the calculus of variations, similarity methods, integral transforms, Fourier series, special functions, and the derivation of models from conservation laws and constitutive equations; other topics may be selected at the discretion of the instructor.

Prerequisite(s): MATH 260, minimum grade: C-

MATH 450 Selected Topics credit(s): 1-3

Course repeatable for 9 credit(s).

Possible topics include combinatorics, topology, number theory, advanced numerical analysis, advanced linear algebra, theory of computation and complexity, and history of mathematics.

Credit by arrangement. Upon sufficient demand.

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): MATH 301

MATH 451 Special Topics credit(s): 1-3

Course repeatable for 9 credit(s).

Possible topics include combinatorics, topology, number theory, advanced numerical analysis, advanced linear algebra, theory of computation and complexity, and history of mathematics.

Credit by arrangement. On sufficient demand.

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): MATH 301

MATH 452 Selected Topics credit(s): 1-3

Course repeatable for 9 credit(s).

Possible topics include combinatorics, topology, number theory, advanced numerical analysis, advanced linear algebra, theory of computation and complexity, and history of mathematics.

Credit by arrangement. Upon sufficient demand.

Prerequisite(s): MATH 301

MATH 453 Selected Topic credit(s): 1-3

Course repeatable for 9 credit(s).

Possible topics include combinatorics, topology, number theory, advanced numerical analysis, advanced linear algebra, theory of computation and complexity, and history of mathematics.

Credit by arrangement. Upon sufficient demand.

Prerequisite(s): MATH 301

MATH 454 Partial Differential Equations credit(s): 3

Solutions of boundary value problems with applications to heat flow, wave motion, and potential theory. Topics include derivation of the heat, wave, and Laplace's equations, orthogonal sets of functions, Fourier series, Sturm-Liouville theory, separation of variables, integral transforms, the method of characteristics, and extensions to higher dimensions and non-Cartesian coordinate systems. Additional topics may include numerical methods, inverse methods, and nonlinear equations. Spring. **Prerequisite(s):** MATH 260, minimum grade: C-

MATH 457 Number Theory and Cryptography credit(s): 3

Elementary number theory topics including modular arithmetic, Diophantine equations, multiplicative functions, factorization techniques, primality testing, and development of the public key code. Additional topics may be included. Fall, even years.

Prerequisite(s): MATH 301

MATH 459 Topology credit(s): 3

Topics selected from the following: Metric spaces, manifolds, general topological spaces. Sequences, continuous functions, homeomorphisms. The separation axioms, connectedness, compactness. The theory of surfaces. Knot theory. Topics from combinatorial topology, algebraic topology, differential topology. Other topics to be determined by the instructor. Spring, odd years.

Equivalent(s): MATH 450

Prerequisite(s): MATH 301

MATH 462 Nonlinear Systems and Chaos credit(s): 3

This course provides an introduction to nonlinear dynamics and chaos theory. We examine concepts related to geometric and global ways of analyzing nonlinear evolution equations. These concepts include: phase space analysis, dissipative versus conservative systems, attractors, basins of attraction, elementary bifurcation theory, linear stability theory, Poincare sections and maps, strange attractors, Lyapunov exponents, fractals and fractal dimension. Fall, even years.

Prerequisite(s): MATH 260, minimum grade: C-

MATH 490 Directed Reading credit(s): 0-4

Course repeatable for 6 credit(s).

Selected topics in mathematics.

Restriction(s):

Must be the following Class(es): Senior

MATH 494 Topics in Actuarial Science credit(s): 1

This course explores the application of mathematics to solving actuarial science problems.

Course material is intended to help students prepare

for the probability and financial math actuarial exams. Spring.

Prerequisite(s): MATH 421, minimum grade: C- and ECON 352L, minimum grade: C-

MATH 496 Comprehensive - Applied Math credit(s): 1

A comprehensive survey of applied mathematics and its connections with various technical disciplines. Students will gain experience with both written and oral communication while reviewing a breadth of mathematical topics and exploring interdisciplinary applications. Students will be required to take the Educational Testing Service's Major Field Test in Mathematics. Required of all Applied Mathematics majors in their final year. Fall.

Restriction(s):

Must be the following Class(es): Senior

MATH 497 Mathematics Internship credit(s): 0-6

Special program for Mathematics majors.

Restriction(s):

Must be the following Class(es): Senior

MATH 498A Thesis I **credit(s): 1**

This course provides the motivated student with the opportunity to conduct an independent research project under the direction of a Mathematics Department faculty member. Rigorous research and study of advanced material with a significant technical writing component.

Contingent on the student finding a faculty member in the Department of Mathematics who is willing to serve as a mentor. Fall and Spring.

Fulfills the following degree requirement(s): Core: Writing Enriched

Restriction(s): Must be the following Class(es): Junior, Senior

Prerequisite(s): MATH 301, minimum grade: C

MATH 498B Thesis II **credit(s): 2**

Continuation of MATH 498A, culminating in a written thesis. Students are expected to present their work at a conference. Fall and Spring.

Fulfills the following degree requirement(s): Core: Writing Enriched

Prerequisite(s): MATH 498A, minimum grade: B

MATH 499 Comprehensive - Math **credit(s): 1**

A comprehensive survey of mathematics. Students will gain experience with both written and oral communication of mathematics while reviewing a breadth of mathematical topics. Students will be required to take the Educational Testing Service's Major Field Test in Mathematics.

Required of all Mathematics majors in their final year. Fall.

Restriction(s):

Must be the following Class(es): Senior

Modern Languages and Literature

Chairperson: Christina Isabelli

Professors: B. Boyer, G. Brooke (Emerita), L. García-Torvisco, T. Haaland, C. Isabelli, B. Semple

Associate Professors: T. Haaland, F. Kuester (Emerita), R. Marquis, S. Nedderman (Emerita), R. Stephanis

Assistant Professors: A. Schumacher

Senior Lecturers: D. Birginal, U. Perz

Lecturers: K. Bishop, A. García Osorio

The department offers two majors and four minors:

Bachelor of Arts, French major

Bachelor of Arts, Spanish major

Minor in French
Minor in German
Minor in Spanish
Minor in Italian

The Department of Modern Languages and Literature offers the Bachelor of Arts degree with majors in French and Spanish, and cooperates in offering majors and minors in Italian studies, Latin American studies, European studies and Asian studies. All language majors are encouraged to become proficient in a foreign language through study abroad. All language majors take a comprehensive exam, write a thesis, or engage in a capstone experience; content varies by language. Majors need a minimum of 19 credits (French) or 25 credits (Spanish) at the 300 level or above.

Minors are available in French, German, Italian, and Spanish. The Asian Studies, Latin American Studies, and European Studies programs, which are part of the International Studies major, are fully described under International Studies. The Italian Studies major and minor are described under Italian Studies. Since the effective availability of upper level courses offered on the main Spokane campus will at times be contingent on enrollment, completion of the Asian Studies minor and Italian minor may require participation in study abroad programs and/or enrolling in summer courses.

Gonzaga also offers programs of study (year or semester) in Paris, France or in Aix-en-Provence and courses may be transferred to Gonzaga and applied to the major requirement. Gonzaga-in-Florence, Italy, admits students for a summer, year or a semester of study. The department has a fall and spring semester program in Granada, Spain, a summer intensive program (up to six credits) in Cuernavaca, Mexico, and also accepts courses from sponsored programs in Argentina, Chile, or Spain. Gonzaga students can study abroad in Tokyo and Akita, Japan through the Japanese Program for one semester, one academic year, or for a 6-week summer session. Occasionally, students in the German program can spend a semester or a whole academic year at the University in Graz, Austria, or participate in a language program during the summer.

Special Topics in Language Courses

With **prior** approval of the Departmental Chair, students may study a language abroad (in a university approved program) not offered at Gonzaga and transfer these credits to Gonzaga.

Courses:

Arabic

ARAB 101 Elementary Arabic I credit(s): 4

Arabic 101 is a beginning level course primarily for students with little, if any, prior knowledge of Modern Standard Arabic. Arabic 101 introduces grammar, vocabulary, reading, speaking and writing activities, as well as cultural topics. The course stresses communication using both

formal and informal Arabic and exposes the students to the diversity and social issues of the Arab-speaking world. It develops the ability to read, speak, listen and write in Arabic through the consideration of cultural themes, language functions, and authentic situations. The weekly class meetings will be dedicated to meaningful oral use of the language in order to foster acquisition and proficiency. This course provides extensive practice with writing, reading, speaking, and listening proficiency at the novice level according to the ACTFL guidelines.

ARAB 102 Elementary Arabic II credit(s): 4

This course is designed to further introduce students to basic Arabic language skills and give them an insight into the many aspects of Arabic-speaking countries and their culture. Students will be able to apply creative as well as analytic thinking skills by exploring a foreign language and its cultural idiosyncrasies. This course provides extensive practice with writing, reading, speaking, and listening proficiency at the novice level according to the ACTFL guidelines.

Prerequisite(s): ARAB 101 or equivalent

ARAB 201 Intermediate Arabic I credit(s): 4

Arabic 201 is designed to further strengthen and expand basic language skills in Arabic. This course provides extensive practice with writing, reading, speaking, and listening proficiency at the intermediate low level according to the ACTFL guidelines, in addition to developing students' intercultural competencies.

Prerequisite(s): ARAB 102 or equivalent

ARAB 202 Intermediate Arabic II credit(s): 4

Arabic 202 is designed to further strengthen and expand students' language skills in Arabic. This course provides extensive practice with writing, reading, speaking, and listening proficiency at the intermediate level according to the ACTFL guidelines, in addition to developing students' intercultural competencies.

Prerequisite(s): ARAB 201 or equivalent

ARAB 290 Directed Study credit(s): 1-4

Course repeatable 3 time(s).

Topic to be determined by professor and approved by the Department Chair.

ARAB 497 Internship credit(s): 0-6

Course repeatable for 6 credit(s).

Professional experience in a setting related to the Arabic-speaking community in which Arabic is used. Student is responsible to find an appropriate internship and to present a plan (description, objectives, proposed assessment) to the Department Chair for approval.

Prerequisite(s): ARAB 202

Chinese

CHIN 101 Elementary Chinese I credit(s): 4

Fundamentals of standard Chinese, emphasizing culture as well as the four language skills: speaking, listening, reading and writing. Systematic methods and various communication activities for basic training in pronunciation, grammatical structures, conversation on daily topics, and the writing system. Ten hours of conversational language time with students in small groups (held outside of class time) required. This course is only offered through the Gonzaga/Whitworth Classroom Exchange and/or study abroad opportunities.

CHIN 102 Elementary Chinese II credit(s): 4

Second-year course in modern Chinese to develop proficiency in all four language skills: speaking, listening, reading and writing. In addition to the basic conversational topics, students will be taught to use the dictionary, will be exposed to both traditional and simplified characters, and will read and write longer discourses ranging from personal letters to short narratives. Students will also learn to use Chinese word processing. Ten hours of conversational language time with students in small groups (held outside of class time) required. This course is only

offered through the Gonzaga/Whitworth Classroom Exchange and/or study abroad opportunities. Department Chair approval required.

Prerequisite(s): CHIN 101 or equivalent

CHIN 201 Intermediate Chinese I credit(s): 4

Credit for Chinese language is given to students through the consortium agreement (Department Chair approval) or study abroad programs only.

Prerequisite(s): CHIN 102 or equivalent

CHIN 202 Intermediate Chinese II credit(s): 4

Continuation of Chinese 201. Ten hours of conversational language time with students in small groups (held outside of class time) required. This course is only offered through the Gonzaga/Whitworth Classroom Exchange and/or study abroad opportunities. Department Chair approval required.

Prerequisite(s): CHIN 201 or equivalent

CHIN 290 Directed Study credit(s): 1-4

Course repeatable for 12 credit(s).

Topic to be determined by professor. This course is only offered through study abroad opportunities. Department Chair approval required.

CHIN 301 Advanced Chinese I credit(s): 3 or 4

Available only through sponsored Study Abroad programs.

Prerequisite(s): CHIN 202 or equivalent

CHIN 303 Conversation and Composition credit(s): 3

Available only through sponsored Study Abroad programs.

Prerequisite(s): CHIN 302

CHIN 390 Directed Study credit(s): 1-3

Available only through sponsored Study Abroad programs.

French

FREN 101 Elementary French I credit(s): 4

Introduction to French for students with no previous study of the language. Students learn basic tasks such as introducing themselves and meeting others, giving personal information, describing their schedule. Practice in the four skills of speaking, listening, reading and writing. The focus is on language acquisition, with some exposure to aspects of French and Francophone cultures.

Fall.

FREN 102 Elementary French II credit(s): 4

For students who have completed French 101 or the equivalent. The goal of the course is to enable students to progress from novice to intermediate level proficiency in the four language skills of speaking, listening, reading and writing. Students learn to provide more information about themselves and to accomplish more daily tasks. The focus is on language acquisition, and students also are introduced to some basics of French and Francophone cultures. Spring.

Prerequisite(s): FREN 101 or equivalent

FREN 190 Directed Study credit(s): 1-4

Course repeatable for 12 credit(s).

Topic to be determined by faculty.

FREN 200 French Conversation credit(s): 3

Review of grammar and syntax with emphasis on spoken French. Progressive exercises in conversation. Upon sufficient demand.

Equivalent(s): FREN 206

Prerequisite(s): FREN 102

- FREN 201 Intermediate French I credit(s): 4**
 For students who have completed French 102 or the equivalent. The goal of the course is to reinforce the fundamentals of grammar and syntax and to build proficiency in the four skills of speaking, listening, reading and writing. Students will be able to perform many communicative tasks by the end of the semester. A further goal of the course is to increase awareness of French and Francophone cultures. Fall.
Prerequisite(s): FREN 102 or equivalent
- FREN 202 Intermediate French II credit(s): 4**
 For students who have completed French 201 or the equivalent. The goal of the course is to strengthen the skills of speaking, listening, reading and writing in order to enable students to perform a larger number of communicative tasks. Lessons are conducted entirely in French for better immersion in the language. Additional goals of the course are to increase awareness of French and Francophone cultures, and to initiate students into the reading and interpretation of more challenging texts (short pieces of literature). Spring.
 Fulfills the following degree requirement(s): Core: Global Studies
Prerequisite(s): FREN 201 or equivalent
- FREN 280 Special Topics credit(s): 1-3**
 By arrangement.
- FREN 290 Directed Study credit(s): 1-4**
 Course repeatable for 12 credit(s).
 Topic to be determined by faculty.
- FREN 300 Advanced Grammar Review credit(s): 3**
 An intensive one-semester grammar course with extensive oral practice. Fall.
Prerequisite(s): FREN 202 or -FREN 300 level 3 credits
- FREN 301 Advanced French I credit(s): 3**
 Short stories, plays, novels, or essays by modern authors, with grammar and conversation based on the texts studied. Practice in phonetics where needed. Available only through sponsored study abroad programs.
Prerequisite(s): FREN 202 or equivalent
- FREN 302 Advanced French II credit(s): 3**
 Continuation of FREN 301. A greater emphasis on composition and advanced style. Available only through sponsored study abroad programs.
Prerequisite(s): FREN 301
- FREN 303 Advanced Language Practice I credit(s): 3**
 Oral and written comprehension, oral and written expression, grammar, vocabulary. Basic of phonetics. Culture and civilization. Available only through sponsored study abroad programs.
- FREN 304 Advanced Language Practice II credit(s): 3**
 A continuation of FREN 303. Available only through sponsored study abroad programs.
- FREN 315 Advanced French Conversation credit(s): 3**
 Intensive practice in oral French. Study of vocabulary, grammar, and pronunciation through discussion of cultural topics.
Prerequisite(s): FREN 300 level 3 credits
- FREN 323 Le Paris des contrastes credit(s): 3**
 Paris, ville d'amour et d'exclusion sociale. Students will analyze manifestations of social integration and exclusion, through representations of the city of Paris in French literary texts (short stories, novel and poetry), films, songs, photographs, and architecture.
 Fulfills the following degree requirement(s): Core: Social Justice; Fulfills the following degree requirement(s): FREN - Literature
Prerequisite(s): FREN 202 and FREN 300 level 3 credits

FREN 327 Introduction to Existentialism credit(s): 3

Students will analyze existentialist thought and become more acquainted with famous names associated with the area of Saint-Germain-des-Pres, such as Jean-Paul Sartre, Simone de Beauvoir, Albert Camus, Juliette Greco, etc. Existentialism will be approached as a cultural and humanistic movement, a way of life and rebirth in post-war Paris. Also recommended for INST: European Studies major or minor. **Taught in French.**

Fulfills the following degree requirement(s): Core: Global Studies; Fulfills the following degree requirement(s): FREN - Literature

Prerequisite(s): FREN 300 level

FREN 331 Contemporary French Cinema credit(s): 3

A study of French cinema as it has evolved in the last two decades. The films viewed will be used as a means to encourage reflection on the history, ideas and values that have gone into the making of modern France. The course is offered in English and French in separate sections. For students who take the English section of the course through the INST cross-listing, there is no French prerequisite. Spring.

Fulfills the following degree requirement(s): Core: Social Justice; Fulfills the following degree requirement(s): INST - European Studies; Fulfills the following degree requirement(s): FREN - Cinema

Equivalent(s): INST 339

Prerequisite(s): FREN 300 level

FREN 340 La France d'aujourd'hui credit(s): 3

A culture course that explores the political, social, economic, administrative, and cultural reality of contemporary France. Also recommended for INST: European Studies major or minor.

Taught in French.

Fulfills the following degree requirement(s): Core: Global Studies; Fulfills the following degree requirement(s): FREN - Culture

Prerequisite(s): FREN 300 level

FREN 350 French Civilization and Culture credit(s): 3

The political, social, intellectual, and artistic development of French culture from the beginning to the present. Available only through sponsored study abroad programs.

Fulfills the following degree requirement(s): FREN - Culture

Restriction(s):

Must be the following Class(es): Sophomore, Junior, Senior

FREN 365 French Politics credit(s): 3

A study of the French political system, its parties, elections, and how the system works in the new European order. Available only through sponsored study abroad programs.

FREN 380 Special Topics credit(s): 1-3

Course repeatable for 9 credit(s).

Selected topics in French language, literature or civilization.

Prerequisite(s): FREN 300 level

FREN 390 Directed Study credit(s): 1-3

Course repeatable for 12 credit(s).

Topic to be determined by faculty.

FREN 415 Business French credit(s): 3

Offered Abroad.

FREN 491 Directed Reading credit(s): 1-3

Course repeatable for 12 credit(s).

Selected readings by arrangement.

FREN 495 Senior Seminar credit(s): 3

The major French writers by genre. Fall.

Prerequisite(s): FREN 323 or FREN 327

FREN 497 Internship credit(s): 0-6

Course repeatable for 6 credit(s).

Professional experience in a supervised organizational setting allowing for the applied use of skills in French language and/or knowledge of Francophone cultures. An internship plan (description, objectives, learning outcomes) is devised with a French program faculty member before the internship begins.

Restriction(s):

Must be the following Class(es): Junior, Senior

FREN 499 French Comprehensive credit(s): 1

Required of all French majors in their fourth year.

German

GERM 101 Elementary German I credit(s): 4

This course is designed to introduce students to basic German language skills and give them an insight into the many aspects of German-speaking countries and their culture. This course provides extensive practice with writing, reading, speaking, and listening proficiency at the novice level according to the ACTFL guidelines.

GERM 102 Elementary German II credit(s): 4

This course is designed to further introduce students to basic German language skills and give them an insight into the many aspects of German-speaking countries and their culture. Students will be able to apply creative as well as analytic thinking skills by exploring a foreign language and its cultural idiosyncrasies. This course provides extensive practice with writing, reading, speaking, and listening proficiency at the novice level according to the ACTFL guidelines.

Prerequisite(s): GERM 101 or equivalent

GERM 103 Intensive Introductory German credit(s): 4

This accelerated language course is designed to introduce students with previous German or other foreign language experience to basic German language skills and give them an insight into the many aspects of German speaking countries and their culture.

GERM 201 Intermediate German I credit(s): 4

German 201 is designed to further strengthen and expand basic language skills in German. This course provides extensive practice with writing, reading, speaking, and listening proficiency at the intermediate low level according to the ACTFL guidelines, in addition to developing students' intercultural competencies.

Prerequisite(s): GERM 102 or equivalent

GERM 202 Intermediate German II credit(s): 4

German 202 is designed to further strengthen and expand students' language skills in German. This course provides extensive practice with writing, reading, speaking, and listening proficiency at the intermediate level according to the ACTFL guidelines, in addition to developing students' intercultural competencies.

Fulfills the following degree requirement(s): Core: Global Studies

Prerequisite(s): GERM 201 or equivalent

GERM 290 Directed Study credit(s): 1-4

Topics to be determined by faculty.

GERM 301 Advanced German credit(s): 3

Music

Chairperson: R. Spittal, P. Hamlin

Professors: K. Hekmatpanah, R. Spittal, J. K. Waters, S.J. (Emeritus)

Associate Professor: P. Hamlin

Assistant Professors: Shuying Li, T. Westerhaus

Senior Lecturer: D. Fague

The department offers two majors and three minors:

Bachelor of Arts, Music major

(required concentration in General Studies, Performance, Composition, or Sacred Music)

Bachelor of Arts, Music Education major

(required concentration in Choral and General Music or Instrumental and General Music)

Minor in Conducting (for Music or Music Education majors only)

Minor in Music

The Music major requires the completion of a concentration in General Studies, Performance, Composition, or Sacred Music. The Music Education major certifies the graduate to teach music in the elementary and secondary schools in the State of Washington and 47 reciprocating states. Students majoring in Music Education may select one, or both concentrations: choral and general music or instrumental and general music. Students should consult the School of Education for additional course requirements to obtain teacher certification.

All music majors are required to be involved in a major ensemble (orchestra, wind ensemble, or choir) and applied lessons in their major instrument each semester after declaration as a music major. Majors in the performance concentrations are required to enroll in applied lessons for two credits every semester beginning the sophomore year. Students must audition to enter upper-division applied lessons (MUSC 331). All music majors are also required to pass a functional keyboard proficiency examination. Those students who are awarded music scholarships are required to be involved actively in the department, maintain high academic standards, and participate in a performing ensemble and applied lessons each semester.

All instrumental and choral ensembles are open to all students regardless of major or minor through placement processes with faculty. Individual lessons are also available in voice, piano, organ, guitar, woodwinds, strings, brass, percussion, and jazz.

Native American Studies

Director: Laurie Arnold

The program offers one minor:

Minor in Native American Studies

Understanding that there is no single “Native American” perspective, this program will explore Native American histories and cultures through varied Native community experiences and points-of-view. The multi-disciplinary curriculum will create:

- Informed comprehension of Native American histories and distinct Native American colonial experiences;
- Insightful consideration of varied Native American social, cultural, and political perspectives, including contemporary community priorities;
- Scholarly appreciation for Native American arts and literature as tools for cultural interpretation; and
- A deeper understanding of ancestral and contemporary Native American communities on the Columbia Plateau and Gonzaga’s intellectual and spiritual connection to this homeland.

The minor is open to all Gonzaga undergraduate students, and students considering a minor in Native American Studies are encouraged to enroll in the required introductory course, NTAS 101, which will be offered annually in the fall semester.

NTAS 101 Introduction Native American Studies credit(s): 3

This course will explore the histories and cultures of Indigenous groups in North America. While the course will primarily focus on the 19th and 20th centuries, we will also explore Native experiences in early America, and will contextualize later events with those interactions. We will examine Native responses to white settlement, diverse Native reservation experiences, and Native engagement with assimilationist policies like boarding schools and relocation to urban areas. We will also consider the modern era, including outcomes of the self-determination movement for more Native control over tribal governance and economic development. We will engage with literature, film, autobiography, and museum studies to explore these topics, while assessing them from a Native American Studies foundation. Fall.

NTAS 199 Indigenous Science credit(s): 2-3

Biology is the modern scientific study of life and the natural living world. This area of science has provided us with impressive advancements in our understanding of the natural world and human health. However, there exists an enormous amount of traditional indigenous knowledge about the natural world as well. This traditional knowledge is often complementary and convergent with modern science. However, there are significant differences in the ways that these different disciplines look at the world, and differences in what these perspectives can tell us. Spring, odd years.

NTAS 210 Indians of Columbia Plateau credit(s): 3

This course will explore Native American groups on the Columbia Plateau, including their traditional lifestyles, traditional and colonial religions, the Salish language, and responses to settlement and government policies. We will also examine the traditions of cooperation and

collaboration among these groups. We must understand the geography of the Plateau, in order to fully contextualize the importance of homeland and traditional practices, so this course represents place-based study of Native American history. Spring.

NTAS 211 Introduction Native American History credit(s): 3

Hundreds of Indigenous groups made their home in North America for centuries before European colonial expansion reached these shores. Native communities might describe this occupancy as 'since time immemorial.' This class will begin with an exploration of those earlier eras and will acknowledge that each Native community was/is distinct from other communities. Thus, while we can observe commonalities in Native experiences and histories, we will also conclude that there is no 'single' Native perspective. To develop this conclusion, we will assess processes of change over time across what we now know as the United States. This course will consider social and cultural approaches to preserving and passing down Native American histories as well as U.S. history interpretations of Native Americans' societies, cultures, economies, and spiritualities. "Texts" in this course will include history books, literature, images, and film, and we will create and respond to research questions using primary and secondary sources.

NTAS 290 Special Topics credit(s): 1-3

Course repeatable for 9 credit(s).

Topic to be determined by instructor.

NTAS 310 Native American Activism credit(s): 3

Federal Indian policies and assertions of tribal sovereignty will provide context for discussions of Native American activism. We will discuss regional and national pan-Indian organizations, and we will also recognize the value of community-based activism. Local movements can include language preservation, restoration of traditional foods, community-designed and operated tribal museums and political engagement at all levels of government. Spring, every four years beginning 2014.

Fulfills the following degree requirement(s): Core: Social Justice, Core: Global Studies

NTAS 311 Native American Government and Politic credit(s): 3

This course will see Native American government and politics in a milieu of intergovernmental relations, of community to community connections, or the lack of such relationships. Taking social justice as importantly about relationships, and doing so in respect of governing, this course will to study how (or how not) federal, state, and municipal governments interact with Native American governments. Spring, even years.

NTAS 320 Native American Art and Perform credit(s): 3

This course will explore Native American modern art and the historical cultural and artistic practices which informs it. We will also explore Museum Studies as a profession of power and cultural continuity for Native American tribes, and we will review scholarship on Native American museums, including the National Museum of the American Indian. Finally, we will consider performance, in numerous contexts. How does ritual reflect both spirituality and performance? Spring, every four years beginning 2015.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

NTAS 321 American Indian Literatures credit(s): 3

This course is designed to introduce students to several important texts in the multifaceted genre of American Indian literature as well as to invite students into a critical discussion of contemporary issues centering on the relationship between American Indian literatures and

contemporary sociopolitical and -cultural realities and issues. We will examine the role of American Indian literature in the continual process of cultural maintenance as well as identity (re-)construction. Through close reading of texts by writers from various tribes and regions, students will explore the heterogeneity of Native America and the complexities of all attempts to define or shape indigenous nationhood in the United States. We will contextualize these texts in discussions of social justice issues particular to Native America, including but not limited to the five definitions of genocide; geographical and cultural displacements; and "third world" living conditions. We will also be engaged in dialogues about local and national American Indian cultures in cooperation with the American Indian Studies house on campus. Spring, odd years. NTAS 359 Indigenous Early America credit(s): 3

This course will explore the history of Early America through Indigenous perspectives. It will consider the rich and diverse histories of North American tribes, analyze their varied responses to the processes of colonization, and connect these legacies to the present. Topics discussed include political engagement, commodities exchange, resource competition, religious encounters, gender roles, slavery, and racialization. Lectures, discussions, activities, and research will challenge students to re-imagine colonial North America as Native America by centering Indigenous actors.

The department offers one major and one minor:

Bachelor of Arts, Philosophy major (optional Kossel concentration)

Minor in Philosophy

Philosophy has played a central role in Jesuit education since its inception, a tradition that is reflected by the place of philosophy in the Gonzaga University Core curriculum. Philosophy courses included as part of the University Core curriculum for all undergraduate programs aid students in developing skills of thought and logical analysis (PHIL 101), introduce students to sustained reflection on basic questions of human nature and personhood (PHIL 201),

and examine the practical and theoretical considerations relevant to human morality and value (PHIL 301). The department offers 400-level philosophy courses on a wide variety of topics, which serve to integrate work in the University Core curriculum, and to encourage students to reflect on their future roles in the world.

The Philosophy Department also offers courses leading to the Bachelor of Arts degree with a major or minor in philosophy. Beyond the philosophy courses that fulfill the University Core (101, 201, 301, 432), students must complete an additional 9 credits of upper-division course work for a Philosophy Minor, and an additional 24 credits for a Philosophy Major. The major includes a 3-course sequence in the history of philosophy; topical seminars that focus on philosophical research, discussion, and writing; and a broad range of 400-level electives, which allows students to develop a program of studies tailored to their own interests. Each student is required to take at least one course in contemporary philosophy, and one course in ethics or political philosophy. Majors must take at least two philosophy seminars and minors must take at least one. These seminars are identified by their numbers (PHIL 400-430) and they will all carry a Writing Enriched designation, which fulfills a requirement of the University Core curriculum.

Students may also earn a Philosophy Major by completing the department's Kossel Concentration in Philosophical Studies. The Kossel Concentration follows the course of studies established for the training of college seminarians by the Program of Priestly Formation of the United States Conference of Catholic Bishops. The goal of the Kossel Concentration, as stated in the Program, is for students (1) to organize and synthesize their study of the liberal arts through the study of philosophy and (2) to prepare for the study of theology in the post-baccalaureate seminary. Although specifically designed for the students of Bishop White Seminary, the Kossel Concentration is open to all Gonzaga students. The curricular requirements for the Kossel Concentration include all of the requirements of the regular Philosophy Major, but students in the Kossel Concentration must devote their elective courses to traditional areas of Catholic philosophy. They must also complete extra courses in Latin. The Kossel Concentration is named after the late Clifford Kossel, S.J., who taught philosophy at Gonzaga for most of his adult life.

An undergraduate Major in Philosophy is useful preparation for a variety of careers. The focus on logic, argumentation, and moral theory is valuable to students with career plans in law. Students with interests in business, public

policy, or government service can benefit from the many courses which provide reflective analysis on the ways in which political, moral, and social values are embedded in social institutions. A degree in philosophy can be valuable when applying to a variety of professional schools which actively look for liberal arts majors and to employers who do the same.

Postmodernism has been the single most influential philosophical movement in the late 20th Century. As a response to philosophical modernism and as a broad cultural movement, affecting virtually every field of knowledge and cultural practice, postmodernism challenges us to rethink some of the most basic assumptions of the Western philosophical tradition. This course begins with a review of the meaning of philosophical and cultural modernism. We then consider several of the major founding thinkers of the postmodern movement: Jacques Derrida, Michel Foucault, and Francois Lyotard. From its beginnings in the revolutionary atmosphere of the French student rebellion, we move to post-modern thinkers in the analytic and post-analytic tradition, including the later Ludwig Wittgenstein and Richard Rorty. The course concludes with a survey of postmodern culture sampling specific developments in fields such as architecture, music, and contemporary art.

Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Restriction(s):

Must not be the following Class(es): Freshman

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

PHIL 434 Chinese Philosophy credit(s): 3

A survey of the history of Chinese philosophy focusing on the Confucian tradition and taking other traditions such as Taoism and Buddhism into account.

Fulfills the following degree requirement(s): INST - Asian Studies content

Equivalent(s): INST 396

Restriction(s):

Must be in the following Major(s): Philosophy, Philosophy

Must not be the following Class(es): Freshman

Prerequisite(s): PHIL 201

PHIL 435 C.S. Lewis credit(s): 3

This course examines Lewis, the Christian intellectual, as his participation in the Christian theistic tradition and his philosophical training exhibit themselves in his fictional, philosophical and theological works.

Equivalent(s): PHIL 417

Restriction(s):

Must be in the following Major(s): Philosophy, Philosophy

Must not be the following Class(es): Freshman

Prerequisite(s): PHIL 201

PHIL 436 Walker Percy credit(s): 3

This course examines both fiction and non-fiction works by Walker Percy (1916-1990), with particular emphasis on his development of existential themes and C.S. Peirce's semiotics. We investigate Peter Augustine Lawler's description of Percy as a proponent of "postmodernism rightly understood."

Equivalent(s): PHIL 418

Restriction(s):

Must be in the following Major(s): Philosophy, Philosophy

Prerequisite(s): PHIL 201

PHIL 437 Philosophy of Time credit(s): 3

This course looks at answering the question "What is time?" This is done by looking at ancient and modern arguments surrounding the structure, experience and models of time.

Prerequisite(s): PHIL 201

PHIL 438 Phil of Love and Friendship credit(s): 3

Survey and analysis of influential accounts of love and friendship, including treatments of erotic/romantic love, friendship, and charity, within a framework provided by C.S. Lewis classic study 'The Four Loves'. Special attention will be given to the relation between views of love and the nature of happiness, proper treatment of others, human desire and psychology, character, self-love, and religious devotion.

Restriction(s):

Must be in the following Major(s): Philosophy, Philosophy

Prerequisite(s): PHIL 201

PHIL 441 Symbolic Logic credit(s): 3

The study of modern symbolic logic (propositional and predicate). Metalogical issues (the syntax and semantics of formal systems) are discussed.

Restriction(s):

Must not be the following Class(es): Freshman

Prerequisite(s): PHIL 201

PHIL 442 Philosophy of Sex and Gender credit(s): 3

Analyzes the concepts of sex, sexuality, and gender by working with authors across traditions and disciplines. We will be particularly concerned with the roles that sex, sexuality and gender

have on identity formation/subversion while also questioning whether some or all of these concepts are essential/natural or socially constructed.

Fulfills the following degree requirement(s): PHIL - Contemporary

Equivalent(s): WGST 434

Restriction(s):

Must be in the following Major(s): Philosophy, Philosophy

Prerequisite(s): PHIL 201

PHIL 446 Phil Reflections Christianity and Science credit(s): 3
Philosophical inquiry into the historical relationship between Christian religious doctrine and the knowledge imparted by the sciences, with focus on particular episodes such as the Galileo affair and the Darwinian revolution.

Restriction(s):

Must be in the following Major(s): Philosophy, Philosophy

Prerequisite(s): PHIL 201

PHIL 447 Wisdom credit(s): 3
This course in comparative philosophy studies the relationship between wisdom and contemplative practice in three major philosophical/religious traditions: Greek/Hellenic, Judeo/Christian, and Yogic/Samkhya. Students will acquire both a general understanding of the concept of wisdom in each tradition and a specific understanding of how each of these traditions connects wisdom to practice.

Prerequisite(s): PHIL 201

PHIL 449 African American Philosophy credit(s): 3
This course will examine the core issues in African American philosophy. These issues will include: (1) the nature and purpose of African American philosophy; (2) questions concerning racial, cultural, and ethnic identity; (3) the varied forms, causes, and consequences of racism; (4) 'separatist' vs. 'assimilationist' strategies for addressing racial injustice; and (5) debates concerning reparations and affirmative action.

Fulfills the following degree requirement(s): PHIL - Ethics or Political

Must be the following Class(es): Junior, Senior

Prerequisite(s): PHIL 201

PHIL 450 Happiness credit(s): 3
In one form or another, the nature of happiness has always been a central concern of philosophical reflection. In recent years, a new body of psychological research has made interesting contributions to our understanding of happiness. Specifically, Mihaly Csikszentmihalyi's work on 'flow' and Martin Seligman's research on happiness will be considered. This course will sample some of this research and bring it into dialogue with traditional philosophical texts from Western and Eastern philosophy, such as Epicureanism, Stoicism, Taoism, and modern movements such as Existentialism, Liberalism, and Marxism. We will also consider very recent philosophical work on the nature of happiness. Along with this study, we will ask historiographic questions about how the philosophical problem of happiness is temporally and culturally conditioned.

Equivalent(s): PHIL 419

Restriction(s):

Must be in the following Major(s): Philosophy, Philosophy

Prerequisite(s): PHIL 201

PHIL 451 Political Philosophy credit(s): 3

An examination of the nature and norms of political life, with attention to major historical themes in the light of contemporary relevance.

Prerequisite(s): PHIL 201

PHIL 460 Ethics: Global Climate Change credit(s): 3

Many have described global climate change as the defining challenge of the 21st century, noting that unless dramatic changes are made today, future generations will suffer terrible consequences, such as rising seas, wars over fresh water, tens of millions of environmental refugees, and the extinction of species such as the polar bear. This course will investigate the complex technological, historical, economic, scientific, political, and philosophical issues surrounding this issue. Global warming skeptics are especially encouraged to enroll. Spring and Summer.

Fulfills the following degree requirement(s): PHIL - Ethics or Political

Equivalent(s): ENVS 350

Restriction(s):

Must be in the following Major(s): Philosophy, Philosophy

Prerequisite(s): PHIL 201

PHIL 461 Philosophy and Literature credit(s): 3

This course will show how fictional literature can illustrate philosophical insights and how philosophical ideas can help illuminate works of literature.

Must be in the following Major(s): Philosophy, Philosophy

Prerequisite(s): PHIL 201

PHIL 462 Theories Solidarity and Social Just credit(s): 3

This course is designed to fulfill one of the requirements of the Solidarity and Social Justice minor. It builds on the background provided by other courses in the SOSJ minor and the University Core by focusing more explicitly on the role public reason plays in the pursuit of solidarity and social justice. The course will ask "What is justice and how is it related to human solidarity? How do we ground claims about solidarity and social justice through an appeal to reason? What role should reason play in shaping our models of justice and what role can it play in the promotion of solidarity and social justice?"

Fulfills the following degree requirement(s): PHIL - Ethics or Political, SOSJ - Block A

Students pursuing Physics have a choice of attaining the following degrees:

Bachelor of Science, Physics major

Bachelor of Arts, Physics major

Minor in Physics

Students are expected to declare their major in Physics in their first year of study. Students who declare late or plan to study abroad can be accommodated by arrangement with the department.

The Bachelor of Science is designed as a terminal degree providing the basic foundation for direct employment opportunities. Students who are considering graduate school studies should plan on taking additional coursework aligned with their specific interests and goals. Students will be able to identify a four-year course of study with their advisor that will satisfy graduate school requirements.

Lower and upper division courses are designed for students to gain proficiency in hands-on, experimental physics and theoretical physics. Majors in Physics are also expected to acquire a familiarity with scientific computation and the use of computers to model and solve physical problems. Summer research opportunities within the department, as well as with other programs, such as Research Experience for Undergraduates (REU) programs, are encouraged.

Students interested in majoring in Physics and attending medical school should meet with a Physics faculty member as early as possible to discuss four-year course planning and potential course substitutions for particular degree requirements.

Students may elect to earn a Bachelor of Arts degree with a major in Physics, rather than a Bachelor of Science degree. The basic degree requirements for a B.A. degree are the same as the B.S. degree, except rather than choosing two additional upper division PHYS courses, as the B.S. degree requires, the B.A. degree requires two courses from any area that are agreed to by the Department Chair. The B.A. degree is intended to better allow College of Arts and Sciences students to complete double majors; therefore, students who earn a B.A. degree with a Physics major must also be earning a B.A. degree in another College of Arts and Sciences department.

More information is available on the Physics [website](#) and the department's [MyGU website](#).

To satisfy the minor, at least one of the chosen electives must be a 3-credit course beyond PHYS 300. With prior Department Chair approval, PHYS 390, PHYS 490, PHYS 497, and PHYS 499 may count toward the minor. Also with prior Department Chair approval, PHYS 300 may satisfy two credits toward the minor.

Courses:

PHYS 100 Conceptual Physics credit(s): 3

The basic principles of physics are covered in a descriptive (non-mathematical) manner. Designed for students not majoring in the natural sciences or those needing a very basic background in physics. Not regularly offered; offered upon demand.

PHYS 100L Conceptual Physics Lab credit(s): 1

Taken concurrently with PHYS 100. Two hours of laboratory. Not regularly offered; offered upon demand.

Corequisite(s): PHYS 100

PHYS 101 General Physics I credit(s): 4

Algebra-based introductory physics. Mechanics, including Newton's laws, conservation laws, fluids, oscillations and waves. Five hours of lecture with experimental demonstrations and problems. Not accepted as a prerequisite for any advanced work. Fall.

PHYS 101L General Physics I Lab credit(s): 1

Taken concurrently with or after the lecture course PHYS 101. Three hours of laboratory. Fall.

Prerequisite(s): PHYS 101 (or concurrent)

PHYS 102 General Physics II credit(s): 4

Algebra-based introductory physics. Thermodynamics, electricity and magnetism, and optics. Five hours of lecture with experimental demonstrations and problems. Not accepted as prerequisite for any advanced work. Spring.

Prerequisite(s): PHYS 101 or PHYS 103

PHYS 102L General Physics II Lab credit(s): 1

Taken concurrently with or after the lecture course PHYS 102. Three hours of laboratory. Spring.

Prerequisite(s): (PHYS 101L or PHYS 103L) and PHYS 102 (or concurrent)

PHYS 103 Scientific Physics I credit(s): 4

Calculus-based introductory physics. Mechanics, including Newton's laws, conservation laws, fluids, oscillations, and waves. Five hours of lecture with experimental demonstrations and problems. MATH 157 (Calc I) may be taken prior to or concurrently. Fall and Spring.

Prerequisite(s): MATH 157 (or concurrent)

PHYS 103L Scientific Physics I Lab credit(s): 1

Taken concurrently with or after the lecture course PHYS 103. Three hours of laboratory. Fall and Spring.

Prerequisite(s): PHYS 103 (or concurrent)

PHYS 104 Scientific Inquiry credit(s): 3

This course is an integrated course and lab experience satisfying the Core Scientific Inquiry requirement. The course is designed and intended for non-science majors. The topics will be

developed conceptually, with the required mathematics not exceeding high school algebra and trigonometry. The specific content will vary with instructor. The course title in Zagweb will identify the focus of the lecture course material. The integrated, open lab experience focuses on developing an understanding of the scientific method and the processes of science, including measurement, modeling, and analysis. The lab experience includes hands-on activities and experiments highlighting the covered processes and delivered in an open lab time format. The lab will be open and staffed on Tuesdays and Thursdays for students to come in and complete that week's lab on their own schedule. Fall and Spring.

Fulfills the following degree requirement(s): Core: Science Inquiry

PHYS 110 Introduction to Astronomy credit(s): 3

This course is designed for the non-science major. A wide range of topics is covered in order to give an overview of what is currently known about the structure and evolution of the universe. Most areas of observational and theoretical astronomy do not go beyond basic high-school algebra and trigonometry. Not regularly offered; offered upon demand.

PHYS 110L Introduction to Astronomy Lab credit(s): 1

PHYS 110L is optional with concurrent enrollment in PHYS 110. It will consist of experiments and activities further investigating the topics of PHYS 110 involving astronomical measurements and analysis. The required mathematics will not exceed high school algebra and trigonometry. Two hours of laboratory. Not regularly offered; offered upon demand.

Corequisite(s): PHYS 110

PHYS 125 Physics of Music and Sound credit(s): 3

The nature of vibrations and waves will be studied and investigated at the introductory level. Vibrations, properties of waves, addition of waves and the resulting wave phenomena will be covered with an emphasis on their relationship to sound production and interpretation via the ear. This class is designed for non-science majors. The required mathematics will not exceed high school algebra. Not regularly offered; offered upon demand.

PHYS 125L Physics of Music and Sound Lab credit(s): 1

PHYS 125L is optional with concurrent enrollment in PHYS 125. The course will further investigate topics from PHYS 125 involving the behavior of waves. The required mathematics will not exceed high school algebra and trigonometry. Two hours of laboratory. Not regularly offered; offered upon demand.

Corequisite(s): PHYS 125

PHYS 140 Introduction to Geophysics credit(s): 3

This course will look at the basic principles of geophysics. Topics examined include earthquakes, tsunamis, land formations and erosion, geological exploration, and global warming. Mathematics is kept at a minimal level. Not regularly offered; offered upon demand.

PHYS 140L Introduction to Geophysics Lab credit(s): 1

This is a lab course to accompany PHYS 140. Experiments involve examination of crater formation, angle of repose, wave motion, rock classification, and buoyancy. Two hours of laboratory. Not regularly offered; offered upon demand.

Corequisite(s): PHYS 140

PHYS 185 Special Topic credit(s): 1-4

Course repeatable for 12 credit(s).

Topic to be determined by instructor.

PHYS 190 Directed Study: Physics credit(s): 0-4

Course repeatable for 6 credit(s).

PHYS 193 First Year Seminar credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course

highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must be the following Class(es): Freshman

PHYS 198 Lab Methodology credit(s): 0-1

Course repeatable for 8 credit(s).

PHYS 199 Special Topics credit(s): 3-4

Course repeatable for 9 credit(s).

Topic to be determined by instructor.

PHYS 199L Special Topics Lab credit(s): 0-1

Course repeatable for 3 credit(s).

Corequisite(s): PHYS 199

PHYS 204 Scientific Physics II credit(s): 4

Calculus-based introductory physics. Thermodynamics, electricity and magnetism, and optics. Five hours of lecture with experimental demonstrations and problems. MATH 258 (Calc II) may be taken prior to or concurrently. Fall and Spring.

Prerequisite(s): PHYS 103 and MATH 258 (or concurrent)

PHYS 204L Scientific Physics II Lab credit(s): 1

Taken concurrently with or after the lecture course PHYS 204. Three hours of laboratory. Fall and Spring.

Prerequisite(s): PHYS 103L and PHYS 204 (or concurrent)

PHYS 205 Modern Physics credit(s): 3

Special relativity, development and an introduction to quantum mechanics and other selected topics. Spring.

Prerequisite(s): PHYS 204

PHYS 208 Computational Physics credit(s): 2

An introduction to computational physics. Students will be introduced to many of the basic ideas, algorithms, and tools used by physicists to solve problems. Techniques learned here will be used in most upper level courses. Fall, even years.

Prerequisite(s): PHYS 103 and MATH 258

PHYS 210 Introduction to Linear Electronics credit(s): 2

This course is primarily a laboratory in which students learn basic concepts of linear electronics and laboratory techniques through passive components, DC and AC applications, use of test equipment, operational amplifiers, basic transistor circuits, and more. Two hours of lecture and one three-hour laboratory exercise per week. Spring, even years.

Prerequisite(s): PHYS 204L

PHYS 217 Modern Physics Lab credit(s): 2

Usually taken concurrently with PHYS 205, this course looks at laboratory examples of topics covered in PHYS 205. Spring, odd years.

Equivalent(s): PHYS 205L, **Equivalent(s):** PHYS 217L

Prerequisite(s): PHYS 205 (or concurrent)

PHYS 290 Sophomore Directed Reading credit(s): 1-4

Course repeatable for 12 credit(s).

Directed reading in approved topics. Requires completion of a form, departmental approval and cannot be registered for via ZAGWEB.

PHYS 300 Mathematical Methods credit(s): 3

Survey of mathematical techniques used in upper division physics courses. Fall.

Prerequisite(s): PHYS 204

- PHYS 301 Intermediate Mechanics** **credit(s): 3**
 Particle and rigid body statics and dynamics in a rigorous vectorial calculus treatment. A fundamental introduction to theoretical physics. Spring, even years.
Prerequisite(s): PHYS 300(or MATH 259 and MATH 260 and PHYS 204)
- PHYS 306 Electricity and Magnetism** **credit(s): 3**
 Electrical and magnetic phenomena leading to a development of Maxwell's equations and electromagnetic field theory. Fall, even years.
Prerequisite(s): PHYS 300 (or MATH 259 and MATH 260 and PHYS 204)
- PHYS 307 Optics** **credit(s): 3**
 Treatment of optical phenomena using the three major models for light: rays, waves, and photons. Spring, odd years.
 Fulfills the following degree requirement(s): MENG - Tech Elective
Prerequisite(s): PHYS 300(or PHYS 204 and MATH 259 and MATH 260)
- PHYS 310 Intermediate Laboratory** **credit(s): 2**
 This course will discuss the major analytic techniques used in experimental physics through experiments in mechanics, heat, electromagnetism, and modern physics, and will apply these techniques to classic experiments. Fall, odd years.
Prerequisite(s): PHYS 204L
- PHYS 390 Directed Study** **credit(s): 1-4**
 Course repeatable for 12 credit(s).
 Topic to be determined by faculty.
- PHYS 402 Advanced Mechanics** **credit(s): 3**
 A continuation of PHYS 301 and extension to dynamics of particles, rigid bodies, and fluids by the use of Lagrangian and Hamiltonian formalisms. Fall, even years.
 Fulfills the following degree requirement(s): MENG - Tech Elective
Prerequisite(s): PHYS 301
- PHYS 407 Electricity and Magnetism II** **credit(s): 3**
 A continuation of PHYS 306; a study of advanced topics in E&M. Spring, odd years.
Prerequisite(s): PHYS 306
- PHYS 409 Nuclear and Particle Physics** **credit(s): 3**
 Study of experimental and theoretical aspects of nuclear interactions as they apply to nuclear structure and elementary particle characteristics. Spring, even years.
Prerequisite(s): PHYS 205
- PHYS 412 Biophysical Systems and Modeling** **credit(s): 3**
 Study of biological systems using first principles, tools, and models from physics. Topics may include diffusion, membrane potentials, models of neural dynamics, information processing in biological systems, and other selected biophysics topics. Spring, even years. Upon sufficient demand.
Prerequisite(s): (CPSC 121 or ENSC 192) and PHYS 300(or PHYS 204 and MATH 260)
- PHYS 415 Cosmology and Astrophysics** **credit(s): 3**
 Study of the global evolution of the universe, including the expansion rate of the universe, big bang nucleosynthesis, the cosmic microwave background radiation, inflation, relativity, and other selected astrophysics topics. Spring, even years. Upon sufficient demand.
Prerequisite(s): PHYS 300(or MATH 259 and MATH 260 and PHYS 204)
- PHYS 432 Core Integration Seminar:** **credit(s): 3**
 The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way

that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Political Science

Chairperson: Stacy Taninchev

Professors: L. Brunell, B. Garvin, J. Isacoff, M. Leiserson (Emeritus)

Associate Professors: M. Connolly, S.J., J. Gardner, C. Stavrianos, S. Taninchev, M. Treleaven, R. Waterman (Emeritus)

The department offers one major and one minor:

Bachelor of Arts, Political Science major

Minor in Political Science

Political science courses invite students to examine political thought and systems past and present. A major or minor in political science provides an enduring political education for citizens, a solid basis for graduate work, a fine background for the study of law, the teaching or practice of politics and social and economic organization, and change.

Our faculty believes that public-spirited participation in civic affairs serves the department's mission and the mission of Gonzaga University. So, we encourage majors to do politics in our public affairs internships and other forms of experiential learning as well as in pursuing their own political interests and passions. In the fall or spring semester of their senior year, all political science majors must take POLS 498, Preparation for the Comprehensive, a one credit seminar that helps students review their departmental and related studies in preparation for comprehensive examination in November or April. Students base the examination on the special interests and thematic questions they have discovered in their courses as well as in their own political engagement, service learning, internships, study abroad, etc.

The faculty also provide guidance and advice about applying to graduate school or law school and pursuing careers in politics, public administration, or international affairs.

Chairperson: Monica Bartlett

Professors: M. Bartlett, M. Kretchmar-Hendricks, A.M. Medina, V. Norasakkunkit, N. Worsham, L. Wurm

Associate Professors: S. Arpin, M. Nelson, P. Romanowich

Assistant Professors: A. Bies, T. McCulloh, A. Stivers, G. Thorne

The department offers one major and one minor:

Bachelor of Arts, Psychology major (optional research concentration)

Minor in Psychology

The Department of Psychology offers courses that focus on the scientific study of human and animal behavior and decision-making. The department offers a Bachelor of Arts in Psychology.

General Psychology (PSYC 101), Statistics for Psychology (PSYC 202) and Scientific Principles of Psychology (PSYC 206) are prerequisites for most upper division courses. These courses provide students with an initial understanding and appreciation of the scientific method in psychology. General Psychology, Statistics, and Scientific Principles of Psychology constitute the lower division requirements for both the major and the minor. Students must earn a B- or better in Scientific Principles of Psychology to complete the major in Psychology.

After taking the three lower division requirements, Psychology minors are required to complete 12 credits of upper-division psychology coursework. Majors are required to complete 24 credits of upper-division coursework, 18 of which must be selected from particular cluster areas as described below. Finally, majors must either pass a comprehensive examination (PSYC 499) or complete independent research under faculty supervision, the results of which must be presented at a regional or national conference (PSYC 498). Students usually complete the comprehensive exam or independent research during their final year-once they have completed the majority of their coursework.

Research Concentration:

The Research Concentration is a special pathway within the Psychology major. This concentration is for students planning to advance onto doctoral level graduate degrees (Ph.D.) upon completing their undergraduate degree at Gonzaga. Students who declare this concentration are required to receive an A- in Scientific Principles of Psychology (PSYC 206) or petition the Department Chair of Psychology for admittance to the concentration. For upper division classes, students in the concentration will take Advanced Statistics in Psychology (PSYC 450) and *one* of the following: 1) Advanced Research Methods in Psychology–Graduate Emphasis, and the required laboratory (PSYC 455 and PSYC 455L); 2) Behavior Analysis and the required laboratory (PSYC 470 and PSYC 470L); or 3) at least 3 credits of Group Research Topics (PSYC 493) or Individual Research Topics (PSYC 496). Students in the concentration must present their research at a local, regional, or national conference. Finally, students in the concentration will register for the Comprehensive Alternate (PSYC 498) during the semester in which they are presenting their research at a conference.

*Majors and minors may take either PSYC 460 or PSYC 462 (*but not both*) to fulfill upper-division major/minor requirements.

Courses:

PSYC 101 General Psychology credit(s): 3

An overview of contemporary psychology which introduces the student to the following areas: human development, sensation perception, motivation, learning, emotion, psychological measurement, biological basis of behavior, experimental psychology, intelligence, abnormal behavior, and personality. Format consists of lectures and discussions. Fall and Spring; Fulfills the following degree requirement(s): Core: Social/Behavioral Sci

PSYC 193 First Year Seminar: credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must be the following Class(es): Freshman

PSYC 202 Statistics for Psychology credit(s): 3

An introduction to the essential statistical methods employed in psychological research. Fall/Spring

Restriction(s):

Must be in the following Major(s): Psychology, Psychology

Prerequisite(s): PSYC 101

PSYC 206 Scientific Principles of Psych credit(s): 3

This course introduces the fundamental methods used in psychological research. Students have an opportunity through assignments and in-class exercises to practice their understanding of the

scientific principles guiding psychology. Majors must earn a grade of B- or better (course may be repeated). Research concentration students must earn an A- or better. Fall and Spring.

Restriction(s):

PSYC 376 Forensics credit(s): 3

This course is an introductory level course to the field of forensic psychology, the branch of psychology which focuses on the application of psychological research data and principles within the legal arena. Students will be introduced to the process of applying psychological knowledge, concepts, and principles within the civil and criminal court systems. This course will include an introduction to an overview of topics such as the history of forensic psychology, an overview of the legal system, consultation to legal parties, ethical issues, eye witness testimony, assessment, evaluation of malingering, competency in criminal proceedings, civil commitment, child custody, psychologist testimony in courtroom settings, assessment of sexual offenders, assessment of violent and homicidal behavior, treatment of crime victims, police and investigative psychology, and careers within this field. A variety of formats will be used including lecture, readings, presentation by class members on selected topics, and guest speakers from within the legal arena. Disclaimer: This course by virtue of its topic will address issues related to criminal activity and the subsequent legal proceedings. Although it may seem obvious, each person should consider carefully whether the content is suitable before enrolling in the course as the lectures, readings, and other materials may at times involve topics related to violence and sometimes sexual material, which may be offensive to some people.

The department offers one major and one minor:

Bachelor of Arts, Religious Studies major

Minor in Religious Studies

Religious Studies at Gonzaga University is guided by a recognition of the increasingly globalized and diverse character of the contemporary world. Complementing such diversity, the course offerings in the Department of Religious Studies employ a rich array of academic methods to investigate the cultural, social, and religious realities that animate the subjects of Religion and Theology. In order to better understand the complex, globalized world in which they find themselves living, Religious Studies majors are given the tools to explore a diversity of religious traditions. In addition, through the appreciation of the variety of methods and approaches that define the academic study of religion, Religious Studies majors cultivate the kinds of robust, critical thinking skills that will better enable them to navigate the many complex issues and problems that define the contemporary world.

Students majoring in Religious Studies are required to fulfill 36 credit hours in accordance with the following four methodological areas: one course in Sacred Texts and Traditions; one course in Theology and Spirituality; one course in Religion, Culture, and Society; one course in Ethics. In addition, majors are required to take one course in Methodology (399) and at least four seminar level (400) courses, including Senior Thesis (499) and/or Internship (497). The remaining nine credits for the major are electives and

may be fulfilled by taking courses in any of the four methodological areas listed above.

Students minoring in Religious Studies are required to fulfill 18 credit hours in accordance with the following: one course in Ethics; one course in Methodology (399); and two courses at or above the 400 seminar level. Any remaining credits needed for the required total of 18 credit hours are electives and may be fulfilled by taking courses in any of the four methodological areas listed above.

Religious Studies/Law 3+3 Program

The Religious Studies Department also offers a 3+3 dual-degree program with the Gonzaga School of Law. This program consists of three years in the undergraduate major and entrance to the Law School in the fourth year, resulting in a B.A. with a major in Religious Studies and a J.D. from the Gonzaga University School of Law in six years rather than seven.

The 3+3 program requires successful completion of 96 credits from Gonzaga University by the end of their junior year (six semesters). Upon completion of these 96 credits, the student should have met all relevant undergraduate degree requirements, except for the final 32 elective credits required under the 128 credit undergraduate degree policy. The additional 32 elective credits will be fulfilled using completed law school courses. Students complete the application to the Gonzaga School of Law in their fifth semester.

The department offers one major and one minor:

Bachelor of Arts, Sociology major

Minor in Sociology

The Sociology program helps students develop an awareness of the connections between our individual experiences and the groups to which we belong. Learning the theories and methodologies of sociology provides students with an excellent foundation for a variety of careers, including law, government service, teaching, and business. The department has designed the major to facilitate the acquisition of skills in social scientific theorizing and research design. The student may use elective credits to pursue an interest in a specific area of the discipline, such as social inequality, social psychology, social institutions, or deviance.

Students have the opportunity to graduate with honors in the major if they have fulfilled all requirements, achieved a grade point average of at least 3.70 in their sociology courses, and written and defended a senior thesis (SOCI 498).

Students who are planning to obtain certification in elementary or secondary education, while majoring in Sociology, must consult with advisors in the department and in the School of Education to insure all requirements may be met. The department advises students to choose a minor which will broaden and strengthen their social science knowledge.

Solidarity and Social Justice

Director: Andrea Bertotti Metoyer

The program offers one minor:

Minor in Solidarity and Social Justice

The Solidarity and Social Justice (SOSJ) minor strives to provide students with a thorough understanding of the range of ways that scholars, researchers, and students address injustices and engage in efforts to promote social justice in the contemporary world. The minor provides students with a strong foundation for understanding and researching justice issues from a variety of disciplinary perspectives and endeavors to inspire them to become "men and women for others," while also fostering the practical skills necessary for employment.

The curriculum enables students to blend the best of the liberal arts with courses designed for professional training to integrate themes of justice and peace into their academic, civic, and social pursuits. Special emphasis is placed upon the development of the habits of critical thinking and reflection, the skills of effective communication and leadership, as well as the acquisition of basic knowledge of the social sciences as they pertain to the areas of social justice, community building, social change, and human dignity.

SOSJ 410 Theories Solidarity and Social Just

credit(s): 3

This course is designed to fulfill one of the requirements of the Solidarity and Social Justice minor. It builds on the background provided by other courses in the SOSJ minor and the University Core by focusing more explicitly on the role public reason plays in the pursuit of solidarity and social justice. The course will ask "What is justice and how is it related to human solidarity? How do we ground claims about solidarity and social justice through an appeal to reason? What role should reason play in shaping our models of justice and what role can it play in the promotion of solidarity and social justice?"

The department offers two majors and two minors:

Bachelor of Arts, Theatre Arts major

(required concentration in either Performance or Design, Technology, and Management [DTM])

Bachelor of Arts, Dance major

(required concentration in either Dance Pedagogy or Performance)

Minor in Theatre Arts

Minor in Dance

Since the earliest human civilizations, theatre and dance have been integral to the fabric of human communication. The process of performance is woven into personal, community, business, artistic, and religious life - and into the dialogue among the cultures and nations of the world.

Critical examination of this process describes, interprets, and evaluates these relationships. As faculty in the Department of Theatre & Dance, we seek to assist students in becoming effective, creative, and ethically responsible communicators who can understand theoretical choices and design, express, interpret, and critically evaluate oral, written, nonverbal, and electronically mediated messages.

Theatre & Dance, as an academic discipline, draws upon the humanities, the social and natural sciences, and the professions. The curriculum is both conceptual and applied. Courses prepare for an in-depth exploration of one or more areas of inquiry. Teaching and learning methods combine lectures, seminars, workshops, production, and performance. Theatre & Dance at Gonzaga reflects the Jesuit Catholic character and liberal arts tradition of the institution.

Mission Statement

The Theatre & Dance Department at Gonzaga University is committed to training and developing artists who confront the important issues of our lives through their engagement with the art forms of live theatre and dance.

Students study and critically reflect on a broad range of literature, theatrical forms, and techniques in order to promote an active engagement with the foundations of our culture and to promote the formation of a character that reflects the faith and justice mission of Gonzaga University. The intended outcome of this study and reflection is to provide service to our audience and the broader community and to promote the pursuit for social justice.

Our purpose is to serve young artists hoping to apply disciplined training and thoughtful work to search for justice and the greater good of those around them.

Students interested in a minor that combines the strengths of theatre, dance, visual arts, and music should visit the [Interdisciplinary Arts](#) page for more information about the Interdisciplinary Arts Minor.

Master of Arts in Communication and Leadership Studies (COML) and Master of Arts in Organizational Leadership (ORGL) 4+1 Program:

Majors interested in pursuing a Master of Arts in Communication and Leadership Studies (COML) or a Master of Arts in Organizational Leadership (ORGL) may apply to the graduate program at the end of the academic year immediately preceding their final year of undergraduate study. Those who meet the COML or ORGL admissions standards will be granted provisional acceptance. During their final year of undergraduate study, these students will be able to enroll in up to six graduate-level COML or ORGL credits in addition to their undergraduate course load, with no additional or separate charge for graduate credits. "4+ 1" students will be limited to a maximum of 18 credits per semester, including graduate credits, in each of the two semesters of their final year of undergraduate study.

Courses:

THEA 100 Introduction to Theatre Arts credit(s): 3

An introductory survey of the history, aesthetics, and literature of the theatre, and the various areas of theatrical production. Fall and Spring.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

THEA 102 Dance: Culture and Art credit(s): 3

This course introduces dance as a social form present in all cultures and as an art form composed for the stage. This course provides the necessary skills and understanding for an appreciation of the social, physical, and artistic qualities of dance through various cultures. Somatic learning of social/ballroom dance forms is paired with cognitive and emotional understanding of the countries and cultures from which they were derived. Students will also study the concepts of leading and following, the transition from social to concert dance as a global phenomenon, and gain an understanding of dance from a global perspective.

Fulfills the following degree requirement(s): Core: Fine Arts and Design, Core: Global Studies

THEA 111 Acting I credit(s): 4

An introduction to the techniques of dramatic expression utilizing the body, voice, and imagination. Structured play exercise helps the beginner to overcome physical/vocal inhibitions, and develop a sense of trust and teamwork within the group. Scene work is approached using beats, intentions, scores of physical actions, obstacles, and subtext. The class concludes with a recital to provide practical experience in rehearsal and performance. Fall and Spring.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

Equivalent(s): THEA 211

THEA 120 Voice and Movement credit(s): 3

An introduction to expressively engaging the entire physical instrument in life and performance. Coursework focuses on a variety of techniques designed to develop an increased range of physical and vocal expression. The course features experimentation in a studio setting and practical/creative application through rehearsal and performance. Fall, odd years.

THEA 122 Interdisciplinary Arts credit(s): 3

This course uses concepts of theatre-, dance-, and visual arts-based research to solve problems. Students will be exposed, through lecture and assignments, to theories and methods from each art form and will learn to integrate the art forms to explore complex concepts through performance. Fall.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

THEA 124 Ballet I credit(s): 2

Course repeatable for 8 credit(s).

Beginning instruction in ballet. This course includes the technique, vocabulary and history of classical ballet. May be repeated. Fall.

Equivalent(s): THEA 120

THEA 125 Jazz Dance I credit(s): 2

Course repeatable for 8 credit(s).

Beginning and continuing instruction in jazz dance. This course includes the technique, vocabulary and history of the genre. May be repeated. Fall.

THEA 130 Topics in Dance credit(s): 1-2

Course repeatable for 6 credit(s).

Advanced courses, visiting artists, cultural dance. Periodic offering.

THEA 132 Stagecraft credit(s): 4

The theory and practice of the construction and painting of scenery and props, the fundamentals of stage lighting, and the organization of technical work in the theatre. Includes a lab component. Fall.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

Equivalent(s): THEA 232

THEA 134 Costume Construction credit(s): 3

In this class we will seek to understand the overall breadth of the field, with an introduction to its areas of specialization; beginning stitching, patterning, and crafting techniques, and individual contributions to the work of the Gonzaga Costume Shop, as well as a personal construction project. Fall.

THEA 190 Directed Study credit(s): 1-3

Course repeatable for 6 credit(s).

Topic to be determined by faculty.

THEA 193 First Year Seminar: credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must be the following Class(es): Freshman

THEA 200 Theatre History credit(s): 3

A study of the theatre as an expression of life and culture from a primitive ritual to the 21st century. Theatre literature, performance practice, and theatre architecture will be studied within the larger context of the culture form which the various types of theatrical expression are derived. Fall, odd years.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

THEA 202 Performance Text Analysis credit(s): 3

This course will provide students with the necessary tools to create—and support other students in the creation of—critical analyses of plays and productions. Through textbook readings designed to provide students with access to the creative process, published play readings engineered to highlight successful analytical lenses and practices, and exercises devised to tap into different modes of creative generation, students will discover multiple methodologies for performance text analysis. Students will learn to give and receive effective feedback. By the end of the semester, students will complete several full performance text analyses and contribute directly to the making of a live performance.

Fulfills the following degree requirement(s): Core: Writing Enriched

THEA 216 Acting II credit(s): 4

An intensive study of the acting process building on skills developed in Acting I (THEA 111).

The course focuses on character development in psychological realism and other modern forms and is intended to expand the actor's range with both scene and monologue work, as well as to expand skills in voice/body integration and script analysis. Spring.

Prerequisite(s): THEA 111

THEA 222 E-Portfolio credit(s): 0

Course repeatable 12 time.

In this zero credit course taken each fall of sophomore and junior years, Interdisciplinary Arts Minor students will submit work from the year before into an e-portfolio format. This will be reviewed by the Director and the student in a scheduled meeting, reviewing ideas for the senior synthesis project and ensuring they are on track with coursework.

THEA 224 Contemporary Modern Dance I credit(s): 2

Course repeatable for 8 credit(s).

Analysis and theory of modern dance with an emphasis on basic technique and movement exploration. Includes a study of the evolution of modern dance and its past and present pioneers. Fall.

THEA 226 Accelerated Dance Technique credit(s): 2

Course repeatable for 8 credit(s).

A continued study of ballet with an emphasis on artistry, choreography and intermediate level technique. Includes a critical analysis of past and present classical dance works. Completion of THEA 124 Ballet I recommended. May be repeated. Fall and Spring.

THEA 227 Principles of Dance Conditioning credit(s): 3

This course will provide student dancers scientific information for understanding the human body, injury prevention and enhanced longevity and performance. Students will be given the tools to connect the anatomy and physiology of the body to dance while performing practical exercises to allow application of the knowledge learned. Spring, even years.

THEA 228 Dance History credit(s): 3

This course will look at dance as a reflection of culture and as an art form from earliest societies to the present, focusing primarily on western dance history. Fall.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

Equivalent(s): THEA 424

THEA 230 Topics in Dance credit(s): 1-2

Course repeatable for 6 credit(s).

Topic to be determined by instructor. Periodic offering.

THEA 235 Design Process credit(s): 3

This course covers the fundamentals of the process of designing for the theatre - developing the design from the initial script study through the collaborative process in design meetings.

Learning how to "see" and developing points of view and approaches are studied. The course will also cover the business of design, working in regional theatres and other professional venues. Fall, even years.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

THEA 237 Costume and Fashion Design credit(s): 3

This course examines the role of costume design in the performance storytelling process for stage and fashion. Utilizing classic design principles and tools, including color theory and artistic media, we will explore turning texts into visual images through script analysis, character interpretation, use of historical dress, and artistic inspirations. Spring.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

THEA 239 Lighting Design credit(s): 3

An introduction to the technical procedures, equipment, organization, drafting, and design principles of theatrical lighting. Students will design and execute lighting for main stage productions. Spring.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

THEA 240 Theatre for Young Audiences credit(s): 3

An introduction to the artistic, pedagogical, and entrepreneurial methods for producing theatre for (and with) young audiences. Coursework features practical rehearsal and performance, a survey of major Theatre for Young Audience plays, applied theatre techniques, and curriculum development. This class is intended for students seeking to become teachers (inside and outside of theatre arts classrooms) and those interested in performing for K-12 audiences. Spring, even years.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

THEA 253 Directing I credit(s): 3

The fundamental techniques of play analysis, actor communication, and composition are introduced and applied to model plays. Organizational, leadership, and conceptual skills are developed as students audition, cast, and rehearse chosen scenes from the modern realistic repertoire for performance. Fall.

Equivalent(s): THEA 453

Restriction(s):

Must be the following Class(es): Sophomore, Junior, Senior

Prerequisite(s): THEA 111

THEA 260 Production Lab credit(s): 1

Course repeatable for 20 credit(s).

Introductory level participation in one or more phases of the design, technology, and management (DTM) production process (set construction, costume construction, lighting, sound, etc.) Spring and Fall.

THEA 261 Performance Lab credit(s): 1

Course repeatable for 20 credit(s).

Performance of a role in a main stage theatre production. Spring and Fall.

THEA 280 Shakespeare in Performance credit(s): 3

An introductory study of contemporary acting methods used to perform Shakespeare's plays. Emphasis is placed on balancing Elizabethan language and staging conventions with today's psychological realism. The course focuses on character development, physical and vocal techniques for the actor, use of verse and prose, delivery of soliloquies, and script analysis. Students will engage with both scene and monologue work. The course is intended to expand the actor's range as well as the reader's understanding of Shakespeare's work for the live stage.

THEA 287 Allied Arts credit(s): 3

The goal of the artist in a theatrical production is simple: to make the audience believe. To that end, it is the responsibility of the scenic artist to create the illusion that rough plywood surfaces are in fact brick walls, or that a masonite floor is instead a cobblestone walkway. This class will explore scenic painting techniques, foam carving, and specialty prop design. Topics include the role of the scenic artist in the production process. Additional emphasis will be placed on faux painting techniques and trompe l'oeil painting.

This course is an intermediate studio class exploring the techniques and processes of scenic painting and crafts that encompass skills necessary for theatre and theatre production projects. Tools, materials and painting techniques will be demonstrated by the instructor and explored and executed by the student. Scenic painting does not arrive from your imagination alone. Research into surfaces and light will be necessary to apply the skills of painting.

THEA 290 Directed Study credit(s): 1-3

Course repeatable for 6 credit(s).

Topic to be determined by faculty.

THEA 293 Special Topics credit(s): 1-4

THEA 426 Advanced Composition and Production credit(s): 2

Course repeatable for 4 credit(s).

This course builds on the coursework from THEA 425. With a foundation in dance conceptualization, analysis, communication, and choreography, students will create advanced compositions and learn from the production of the Fall Dance Concert. Emphasis is placed on building conceptually rich, unified productions and the development of an individual creative voice while learning what it takes to produce a professional dance concert with guest artists. Fall.

Prerequisite(s): THEA 425, minimum grade: B

THEA 432 Core Integration Seminar: credit(s): 3

The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

THEA 440 Playwriting credit(s): 3

This course is designed to provide students with the necessary tools to create dramatic texts for reading and performance. Through play reading assignments and exercises devised to tap into different modes of creative generation, students will discover methodologies for developing new work. Students will hear their work read by actors in a 10-minute play festival. By the end of the semester, students will complete a short one-act play. Fall, even years.

Visual Literacy

Program Directors: Susan English, Shalon Parker

The program offers one minor:

Minor in Visual Literacy

The Visual Literacy minor focuses on an interdisciplinary approach to studying photographic and video arts, photojournalism, and documentary film. The minor gives students models for thinking critically about the interpretation and impact of images in society and artistic creation, and the evolving role of video in online news and social media. The curriculum integrates experiential learning with the theories and ethics of artistic and journalistic visual creation.

Minor in Visual Literacy: 18-19 credits

Women's and Gender Studies

Chair: S. Diaz

Associate Professor: S. Diaz

Assistant Professor: N. Rodriguez-Coss

The program offers one minor:

Minor in Women's and Gender Studies

Gonzaga's Women's and Gender Studies Department is an inter- and multi-disciplinary program that employs critical feminist theories and methodologies to foster transformative understanding of the intersections of gender, race, ethnicity, sexuality, and class among other socially defined identities. Using gender as a central analytic, we examine and question systems of power, inequality, and injustice and their role in shaping lived experiences of persons, locally, nationally, globally. We foster an ethical and intellectual commitment to dismantle sexism, heterosexism, and other dimensions of intersecting oppressions such as racism and classism. Our faculty empower students to imagine a more just future and equip them with the tools to collectively enact it.

The program offers a twenty-one credit minor in Women's and Gender Studies. There are three required Courses: WGST 201 or WGST 202, WGST 401, and WGST 499. Students also select four elective courses from inside the department or from several disciplines, including english literature, history,

philosophy, political science, religious studies, and sociology. A maximum of six elective credits may be lower-division courses with a WGST number. Further, a maximum of six elective credits may be component courses (“C” suffix), with the remainder of electives being upper division electives with a WGST number or full women’s studies courses.

Full women’s studies courses systematically use the methods, themes, and approaches of feminist scholarship throughout the semester. In component courses, one-third to one-half of the course material addresses gender issues and/or uses feminist perspectives. A maximum of nine credits may be taken in any one discipline. WGST 401 will not be included in this count.

Minor in Women’s and Gender Studies: 21 credits

The School of Business was established in 1921 and is accredited by AACSB International - The Association to Advance Collegiate Schools of Business. As stated in its Mission, the School “strives to develop professionally competent graduates who exemplify the humanistic, ethical, and moral values of a Jesuit institution. A personal learning environment, quality students, and a faculty dedicated to teaching and advising, scholarship, and service will mark our excellence. As part of a dynamic business environment, we will strengthen relationships with the regional, national, international and scholarly communities.” To support the mission of the School of Business, the learning objectives of the programs prepare students to:

- apply fundamental business theories and practices to any organization;
- analyze challenges and opportunities critically and arrive at a best solution;
- understand diverse perspectives and the global reach of business decisions;
- communicate ideas and information effectively;
- approach decision-making ethically and with a commitment to the common good; and
- adapt readily to the changing demands of a high-technology market.

Required courses in literature, fine arts, religious studies, philosophy, mathematics, history, and natural and social sciences are an integral part of the business curriculum. These courses foster the development of critical thinking, and creative problem-solving skills that are vital to the education of future leaders.

Admission Requirements

In order to take School of Business courses numbered 300 and above, students with majors in the School of Business Administration must have: a) attained junior standing, and b) achieved a cumulative grade point average of 2.70 in the following lower division business core courses: ACCT 260-ACCT 261 (Principles of Accounting I and II), BUSN 230 or MATH 321 (Statistics), BMIS 235 (Management Information Systems), and ECON 201-ECON 202 (Microeconomics and Macroeconomics) with a grade no lower than C- in any of these classes. Third-year transfer students who have not completed all the lower division business core courses listed above should consult the business school's transfer advisor.

Degree Requirements of the School of Business Administration

In addition to the general degree requirements of the University, including the University Core curriculum, students earning the Bachelor of Business Administration degree must complete the following requirements:

- I. Completion of the SBA common curriculum consisting of:
- a. Mathematics (3-4 credits): MATH 114, MATH 148, or MATH 157
 - b. Business Computing (2 credits): BUSN 111
 - c. Accounting (6 credits): ACCT 260 and ACCT 261
 - d. Economics (6 credits): ECON 201 and ECON 202

Major Programs of Study in Business

The degree of Bachelor of Business Administration (B.B.A.) is offered with a major in accounting or a major in business administration.

The accounting major requires completion of 27 credits, as described in the accounting section of this catalog.

The business administration major requires completion of 18-21 upper division credits including:

1. Twelve to fifteen credits from a designated concentration. Requirements of concentrations in economics, entrepreneurship and innovation, finance, human resource management, management information systems, marketing, and operations and supply chain management are described in the respective sections of this catalog. Also offered are interdisciplinary concentrations in international business, and law and public policy. Students may also design an interdisciplinary individualized concentration with the approval of a faculty advisor. A second concentration in the School of Business may be earned by completing 12 to 15 credits required in the area. Only one course may be double-counted between two concentrations in all but the international business concentration, where no double counting is allowed. International business is only available as a second concentration.
2. Three to six credits chosen from among the three categories listed below (only one course in a category may be used).
 - Students with a Single Concentration: Students will take a Broadening course and either an International or Experiential course chosen from the menus listed below. Note: The requirement applies to all concentrations, regardless of whether those concentrations require a course outside the discipline, e.g., ACCT 367 for the Finance concentration, or even outside the SBA, e.g., certain nonbusiness courses for Marketing. Exception: Students with a concentration in Entrepreneurship and Innovation will take a Broadening and an International course (an Experiential course is already part of the 12-credit requirement for this concentration).

- Students with Two or More Concentrations (or a concentration in business plus an accounting major): Students will take either an International or Experiential course chosen from the menus listed below. Exceptions: a) students with an International Business concentration will take either a Broadening, Experiential or 200-level of higher language course; b) students with a concentration in Entrepreneurship and Innovation will take a Broadening or an International course.

B - Broadening course. A 3-credit upper division course in business outside a student's concentration(s), and not included in the International or Experiential course menus. A Broadening course provides students an opportunity to pursue interests in a discipline outside their concentration(s) and, if desired, to complete coursework that complements their respective concentrations (e.g., BMIS 443 "Technology for Web and Mobile-based Business" for students in Marketing; ACCT 363 "Cost Accounting" for students in Operations and Supply Chain Management).

I - International course. Students not earning a concentration in International Business may select a course from the following menu.

BFIN 327 International Finance
 ECON 311 Global Economic Issues
 ECON 321 International Economics
 ECON 404 Economic Integration of European Community
 MGMT 355 International Management
 MKTG 417 International Marketing
 OPER 440 Global Operations and Supply Chain Management

E – Experiential course. Students may select a course from the following menu.

ACCT 471 Forensic Accounting Lab
 BENT 495 New Venture Lab
 BFIN 429A, BFIN 429B, BFIN 429C Portfolio Management
 BUSN 494 Management Consulting/Small Business Consulting
 BUSN 470 Multidisciplinary Act Projects
 BUSN 497 or ECON 497 Internship
 MKTG 490 Promotion Project

3. A course taken to fulfill a concentration requirement may not be double-counted to satisfy a requirement in the Broadening, Integrative, or Experiential area for the Business Administration major.

Students in the School of Business may also earn minors from other areas of the University. No more than six (6) credits of courses taken to satisfy requirements of minors may be double-counted to satisfy the requirements of majors and concentrations in the School of Business.

The B.B.A. is also offered with an Honors designation. Interested students should contact the director of the Honors Program.

Student Internships

An internship program is available to eligible juniors and seniors in the School of Business. In an academic internship, a student collaborates with an organization to learn business knowledge and skills in a professional environment. There are several steps students must take before participating in an academic internship. Internships are not awarded retroactively. Students must receive approval for internship credits before internship hours are started. Internship guidelines are available on the School of Business website.

Economics Programs Offered by the College of Arts and Sciences

All economics courses offered in the university are taught by faculty of the School of Business, but are open to students from throughout the university. Students in the College of Arts and Sciences may obtain a B.A. or a B.S. degree with a major in economics. A minor in economics is also available. These degrees offer the opportunity for more extensive study of economics than the economics concentration in business but without the broad background of the business core. The College of Arts and Sciences also offers a minor in economics for students receiving a degree from any college or school of the University. Interested students should refer to the College of Arts and Sciences section of this catalog for specific requirements.

Pre-Law Students

Students who intend to pursue the study of law are encouraged to enroll in business courses that will provide a solid understanding of the integral relationship between law and business.

Core courses such as Principles of Accounting I and II (ACCT 260 and ACCT 261), Microeconomics and Macroeconomics (ECON 201 and ECON 202), are recommended for pre-law students with majors outside the School of Business. Accounting provides basic skills to prepare and analyze financial statements and to complete case analysis; economics gives an understanding of how economics affects government fiscal policies, international trade, labor and other resource markets, political decisions, etc.

In addition, a pre-law student in the School of Business will benefit from courses in the law and public policy concentration. This concentration includes various courses which address legal issues such as corporate taxation, regulation of securities trading, business ethics, mergers and acquisitions, and antitrust policy and regulation. All of these courses provide pre-law students a unique insight into how business functions within the framework of the legal system.

Validation of Transfer Courses

Transfer students who take lower division courses at another AACSB-accredited institution equivalent to required upper division business courses at Gonzaga must have those courses validated by the transfer advisor.

Accounting

The accounting major is designed to enable students to develop an understanding of, and proficiency in, accounting concepts and techniques. Building on the principles of accounting, students study financial reporting, auditing, taxation, income determination, account valuation, accounting systems, and the role of accounting in the allocation and use of resources. The program offers several career options leading to employment in business, government, and public accounting.

In order to pursue the Accounting major, a student must have earned a minimum grade of B- in ACCT 260 and ACCT 261, or their equivalent.

CPA Certificate Track

To sit for the CPA examination, Washington State requires candidates to obtain 150 semester credit hours of acceptable educational preparation. Gonzaga offers both a Master of Accountancy (MAcc) and a Master of Science in Taxation (MSTax) degree tailored for students who desire to fulfill the 150-hour requirement and earn a graduate degree at the same time. A student pursuing this track will, during the junior, senior, and graduate years, acquire the technical competence in the 300-level and 400-level accounting courses, while more fully developing research, communication, and presentation skills offered in graduate classes. A student planning to obtain both undergraduate and graduate degrees should work closely with a faculty advisor for proper course sequencing.

Gonzaga's accounting majors may apply for the MAcc or MSTax program during the second semester of the junior year. If accepted into the program, nine credit hours of graduate-level courses may be taken during the senior year with the permission of the accounting program coordinator. Before applying for admission, a student should have completed 75 credit hours (including ACCT 360) with a cumulative GPA of 3.2 and a grade no lower than C+ in any upper division accounting courses. The student must be admitted to the MAcc or MSTax program before enrolling in any graduate courses.

Non-CPA Track

A student who does not wish to obtain CPA certification can earn the B.B.A. degree in accounting. With this degree, a student might find employment opportunities in governmental agencies, financial institutions, and industrial firms such as Boeing or Avista. The student pursuing this track is encouraged to obtain an accounting major accompanied by elective course work in information systems. Both the Certified Internal Auditor (CIA) and Certified Managerial Accountant (CMA) designations are available to students with this degree.

Economics

The objective of the economics program is to give students a broad background and knowledge of domestic and international economic systems that are essential for business managers in today's competitive global economy. Graduates can apply economic theory to problems relating to market structures, resource markets, employment, and fiscal and monetary policies. Economists occupy a wide range of positions in profit and non-profit enterprises as well as in government. The economics concentration is highly recommended for pre-law students, as well as for students aiming for careers in banking, finance, government, or industry.

Students in the College of Arts and Sciences may also pursue a major or minor in this field. The requirements for the B.A. and B.S. degrees in economics can be found under the College of Arts and Sciences section in this catalog. Students expecting to pursue graduate studies in economics are encouraged to pursue the B.S. degree. Students doing an Economics

Concentration in Business are encouraged to take ECON 351 Managerial Economics and ECON 352 Money & Banking. Note that ECON 302 has a prerequisite of ECON 202 with a B- or better and ECON 301 has a prerequisite of ECON 201 with a B- or better.

In addition to a concentration under the Bachelor of Business Administration degree, Economics offers two degrees and one minor:

Bachelor of Science, Economics major

Bachelor of Arts, Economics major

Minor in Economics

The mission of the Economics program is to give students a broad background and knowledge of domestic and international economic systems that are essential for people in today's competitive global economy. To this end, two Economics majors are offered. The B.S. Major in Economics includes extensive coursework in mathematics as well as economics in preparation for graduate study in economics and careers requiring strong quantitative skills. The B.A. Major in Economics is offered for students who want an extensive background in economics in preparation for careers in business or government as well as for those pursuing advanced study in law or business. A minor in Economics is also offered for students with other majors who need less extensive knowledge of economics. Regardless of the

chosen degree, graduates can apply economic theory to problems relating to market structures, resource markets, employment, and fiscal and monetary policies. Students expecting to go into a business field are encouraged to take courses in accounting and may want to consider the general business minor or the minor in analytical finance offered by the School of Business Administration.

While Economics courses are taught by faculty of the School of Business Administration, students pursuing the B.A. and B.S. majors are enrolled in the College of Arts and Sciences and must the College of Arts and Sciences common curriculum. ECON 200 may be taken by students who are not Business or Economics majors to satisfy the Social & Behavioral Science requirement of the University Core. Most 300-level courses require only ECON 201 as a prerequisite. Students considering an Economics major or minor should note that ECON 302 has a prerequisite of ECON 202 with a grade of B- or better, and ECON 301 has a prerequisite of ECON 201 with a grade of B- or better. All majors should try to take the comprehensive examination (ECON 499) in the semester before they plan on graduating. Economics majors should complete both ECON 301 and ECON 302 before or concurrent with taking ECON 499.

Individualized Program

Students may design an interdisciplinary concentration of courses related to their individual goals and interests. This concentration must include twelve credits of upper division courses approved by a faculty advisor.

International Business

The International Business Concentration is designed for students who want to prepare themselves to meet the challenges associated with globalization. This concentration must be taken in tandem with another major (accounting) or another concentration. Students must complete the international course for the functional area of their primary concentration, if offered. This international course can be used to fulfill either a requirement in the primary concentration or the international business concentration. **It cannot be double-counted.**

International Business Concentration: 12 credits

Four courses selected from the following:

<u>ECON 311</u> Global Economic Issues (or <u>ECON 321</u> for economics concentration)	3 credits
<u>BFIN 327</u> International Finance	3 credits
<u>MGMT 355</u> International Management	3 credits
<u>MKTG 417</u> International Marketing	3 credits
<u>OPER 440</u> Global Operations and Supply Chain Management	3 credits

Course descriptions are found under the respective disciplines.

Students with a concentration in International Business may not double-count any of the above courses to satisfy the broadening, international, experiential elective in the business administration major. Students in this concentration may count one three credit foreign language course taken at the 200-level or above at a university to satisfy the international three- credit requirement in the BIE group. A course in a student's native language does not fulfill this requirement.

Law and Public Policy

Government regulation and legislation have a major impact on business, creating a need for public policy makers to understand the workings of business and for people in the private sector to understand the public sector. This is especially relevant for people pursuing careers in corporate public affairs and professional study in law, public administration, and public policy analysis.

Law and Public Policy Concentration: 12 credits

BMIS 245 Tech Foundation of Digital Marketing credit(s): 3

Marketing now has a stronger use of information technology than ever before. For example, as of 2015, 99% of Google's revenue comes from advertising. The objective of the course is to equip students with foundational knowledge, skills, and techniques of a variety of technologies that have been widely used to build customer-facing applications and devices. Beginning with a short review of the history of the Internet and the Web, the course introduces students to fundamental concepts and the process of developing consumer-centered applications. A variety of tools and techniques for developing such applications are presented, such as the structure of web pages, web page language (XHTML and HTML), Cascading Style Sheets (CSS) and script languages. The de facto language of consumer-centered programming language, JavaScript, is adopted as a vehicle to develop aforementioned skills and techniques. Relevant technologies such as JQuery, JSON and popular JavaScript frameworks will be introduced. These skills will provide the technical background necessary for digital marketing efforts. Spring.

BMIS 331 Problem Solving and Program Techniques credit(s): 3

This course provides a basic introduction and practical experience in developing algorithms and writing computer programs to solve business problems. Students will be required to design solutions as well as to code, test, and debug programs that are soundly structured and easy to maintain. Topics include variables, data types, control structures, input/output control, arrays, method invocation and parameter passing. Fall.

Marketing

Marketing emphasizes satisfying needs and wants through the facilitation of the exchange process between and among organizations and customers. Marketing concepts and techniques apply to all types of organizations, whether they are for profit or non-profit and whether providing goods, services, experiences or ideas to their customers. An organization's long-term success is determined by understanding customer preferences and perceptions as well as how they change. Marketing is also a critical link between organizations and their environment.

The topics studied include: gathering and interpreting market information, understanding customer decision processes and the influencers of these processes, target market decisions involving segmenting markets and positioning market offerings, marketing promotion and advertising, product design and modification, pricing, distribution of products, and effective managerial decision-making and planning.

Marketing is an essential, universal activity common to all individuals and organizations around the world, whether pursuing personal employment, seeking clients for an accounting firm, or in marketing supertankers or soap. Marketing knowledge and skills may lead to challenging and satisfying careers

in nearly any field including such activities as sales and sales management, advertising and promotion management, retail management and buying, product development and management, public relations, industrial marketing, marketing research, and international marketing.

Operations and Supply Chain Management

The growth of e-commerce, increased global competition, and advances in information technology are some of the forces behind the ongoing need to eliminate waste and add value throughout a product's supply chain. The Operations and Supply Chain Management (OSCM) concentration examines how a firm can establish and enhance the operational core competencies required by demanding consumers in a dynamic marketplace.

This concentration prepares students for the challenges of tomorrow's business environment by providing them with the technical, informational, and managerial skills needed to manage and improve an integrated system of productive processes. Career opportunities exist with organizations that provide or are dependent on fast, low-cost, accurate, and uniform flows of products, information, and services. Examples of career opportunities include consulting, logistics, manufacturing, health services, government, retail and insurance, and banking.

Courses:

OPER 340 Operations Management credit(s): 3

This foundation course provides an understanding of the strategic and tactical role of operations management in building and maintaining a firm's core competencies. A significant emphasis is placed on discussing the impact of technology and globalization on creating and enhancing value from both the producer and consumer's perspective. This hybrid course uses a combination of lectures, Blackboard.com exercises, computer lab projects and group projects to ensure an understanding of basic concepts. Upon completion of the course students will possess the requisite skills to create and sustain the operational core competencies required to compete in a global marketplace. Fall and Spring.

Business Minors

Business Minors for all majors, including Business and Accounting:

Digital Marketing: 24 credits

Sustainable Business: 26 credits

Business Minors for Non-Business majors:

The School of Business offers minors in Entrepreneurship and Innovation, Digital Marketing, Sustainable Business, General Business, Analytical Finance, Management Information Systems, and Promotion to non-business students. Students desiring to pursue a minor should meet with a School of Business advisor early in their program to ensure development of a course sequencing plan. Students will not be allowed in classes with designated

prerequisites unless that prerequisite has been satisfied. Also, students will not be allowed to take equivalent CLEP or other exams to replace or waive courses in the minor.

Analytical Finance: 27-28 credits
Entrepreneurship and Innovation: 18 credits
General Business: 24 credits
Management Information Systems: 17 credits
Promotion: 18 credits

Minor in Digital Marketing: 24 credits

Digital marketing is the present and future of marketing. Students with digital marketing knowledge and skills are well-positioned to succeed in modern marketing and e-commerce careers. The minor is designed to develop skills in content marketing, social media marketing, search engine optimization, web analytics, mobile marketing, app development, and more.

This minor pairs particularly well with business concentrations in marketing, MIS, and entrepreneurship. Students majoring in fields such as integrated media, public relations, communications, computer science, journalism, English, art, and psychology might also find the minor helpful in their professional pursuits.

Sustainable Business Minor: 26 credits

This minor is designed primarily for business majors who want to learn more about environmental issues, but the minor would be available to anyone at Gonzaga University.

Students earning a Sustainable Business minor would be required to take courses from both the School of Business Administration and the Environmental Studies Department within the College of Arts & Sciences. The intention is to have these courses work together across disciplines to give students the necessary background in both business and environmental studies.

Minor in Analytical Finance: 27-28 credits

The minor in analytical finance is intended for students with a secondary interest in either general corporate finance or investments. This field of study may be particularly useful to two groups of students: 1) mathematics majors interested in actuarial science careers and 2) those interested in a more finance-oriented minor than the general business minor program offers. Completion of ACCT 260-ACCT 261, ECON 201-ECON 202, and one three-credit course in statistics with a minimum GPA of 2.70 and no lower than a C- in any one class is required to enroll in upper division courses required in the minor. Applications for admission to upper division business courses are available in the School of Business and must be approved before registration for upper division business courses. Students will not be allowed in classes with designated prerequisites unless that prerequisite has been satisfied.

School of Education Mission Statement

The mission of the School of Education is to prepare socially responsive and discerning practitioners to serve their community and profession.

- We model and promote leadership, scholarship and professional competence in multiple specializations.
- We support an environment that is challenging, inclusive, reflective, and collegial.
- We foster inquiry, intellectual creativity, and evidence-based decision making to accept the challenges facing a global society.
- We provide academic excellence in teaching, advising, service, and scholarship.
- We promote, support and respect diversity.

The School of Education upholds the tradition of humanistic, Catholic, and Jesuit education and this tradition and mission are embodied in our theme

statement: **Preparing socially responsible professionals who serve with Care, Competence and Commitment.**

Programs of Study

The School of Education offers four undergraduate degrees:

Bachelor of Education (B.Ed.) in Community, Culture, and Language

Bachelor of Education (B.Ed.) in Kinesiology

Bachelor of Education (B.Ed.) in Special Education

Bachelor of Education (B.Ed.) in Sport Management

Degree Requirements for the School of Education

Students must complete the general degree requirements of the University, including the University Core curriculum, and the requirements of their major.

Please note: Every degree requires a minimum of 128 completed semester credits. No core, major, minor, or concentration courses may be taken under the Pass/Fail option.

Certification

Additionally there is a Teacher Certification program that enables students to obtain initial (Residency) certification within the state of Washington. The School also offers initial and advanced certification for teachers, and school administrators at the graduate level. Further information on these programs can be found in the graduate catalog.

Accreditation

All teacher preparation degree programs, and elementary, secondary, and advanced certification programs in the School of Education are fully approved by the Washington state Professional Educator Standard Board (PESB).

Notice

While this catalog provides students with the most current information regarding School of Education undergraduate programs, students are advised that programmatic changes are a common occurrence in the field of education and are usually the result of directives from the Washington State Office of the Superintendent of Public Instruction (OSPI) and outside accreditation agencies. The School of Education takes seriously its responsibility to communicate all changes to education students. Students must be sure to meet with their education advisors regularly to complete a plan of study in compliance with current regulations.

Special Education

Chairperson: Kimberly Weber

The department offers one degree and one minor:

Bachelor of Education in Special Education
Minor in Special Education

The Department of Special Education offers a major and minor in Special Education that emphasizes learning experiences in applied settings. Public, private schools, as well as a variety of non-school settings, provide students the opportunity to combine academic training with practical experience. Candidates who earn the Bachelor of Education degree with a major in Special Education are prepared to work with individuals having mild to severe disabilities, such as learning disabilities, pervasive developmental disabilities, and behavior disorders. Majors seeking teacher certification take courses that focus on developing skills needed to function in a variety of classroom settings including but not limited to resource, self-contained, and inclusionary. The Special Education Department also prepares candidates who plan to work in non-school settings like clinics, workshops, homes, etc. Courses for those seeking Board Certified Assistant Behavior Analyst (BCaBA) certification are also an option. The Special Education degree is a great starting point for those seeking advanced degrees in behavior analysis, occupational therapy, speech and language, counseling, or school psychology.

State of Washington teacher certification requirements indicate that those seeking certification in Special Education also obtain an endorsement in a second content area. Many candidates choose elementary or reading to fulfill this requirement although there are other options. The Special Education Department has two different teaching endorsements that may be earned through completion of the B.Ed. The first endorsement is in Special Education and permits teaching special needs students preschool through twelfth grade. The second endorsement is in Early Childhood Special Education and permits teaching special needs student's birth through third grade. Students seeking teacher certification complete courses beyond what is required for the major in order to meet program completion requirements. It is best to meet with your Special Education advisor to make sure you are taking the necessary coursework. All students majoring in special education who wish to become endorsed to teach special education in the State of Washington must:

1. Complete required coursework in line with the Special Education Major with a grade of C or better, including but not limited to EDSE 320, EDSE 306 and EDSE 406 in-school practicum courses, and EDSE 480 EdTPA and Teacher Development Seminar.
2. Take the WEST-B exam or have equivalent test scores prior to being admitted to the certification program. Those who have not completed this requirement are prohibited from student teaching.
3. Complete an application for and obtain acceptance into the teacher certification program.
4. Obtain and maintain WSP/FBI clearance throughout all field experience including student teaching.
5. Create and maintain an eCertification PreResidency Clearance Account throughout the program.
6. Take the West-E/NES exam in Special Education or another endorsement area prior to student teaching.
7. Receive a C or better for all courses required for certification.

The Early Childhood Special Education endorsement prepares candidates to serve young children with disabilities from birth through early school years (3rd grade). Candidates who wish to become endorsed in Early Childhood

Special Education must complete all of the requirements above as well as the following:

1. Complete the series of four courses specifically addressing critical issues, background, and pedagogy for early development, methodology, physical development, and communication (EDSE 350, EDSE 351, EDSE 352, and EDSE 353) with a grade of C or better.
2. Complete student teaching in an Early Childhood Special Education classroom.

All Gonzaga University students may enroll in EDSE 150, 155, 225, 306, 335, 307, 320, 340, 344, 346, 406, 407, or 417. All other upper division courses require official acceptance into the major or minor in special education. Acceptance and continuance in the major or minor are dependent on an overall Gonzaga GPA of at least a 3.00; a 3.00 average or higher in EDSE 150, 320; a minimum of 3.00 in EDSE 320; a pass and positive evaluations in EDSE 306, 307, 406, or 407; recommendation by the advisor; and approval by the faculty in the Department of Special Education.

Kinesiology and Sport Management

Chair: Karen Rickel

The department offers two degrees and a minor:

Bachelor of Education in Kinesiology

concentrations:

Fitness Specialist

Health & Physical Education Pedagogy

Bachelor of Education in Sport Management

Minor in Sport Management

Bachelor of Education in Kinesiology

The B.Ed. in Kinesiology is dedicated to training students in the pedagogical and scientific practices that help others reach their highest potential. Students pursuing this degree study how physical activity and health behaviors influence performance, disease, and quality of life. Graduates are equipped with the knowledge, skills, and confidence to work in school, clinical, community, and commercial/corporate settings to instruct, coach, and evaluate health, fitness, and sport-related activities. Students pursuing a degree in Kinesiology are encouraged to select a concentration that emphasizes a specialized area of study.

The Fitness Specialist Concentration focuses on the scientific principles of exercise testing and prescription and prepares students to work in roles such as an exercise physiologist, strength and conditioning coach, or fitness club programmer. In addition, this concentration is designed to provide students with a pathway to graduate programs in athletic training and clinical or applied kinesiology and exercise science-related fields. Students will be qualified to sit for national certification exams in fitness specialties such as the American College of Sports Medicine (ACSM) Certified Exercise Physiologist Exam or the National Strength and Conditioning (NSCA) Certified Strength and Conditioning Exam.

The Health and Physical Education Pedagogy Concentration focuses on the knowledge, skills, and dispositions essential for teaching and coaching individuals in sport, health and fitness activities in a community or school setting. Students are prepared to design and deliver health, fitness and physical education programs to children and youth. Students desiring to teach health and physical education in the K-12 public school system must complete this concentration along with the required teacher education certification courses to obtain a Washington State Teacher Certificate and a K-12 health and fitness endorsement. Gonzaga's teacher certification program is recognized by the Interstate New Teacher Assessment & Support Consortium (InTASC), so candidates are qualified to teach in any state that is part of InTASC.

Bachelor of Education in Sport Management

The Bachelor of Education in Sport Management prepares students for a variety of positions within the sport industry. This degree also prepares students for graduate studies in Athletic Administration, Sport Management, or related disciplines. It is strongly recommended that Sport Management majors pursue an advisor-approved minor such as General Business, Communications, or other relevant specialty areas. The Sport and Physical Education department also offers a 24-credit minor in Sport Management.

Activity Course Offering: The Sport and Physical Education Department also offers a large number of activity courses (EDPE 101-189) which are open to students throughout the University. Activity courses may be repeated for credit.

Chairperson: Stephen Hess, S.J., Ph.D.

B.Ed Community, Culture, & Language Program Director: Mary Jeannot, Ph.D.

Elementary Program Director: Deborah Nieding, Ph.D

Secondary Program Director: Stephen Hess, S.J., Ph.D.

The Teacher Education Department offers one degree and two certifications:

Bachelor of Education in Community, Culture and Language

Elementary Teacher Certification

Secondary Teacher Certification

In the spirit of Gonzaga's Catholic and Jesuit mission the Teacher Education Department prepares individuals to be reflective practitioners committed to servant leadership and social justice. We have been educating students since 1928, offering a thorough preparation in academic subject matter and professional teaching. As a reflective learning community faculty, staff, and students form supportive relationships that encourage service for others, reflective practice, and critical thinking skills.

Bachelor of Education in Community, Culture, and Language

The B.Ed in Community, Culture, and Language (CCL) provides students with a deep understanding of the ways in which cultures, languages, and literacies affect communities. The guiding philosophy of this interdisciplinary degree is rooted in the Jesuit principle of living as men and women for others. In order to be men and women for others we must understand how our cultural and linguistic behaviors shape and are shaped by our worldviews and those of our respective communities. By developing cultural humility, we can develop alongside individuals from diverse linguistic and cultural backgrounds.

The CCL degree offers two concentrations or focus areas – community education and elementary education. Students choosing the community concentration take the basic CCL major requirements along with courses in the social sciences preparing them to serve in a variety of nonprofit, nongovernmental, and global organizations. The elementary concentration offers students a pathway to obtain an elementary teaching certificate by

taking specialized courses in addition to the CCL major requirements. It is important to note that completion of the CCL Elementary Concentration does not result in teacher certification. Students must also complete the certification courses required by the state of Washington that are offered in the Teacher Education Department.

Bachelor of Education in Community, Culture, and Language

The Community, Culture, and Language degree is intended to provide students with a sophisticated, practical understanding of the ways in which cultures, languages, and literacies support or challenge communities. This degree is specifically designed to be paired with elementary certification. The guiding philosophy of the program is that in order for us to be women and men for and with others, we must understand how our cultural and linguistic behaviors shape and are shaped by our worldviews and those of the communities we belong to. By developing a stance of cultural humility, we are better able to grow with and learn from individuals coming from diverse linguistic and cultural backgrounds.

The program may also attract those who seek a deeper understanding of and ability to navigate cultural and linguistic differences, as well as the tools to build and support community for the benefit of all. With its interdisciplinary focus and complementary integration with the university core, the major will also target potential employment by NGOs, NPOs, and any businesses or organizations with a global focus. By the end of their sophomore year, students will be placed into one of two concentrations: the Elementary Education concentration, or the Community Education concentration. Please note that completion of this major does not, in and of itself, result in teacher certification – as that is an additional program. Additionally, a concentration is an area of focus and does not equate to certification.

Teacher Certification Programs

The Teacher Education Department offers a thorough preparation in professional teaching. Students have an opportunity to obtain initial (residency) certification within the state of Washington at the Elementary (K-8) or Secondary (5-12) level with reciprocity throughout the United States. The Department is advised by a Professional Education Advisory Board (PEAB) composed of area teachers and school administrators. The certification programs also meet the standards specified by the Washington Professional Educator Standards Board (PEAB). It is important to note that certification is not a major. Students pursue a major field of study in the School of Education or from another school or college at the University while also taking teacher certification courses. Students must also fulfill all the University core curriculum requirements.

Teacher certification students have a primary and a secondary advisor. The primary advisor (assigned when students are admitted to the University) advise students regarding degree and core curriculum requirements. Teacher certification students are assigned a secondary advisor from the Teacher Education Department during EDTE 101 – Social and Cultural Foundations of Education. This advisor guides teacher certification candidates throughout the certification program.

Students who want to serve as elementary school teachers pursue Elementary certification allowing them to teach grades K-8 as generalists in a self-contained classroom. Those wanting to teach at the middle or high school level (5-12) pursue secondary certification. Secondary candidates choose a

specific content/endorsement area to teach. The Teacher Education Department offers Secondary certification in the following endorsement areas:

Biology	English Language Arts
Chemistry	Mathematics
Physics	Music
French	Theatre Arts
Spanish	Social Studies/History

Teacher Certification candidates engage in a student teaching experience during their final semester.

Admission to Teacher Certification Program Requirements:

Admission into the teacher certification program is dependent on completion of the following:

1. 12 credits of education coursework successfully completed including one field experience.
2. All courses required for teacher certification must be a 2.00 or higher.
3. Cumulative GPA of 2.50 or higher across GU courses.

Courses:

Teacher Education

EDTE 101 Social and Cultural Foundations of Education credit(s): 3

This course provides an overview of the teaching profession. It is designed as an exploration of teaching as a career choice, serving as an introduction to various philosophical positions

regarding education, the laws that affect students and teachers, the global and historical background of our current educational systems, and the issues concerned with recognizing, accepting, and affirming diversity.

Fulfills the following degree requirement(s): Core: Social Justice

EDTE 200 Language, Society, and Power credit(s): 3

This course introduces students to foundational concepts in linguistics, with particular emphasis on how language, culture, and society intersect and how linguistic choices reinforce or undermine power relations in society. Students will develop and understanding of what constitutes language and how languages create and maintain identities within communities.

Equivalent(s): MTSL 200

EDTE 201 Learning Theory and Epistemologies credit(s): 3

This course is designed to introduce the undergraduate teacher candidate to theories of learning. The contributions of behaviorism, humanistic psychology, and cognitive psychology will be examined in order to give a basis for critically analyzing how and why human development and growth occur in the teaching/learning act. Based on the dynamics of respect for individual differences within the learning community, prior learning, and authentic scholarly exploration of historical and current literature, student teacher candidates will be able to articulate, develop, and seek alternatives to their theories-in-use.

Fulfills the following degree requirement(s): Core: First Year Seminar

Prerequisite(s): EDTE 101 (or concurrent)

EDTE 202 Community and Ethnography credit(s): 3

Using a variety of frameworks and tools, students will investigate the language and culture of carefully selected communities. Students will learn how to describe events without interpretation and work collaboratively to formulate possible hypotheses about cultures.

Equivalent(s): MTSL 202

Prerequisite(s): EDTE 200 or MTSL 200

EDTE 204 Community Languages and Language Acquisition credit(s): 3

This course is an introduction to first and additional language acquisition through the lens of an introductory course in two of the languages and writing systems used in the Spokane region. The purpose of the course is to introduce students to the languages and cultures of minority groups and to explore the ways in which the worldviews of these groups differ from those of the dominant culture. The course will also introduce students to the principal theories of first and second language acquisition.

Equivalent(s): MTSL 204

Prerequisite(s): EDTE 200 or MTSL 200

EDTE 206 Community and Place-Based Education credit(s): 3

This course introduces students to foundational concepts in community and place-based education practices, with particular emphasis on theories and strategies that support the co-creation of K-12 and community-based educative experiences anchored in the unique contextual elements of place. Students will investigate and engage in local collective impact efforts that reflect a unique community context.

Prerequisite(s): EDTE 202 or MTSL 202

EDTE 213 NW History for Elem Teachers credit(s): 1

This one credit course is designed to provide undergraduate teacher candidates with the basic content of Washington State history. An emphasis will be placed on the use of technology, diversity and assessment. The history and geography EALR's/GLE's/PE's will be emphasized. Fall and Spring.

EDTE 221E Elem Differential Instruct and Assess credit(s): 3

This course is designed to integrate the planning, implementation, and assessment of instruction across content areas at the elementary level with a special emphasis on diversity. The major focus of this course will be meeting the learning needs of a diverse population which

includes students from different racial, ethnic, ability, socio-economic status, language and sexual orientation backgrounds.

Equivalent(s): EDTE 221A

Corequisite(s): EDTE 221L

Prerequisite(s): EDTE 101

EDTE 221L Field Experience

credit(s): 1

Course repeatable for 2 credit(s).

Teacher candidates will have the opportunity to explore firsthand the instruction, assessment, and technology practices that are at work in schools. Candidates also gain pedagogical practice by working with students and teaching a lesson. Teacher candidates are required to submit a Field Experience Request form to the Field Experience Office a minimum of a month prior to the semester they are taking the course. This form can be found on Blackboard under Teacher Certification & Field Experience Materials Course. The field experience requires a minimum of 30 hours in the classroom and travel by car may be required. In addition, current fingerprint clearance from the WSP and FBI throughout the semester and Pre-Residency Clearance is on file.

Equivalent(s): EDTE 305A, **Equivalent(s):** EDTE 305B

Prerequisite(s): EDTE 101(and EDTE 221E (or concurrent) or EDTE 221S (or concurrent))

EDTE 221S Sec Diff Instruct and Assess

credit(s): 3

This course is designed to integrate the planning, implementation, and assessment of instruction across content areas at the secondary level with a special emphasis on diversity. The major focus of this course will be meeting the learning needs of a diverse population which includes students from different racial, ethnic, ability, socio-economic status, language and sexual orientation backgrounds.

Corequisite(s): EDTE 221L, **Corequisite(s):** EDTE 241

Prerequisite(s): EDTE 101

EDTE 231 Instruct Methods: Reading/Writing/Communication I

credit(s): 3

The primary purpose of this course is to provide opportunities for teacher candidates to understand theoretical constructs related to reading, writing, and communication in classroom curriculum. Teacher candidates will develop pedagogy from an analysis of the processes of natural learning, language acquisition, multiple intelligence, and learning styles. This knowledge will become the framework for instructional methodology for reading, writing, and communication skills.

Equivalent(s): EDTE 401

EDTE 241 Teaching in the Middle School

credit(s): 3

The purpose of this course is to help the prospective middle level/secondary teacher candidate develop in-depth knowledge and understanding of early adolescents. The middle school reform movement and the developmental characteristics and needs of adolescents provide a framework for this course.

Corequisite(s): EDTE 221L, **Corequisite(s):** EDTE 221S

Prerequisite(s): EDTE 101

EDTE 302 Advocacy and Policy

credit(s): 3

This class harnesses the power of language and engagement with communities through the lenses of inquiry and advocacy with a focus on action to bend the arc of the universe to become more moral and just. In it, we learn the basis for types of advocacy, advocacy planning, and how to take action based on your plan.

EDTE 304 Concepts in Science

credit(s): 3

This course presents earth, physical, and space science concepts for elementary teacher candidates.

Equivalent(s): EDTE 404

EDTE 305 Intercultural Competence Development credit(s): 3

This course addresses social justice by introducing students to a developmental process of acquiring cultural self-awareness, developing knowledge and skills that build intercultural competence, and engaging in meaningful reflective self-evaluation. Intercultural Competence involves a set of cognitive, affective, and behavioral skills and characteristics that support appropriate and effective interaction in a variety of cultural contexts (Bennett, J., 2008). This process begins with recognizing new perspectives about personal cultural beliefs, values, and assumptions; and exploring others' cultures and worldviews. The opportunity to understand the worldviews of others will occur through reading and discussion, learning from speakers representing a variety of cultural backgrounds, refugee simulation at World Relief Refugee Resettlement, and reflection.

Equivalent(s): EDTE 221L

EDTE 306 Critical Pedagogical Issues American Education credit(s): 3

This course is designed to examine issues in education from the perspective of Native American students, and to provide educators with knowledge and skills that will increase their comfort level, competency and ability to work in schools where American Indian children and other diverse students are educated. Course content will include an overview of important historical and cultural factors, the study of current methods based on research and experiences of practitioners in the field, and a practicum in the development of effective educational strategies and materials, specifically the Washington State Since Time Immemorial curriculum.

EDTE 315E Classroom Assessment Elem Teachers credit(s): 3

This course will introduce and practice the processes of assessing whether students are meeting desired classroom outcomes, addressing the question, "How do we know our students learned the material?" Multiple methods and types of classroom assessments will be analyzed and evaluated for the purposes of creating a systematic framework that implements, collects, and reviews assessment data. The following assessment components will be discussed, applied and evaluated: timely and appropriate feedback; formative, summative and diagnostic methodologies; classroom assessment instruments; self-assessment applications; clear criteria; scoring guides and rubrics; student voice; and content-specific assessment practices. Fall.

Equivalent(s): EDTE 417

Prerequisite(s): EDTE 221E and EDTE 221L

EDTE 315S Classroom Assessment Secondary Teacher credit(s): 3

This course will introduce and practice the processes of assessing whether students are meeting desired classroom outcomes, addressing the question, "How do we know our students learned the material?" EDTE 321 Social Emo Learners in Classroom and Community credit(s): 3
2 time.

This course offers candidates the opportunity to learn communication and intervention skills that can be used within any instructional setting. Supportive behavior and resource management techniques are addressed that result in logical consequence, assisting the student in accepting responsibility for behavior. This course focuses on a multitude of methods and modalities in order to address various learning styles and reduce non-academic stressors. There is a focus on mastery of social and emotional skills in addition to academic ones, as well as adverse childhood experiences (ACEs) and a trauma-sensitive learning environment.

EDTE 331 Instruct Methods: Reading/Writing/Communication II credit(s): 3

The purpose of this course is twofold: one, to prepare teacher candidates to create appropriate lesson plans for literacy instruction and assessment in order to provide opportunities for children to become involved with literacy in a purposeful and meaningful manner. Second, to prepare teacher candidates to become aware and utilize available literary resources, including technology for teaching. An emphasis of this course will be the compatibility of methods of instruction and assessment with regard to Washington State Standards/Common Core Standards. Fall and Spring.

Fulfills the following degree requirement(s): Core: Writing Enriched

Corequisite(s): EDTE 331L

EDTE 331L Field Experience credit(s): 1

Teacher candidates will have the opportunity to explore first-hand Literacy instruction, assessment, and technology practices that are at work in schools. This course will aid the teacher candidate to focus and integrate learning by observing, teaching, reflecting, and analyzing instructional events occurring at the school site. The course will enable the teacher candidate to observe and participate in instructional decision making, strategies for differentiation, and various assessment modes. Teacher candidates are required to submit a Field Experience Request form to the Field Experience office a minimum of a month prior to the semester they are taking the course. This form can be found on Blackboard under Teacher Certification & Field Experience Materials Course. EDTE 455L Field Experience: Additional Endorsement credit(s): 1
Course repeatable for 2 credit(s).

This is a lab course which will accommodate teacher candidates who add-on an additional endorsement. Teacher candidates are required to complete a Field Experience request form prior to taking this course which can be found on the Gonzaga School of Education website under Field Experience. This course must be taken concurrently with an EDTE 454 Discipline Specific Methods course. The field experience requires a minimum of 30 hours in the classroom and travel by car may be required. In addition, current fingerprint clearance from the WSP and FBI throughout the semester and a Character and Fitness form on file is required. Fall only.

Prerequisite(s): EDTE 454E (or concurrent) or EDTE 454F (or concurrent) or EDTE 454D (or concurrent) or EDTE 454M (or concurrent) or EDTE 454S (or concurrent) or EDTE 454T (or concurrent)

EDTE 460E Classroom Management and Communication Elem credit(s): 3

Teacher candidates are provided with strategies to manage the elementary classroom to create a motivated classroom climate, to communicate with teacher candidates, parents, school, and community agencies, and to deal effectively with problem situations, management, instructional approaches, and corrective measures. Teacher as leader will be the primary metaphor which requires candidates to investigate the role of power and communication in teaching.

Prerequisite(s): EDTE 221E and EDTE 221L

EDTE 460S Classroom Management Secondary credit(s): 3

Teacher candidates are provided with strategies to manage the secondary classroom, to create a motivated classroom climate, to communicate with student teacher candidates, parents, school, and community agencies, and to deal effectively with problem situations, management, instructional approaches, and corrective measures. Teacher as leader will be the primary metaphor which requires candidates to investigate the role of power and communication in teaching.

Corequisite(s): EDTE 454L

Prerequisite(s): EDTE 221S and EDTE 221L and EDTE 241

EDTE 461 Reading Diagnosis credit(s): 3

This course provides teacher candidates with the in-depth knowledge and skills to identify and diagnose reading strengths and deficiencies of K-12 students. Appropriate instructional strategies for remediation and extension are developed. This class incorporates field experience components. Spring only.

EDTE 462 Child and Adolescent Literature credit(s): 3

This course surveys classical and contemporary literary works for children and youth, preschool-early adolescent. Assessment and teaching strategies for the utilization of literature across the K-12 curriculum are presented. Fall only.

EDTE 464 Practicum-Reading credit(s): 1

This course creates and applies literacy instruction assessment strategies in a K-12 classroom setting. A school location is arranged. Practicum requires completion of a form, and department permission and cannot be registered for via Zagweb. 1 credit = 30 contact hours.

EDTE 466 Literacy for English Lang Learner credit(s): 3

This course provides literacy knowledge related to working with English Language Learners. Teacher candidates will create classroom materials for K-12 learners to support their literacy and language development. Students will develop knowledge translated into practical application through the creation of lesson plans, instructional materials and tutoring.

EDTE 469 The Five Themes of Geography credit(s): 3

This course is an introduction to the five themes of geography, location, place, human environment interaction, movement, regions. This course fulfills the geography requirement for a Social Studies endorsement. Spring only.

EDTE 490 Directed Reading credit(s): 1-4

Course repeatable for 9 credit(s).

Directed Reading requires completion of a form, and Department permission.

EDTE 491 Directed Study credit(s): 1-3

Course repeatable for 9 credit(s).

Individualized study that is designed by the professor. Student teacher candidates follow a prescribed course outline.

EDTE 492 Independent Study credit(s): 1-4

Course repeatable for 9 credit(s).

Individualized study that is designed by the student teacher candidate in consultation with the professor. Self-directed learning in a selected area of interest is the process employed.

Professor serves as resource.

EDTE 494 Special Project credit(s): 1-6

Course repeatable 2 time.

Individualized study that is project-based. The study results in a practical application of educational theory. The project or a written report of the project is submitted to the professor for evaluation.

EDTE 495 Student Teaching Prof Seminar credit(s): 2

Corequisite(s): EDSE 450

Prerequisite(s): EDTE 496E (or concurrent) or EDTE 496S (or concurrent)

EDTE 496E Elementary Student Teaching credit(s): 12

This is a culminating 16 week capstone experience in which the teacher candidate assumes the full responsibility of an elementary teacher under the direction of a University supervisor and a co-operating teacher. Seminars are provided for student interaction, problem solving, certification requirements, and informational support. Current fingerprint clearance from the WSP and FBI throughout the semester and Pre-Residency Clearance is on file.

Corequisite(s): EDSE 450, **Corequisite(s):** EDTE 495

Teaching to English to Speakers of Other Languages

MTSL 200 Language, Society, and Power credit(s): 3

This course introduces students to foundational concepts in linguistics, with particular emphasis on how language, culture, and society intersect and how linguistic choices reinforce or undermine power relations in society. Students will develop and understanding of what constitutes language and how languages create and maintain identities within communities.

Equivalent(s): EDTE 200

MTSL 202 Community and Ethnography credit(s): 3

Using a variety of frameworks and tools, students will investigate the language and culture of carefully selected communities. Students will learn how to describe events without interpretation and work collaboratively to formulate possible hypotheses about cultures.

Equivalent(s): EDTE 202

Prerequisite(s): EDTE 200 or MTSL 200

MTSL 204 Community Languages and Language Acquisition credit(s): 3

This course is an introduction to first and additional language acquisition through the lens of an introductory course in two of the languages and writing systems used in the Spokane region. The purpose of the course is to introduce students to the languages and cultures of minority groups and to explore the ways in which the worldviews of these groups differ from those of the

dominant culture. The course will also introduce students to the principal theories of first and second language acquisition.

Equivalent(s): EDTE 204

Prerequisite(s): EDTE 200 or MTSL 200

MTSL 304 Immigrant and Refugee Perspective credit(s): 3

Course repeatable for 6 credit(s).

Designed for students interested in sociocultural perspectives on identity and language and their intersection in diverse cultural communities, this course looks at the experience of immigrant populations in the USA and in the Spokane area, through the lens of their cultural and linguistic adjustment. An average of one hour of service per week is expected of all participants in this course.

Fulfills the following degree requirement(s): Core: Global Studies

MTSL 401 Theory and Practice of Lang Teaching credit(s): 3

This course investigates current theories in second language acquisition and ESL/EFL methodology. Students learn how to apply these methods to the specific needs of language learners while observing, assisting and teaching. The summer offering is an intensive 4 week course where students apply specific methods during a TESOL Field Experience co-requisite course (MTSL 480).

MTSL 404 Introduction to Sociolinguistics credit(s): 3

This course will examine how communication in ESL education shape relationships with non-members and members of a community. In particular, it will examine how the control of communication in bilingual and ESL education affects cognitive, social-cultural, affective, and linguistic development in bilingual and ESL classrooms. Theories studied in this course will help build an understanding of how to observe and analyze the effects of communication patterns on learning opportunities for ESL students.

MTSL 408 Principle of Sec Lang Acquisition credit(s): 3-4

This course will investigate some of the major theoretical concepts that have developed in the field of second language learning and teaching with emphases on the concepts of interaction, learner strategies, routines, negotiating meaning, motivation and developmental processes within sociocultural contexts.

MTSL 414 Literacy and English Lang Learner credit(s): 3

This course will involve discussion and review of relevant research in second-language reading and writing. It also includes a critical investigation of research to implementation in the language classroom.

MTSL 450 Language Awareness credit(s): 1

This course will cover the basics of syntax along with the common metalanguage that enables teachers to talk about grammar, as well as broader issues of language structure in general.

MTSL 480 TESOL Field Experience credit(s): 1

Course repeatable for 15 credit(s).

An integral feature of the Theory and Practice of Language Teaching course (MTSL 401) is the TESOL Field Experience which provides a unique opportunity for its participants to work with ESL students of various ages, nationalities, and proficiency levels. Included in this enhanced hands-on experience are opportunities for observation, teaching, and participation in social activities with ESL students.

Corequisite(s): MTSL 401

MTSL 490 Independent Study credit(s): 1-6

Course repeatable for 12 credit(s).

School of Engineering and Applied Science

Dean: Karlene A. Hoo

Associate Dean: TBD

Engineering is the profession in which a knowledge of natural sciences and mathematics is applied with judgment to develop ways to utilize, economically, sustainably, and with concern for the environment and society, the materials and forces of nature for the benefit of humankind. Engineers and scientists pursue a common goal of introducing new knowledge through research. The new knowledge is applied by the engineers to create new devices and systems. Engineers enjoy a unique professional satisfaction: they can usually point to tangible evidence of their efforts. For example, every bridge, skyscraper, television set, computer, robot, airplane, power plant, or automobile is a lasting testimonial to the engineers responsible for it.

It is difficult, maybe impossible, to imagine contemporary civilization without computing machines and the software that brings them to life. The Department of Computer Science trains students to meet the expanding quantitative needs of society and provides them with the theoretical structures from which practical applications derive. Majors in this department are well-prepared for positions in industry and government demanding quantitative techniques or computer science, and for graduate work.

The over-arching goal of the undergraduate programs in the School of Engineering and Applied Science (SEAS) at Gonzaga University is to provide an education that prepares the student with a baccalaureate degree to be a professional engineer or computer scientist. In addition, the programs provide a base both for graduate study and for lifelong learning in support of evolving career objectives, which include being informed, effective, and responsible participants in the profession and society. It is also an education that is designed to challenge the intellect of the student and help him/her learn the value and reward of analytical and logical thinking.

All departments within the School therefore share a common mission of equipping graduates to enter professional practice. This is summarized by our School's Mission Statement:

The School of Engineering and Applied Science at Gonzaga University produces broadly educated and capable engineers and computer scientists ready to contribute innovative solutions for a better world.

This statement is consistent with the University's mission and specifically implements the following section of that mission statement:

- Gonzaga models and expects excellence in academic and professional pursuits and intentionally develops the whole person: intellectually, spiritually, physically, and emotionally
- Through engagement with knowledge, wisdom, and questions informed by classical and contemporary perspectives, Gonzaga cultivates in its students the capacities and dispositions for reflective and critical thought, lifelong learning, spiritual growth, ethical discernment, creativity, and innovation.

In both Engineering and Computer Science

- Develop engineered solutions that are well conceived and carefully implemented to meet public and private sector needs.
- Contribute effectively to organizations as leaders and / or as team members.
- Foster personal and organizational success in a dynamic globalized professional environment.
- Improve society by applying Jesuit, humanistic values to their professional and civic responsibilities.

Additional objectives identified with the Computer Science program

- Earn advanced degrees in computer science or professional credentials.
- Contribute to the development of the next generation of information technology either through research or through practice in a corporate setting.
- Bring a critical intelligence, formed through the University's commitment to liberal humanistic learning, to the development of information technology.

A concerned and well-trained faculty, easy access to faculty outside the classroom, and modern facilities provide Gonzaga University students with the knowledge and skills to become productive engineers or computer scientists and to assume leadership roles in business, industry, and government. A

unique feature of the program is the strong emphasis on liberal arts education. A strong and rigorous technical curriculum combined with a broad liberal arts education emphasizing communication skills, critical thinking, and ethics enables Gonzaga graduates to adapt to an ever-changing computing, engineering, social, political, and business environment.

Degree Programs and Accreditation

SEAS offers four-year Bachelor of Science degrees in Civil Engineering (BSCE), Computer Engineering (BSCpE), Electrical Engineering (BSEE), Engineering Management (BSEM), Mechanical Engineering (BSME), and Computer Science (BSCS). The Civil, Computer, Electrical, Mechanical, and Engineering Management degree programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. The Computer Science degree program is accredited through the Computing Accreditation Commission of ABET.

Center for Engineering Design and Entrepreneurship

Engineering and computer science are rapidly changing professions. The fast pace of technological advances and new approaches to organizing the work place are requiring engineers and software developers to continually update their training. In addition to having a broad range of technical knowledge, today's engineers and software developers are expected to possess excellent interpersonal skills. They must be able to deal with open-ended design problems, to work cooperatively in a team environment, to communicate effectively, and to understand the technical, economic, environmental, and managerial aspects of projects.

The diverse skills required of modern engineers and software developers cannot be learned solely in a classroom or from a textbook. These skills are best learned through a combination of observation, emulation, analysis, and experimentation. This demands a high degree of interaction between the student and experienced engineers and computer scientists. Interpersonal skills are best developed through team work. Industry has discovered that the give-and-take process that characterizes a well-motivated team is a key element to a project's success.

The Center for Engineering Design and Entrepreneurship enhances the experience of students in the engineering and computer science programs at Gonzaga University by promoting interaction between the industrial and academic communities. Student teams, under the guidance of industry engineers and GU faculty, undertake design projects defined by sponsors in both the private and public sectors, or through proposals submitted by student teams. A project team typically consists of three to five students, often from different fields of study in the School of Engineering and Applied Science. Team members must make effective use of available resources to perform and manage the project activities. By working on a real-world problem, each student has the opportunity to make decisions under risk, to work as part of a team, and to interact with professionals in the private and public sectors. Further, working on technical projects that have real value to business, non-profits, and the government, encourages students to acquire new skills.

Gonzaga faculty members, who advise the student teams, are ideally suited as advisors. A faculty advisor lends knowledge and experience to the project team by guiding and counseling the students in the technical and managerial decisions required by the project.

A liaison from the sponsoring organization provides technical direction and advice to the student team, monitors the project's progress, and ensures that the project meets the needs of the sponsor. The liaison also assists the team in making the best use of the sponsor's resources and facilities.

Design projects related to all the SEAS disciplines are sought throughout the year. Sponsors who are supportive of SEAS education provide ideas, resources, and funds for projects. By identifying project topics and the technical areas that are of interest to them, they help direct students to realistic problems that are important to their operations.

At the end of the spring semester, student design teams present their projects and reports, and demonstrate models and prototypes. Industrial sponsors, faculty members, prospective students, and members of the community are invited to attend the event and to interact with the project teams.

Degree requirements for the School of Engineering & Applied Science

In addition to the general [degree requirements](#) of the University, including the University Core Curriculum (see below for engineering-specific adaptations to

the core), students earning all Bachelor's degrees offered by the School of Engineering and Applied Science must complete the following requirements:

1. For engineering programs, completion of the following courses: MATH 258, 259, 260, PHYS 103/103L, and CHEM 101/101L. For computer science majors, please see the program description below.
2. Completion of certain program specific requirements.
3. Attainment of an average cumulative grade point of 2.00 in all SEAS course work taken at Gonzaga University

Please note: Every degree requires a minimum of 128 completed semester credits. No core, major, minor, or concentration courses may be taken under the Pass/Fail option.

The University Core for SEAS Engineering Majors

SEAS engineering majors will fulfill the requirements of the University Core through a combination of courses within the regular University Core curriculum combined with specific courses within Engineering. The engineering-specific substitutions for University Core courses are:

- First-Year Seminar: Fulfilled through ENSC 191
- Writing: Fulfilled through ENSC 191 & 192
- Fine Arts & Design: Fulfilled through ENSC 491 & 492

Additionally, engineering majors will be required to complete two of the following three core broadening courses: History, Literature, and/or Social & Behavioral Science. That is, one core broadening course will be waived. Students who enter with Advanced Placement (AP) or other college credits are strongly encouraged to complete all core broadening requirements.

Please note: Other than the waiver of one core broadening course (i.e., History, Literature, or Social & Behavioral Science), no other core *course* requirements will be waived.

SEAS computer science majors will complete the regular University Core.

Transfer students should consult the General Degree Requirements and Procedures section of this catalog for possible modifications to the Core requirements. Substitutions for discontinued courses are required and must be authorized by the proper University authorities.

Prerequisite to co-requisite override

If a student requires a class in which a prerequisite has been completed but failed, a prerequisite waiver may be available. The requirements for the waiver include:

1. The student must have completed all of the course work for the prerequisite class (yet received an F grade);
2. The prerequisite class is offered in the same semester as the required subsequent class;
3. The student must pass an exam that tests the concepts from the prerequisite class that are required in the subsequent class (this exam is administered by the faculty teaching the subsequent class, and will be completed before the semester in which the subsequent class begins).

If items [1] through [3] are completed, and there is approval from both the Department Chair and Dean, both the prerequisite class and subsequent class may be taken as co-requisites in the same semester. Note that if approved, the prerequisite class cannot be dropped unless the subsequent class is also dropped.

Civil engineers are problem solvers who utilize sophisticated technologies to find safe and sustainable solutions to a wide variety of the challenges facing our world. A civil engineer plans, designs and supervises construction of numerous infrastructure facilities required by modern society. These facilities exist in both the public and private sectors, and vary in scope and size. Examples of civil engineering projects include bridges, roadways, buildings, transportation systems, irrigation water supply and treatment systems, wastewater collection and treatment systems, flood control and river restoration facilities, solid and hazardous waste management, and environmental restoration. Civil engineers have important roles in analysis, design, management, regulatory enforcement, and policy development. To participate effectively in this broad scope of activities, civil engineers acquire technical and problem solving skills, and the ability to communicate clearly and effectively. Students completing the requirements for a degree in civil engineering have a choice of technical electives from six areas: Environmental Engineering, Geotechnical Engineering, Structural Engineering, Transportation Engineering, Water Resources Engineering and Construction.

The department of Civil Engineering, in conjunction with its various constituencies, has clearly defined program objectives. These engineering program objectives are listed in the School of Engineering and Applied Science section of this catalog, and by the Gonzaga University Mission Statement that may be found at the beginning of the catalog.

The BS in Civil Engineering (BSCE) is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Technical Electives

Courses from the following list satisfy the technical elective requirements. Students work with their faculty advisor to select five technical elective courses to create a specialized plan of study that can be highly specialized or with a broad focus among the civil engineering sub-disciplines: environmental engineering (E), geotechnical engineering (G), structural engineering (S), Transportation (T), and water resources engineering (W).

Typically Offered in Fall

CENG 411 Steel Design (S)
CENG 418 Transportation Systems Design (T)
CENG 420 Structural Dynamics (S)
CENG 421 Stormwater Management (W, E)
CENG 424 Water Treatment Processes (E)
CENG 426 Stream Restoration (W, E)
CENG 473 Foundations Design (G, S)

Typically Offered in Spring

CENG 422 Structural Analysis II (S)

CENG 440 Gonzaga in Delft: Sustainable Cities (E)

Typically Offered Even-Number Summers

CENG 440 Gonzaga in Delft: Sustainable Cities (E,S,T,W) 3-week study abroad course in the Netherlands

Restriction(s):

Must be in the following Major(s): Civil Engineering

Corequisite(s): CENG 303L**Prerequisite(s):** CHEM 101 or TRAN GCHM, minimum grade: T or TRAN GCHM**CENG 303L Environmental Engineering Lab credit(s): 1**

This course emphasizes fundamental environmental chemistry principles and analytical techniques used to study air and water quality and treatment process performance. The course also emphasizes statistical analysis, data interpretation, and reporting requirements associated with environmental engineering. CENG 303 is a co-requisite or pre-requisite for this course.

Corequisite(s): CENG 303**Restriction(s):**

Must be in the following Major(s): Civil Engineering

CENG 318 Transportation Engineering credit(s): 3

The course will cover general knowledge in all the transportation fields including; traffic characteristics and flow theory. transportation planning. geometric design of highways, traffic safety, highway materials, and pavement design.

Prerequisite(s): CENG 261**CENG 331 Soil Mechanics credit(s): 3**

In this course the properties and behavior of soils (sand, gravel, silt and clay) are studied under various environmental conditions. The study includes weight-volume relations, soil classifications, soil compaction, seepage through porous media, normal effective stress concept, consolidation, shear strength, lateral pressures and slope stability. Laboratory and Field methods for evaluating pertinent properties, generally used for analysis and foundation design. Three hours of lecture and three hours of laboratory per week. Fall.

Prerequisite(s): ENSC 301**CENG 331L Soil Mechanics Lab credit(s): 1**

Three hours of laboratory per week.

Corequisite(s): CENG 331**CENG 351 Engineering Hydrology credit(s): 3**

This course will form a foundation for the study of the occurrence, distribution, and movement of water on, in, and above the earth. Topics covered include: watersheds, precipitation, evaporation, infiltration, discharge calculations, hydrographs, river and reservoir routing, and drainage design including sanitary and storm sewer design and reservoir sizing. Statistical tools dealing with information in water resources, frequency analysis, confidence intervals for prediction, and risk. Applications to common engineering projects in surface and sub-surface situations are presented. Includes computer applications. Fall.

Prerequisite(s): ENSC 352 or CENG 252**CENG 352 Hydraulic Engineering credit(s): 3**

Use of fluid mechanics in the engineering analysis and design of components of hydraulic and water resources systems. Topics covered include: closed conduit flow; pump selection and cavitation; steady, uniform, and gradually varied flow of water in open channels with immobile boundaries and through bridges and culverts; specific energy and transitions; stable channel design; and design hydraulic/stormwater structures. Includes problem solving, a design project, and computer applications. The associated lab course (CENG352L) stresses a variety of practical applications in the hydraulics laboratory including: measuring pipe friction' analyzing pipe networks; developing pump curves and observing cavitation; measuring energy and roughness in uniform open channel flow; analyzing hydraulic jumps; applying hydraulic modeling to culvert design; Civil 3D

applications in stormwater and/or sanitary sewer design; and the development and implementation of a student derived investigation.

Corequisite(s): CENG 352L

Prerequisite(s): ENSC 352 or CENG 252

CENG 352L Hydraulic Engineer Lab

credit(s): 1

see CENG 352.

Corequisite(s): CENG 352

CENG 391 Civil Engineering Design and Practice

credit(s): 3

An integration of topics essential to the practice of civil engineering, including: 1) engineering economics concepts; 2) project management approaches; 3) contract issues and project structures, and 4) general code of conduct of engineers and ethics. Engineering economy topics will include annual cost, present worth, future worth, and rate of return concepts. Students will develop an understanding of the elements of proposals, reports, construction drawings, and specifications. Engineering law, in the context of civil engineering project will be included to further illustrate the four main topics. Spring.

Restriction(s):

Must be the following Class(es): Junior, Senior

CENG 404 Sustainable Systems and Design

credit(s): 3

This course explores the characteristics of sustainable systems and how design practices may encourage sustainability. Topics covered in the course will be selected for applicability to specific regions of the world and may change each year. Basic concepts include: building thermal performance, indoor and outdoor environmental quality, passive and active energy systems, water reclamation strategies, life cycle analysis and current sustainable building rating systems. Sustainable design concepts and methods are also applied to building design site development and infrastructure use.

Prerequisite(s): CENG 391

CENG 411 Steel Design

credit(s): 3

Application of basic principles of mechanics applied to the design of steel members. Design of structural members and connections using the current American Institute of Steel Construction specifications. Load and Resistance Factor Design and Allowable Stress Design procedures. Fall.

Prerequisite(s): CENG 301

Fulfills the following degree requirement(s): CENG - Tech Elective

CENG 412 Concrete Design

credit(s): 3

Theory and application of analytical procedures applied to the design of reinforced concrete structural members. Proportioning of beams, columns, footings, and walls in concrete structures is approached using current American Concrete Institute code specifications. Ultimate Strength Design Procedures. Spring.

Prerequisite(s): CENG 301

CENG 414 Waste Management

credit(s): 3

An overview of solid, hazardous, and industrial waste management. Topics include regulations, contaminant transport, waste sources, waste minimization, recycling, treatment and remediation technologies, landfill design and risk assessment.

Fulfills the following degree requirement(s): CENG - Tech Elective

Prerequisite(s): CENG 303

remote communities.

Fulfills the following degree requirement(s): CENG - Tech Elective

Prerequisite(s): CENG 303

CENG 426 Stream Restoration credit(s): 3

Course presents fundamentals of stream restoration: Hydrologic, sediment transport, geomorphic, and ecological principles applicable to (1) assessment of stream channel condition, (2) developing approaches to stream management and restoration, and (3) evaluating project performance. Approach emphasizes the inter-related nature of hydrology, hydraulics, sediment transport, geomorphology, fisheries, and aquatic and riparian ecology. Provides students opportunities to literally get their feet wet while making various observations and measurements in field exercises to evaluate physical and ecological stream characteristics assess stream stability.

Fulfills the following degree requirement(s): CENG - Tech Elective

Prerequisite(s): CENG 351 and CENG 352

CENG 427 Infrastructure Design credit(s): 3

Design and construction supervision of the infrastructure required for land development. Topics include roadway geometry, water supply pipelines, sewer pipelines, and storm water drainage. Students will prepare design drawings, project plans, project reports, project specifications, and construction cost estimates that address regulatory requirements.

Fulfills the following degree requirement(s): CENG - Tech Elective

Prerequisite(s): CENG 318 and CENG 352

CENG 428 Urban Design and Development credit(s): 3

This course introduces civil engineering students to fundamental concepts of urban design and development, and prepares them with essentials tools, techniques, and strategies to engage in the urban design process.

Fulfills the following degree requirement(s): CENG - Tech Elective

Restriction(s):

Must be in the following Major(s): Civil Engineering

Prerequisite(s): CENG 261

CENG 432 Hazard Mitigation credit(s): 3

Quantitative Risk Analysis provides engineers with a basis to improve decisions for design and operation of complex projects by incorporating effects of uncertainty. Applications to a variety of engineering problems.

Fulfills the following degree requirement(s): CENG - Tech Elective

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): MATH 321

CENG 440 GU-in-Delft:Sustainable Cities credit(s): 4

Covers the design of urban areas to promote sustainable development including the structural, transportation, energy, water, and food production systems. Use of comparative case studies to explore historical and regional differences in cities and their impacts on the environment and resource consumption.

Fulfills the following degree requirement(s): CENG - Tech Elective

CENG 444 Air Pollution credit(s): 3

An introduction to the field of air pollution and its control. Topics include regulations, air pollution sources, health effects, meteorology, and the theory and design of control techniques.

Fulfills the following degree requirement(s): CENG - Tech Elective

Prerequisite(s): CENG 303

CENG 450 Watershed Modeling credit(s): 3

Basic principles of hydrologic modeling are presented and practices. Key topics covered include watershed delineation, land use change impact on runoff, flooding impact, bridge/culvert

Lecturers: J. Crandall, D. Eshner

The Department of Computer Science offers two degrees, a B.S. in Computer Science (BSCS) and a B.A. in Computer Science and Computational Thinking (BACSCT). The department also offers minors and concentrations in Data Science, Software Application Development, and Software Security. The minors are intended for students not in the BSCS or BACSCT programs. The concentrations are intended for students in the BSCS or BACSCT programs. For a description of the BACSCT, see the Undergraduate Catalog entry (College of Arts and Sciences) under “Computer Science and Computational Thinking.”

The B.S. in Computer Science is built on a broad and rigorous foundation of science, mathematics, software engineering, and advanced computer science topics. All students participate in a large software engineering project during their senior years. Each project is completed under the guidance of a faculty advisor and a project sponsor. Advisors are frequently practicing software developers. Project sponsors are often from the computer industry.

Faculty expertise and research interests span a wide range of computer science topics, including networks, machine learning, artificial intelligence, human language processing, computer graphics, database systems, cloud computing, and computer security. Select students can participate in research projects directly with a faculty mentor through independent study courses, a senior thesis, or as a member of a professor’s research group. Students are encouraged to pursue summer research or industry-sponsored internships. Many Computer Science students secure summer research funding through the National Science Foundation’s Research Experience for Undergraduates program. Others intern in the computer industry, some with companies that regularly work with the Department of Computer Science.

The department offers several laboratories and servers, including two general purpose computing labs, a lab for group projects, and two high-performance computing labs. The department sponsors several student organizations,

including the Women in Computing club, the GU Makers and Developers club, and a chapter of Upsilon Pi Epsilon, the international honor society for computer science and related disciplines. The department also sponsors teams that compete in the annual Association for Computing Machinery's Student Programming contest. Many Computer Science students are active in the GU Robotics club.

Computer Science majors can graduate with departmental honors if they have fulfilled all computer science degree requirements, achieved a grade point average of at least 3.50 in their CPSC courses needed for a major in Computer Science, written a senior thesis under the supervision of a Computer Science faculty member, and successfully completed CPSC 495 and 496.

The BS in Computer Science (BSCS) is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

The Department of Computer Science offers three concentrations listed below:

- Software Security
- Data Science
- Software Application Development

These concentrations are for students majoring in either the BSCS or the BACSCT degrees. A student majoring in one of these programs may pursue any of the three concentrations listed as they are not eligible for a minor in these three areas. The concentration course requirements are identical regardless of the degree a student is seeking.

Courses:

CPSC 105 Great Ideas in Comp Science credit(s): 3

Computer science is the study of what is computable. Students will be introduced to computing technologies and learn how these technologies are applied in today's world. The course will focus on the relationship between computation, technology, and society. Topics could include robotics, artificial intelligence, bio-computing, media computing, technology from the movies, and technology and art. On sufficient demand.

CPSC 107 User Centered Web Site Design credit(s): 3

Introduction to quality design principles and user-centered development techniques used in creating a web site. Topics will include human-computer interaction, graphical design, prototyping, and introduction to web programming. On sufficient demand.

CPSC 110 Special Topics for Non Majors credit(s): 1-3

Course repeatable for 9 credit(s).

Computer Science topics of special interest to students majoring in other disciplines. Sample topics include principles of programming, web programming, and media computing. May not be counted towards a major in Computer Science. On sufficient demand.

Restriction(s):

Must not be in the following Major(s): Comp Sci & Computation Think, Computer Science

CPSC 121 Computer Science I credit(s): 3
Techniques of problem-solving and algorithmic development. An introduction to programming. Emphasis is on how to design, code, debug, and document programs using good programming style. Fall and Spring.

CPSC 122 Computer Science II credit(s): 3
A continuation of CPSC 121. An examination of dynamic memory management and recursion; an introduction to basic data structures and algorithmic analysis. Fall and Spring.

Prerequisite(s): CPSC 121

CPSC 211 Algorithmic Art credit(s): 3
Algorithmic Art sits at the intersection of mathematics, programming, algorithms, and art. The primary goal of the course is to teach computational thinking to liberal arts students. Student motivation is achieved by presenting programming and math concepts in the context of the visual arts. The assignments use the programming environment called Processing which was developed specifically for visual artists. Fall.

Equivalent(s): ITEC 211

Restriction(s):

Must be the following Class(es): Freshman, Sophomore

CPSC 212 Computational Modeling credit(s): 3
This course introduces students to the modeling process and computer simulations. It considers two major approaches: system dynamics models and agent-based models. A variety of software tools will be explored. Applications will be chosen from ecology, medicine, chemistry, biology, and others. Spring.

Equivalent(s): ITEC 212

Restriction(s):

Must be the following Class(es): Freshman, Sophomore

CPSC 213 Special Topics credit(s): 3
Topic to be determined by instructor.

CPSC 214 Special Topics credit(s): 3
Topic to be determined by instructor.

CPSC 215 Special Topics credit(s): 3

CPSC 222 Introduction to Data Science credit(s): 3
This course provides an introduction to the underlying ideas, concepts, and techniques used in data science. Students gain skills in statistical and computational thinking, and their practical application to real-world, data-driven problem solving and decision making. The course teaches important concepts and skills in both statistical reasoning and computer programming for the purpose of analyzing real-world data sets. Examples are drawn from diverse areas such as economics, social science, health and wellness, climate science, and education. Students gain experience using the Python programming language, Python's standard libraries for data science applications and computational notebooks (e.g., using Jupyter). The course also raises important social questions concerning privacy, social inequality, and professional ethics related to data science and its applications.

Restriction(s):

Must be the following Class(es): Freshman, Sophomore

CPSC 223 Algorithm and Abstract Data Structure credit(s): 3
Algorithm analysis using Big-O notation, sorting, heaps, balanced binary search trees, and hash tables. MATH 231 is a co-requisite or pre-requisite for this course. Fall and Spring.

Prerequisite(s): CPSC 122 and MATH 231 (or concurrent) and MATH 231 (or concurrent)

CPSC 224 Software Development credit(s): 3
This course covers topics in object-oriented programming, user-interface design and development, and software construction including program design, development tools, and

basic concepts in software engineering. Students work on hands-on development assignments and projects throughout the semester. Fall and Spring.

Prerequisite(s): CPSC 122

CPSC 260 Computer Organization credit(s): 3

This course covers basic topics in the design of modern computer systems. Topics include digital logic, computer system components, machine-level code, memory organization and management, computer arithmetic, assembly-language programming, and basic connections between high-level and low-level languages (C and assembly). This course also serves as a foundation for courses on networking, security, operating systems, and computer architecture, where a deeper understanding of systems-level issues is required. Fall and Spring.

**** Students who have taken and received credit for CPEN 231 may not also receive credit for CPSC 260. *****

Prerequisite(s): CPSC 122

CPSC 290 Directed Reading credit(s): 0-3

Individual exploration of a topic not normally covered in the curriculum.

CPSC 310 Special Topics credit(s): 3

Topics that reflect the current interests and expertise of the faculty. On sufficient demand.

Prerequisite(s): CPSC 122

CPSC 311 Special Topics credit(s): 3

Topics that reflect the current interests and expertise of the faculty. On sufficient demand.

Prerequisite(s): CPSC 122

CPSC 312 Special Topics credit(s): 3

Topics that reflect the current interests and expertise of the faculty. On sufficient demand.

Prerequisite(s): CPSC 122

CPSC 313 Special Topics credit(s): 3

Topics that reflect the current interests and expertise of the faculty. On sufficient demand.

Prerequisite(s): CPSC 122

CPSC 314 Special Topics credit(s): 3

Topics that reflect the current interests and expertise of the faculty. On sufficient demand.

Prerequisite(s): CPSC 122

CPSC 315 Special Topics credit(s): 1-3

Course repeatable for 9 credit(s).

Topics that reflect the current interests and expertise of the faculty. On sufficient demand.

Prerequisite(s): CPSC 122

CPSC 321 Database Management Systems credit(s): 3

Introduction to relational database concepts and techniques. Topics include the relational model, database design, SQL, transactions, file and index organization, and using databases within software applications, Fall.

Fulfills the following degree requirement(s): CPEN - Tech Elective

Equivalent(s): CPSC 421

Prerequisite(s): CPSC 122 or CPSC 222

CPSC 322 Data Science Algorithms credit(s): 3

This course provides a detailed overview of the processes and techniques used in creating data science applications. Emphasis is placed on popular algorithms for the analysis, classification, and mining of relational data. Students learn to implement data science algorithms and techniques over real-world data sets through assignments and projects in Python. Topics include data preparation and cleaning, summary statistics, basic data visualization techniques, feature selection, discretization, k nearest neighbors, naive bayes, decision trees, ensemble methods, apriori rule mining, and k-means clustering. On sufficient demand.

Prerequisite(s): CPSC 122 or CPSC 222

CPSC 455 Chaos and Dynamical Systems credit(s): 3

Introduction to the study of discrete nonlinear dynamical systems and their chaotic behavior. The course will focus on investigations through computer experiments- both numerical and graphical- and the corresponding mathematical analysis of the observed behavior. A significant portion of the course will be devoted to designing graphics programs. In the humanistic tradition of Gonzaga, students will also learn the historical development of the modern science of chaotic dynamical systems. On sufficient demand.

Prerequisite(s): CPSC 122(and MATH 231 or MATH 301)

CPSC 475 Speech and Natural Language Processing credit(s): 3

Computational approaches to language processing: text normalization, N-grams, sentiment classification, part-of-speech tagging, parsing, semantic analysis, and applied phonetics. Fall, even years.

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): CPSC 223 or CPSC 322

CPSC 490 Directed Reading credit(s): 1-3

Individual exploration of a topic not normally covered in the curriculum. Arrangement with an instructor.

Restriction(s):

Must be the following Class(es): Senior

CPSC 491 Software Engineering credit(s): 2

A survey of approaches used in software engineering focusing on software development processes, requirements engineering, estimation, scheduling, risk analysis, testing, version control, and project management. Students apply the techniques and practices learned in their senior design projects, including the development of a detailed project plan and a functional software prototype. Fall.

Fulfills the following degree requirement(s): Core: Writing Enriched

Corequisite(s): CPSC 491L, **Corequisite(s):** CPSC 499

Restriction(s):

Must not be in the following Major(s): Must be in the following Major(s): Comp Sci & Computation Think, Computer Science

Must be the following Class(es): Senior

Prerequisite(s): CPSC 223 and CPSC 224

CPSC 491L Senior Design Project Lab I credit(s): 1

First semester of a two semester senior design project in which students work in teams to develop a large software product. Teams meet weekly with their faculty project advisors. Fall.

Fulfills the following degree requirement(s): Core: Writing Enriched

Corequisite(s): CPSC 491, **Corequisite(s):** CPSC 499

Restriction(s):

CPSC 492L Senior Design Project Lab II credit(s): 3

Second semester of a two semester senior design project in which students work in teams to develop a large software product. Teams meet weekly with their faculty project advisors. Spring.

Restriction(s):

Must be in the following Major(s): Comp Sci & Computation Think, Computer Science

Must be the following Class(es): Senior

Prerequisite(s): CPSC 491 and CPSC 491L

CPSC 495 Thesis I **credit(s): 1**
First of a two semester senior thesis project. Requires arrangement with a faculty supervisor.

Restriction(s):

Must be in the following Major(s): Computer Science

Must be the following Class(es): Senior

CPSC 496 Thesis II **credit(s): 1**
Second of a two semester senior thesis project. Requires arrangement with a faculty supervisor.

Electrical Engineering and Computer Engineering

Chairperson: Vladimir Labay

Professors: G. Allwine (Emeritus), R. Birgenheier (Emeritus), G. Braileanu (Emeritus), Y. Ji, V.A. Labay, S. Schennum, C. Talarico, C. Tavora (Emeritus)

Associate Professor: J. Tadrous

Assistant Professor: M. Zhang

Lecturer: R. Cox

The purpose of the electrical engineering (EE) and computer engineering (CpE) programs is to develop knowledgeable and competent engineering professionals who exemplify the humanistic, Catholic, and Jesuit tradition of education, and who are committed to social justice, service to others, life-long learning, ethical and moral responsibility, and concern for the environment. The integration of the Gonzaga University core curriculum as an essential part of the EE and CpE curricula gives the programs their distinct and desirable characteristics.

Roughly half of the credits in either the EE or the CpE program are devoted to engineering topics and design. Both programs include four technical electives to allow students to pursue specialization in one or more areas of electrical engineering and/or computer engineering. During their final year, students complete a design project, which involves both technical and non-technical aspects of an engineering problem, under faculty supervision. The senior design project culminates in a comprehensive written report and an oral presentation.

Career Opportunities

Graduates of our EE and CpE programs are well prepared to embark on careers in electrical engineering or computer engineering, or to further their education at graduate schools of their choice. Our graduates find employment with a broad segment of industry, as well as with governmental agencies. Employment opportunities include the design of electronic products, design of electrical systems, development of computer, hardware, software/firmware, computer applications, research and development, engineering consulting,

electrical utilities, manufacturing, marketing, operations and maintenance, administration, and teaching. Moreover, electrical and computer engineers traditionally engage in interdisciplinary fields, such as aerospace engineering, national defense systems, global communication systems, biomedical engineering, instrumentation, transportation systems, energy conversion, robotics, and industrial automation. Many of our graduates have distinguished themselves at some of the best graduate schools in the USA. Moreover, a substantial number of our graduates have achieved high positions in academia, business, and government.

Electrical Engineering

Electrical engineering is the profession that applies mathematics, the basic sciences, technology, and problem-solving skills to the design, construction, operation, and maintenance of electrical and electronic products, equipment, services, and information systems. Electrical engineers find innovative ways to use electricity, information, computers, and electronics to make people's lives better. Traditionally, electrical engineering involves the areas of communication systems, computer systems, control systems, electric power systems, electronics, and signal processing.

Communication systems process and transfer information from one point to another. This information includes audio and video data, as well as digital data used in computers. Computer systems includes computer design, as well as the areas of hardware and software used to control processes and equipment. Control systems use electronic circuits to regulate processes to meet specific objectives and requirements. Electric power systems generate, transmit, and distribute electricity to residential, commercial, and industrial establishments. Electronics engineers design and develop devices, components, and circuits that are used in computers, appliances, automobiles, and countless other areas. Signal processing systems transform electrical and electromagnetic signals to more usable form in such applications as computerized tomography (CT) scan and magnetic resonance imaging (MRI).

The department of Electrical and Computer Engineering, in conjunction with its various constituencies, has clearly defined program objectives. These engineering program objectives are listed in the School of Engineering and Applied Science section of this catalog.

The BS in Electrical Engineering (BSEE) is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

- CPSC 423 Object-Oriented Modeling and Design
- CPSC 428 Real-Time Computer Systems Engineering
- CPSC 431 Computer Architecture

Signals and systems; types of signals; properties of systems; convolution integral; Fourier series; Fourier transform and applications; Laplace transform and applications; Sampling Theorem. Four lecture hours per week. EENG 202 and MATH 260 are co-requisites or pre-requisites for this course.

Prerequisite(s): EENG 201 and MATH 260 (or concurrent)

EENG322 Probabilistic Methods Elect Engineering credit(s): 3

Introduction to probability; random variables; multiple random variables; elements of statistics; applications in electrical and computer engineering. Three lecture hours per week.

Prerequisite(s): MATH 258 and EENG 311 (or concurrent)

EENG340 Introduction Electric Power Engineering credit(s): 3

Magnetic circuits; principles of electromechanical energy conversion; transformers; synchronous machines; three-phase induction machines; D.C. machines; transmission lines; power system modeling; power flow analysis. Three lecture hours per week.

Fulfills the following degree requirement(s): CPEN - Tech Elective

Corequisite(s): EENG 340L

Prerequisite(s): EENG 201 and EENG 202 (or concurrent)

EENG340L Introduction Electric Power Engineering Lab credit(s): 1

Three hours of laboratory per week. Taken concurrently with EENG 340.

Fulfills the following degree requirement(s): CPEN - Tech Elective

Corequisite(s): EENG 340

EENG391 Engineering Design credit(s): 1

Preparatory course for EENG 491 Senior Design Project. Fundamentals of the engineering design process fundamentals: project requirements analysis and specification, system design, detailed design, testing and written and oral presentations. Project management: tasks, schedules, budget, critical items and fall back options. Ethics and professionalism. One lecture hour per week.

Restriction(s):

Must be the following Class(es): Junior, Senior

Prerequisite(s): EENG 202 (or concurrent)

EENG401 Lower Power Bioelectronics credit(s): 3

Physics and technology of semiconductor devices; Carrier transport phenomena; p-n junctions; Metal semiconductor junctions; Device operation based on junction physics; Process technologies; Some simulations using modern software. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Equivalent(s): CPEN 401

Prerequisite(s): CPEN 230 and EENG 303

EENG402 Electromagnet Waves and Materials credit(s): 3

Continuation of EENG 301. Time varying fields; electromagnetic waves and transmission lines; metallic waveguides and resonators; principles of photonics; antennas. Three lectures hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective

Prerequisite(s): EENG 301

EENG403 Passive and Active Filter Design credit(s): 3

Properties of network functions; properties and realizations of LC and RC driving point functions; passive realizations of transfer functions; Butterworth, Chebyshev, and Bessel filter approximations; design techniques for low-pass, high-pass, band-pass, and band-elimination filters. Basic building blocks for active filters; direct and cascade realizations approaches. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Prerequisite(s): EENG 311

EENG406 VLSI Circuits and Systems credit(s): 3

Structural design of digital integrated circuits in MOS technology; layout, design rules, fabrication techniques; use of computer automated design and simulation tools, and high-level description language. Three lecture hours per week. EENG 304 is a co-requisite or pre-requisite for this course.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Equivalent(s): CPEN 406

Prerequisite(s): CPEN 230 and EENG 303

EENG410 Information Theory and Coding credit(s): 3

Discussion of the concepts of information transmission theory including entropy, redundancy, the noisy channel model and channel capacity. Basics of source coding including compression limits and Huffman codes. Linear block code discussion involving Hamming distance, error detection/correction capabilities, generator/parity-check matrices, syndromes and error correction. Well-known block codes such as Hamming codes and the Golay code. Basics of finite field algebra and BCH codes including Reed-Solomon codes. Convolutional codes and the Viterbi decoding algorithm. Concatenated codes and the NASA Deep Space Network telemetry system. Fall.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Restriction(s):

Must be the following Class(es): Junior, Senior

EENG411 Introduction to Control Systems credit(s): 3

Analysis and design of linear closed-loop systems; stability; design based on root locus and root contours. A package of computer programs is used for homework and design problems. Three lectures hours per week.

Fulfills the following degree requirement(s): CPEN - Tech Elective

Corequisite(s): EENG 421, **Corequisite(s):** EENG 425

Prerequisite(s): EENG 303 (or concurrent)

EENG412 Digital Control Systems credit(s): 3

Classical and modern control system analysis and design techniques. Sampling; stability; frequency response; root locus; state variables in discrete time; controllability; observability; state variable feedback; pole placement and observers. A package of computer programs is used for homework and a design project. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): MENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Prerequisite(s): EENG 411 or MENG 411

EENG413 Automation credit(s): 2

Use of programmable controllers to automate manufacturing processes and equipment; ladder logic and state based control languages; controller architecture and systems software; structured design using Grafset; interactive graphic operator interface design; safety considerations; sensors and instrumentation; single loop controllers. Two lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Prerequisite(s): CPSC 121(and EENG 311 or MENG 301)

EENG413L Automation Lab credit(s): 1

Three laboratory hours per week. Taken concurrently with EENG 413 (ENSC413).
Fulfills the following degree requirement(s): EENG - Tech Elective

Equivalent(s): ENSC 413L

EENG421 Introduction Communication Systems credit(s): 3

Basic concepts in communication systems: correlation and power spectral density; pulse modulation; amplitude modulation; angle modulation; effects of noise. Three lecture hours per week.

Fulfills the following degree requirement(s): CPEN - Tech Elective

Corequisite(s): EENG 411, **Corequisite(s):** EENG 425

Prerequisite(s): EENG 311 and EENG 322

EENG422 Digital Communication Systems credit(s): 3

Statistical Communications: random processes; formatting and baseband transmissions; bandpass modulation and demodulation; communication link analysis; block and convolutional channel coding; modulation and coding tradeoffs. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Restriction(s):

Must be the following Class(es): Senior

Prerequisite(s): EENG 421

EENG424 Digital Signal Processing credit(s): 3

Discrete Fourier Transform and circular convolution; Fast Fourier Transform; use of windows in spectral estimation; filter approximations; design and realization of IIR and FIR digital filters; effects of finite word size; sampling rate conversion. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Prerequisite(s): EENG 311

EENG425 Communication-Control Lab credit(s): 1

Experimental investigation of concepts and subsystems used in communications and controls. Three hour laboratory per week. Taken concurrently with EENG 411 and EENG 421.

Corequisite(s): EENG 411, **Corequisite(s):** EENG 421

EENG427 Wireless Systems credit(s): 3

Fundamentals of RF stages of modern wireless systems including antennas, propagation, fading, noise, receiver design, modulation methods and bit error rates. Components of wireless systems, including filters, amplifiers, mixers, oscillators, and phase-locked loops. Initial coverage includes transmission lines, S-parameters, impedance matching, and random processes. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective, Fulfills the following degree requirement(s): CPEN - Tech Elective

Prerequisite(s): EENG 202

EENG428 Wireless Systems II credit(s): 3

Advanced topics in modern RF/microwave wireless component design including microstrip transmission lines, filters and amplifiers. Mixer, oscillator and phase-locked loop basics. Digital modulation methods and bit error rates. Introduction to information capacity. Receiver design. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective

Prerequisite(s): EENG 427

EENG441 Analysis of Power Systems credit(s): 3

Per unit system; transmission line parameters; power system models; generators, transformers, lines, loads; power flow problem and solution methods; symmetrical components; symmetrical and unsymmetrical fault analysis; use of computer software package to solve power-flow and short-circuit problems. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective

Prerequisite(s): EENG 340

EENG442 Electric Power Distribution System Engineering credit(s): 3

Distribution system planning; load characteristics; distribution transformer applications; design of sub-transmission lines, substations, primary and secondary distribution systems; voltage regulation; capacitor applications; protection. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective

Prerequisite(s): EENG 340

EENG443 Analysis of Electrical Machines credit(s): 3

D.C. machine dynamics; D.C. motor starters and controllers; synchronous machine steady-state and transient performance; polyphase induction machine dynamics; A.C. motor starters and controllers; transformer applications; fractional horsepower A.C. motors; power electronics. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective

Prerequisite(s): EENG 340

EENG444 Computational Methods for Power System credit(s): 3

Power system matrices; -bus and Z-bus matrices; computer programming considerations: sparsely, triangular factorization; computer solutions of power flow fault circulations; protective relays; protection of generators, transformers, and transmission lines; stability concepts; transient stability, computer simulations. Three lecture hours per week.

Fulfills the following degree requirement(s): EENG - Tech Elective

Restriction(s):

Must be the following Class(es): Senior

Prerequisite(s): EENG 441

EENG481 Special Topics Electrical Engineering credit(s): 1-3

Computer Engineering

Computer Engineering (CpE) combines the disciplines of electrical engineering and computer science. It encompasses computer hardware, software, and systems. The study of computer engineering is not limited to general purpose computers, but also covers embedded computer systems that control a vast multitude of devices and functions from automotive ignitions to cellular phones and various industrial controls, medical instruments, robotics, consumer electronics. Computer hardware design involves logic design, digital electronics, computer architecture, and integrated circuit design. Computer software involves the design of programs in various languages using structured and object-oriented techniques to control devices

and systems. Computer systems involve the combination of hardware, software and operating system that will provide the most effective realization of a system.

Computer engineers are continually developing newer and faster computers, and they find new applications for computers every day to fill the needs of society. The computer engineer must have a broad understanding not only of computer systems, but also of basic engineering fundamentals to apply computer technology to the solution of real engineering problems.

The courses and laboratories offered in the CpE program are organized into the three disciplines of hardware, software, and system design. Technical electives that are chosen from various fields of specialization (e.g., communications, computers, controls, electronics, and power) enable CpE seniors to apply their computer engineering knowledge in selected areas in their professional career.

The department of Electrical and Computer Engineering, in conjunction with its various constituencies, has clearly defined program objectives. These engineering program objectives are listed in the School of Engineering and Applied Science section of this catalog.

The BS in Computer Engineering (BSCpE) is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Engineering Management

Chairperson: Gary R. Weber

Professors: S. Bowers, P. McKenny (Emeritus), P. Nowak, P. Ferro, S. Schennum

The Engineering Management Program was developed to address a growing need for individuals that possess both engineering and management skills. Courses taken in the Engineering Management Program are intended to provide students with a broad understanding of the practice and concepts of engineering, and make them adaptive leaders that are ready to address challenges caused by rapid changes in technology. The program provides graduates an opportunity to select from a wide range of career paths, and sufficient preparation for entry into the M.B.A. Program - which can be completed in an additional calendar year. (See “B.S. in Engineering and M.B.A.” for information.)

The Engineering Management program attracts students whose talents and interests are broader than those required for a traditional engineering design and analysis position, and also those that have yet to decide on a particular field of engineering specialization. The program is especially well suited to the typical engineering student attracted to Gonzaga University since it makes use of engineering and leadership skills they develop at GU, with their interest in helping others and making a valuable contribution to society. By combining a strong engineering background with a General Business Minor from the School of Business Administration, students develop a skill-set that is sought after by employers.

In practice, engineering managers combine management expertise and leadership skills with their engineering background to lead teams in various technical fields. Areas of employment typically include engineering project management and supervision, product development, production planning, engineering design and manufacturing, product quality and reliability, materials management, production processes, inventory management, system analysis, industrial plant management, technical sales and marketing, and a range of other positions in a wide variety of industries. As such, your

Engineering Management degree will provide you with flexibility in terms of future employment opportunities.

Engineers typically work in teams, create innovative devices, and add value to the products we use in everyday life. Many engineers rise to the highest levels in business organizations to become global leaders and innovators, start companies like Boeing, Google, Hewlett Packard, Intel, and Yahoo, or use their engineering training as a springboard to other fields. They succeed in fields as diverse as investment banking, law, and medicine, and also play a leading role in addressing many world problems' including global warming, clean water shortage, power shortages, poverty, nuclear proliferation, and new medical devices and equipment.

Our Engineering Management program provides students with a foundation in the critical skills required to be successful in their chosen career. The program contains a set of common engineering courses that provide a solid basis in engineering principles, augmented by relevant courses on the process of management as it applies to technically-based projects. Students also develop a technical concentration by taking a set of courses from one of five tracks - Civil, Computer, Electrical, and Mechanical Engineering, or Computer Science. Each technical track draws from a wide selection of interests within a particular engineering discipline. Technical proficiency is increased and management skills strengthened by combining qualitative approaches and quantitative techniques in a balanced curriculum. This combination of management and engineering skills is highly sought after by industry today.

Gonzaga's School of Engineering and Applied Science is in a unique position to offer this Engineering Management program. Students receive a wealth of engineering knowledge in small class sizes with caring faculty that possess an array of industrial experience. Graduates from the program will be competent and conversant in the basic scientific and engineering principles, and able to formulate concepts, develop system designs, and apply engineering problem solving skills to their solutions. They will be able to see the "big picture" and interact with other engineers to develop practical, technologically achievable solutions within the constraints of time, cost, and resources. They will also be able to mediate between design team members, particularly in their ability to interpret requirements, explain designs and describe features for the non-technical members of the team.

The Engineering Management Department, in conjunction with its various constituencies, has clearly defined program objectives. These engineering program objectives are listed in the School of Engineering and Applied

Science section of this catalog, and by the Gonzaga University Mission Statement that may be found at the beginning of the catalog.

Mechanical Engineering

Chairperson: Dr. Massimo. "Max" Capobianchi

Professors: K. Ansari, M. Capobianchi, T. Chen, P. Ferro, G. Hordemann (Emeritus)

Associate Professors: M. Baumgardner, T. Fitzgerald, J. Marciniak

Assistant Professors: H. Khare, G. Weber

Lecturers: D. McDonald, A. Toghraee, J. Weston,

Mechanical Engineering is that branch of engineering that encompasses the study of forces, motion, energy, materials, manufacturing, and design

in order to apply them to the creation of mechanical devices and systems that serve society (e.g., engines, refrigerators, machines, tools, etc). This is accomplished through a process of problem description, creative idea generation, design, analysis, judgment, planning, and production that typically involves a host of professionals who may all have been educated as mechanical engineers. For example, mechanical engineers may be involved in product design, analysis, and testing, in developing manufacturing processes, in defining product requirements and troubleshooting customer problems, in project management, and in research and education.

The profession serves many diverse fields and industries such as the aerospace, pharmaceutical, automotive, biomedical engineering, and power generation industries, to name just a few. In fact, any device or system that involves energy or movement probably involved one or more mechanical engineers in its creation. Some exciting, rapidly developing fields and emerging technologies of interest to mechanical engineers include fuel cells (the use of chemical fuel and an oxidant to directly produce electricity), rapid prototyping (the use of computer-controlled machines to fabricate complete objects in one step directly from computer models), mechatronics (the integration of mechanical systems and electronic sensing and control), biomedical engineering (the application of engineering to problems in medicine and biology), nanoengineering (the creation of materials and devices at the nanometer level, i.e., at the atomic, molecular, or supramolecular levels), and MEMS (Microelectromechanical Systems-the integration of mechanical, chemical, and/or electronic systems at the chip level).

The Department of Mechanical Engineering at Gonzaga University develops men and women who are both competent engineers and educated, responsible human beings. The development of these two characteristics in students is affected by course work from both the liberal arts and the profession. Thus, these two aspects are interwoven, being a single, integrated fabric having many threads contributed by many curricula. This synthesis is expressed by the engineering program educational objectives that are listed in the School of Engineering and Applied Science section of this catalog, and by the Gonzaga University Mission Statement that may be found at the beginning of the catalog.

Diversity of opportunity and professional breadth are hallmarks of the mechanical engineering profession. This translates into a need for a thorough grounding in a variety of mathematical, scientific, and engineering

fundamentals. Thus, the Mechanical Engineering Program at Gonzaga University prepares the student in the areas of mathematics, chemistry, physics, mechanics, thermodynamics, fluid mechanics, heat transfer, materials, manufacturing, design, control theory, experimentation, and economics. These fundamentals are enhanced with exposure to important engineering tools such as: mathematical techniques; computer programming; computer applications including computer aided design (CAD), computer aided manufacturing (CAM), finite element analysis (FEA), and computational fluid dynamics (CFD); and the use of equipment, instruments, and software typically found in manufacturing and laboratory situations. Since teamwork is an essential aspect of the modern practice of mechanical engineering, the Mechanical Engineering Program gives considerable attention to building personal communication skills through team design projects, reports, and presentations. Furthermore, as a critical component of the program, all students engage in design courses beginning in their Sophomore year, culminating in a two-semester capstone design experience in the Senior year. That experience typically entails requiring student design teams, led jointly by faculty and practicing engineers, to solve real industrial design problems. Finally, the degree requirements also include the opportunity for breadth as well as concentration in particular engineering applications through a group of technical electives taken in the senior year (the list of allowed technical electives is given below). The department also has a five-year plan available for students wishing to proceed at a slower pace or for those planning to add a minor in business or in a liberal arts subject such as physics, music, or art. Information and a suggested course package is also available for students planning to enroll in the Gonzaga-in-Florence Engineering Semester program.

The following curriculum details the course requirements for each semester. In addition to these courses, all students must take the Fundamentals of Engineering Examination prior to graduation (see ENSC 400, “Fundamentals of Engineering Exam” course in the Spring semester of the Senior year). Finally, students who follow a curriculum sequence other than that listed below should meet with their Academic Advisors at their first opportunity in order to resolve any scheduling conflicts that may arise due to off-schedule course availability and/or course pre- and co-requisite structure. In all cases, students must comply with the pre- and co-requisite requirements in order to be granted admission into courses.

The BS in Mechanical Engineering (BSME) is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

⁽¹⁾ ENSC 300 is waived under the following circumstances:

Students enrolled in the Hogan Entrepreneurial Leadership program: ENSC 300 is waived.

Students pursuing the General Business or Analytical Finance minor: ENSC 300 is waived after completing both (ECON 200 or (ECON 201 and ECON 202)) and BFIN 320

Students Pursuing the B.S. in Engineering and M.B.A. program: ENSC 300 is waived after completing both (ECON 200 or (ECON 201 and Econ 202)) and BFIN 320.

The above courses are not intended to be options for the ENSC 300 course. Hence, students who are not in one of the above programs are required to take ENSC 300. Also, students who comply with one of the above criteria must complete all of the courses required to waive ENSC 300 prior to enrolling in any course for which ENSC 300 is a pre-requisite.

⁽²⁾ Students must show proof of having taken the examination in the State of Washington, as part of the requirements of this course.

Technical Electives

The courses used to satisfy the technical elective requirements must normally be selected from the following list. However, students may take other courses for technical elective credits but only with the prior approval of both the student's academic advisor and the chair of the Department of Mechanical Engineering. The actual technical elective courses offered from the list below varies from year to year and the department may on occasion offer one or more pre-approved technical elective courses that are not listed below. Courses other than MENG courses may have pre and/or co-requisites that are outside of the normal mechanical engineering

specifications of the School of Engineering and Applied Science (SEAS). Specifications are available on the SEAS web site.

Corequisite(s): MENG 291L

Prerequisite(s): ENSC 192

MENG 291L Introduction to Mechanical Engineering Design Lab **credit(s): 1**

Hands on use of SOLIDWORKS CAD system to create 3-D models and 2-D drawings of machinery elements and assemblies. Laboratory assignments are coordinated with lecture content from MENG 291. Student projects will focus on the creation of machinery elements and assemblies in a team environment.

Corequisite(s): MENG 291

MENG 301 Manufacturing Processes **credit(s): 2**

Overview of manufacturing processes and how they influence design decisions. Emphasizes design for manufacturability, process comparison, and process specification.

Corequisite(s): MENG 301L

Restriction(s):

Must be the following Class(es): Junior, Post-Bacc, Senior

Prerequisite(s): MENG 221

MENG 301L Manufacturing Processes Lab **credit(s): 1**

Laboratory experiences with machine tools and manufacturing processes. Calculations and problem solving that reinforce lecture topics.

Corequisite(s): MENG 301

Restriction(s):

Must be the following Class(es): Junior, Post-Bacc, Senior

MENG 321 Thermodynamics I **credit(s): 3**

The first and second laws of thermodynamics; thermophysical properties of matter, ideal gases and their mixtures; concept of entropy as applied to thermal systems.

Prerequisite(s): MATH 259

MENG 322 Thermodynamics II **credit(s): 3**

Second Law analysis, power and refrigeration cycles, mixtures, combustion, and high speed flow. Applications of first and second law analysis to engineering systems.

Prerequisite(s): MENG 321

MENG 330 Machine Design **credit(s): 3**

Application of stress analysis and theories of failure to basic machine elements. Design of elements under static and fatigue loading. Design involving mechanical elements such as shafts, columns, flywheels, springs, and welds.

Prerequisite(s): ENSC 301

MENG 341 Heat Transfer **credit(s): 3**

One and multidimensional steady conduction, transient conduction, internal and external forced convection, natural convection, radiation heat transfer, boiling and condensation, heat exchangers.

Equivalent(s): MENG 441

Prerequisite(s): MENG 321 and ENSC 352 and MATH 260

MENG 411 Instrumentation Systems **credit(s): 3**

Basic concepts of measurement and analysis of measurement uncertainties and experimental data. Study of transducers and investigation of data acquisition, signal conditioning, and data processing hardware typically utilized in performing mechanical measurements.

Corequisite(s): MENG 411L

Prerequisite(s): EENG 201 and ENSC 371 and MATH 321

MENG 411L Instrumentation Systems Lab **credit(s): 1**

Laboratory exercises supporting the topics covered in MENG 411.

Corequisite(s): MENG 411

MENG 412 Mechanical Measurements **credit(s): 3**

Study of the techniques used for measuring displacement, velocity, acceleration, force, pressure, flow, temperature, and strain. Investigation of the proper application and the associated limitations of the techniques and of the required instruments. The topics are studied within the context of obtaining experimental solutions to engineering problems in thermodynamics, heat transfer, fluid mechanics, mechanics, and strength of materials.

Corequisite(s): MENG 412L

Prerequisite(s): MENG 411 and MENG 341

- MENG 412L Mechanical Measurements Lab** **credit(s): 1**
 Laboratory exercises supporting the topics covered in MENG 412.
Corequisite(s): MENG 412
- MENG 434 Vibration Engineering** **credit(s): 3**
 Elements of vibrating systems. Free, forced harmonic and transient vibrations of single-degree-of-freedom systems with and without damping. Vibration isolation and control. Two-degree-of-freedom systems. Application of matrix techniques.
Prerequisite(s): ENSC 306 and ENSC 371
- MENG 435 Applications in Vibrations** **credit(s): 3**
 Continuation of MENG 434. Practical applications of vibration theory to topics such as: Control and suppression of vibrations in machinery; vibration isolation and damping treatments; dynamic vibration absorbers; balancing of rotating and reciprocating machinery; critical speed evaluation of flexible rotors; ground vehicle response to road profile excitation and evaluation of ride performance; vibration in electronic equipment and prevention of vibration failures; aircraft vibration and flutter; and response of structures to earthquakes.
 Fulfills the following degree requirement(s): MENG - Tech Elective
Prerequisite(s): MENG 434
- MENG 442 Advanced Heat Transfer** **credit(s): 3**
 Advanced heat transfer topics with emphasis on industry applications. Small length scale heat transfer problems, contact resistance, multidimensional transients, boiling and condensation heat transfer, and design of heat exchangers.
 Fulfills the following degree requirement(s): MENG - Tech Elective
Prerequisite(s): MENG 341
- MENG 443 Combustion** **credit(s): 3**
 Combustion processes including explosions, detonations, flame propagation, ignition, and generation of pollutants in moving and stationary energy conversion systems. Focused on fundamental combustion theory in the context of internal combustion engines and, to a lesser degree, the subsequent effect of those emissions on the atmosphere, climate, and human health. Specific focus may vary from year to year.
 Fulfills the following degree requirement(s): MENG - Tech Elective
Prerequisite(s): MENG 322
- MENG 445 Heating Vent and Air Condition** **credit(s): 3**
 Introduction to the techniques used in the analysis and design of heating, ventilating, and air conditioning (HVAC) systems. Topics include the arrangement of typical air conditioning systems (i.e. all air systems, air and water systems, etc.), moist air processes, comfort and health criteria for indoor air quality, heating and cooling loads, piping system design, building air distribution, and operational principles and performance parameters of typical components (i.e., cooling towers, air washers, heating and cooling coils, etc.)
 Fulfills the following degree requirement(s): MENG - Tech Elective
Prerequisite(s): MENG 341
- MENG 446 Energy Auditing** **credit(s): 3**
 This course provides a practical application of thermodynamics and heat transfer concepts with regard to commercial building systems (HVAC, lighting, automated controls, etc.). Students will learn how building systems use electric and natural gas energy, how to identify and make recommendations for how these systems can be made more efficient, and learn calculation methods to quantify these energy savings into useful metrics for clients.
 Fulfills the following degree requirement(s): MENG - Tech Elective
Prerequisite(s): MENG 322 and MENG 341

examples and design studies, non-symmetric laminates, micromechanics of composites, properties of fibers and matrix materials.

Fulfills the following degree requirement(s): CENG - Tech Elective, Fulfills the following degree requirement(s): MENG - Tech Elective

Prerequisite(s): MENG 221

MENG 468 Biomaterials and Biomechanical Engineering credit(s): 3

Introduction to the field of biomaterials and biomechanical engineering. Review and continuation of materials and mechanical properties concepts specific to biomaterials. Introduction to the disciplines of biomechanics and biomechanical engineering. Topics covered include orthopedic anatomy and function, implant technology, cardiac anatomy and function, and medical devices used to restore proper physiological function.

Fulfills the following degree requirement(s): MENG - Tech Elective

Prerequisite(s): MENG 221

MENG 477 Materials Selection for Design credit(s): 3

Methods of materials selection. Systematic approaches for selecting optimal material when competing criteria exist. Real applications and case studies are included. Several topics including fracture mechanics, corrosion, titanium alloys, etc. are covered.

Fulfills the following degree requirement(s): MENG - Tech Elective

Prerequisite(s): MENG 221

Assistant Professor: [B. Dorie](#)

The following Engineering Science courses are service courses for all majors within the School of Engineering and Applied Science:

Courses:

ENSC 191 First Year Seminar credit(s): 3

An introduction to multiple aspects of engineering as well as the university intellectual life. A primary focus is on programming and the use of computers within the engineering disciplines. Through a focus on hands-on projects performed in teams, the course introduces students to commonalities and differences among the engineering disciplines, modes of inquiry, project design, teaming, skills in professional/technical writing, persuasive arguments (based on evidence, logic and critical thinking), innovation, and the use of multiple languages (English, computing, graphic) to communicate technical ideas to colleagues and clients. Fall.

Fulfills the following degree requirement(s): Core: First Year Seminar

Corequisite(s): ENSC 191L

Restriction(s):

Must be in the following College/School(s): School of Engineering and Applied Science

ENSC 191L First Year Seminar Lab credit(s): 0

See ENSC 191.

Corequisite(s): ENSC 191

ENSC 192 First Year Seminar credit(s): 3

A continuation of the concepts introduced in ENSC 191. Spring.

Fulfills the following degree requirement(s): Core: Writing, Fulfills the following degree requirement(s): Core: Writing Enriched

Corequisite(s): ENSC 192L

Restriction(s):

Must be in the following College/School(s): School of Engineering and Applied Science

ENSC 192L First Year Seminar Lab credit(s): 0

See ENSC 192.

Corequisite(s): ENSC 192

ENSC 193 First Year Seminar: credit(s): 3

The First-Year Seminar (FYS) introduces new Gonzaga students to the University, the Core Curriculum, and Gonzaga's Jesuit mission and heritage. While the seminars will be taught by faculty with expertise in particular disciplines, topics will be addressed in a way that illustrates approaches and methods of different academic disciplines. The seminar format of the course highlights the participatory character of university life, emphasizing that learning is an active, collegial process.

Fulfills the following degree requirement(s): Core: First Year Seminar

Restriction(s):

Must not be in the following College/School(s): School of Engineering and Applied Science

ENSC 205 Statics credit(s): 3

A vector treatment of systems of forces and moments in equilibrium. Topics include centroids, distributed loads, effects of friction; analysis of trusses and frames and calculations of moments of inertia. PHYS 103 is a co-requisite or pre-requisite for this course.

Prerequisite(s): PHYS 103 (or concurrent)

ENSC 244 Computer Methods for Engineers credit(s): 3

Course developing facility in the solution of engineering problems by numerical methods using digital computers. A practical treatment of the computational tools for solving linear and non-

linear algebraic equations, and ordinary differential equations. Techniques of numerical differentiation, integration, regression analysis, and interpolation. Use of mathematics computer software.

Prerequisite(s): MATH 260 (or concurrent)

ENSC 290 Directed Study credit(s): 1-3

Course repeatable for 12 credit(s).

Topic to be decided by faculty.

ENSC 300 Engineering Economics credit(s): 2

Techniques of evaluating engineering decisions in the economic realm. Selected topics include: annual cost, present worth, future worth, rate of return, and benefit cost ratio analysis in engineering project alternatives.

Prerequisite(s): MATH 258

ENSC 301 Mechanics of Materials I credit(s): 3

Behavior of materials, elementary theories of stress and strain, generalization of these theories to stress distribution, and deformation and instability in structural members.

Prerequisite(s): ENSC 205

ENSC 306 Dynamics credit(s): 3

A vector treatment of kinematics and kinetics. General motion of a particle, energy and momentum methods for particles and rigid bodies.

Prerequisite(s): ENSC 205

ENSC 352 Fluid Mechanics credit(s): 3

Fluid properties, fluid statics, fluids in motion, momentum and energy equations, dimensional analysis, boundary layers, flow in conduits, drag and lift.

Prerequisite(s): ENSC 205

ENSC 355 Thermal Science credit(s): 3

First and second law of thermodynamics applied to closed and open systems; introduction to conduction, convection, and radiation heat transfer. For non-mechanical engineering majors only.

Restriction(s):

Must not be in the following Major(s): Mechanical Engineering

ENSC 371 Advanced Engineering Math credit(s): 3

Application of advanced mathematical techniques to problems of interest to engineers and scientists. Analytical methods involving topics such as ordinary and partial differential equations, special functions, and complex valued functions.

Prerequisite(s): MATH 260

ENSC 400 Fund of Engineering Exam credit(s): 0

Proctoring of the practice examination for Students in preparation for the Fundamental of Engineering Exam (1st exam toward professional licensing), and of the School of Engineering and Applied Sciences assessment surveys (dates and times are announced during the semester). Also requires Students to take the Washington State Fundamentals of Engineering (FE) Examination. Students must show proof of having taken the examination as part of the requirements of this course.

Prerequisite(s): EENG 491 or MENG 491 or ENSC 491 or CENG 491 or CPSC 491

ENSC 405 Engineering Project Management credit(s): 3

Current tools used to manage engineering and technical projects. Topics covering both theory and practice: Definition of a project; Management and organization; Project planning, including chartering, project scope management, project time (schedule) management, project cost management, quality management, communications, project risk management, and procurement/contract management; Project control; and Project completion/termination.

Restriction(s):

Must be the following Class(es): Junior, Senior

ENSC 486 Special Topics in Engineering credit(s): 1-6

Course repeatable for 12 credit(s).

Special topics in engineering. Admission is based on satisfying any specified pre-requisite, co-requisite and/or restrictions particular to that special topic course. Fall and Spring.

Fulfills the following degree requirement(s): MENG - Tech Elective

Restriction(s):

Must be the following Class(es): Junior, Senior

ENSC 487 Special Topics in Engineering credit(s): 1-6

Course repeatable for 12 credit(s).

Special topics in engineering. Admission is based on satisfying any specified pre-requisite, co-requisite and/or restrictions particular to that special topic course. Fall and Spring.

Restriction(s):

Must be the following Class(es): Junior, Senior

ENSC 488 Special Topics in Engineering credit(s): 1-6

Course repeatable for 12 credit(s).

Special topics in engineering. Admission is based on satisfying any specified pre-requisite, co-requisite and/or restrictions particular to that special topic course. Fall and Spring.

Restriction(s):

Must be the following Class(es): Junior, Senior

ENSC 489 Special Topics in Engineering credit(s): 1-6

Course repeatable for 12 credit(s).

Special topics in engineering. Admission is based on satisfying any specified pre-requisite, co-requisite and/or restrictions particular to that special topic course. Fall and Spring.

Restriction(s):

Must be the following Class(es): Junior, Senior

ENSC 490 Directed Study credit(s): 0-3

Course repeatable for 6 credit(s).

Directed study of a specific topic in engineering. Admission is based on satisfying any specified pre-requisite, co-requisite and/or restrictions particular to that topic in this course. Fall and Spring.

ENSC 491 Senior Design Project I credit(s): 2

Elective senior design project of an interdisciplinary or specialized nature involving both technical and non-technical aspects of an engineering problem for students in any of the engineering majors. Fall.

Fulfills the following degree requirement(s): Core: Fine Arts and Design

Restriction(s):

Must be the following Class(es): Senior

ENSC 492 Senior Design Project II credit(s): 3

Ongoing completion of an elective senior design project of an interdisciplinary or specialized nature involving both technical and non-technical aspects of an engineering problem for students in any of the engineering majors. Spring.

Fulfills the following degree requirement(s): Core: Communication and Speech, Fulfills the following degree requirement(s): Core: Writing Enriched

Corequisite(s): ENSC 400

Restriction(s):

Must be the following Class(es): Senior

Prerequisite(s): ENSC 491

ENSC 497 Internship

credit(s): 0-6

Course repeatable 8 time.

Work experience directly related to the student's major area of study. Internship requires completion of an application form, a 3.00 GPA and permission from department. Zagweb registration is not available. Fall, Spring and Summer.

Restriction(s):

Must be in the following College/School(s): School of Engineering and Applied Science

Master of Business Administration and B.S. in Engineering

To meet the need for business knowledge and skills as an enhancement to the technical engineering degree, students with an aptitude for engineering and the capacity to assume management responsibilities may complete a program which leads to the B.S. in one of the disciplines of engineering and Master of Business Administration (MBA). Earning both the Bachelor's of Engineering Management and the MBA takes five years of full-time study. Students choosing this program must complete their bachelors degree with the required General Business Minor before being admitted to the Graduate School of Business.

The General Business Minor is preparation for the MBA.

Engineering students who complete BFIN 320 and ECON 200 may have ENSC 300 waived. Additional information about the M.B.A. program can be found in the graduate catalog.

For more information on the MBA program, please contact the Marketing & Recruiting Specialist for the Graduate School of Business and/or the School of Business page.

The School of Nursing and Human Physiology

Dean: TBD

Assistant Dean: Jennifer Towers

Welcome to the School of Nursing and Human Physiology (SNHP), which was established in 2013 in response to a growing need and brings together three departments with long histories at Gonzaga: Human Physiology, Nurse Anesthesia, and Nursing. Consistent with the mission of Gonzaga University, our message is that of making a difference through excellence in education and scholarly pursuits in the Jesuit, Catholic tradition.

Students choosing to enroll in one of our undergraduate programs will be taught by faculty with exemplary records in teaching, research, and service. Many faculty maintain clinical schedules to enrich their integration of theory and practice in the classroom. Their research and scholarly work inform and enhance their teaching and result in improvements in individual and population health. Service is an important component of what we do as it provides the school with the opportunity to fulfill the Jesuit commitment to social justice through working to address the needs of society's most vulnerable.

Human Physiology offers a BS degree for undergraduates as a first step in pursuing a graduate career at other institutions in the physiological sciences or clinically related professions, such as medicine, dentistry, or physical therapy, to name a few.

Nursing builds on a solid foundation in the liberal arts, behavioral sciences, and nursing theory and is informed by ethical principles. Graduates are prepared to practice as generalist nurses with their practice grounded in the principles and processes of safe, competent, and ethical care; effective communication; leadership; and professionalism.

Undergraduate Degree Programs in the School of Nursing and Human Physiology

- Human Physiology (B.S.)
- Nursing (B.S.N); undergraduate prerequisites for R.N. to M.S.N. degree are listed in the Undergraduate Catalogue)
-

Degree Requirements for the School of Nursing and Human Physiology

Students must complete the general degree requirements of the University, including the University Core curriculum, and the requirements of their major.

Please note: No core, major, minor, or concentration courses may be taken under the Pass/Fail option.

Nursing students are referred to the relevant Department of Nursing Student Handbook for a more detailed overview of requirements and expectations. There are separate handbooks for the BSN and graduate (MSN and DNP) programs.

Human Physiology

Chairperson: David Thorp

Professors: D. Thorp

Associate Professors: R. McCulloch, P. Crosswhite

Assistant Professors: E. Donovan, B. Wilkins, C. Wutzke

Senior Lecturer: J. McKenzie

Lecturer: J. Deckert

The Bachelor of Science degree in Human Physiology provides an introduction to the physical and life sciences, followed by a concentrated study of human structure and function spanning the hierarchy of structure and function from molecules to the entire organism. Acute physiological responses and chronic adaptations to normal activity, exercise, disease and aging are emphasized. Laboratory experiences are used to introduce students to the methods of investigation and evaluation of human structure and function. The degree is unique within the University because it emphasizes the scientific basis and mechanisms of human function, adaptation, aging, health and disease, and performance. Because several courses may double-count for both the University Core Curriculum and the Human Physiology degree, the total credits needed to complete the University Core and Human Physiology degree is 104 credits. This can be further reduced by 6 credits if social justice and global studies requirements are carefully selected. Therefore, Human Physiology majors have a minimum of 24 additional elective credits to complete a minor and/or specific prerequisite courses for graduate or professional school.

Because prerequisites for admission to different graduate programs vary, students are advised to obtain the specific prerequisites from programs and schools of interest as early in their academic career as possible.

Courses:

HPHY 190 Directed Study credit(s): 1-3

Course repeatable for 3 credit(s).

Topic to be decided by faculty. Course may be repeated to total not more than 2 credits. By permission from department only. Fall, Spring, and Summer.

Equivalent(s): EXSC 190

HPHY 205 Experimental Design and Stats credit(s): 3

Relationships among research, research design, measurement, and data analysis provide the context for an introduction to basic concepts of research design and data analysis. Students will learn how to interpret statistics in peer-reviewed research and how to apply statistical methods to analyze data and address research questions in the sciences. Fall.

Restriction(s):

Must not be in the following Major(s):

HPHY 210 Scientific Writing credit(s): 3

An introduction to the fundamentals of writing scientific reports and manuscripts of experimental research, with special emphasis on research in human physiology. Spring.

Restriction(s):

Must not be in the following Major(s):

Prerequisite(s): HPHY 205

HPHY 215 GIF: Food Equity and Health credit(s): 3

This course is designed to explore students' understanding of how the three macronutrients are digested and absorbed, and the various roles they play in our body. Using this as a basis of understanding, the course will explore how the distribution and access to food impacts human health in the context of a global setting. Students will engage with how food equity and sustainability is a global issue and how socioeconomic and health outcomes are inherently linked to food access. Summer.

HPHY 241 Human Anatomy and Physiology credit(s): 3

An introduction to the fundamentals of anatomical and physiological science, emphasizing basic cell processes as well as homeostasis and control. Basic cell processes include compartmentation of cells and tissues, bioenergetics, membrane dynamics, communication, integration, and homeostasis. Topics include cells, tissues, metabolism, the endocrine system, the nervous system, and muscle. Fall.

HPHY 244 Nutrition and Metabolism credit(s): 3

An introduction to the study of the role macro and micro nutrients including carbohydrates, fat, protein, vitamins, minerals, and water play in bioenergetics. Additional topics include the anatomy and physiology of digestion, absorption, and the microbiome. Spring.

Restriction(s):

Must not be in the following Major(s):

Prerequisite(s): HPHY 241 and HPHY 241L

HPHY 274 Musculoskeletal Dynamics and Physiology credit(s): 3

An introduction to the basic principles of kinesiology with emphasis on osteology, arthrology, and the mechanical interactions between the muscles and joints of the body. Spring.

Equivalent(s): HPHY 374

Restriction(s):

Must not be in the following Major(s):

Prerequisite(s): HPHY 205 and PHYS 101 and PHYS 101L and HPHY 241 and HPHY 241L

HPHY 304 Practice in Lab Teaching credit(s): 1

Course repeatable for 2 credit(s).

Students gain experience in assisting in teaching and directing human physiology laboratory sections. The student must have successful completion of the lab for which the student will be a teaching assistant. By permission from department only. May be repeated for different lab courses (e.g., 241L and 242L) with departmental permission to total not more than 2 credits.

Fall, Spring, Summer.

Equivalent(s): EXSC 304

Restriction(s):

Must not be in the following Major(s):

Prerequisite(s): HPHY 242 and HPHY 242L

HPHY 375 Biomechanics credit(s): 3

An introduction to the physical laws and mechanical aspects governing human motion which covers analysis of internal and external forces acting on the human body and the effects of these forces. Topics include kinematics and kinetics of human motion, function of the musculoskeletal system, and mechanical analysis of movement. Fall.

Corequisite(s): HPHY 375L

Prerequisite(s): HPHY 205 and HPHY 210 and HPHY 242 and HPHY 242L and HPHY 274 and MATH 148 or higher and PHYS 102 and PHYS 102L

HPHY 375L Biomechanics Lab credit(s): 1

An introduction to techniques and experimental methods used in the study of human motion.

Corequisite(s): HPHY 375

HPHY 376 Exercise Physiology credit(s): 3

A course dealing with the nature and function of neuromuscular activity, circulation, metabolism, respiration and acid-base balance as they relate to exercise and performance. Fall.

Corequisite(s): HPHY 376L

Restriction(s):

Must not be in the following Major(s):

Prerequisite(s): HPHY 205 and HPHY 210 and HPHY 242 and HPHY 242L and MATH 148 or higher and PHYS 102 and PHYS 102L

HPHY 376L Exercise Physiology Lab credit(s): 1

Laboratory study and techniques dealing with the evaluation of physiological capacities involved in rest, exercise, neuromuscular interactions, metabolism, respiration, and circulation. Fall.

Corequisite(s): HPHY 376

Restriction(s):

Must not be in the following Major(s):

HPHY 390 Directed Study credit(s): 1-2

Course repeatable for 2 credit(s).

Topic to be decided by faculty. Course may be repeated to total not more than 2 credits. By permission from department only. Fall, Spring, Summer.

HPHY 401 Assessment of Health and Function credit(s): 3

The course covers the purposes, methods, and guidelines related to assessment of health, fitness, and function. Fall or Spring on need.

Corequisite(s): HPHY 401L

Prerequisite(s): HPHY 376 (or concurrent) and HPHY 376L (or concurrent)

HPHY 401L Assess of Health and Function Lab credit(s): 1

Students will develop skill in administering selected field and laboratory tests for assessing different components of health, fitness, and function. Fall or Spring on need.

Corequisite(s): HPHY 401

HPHY 402 Clinical Exercise Physiology credit(s): 3

Assessing and treating individuals with chronic diseases and disabilities, as well as other special populations. Content will include physiology and pathophysiology, exercise prescription, clinical applications, and current research related to a variety of diseases and conditions. Fall or Spring on need.

Restriction(s):

Must not be in the following Major(s):

Prerequisite(s): HPHY 376 and HPHY 376L

HPHY 422 Cardiovascular Physiology credit(s): 3

This course is designed for upper division students and will expand on the core cardiovascular concepts covered in HPHY 242. The course is designed to help students develop a detailed understanding of the physiology and regulation of the cardiovascular system. The course will cover concepts of myocardial function, peripheral vascular function and the integration and regulation of these two components of the cardiovascular system. Fall or Spring on need.

Prerequisite(s): HPHY 376

HPHY 432 Core Integration Seminar: credit(s): 3

The Core Integration Seminar (CIS) engages the Year Four Question: "Imagining the possible: What is our role in the world?" by offering students a culminating seminar experience in which students integrate the principles of Jesuit education, prior components of the Core, and their disciplinary expertise. Each section of the course will focus on a problem or issue raised by the contemporary world that encourages integration, collaboration, and problem solving. The topic for each section of the course will be proposed and developed by each faculty member in a way that clearly connects to the Jesuit Mission, to multiple disciplinary perspectives, and to our students' future role in the world.

Fulfills the following degree requirement(s): Core: Core Integration Seminar

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

HPHY 441L Guided Experimental Design credit(s): 1

Laboratory research in the study of physiology or a related sub-discipline such as biomechanics or biomedical engineering. Students work in groups with a faculty advisor (course instructor) in proposing, researching and designing an experiment. Students will author a research proposal and conduct pilot work. Spring.

Restriction(s):

Must be in the following Major(s): Human Physiology

Prerequisite(s): (HPHY 375 and HPHY 375L)(and HPHY 376 and HPHY 376L)

HPHY 442L Guided Research credit(s): 1

Laboratory research in the study of physiology or a related sub-discipline such as biomechanics or biomedical engineering. Students work in groups with a faculty advisor (course instructor) in conducting, analyzing, and presenting their research. Fall.

Restriction(s):

Must be in the following Major(s): Human Physiology

Prerequisite(s): HPHY 441L

HPHY 451 Systems Neurophysiology credit(s): 3

The course is an advanced examination of the cellular and physiological properties of neurons, neural communication / transmission, and the physiological manifestations of the nervous systems control. After examining neural cell function, we begin by exploring the neurophysiological systems involved in sensory pathways including proprioception and vestibular system, pain, vision, auditory, and chemical senses. Then, we apply this knowledge by examining the integration of these systems and their role in normal human physiological function, disease, and performance. Fall or Spring on need.

Prerequisite(s): HPHY 376

credits. By permission from department only. Fall, Spring and Summer.

Equivalent(s): EXSC 492

HPHY 497 Internship

credit(s): 0-6

Course repeatable for 6 credit(s).

This course is designed to provide students with the opportunity to receive 0 to 6 course credits for professional work experience in a human physiology-related field. The location, duration, learning activities, and specific learning objectives are decided upon through a written agreement established among the student, internship supervisor and the department. This course may be repeated to total not more than 3 credits and is graded as Satisfactory/Non-Satisfactory. By permission from the department only. Credits for this course do not count toward HPHY required elective credits. Fall, Spring, and Summer.

Restriction(s):

Must be in the following Major(s): Human Physiology

Prerequisite(s): HPHY 242 and HPHY 242L

HPHY 498 Directed Research

credit(s): 1-2

Course repeatable for 2 credit(s).

This course provides the motivated student with the opportunity to conduct or assist with a research project under the direction of a human physiology faculty member. Course may be repeated to total not more than 2 credits. Fall, Spring and Summer. By faculty permission only.

Equivalent(s): EXSC 498

HPHY 499 Culminating Experience

credit(s): 1

Required of all HPHY majors in their senior or final year. Spring.

Restriction(s):

Must be in the following Major(s): Human Physiology

Must be the following Class(es): Senior

Prerequisite(s): HPHY 441L and HPHY 442L

Introduction

Grounded in Jesuit and Nursing values, the pre-licensure BSN program offered by the Department of Nursing prepares students to be able to practice as registered nurses in a variety of settings. Students learn to promote health, to care for patients with acute and chronic illnesses, and to support patients and their families at the end of life. The BSN program builds on the curricular themes of servant leadership, social justice, community, and reflective practice. The concept of Complex Adaptive Systems (CAS) serves as the organizing framework for the curriculum. One application of this concept is that students initially care for individuals with more predictable healthcare needs. As they progress in the program, they learn to care for individuals, families, and populations with increasingly more complex healthcare needs in highly complex organizational settings.

Program Overview

Students are admitted to the pre-licensure BSN program as freshmen. At the time they submit their applications to Gonzaga University, nursing applicants must indicate "Nursing" as their first academic interest on the Common Application. Nursing applicants are also required to complete "Section V" of the Common Application Gonzaga Student Supplement. Those not admitted into nursing as freshmen may not become a nursing major at Gonzaga. As

freshman nursing majors, students begin the process of completing the GU core requirements and the nursing pre-requisite courses.

Due to constraints on availability of clinical placements, it may take nine semesters to complete the Bachelor of Science in Nursing (BSN) program. The Nursing faculty tries to accommodate student requests to complete the program in eight semesters, but the eight semester time frame is not guaranteed. Students apply for their preferred time frame (eight or nine semester) placement during the second semester of their freshman year and are notified of their placement by the end of that same academic year. If demand for completion in eight semesters exceeds available clinical placements and/or limits on class sizes, students will be placed based on their ranked grade point average in the nursing pre-requisite courses and progression in the program. Students who are major-ready by the end of their sophomore year but are placed in the nine-semester time frame for the program may take a leave of absence in the fall semester of their junior year. The nine-semester time frame is supported by financial aid in the same way as the eight-semester option, and it provides students with opportunities to pursue a minor or to participate in a study abroad program.

Once students begin their upper division nursing courses, they also complete a series of practicum courses that introduce them to professional nursing practice in a variety of healthcare settings. The program also prepares students to take the National Council Licensing Examination (NCLEX) after graduation, which is a requirement for licensure as a registered nurse.

Admission Requirements

Admission to the pre-licensure BSN program is competitive and selective. Students are admitted to the pre-licensure BSN program as freshmen. The decision to admit a student to the BSN program as a freshman is based on consideration of the student's overall portfolio including:

1. Cumulative GPA and grade trends
2. Four years of math and science courses
3. SAT/ACT scores
4. Work or volunteer experience in healthcare
5. One academic letter of recommendation
6. Written essay as well as responses to short answer questions on the application

Information regarding admission to Gonzaga's Nursing Program will follow notification of acceptance to the University by approximately one month.

During their first two years at Gonzaga, students need to maintain a cumulative GPA of 3.0 or better and achieve a minimum grade of "C" (2.0) in all of the nursing prerequisite courses and their respective labs. If a student receives less than the required minimum grade of "C" in any of the nursing prerequisite courses taken at Gonzaga or taken at any other college/university as a substitution, the student may only retake two of these courses one time only. Continuation to the upper division BSN program is contingent upon maintaining a cumulative GPA of 3.0 and successful completion of nursing prerequisite courses.

RN to MSN Program

(for Registered Nurses)

The RN to MSN program offers the licensed registered nurse with an associate's degree in nursing the opportunity to earn a master's degree in nursing in less time and with fewer credits than would be required if completing separate BSN and MSN degrees. The MSN is the degree awarded, and there is no option for earning a separate BSN degree. In an effort to meet the needs of working registered nurses, the program is offered in a distance delivery format. Students complete five courses (15 credits) that "bridge" them to the master's level courses.

Once the "bridge" courses have been successfully completed, students progress immediately to the master's level courses provided they maintain a minimum cumulative GPA of 3.0. At the master's level, there is an emphasis on preparation for an advanced role as a nursing leader. Students take the core MSN courses and then complete the Nursing Leadership in Healthcare (NLH) track or concentration. Grounded in Jesuit and Nursing values, the program builds on the curricular themes of servant leadership, social justice, community, and reflective practice. The concept of Complex Adaptive Systems (CAS) serves as the organizing framework for the curriculum.

Admission Requirements RN to MSN Program

At the time of application to the RN to MSN program, the applicant also applies for admission to Gonzaga University. The applicant must have an associate's degree in nursing from an accredited college and must submit one official transcript from each college or university. The decision to admit an applicant to the RN to MSN program is based on consideration of the individual's overall portfolio including:

1. Cumulative GPA of 3.0 or better (4.0 scale)
2. Evidence of a current unencumbered RN license
3. One official transcript from every college or university attended. Only degrees and courses from regionally accredited institutions will be accepted.
4. Current curriculum vitae (CV)
5. Two letters of recommendation from individuals such as employers, colleagues, or professors who can attest to the applicant's leadership, interpersonal skills, professional practice, critical thinking and judgment, and potential for advanced study.
6. Typewritten statement that describes the applicant's:
 - a) Interest in the RN to MSN Program and specific MSN option, i.e., Nursing Leadership in Healthcare
 - b) Professional goals
 - c) Personal and professional strengths
 - d) Professional experiences
7. Non-native English speakers are required to provide proof of English proficiency. Gonzaga University accepts the following:
 - a) Score of 6.5 or better on the IELTS, or
 - b) Official TOEFL score of at least 88 ibt or 580 pbt, or

wellness, as well as factors that affect health outcomes and recovery from illness. Students will learn basic community assessment skills, including how to use and interpret basic epidemiological measures.

Fulfills the following degree requirement(s): Core: Social Justice

Prerequisite(s): SOCI 101, minimum grade: C and MATH 121, minimum grade: C and NURS 100, minimum grade: C

NURS 311 Prof and Therapeutic Communication credit(s): 2

This course is designed to provide the learner a theoretical foundation for effective communication. Using the lens of complex adaptive systems and servant leadership, selected models of communication, health and illness, health communication, conflict resolution and negotiation are explored for their implications for nursing practice. Diversity issues affecting perception of health/illness and influencing verbal and nonverbal communication are examined. Media and internet influence on health care and the profession of nursing are included. Theory-based strategies to improve communication skills throughout the health care continuum are stressed.

Prerequisite(s): NURS 100, minimum grade: C and NURS 210, minimum grade: C and NURS 251, minimum grade: C

NURS 314 Assessing and Promoting Wellness credit(s): 4

Complex adaptive systems, as they relate to body systems, individuals (children, adolescents, adults, and older adults), and families are used as a guiding framework. Theoretical and research-based content in individual and family health and development throughout the life span is emphasized. Students learn foundational skills for the health assessment and care of individuals and family. The student integrates functional health patterns, physical assessment findings, and family concepts to formulate nursing diagnoses and a nursing plan of care. The nursing role in health promotion and health education is emphasized.

Corequisite(s): NURS 315, **Corequisite(s):** NURS 316

Prerequisite(s): NURS 100, minimum grade: C and NURS 210, minimum grade: C and NURS 251, minimum grade: C

NURS 315 Practicum I: Assess/Promo Wellness credit(s): 5

Students will use knowledge from Nurs 314 to assess and promote wellness for healthy individuals and families in community settings. Students participate in learning activities in the Learning Resource Center, in a variety of community-based settings, and in post clinical conferences. The course celebrates the body, mind, and spirit of the student in nursing and recognizes that learning transforms. In the process of transformation, reflection provides the key to understanding.

Corequisite(s): NURS 314, **Corequisite(s):** NURS 316

Prerequisite(s): NURS 100, minimum grade: C and NURS 210, minimum grade: C and NURS 251, minimum grade: C

NURS 316 Pathophysiology and Pharmacology I credit(s): 4

This is the first of a two course pathophysiology and pharmacology series in the BSN curriculum. The course is designed to improve the learner's understanding of how alterations in normal human anatomic structure and physiology function may impact various organ systems, body homeostasis, and medication management. A student-center case-based active learning model will be utilized to exemplify basic and clinical pharmacology principles for common outpatient disease processes. Nursing pharmacology fundamentals, including principles of drug administration, pharmacokinetics, pharmacodynamics, adverse drug effects, drug interactions, and medication errors are introduced. These principles form the foundation for applied pharmacology case studies. Drug class prototypes will be reviewed using an organ system case-based pathophysiologic approach to therapeutics. The case studies illustrate key pathophysiologic and pharmacology concepts thus providing students an opportunity for critical

thinking, synthesis, integration, and application of course material to therapeutic decision making, planning, and managing care for individuals.

Corequisite(s): NURS 314, **Corequisite(s):** NURS 315

Restriction(s):

Must be in the following Major(s): Nursing

Prerequisite(s): NURS 100, minimum grade: C and NURS 210, minimum grade: C and NURS 251, minimum grade: C

NURS 320 Stats for Health Professions credit(s): 3

This online course provides an introduction to descriptive and inferential statistics. It includes the statistical procedures used most frequently to analyze quantitative data for health science and nursing research. Emphasis is placed on the conceptual understanding and correct application of statistical tests, as well as the correct interpretation of statistical results. Some mathematical calculation will be necessary. The ultimate goal will be for the learner to understand statistical reasoning and become familiar with the correct use and interpretation of statistics.

Restriction(s):

Must be in the following Major(s): Nursing

NURS 351 Care of Individual and Family credit(s): 4

This course focuses on the development of nursing competence in planning and managing care for individuals and families with alterations in health status. The course stresses the integration of physiological, pathophysiological, pharmacological and developmental concepts as the foundation for professional nursing practice. Theoretical foundations for the provision of care to individuals and families with alterations in health related to fluid and electrolyte balance and to the reproductive, urinary tract/renal, musculoskeletal, and digestive systems, and some of the more common mental health problems are addressed. Use of theory and research based assessment strategies and nursing interventions required to provide care to these individuals/families in health care organizations are emphasized. Critical thinking and diagnostic reasoning are stressed.

Corequisite(s): NURS 352, **Corequisite(s):** NURS 356

Prerequisite(s): NURS 314, minimum grade: C and NURS 315, minimum grade: C and NURS 316, minimum grade: C (or concurrent)

NURS 352 Practicum II: Care Individual and Family credit(s): 5

Using knowledge from NURS 351, this course focuses on the provision of care for individuals and families with health care needs related to fluid-electrolyte disturbances, the endocrine, reproductive, urinary tract/renal, musculoskeletal, and digestive systems. Emphasis is placed on the development of self-discovery and the meaning of experience as a reflective practitioner. Students participate in learning activities in the Learning Resource Center, in a variety of clinical settings within healthcare organizations, and in post-clinical conferences.

Corequisite(s): NURS 351, **Corequisite(s):** NURS 356

Prerequisite(s): NURS 314, minimum grade: C(and NURS 315, minimum grade: C or NURS 315, minimum grade: S) and NURS 316, minimum grade: C

NURS 356 Pathophysiology and Pharmacology II credit(s): 3

This is the second of a two course pathophysiology and pharmacology series in Gonzaga's BSN curriculum. This course builds on the content and concepts learned in the NURS 316 pathophysiology and Pharmacology I course. It is designed to address more complex pathophysiologic processes which are often encountered in hospitalized acute care patients. A student centered case-based active learning method will be utilized to exemplify advanced clinical pharmacology principles for common inpatient disease processes. Drug class prototypes will be reviewed using an organ system case-based pathophysiologic approach to therapeutics. The case studies illustrate key pathophysiologic and pharmacology concepts thus providing

students an opportunity for critical thinking, synthesis, integration, and application of course material to therapeutic decision making, planning, and managing care for individuals.

Corequisite(s): NURS 351, **Corequisite(s):** NURS 352

Prerequisite(s): NURS 314, minimum grade: C and NURS 315, minimum grade: C and NURS 316, minimum grade: C

NURS 402 Care of Individuals and Families credit(s): 4

Focuses on the continued development of nursing competence in planning and managing care for individuals and families with complex alterations in health status. Stresses integration of physiological, pathophysiological, psychological, and pharmacological concepts as essential to professional nursing practice. Emphasis is placed on development of focused assessment skills needed to provide care to individuals and families with health care needs related to the cardiovascular, neurological, endocrine, pulmonary, renal, and mental health systems.

Corequisite(s): NURS 403

Restriction(s):

Must not be in the following Major(s):

Prerequisite(s): NURS 351, minimum grade: C and NURS 352, minimum grade: C and NURS 356, minimum grade: C

NURS 403 Practicum III: Acute/Chronic Alt Health credit(s): 6

This course focuses on providing care for individuals and families with chronic and complex health care needs related to the cardiovascular, neurological, endocrine, pulmonary, renal and mental health systems. Examines internal resources (such as faith or spiritual health) as a source of nourishment when making decisions--especially those involving ethics, urgency, reaction and immediacy. Students participate in learning activities in the Resource & Simulation Center, in a variety of clinical settings within healthcare organizations, and in post-clinical conferences.

Corequisite(s): NURS 402

Restriction(s):

Must not be in the following Major(s):

Prerequisite(s): NURS 351, minimum grade: C(and NURS 352, minimum grade: C or NURS 352, minimum grade: S) and NURS 356, minimum grade: C

NURS 404 Research and Info Management credit(s): 3

Provides an introduction to quantitative and qualitative research principles and methodologies, including evaluation of research studies and application to practice. Critical analysis of nursing and health care research is emphasized. Stresses research design, sampling, data collection strategies and ethical considerations in research.

Fulfills the following degree requirement(s): Core: Writing Enriched

Restriction(s):

Must be in the following Major(s): Nursing

Must be the following Class(es): Junior, Senior

Prerequisite(s): MATH 121, minimum grade: C

NURS 406 Nursing Research credit(s): 3

Critical analysis of nursing and health care research is emphasized. The course stresses research design, sampling, data collection strategies, and ethical considerations in research.

Restriction(s):

Must be in the following Major(s): Nursing

Prerequisite(s): NURS 320, minimum grade: C

NURS 418 Complexity in Health Care Org credit(s): 2

This course considers quality, safety and error reduction within complex healthcare organizations in the United States. Healthcare policy, health care transitions, interdisciplinary

health care and social-cultural implications are explored. The nursing role in the delivery and maintenance of safe, quality care of the patient and family are emphasized using current competency models.

Restriction(s):

Must be in the following Major(s): Nursing

Prerequisite(s): NURS 351, minimum grade: C and NURS 352, minimum grade: C

Prerequisite(s): Core: Ethics requirement and Core: World Comparative Religion requirement

NURS 463 Community Health credit(s): 3

Designed for the licensed registered nurse, this course introduces community-as-partner model as a guide for providing cost-effective, accessible care for families, groups, and populations. Emphasis will be placed on cultural competence, the use of complex adaptive systems to understand the interaction among and between systems within community health practice, epidemiological concepts in the development of effective health policy/programs, and ethical dilemmas inherent in the community-as-partner model of practice.

Corequisite(s): NURS 464

Restriction(s):

Must be in the following Major(s): Nursing

NURS 464 Community Health Practicum credit(s): 3

This practicum emphasizes the use of the community-as-partner model to guide community health practice. Students will explore the various dimensions of a healthy community as they actively participate in community health practice that emphasizes assessing, planning, implementing, and evaluating cost-effective, accessible care for families, groups, and populations within a complex adaptive system. Students will expand their cultural competence, apply epidemiological concepts in the development of effective health policy/programs, and gain an appreciation of the ethical dilemmas inherent in the community-as-partner model of practice.

Corequisite(s): NURS 463

Restriction(s):

Must be in the following Major(s): Nursing

NURS 465 Prof Nurse Practice Complex Adaptive Sys credit(s): 3

Considers nursing leadership roles within complex adaptive systems and examines transition to the professional role. Servant leadership principles are connected to nursing leadership.

Restriction(s):

Must be in the following Major(s): Nursing

Prerequisite(s): NURS 418, minimum grade: C

NURS 466 Population Focused Health credit(s): 3

This course will address communities and populations as the clients for nursing interventions. The focus of this course is interventions used to promote and improve population health. A particular emphasis will be interpreting assessment and epidemiological data to identify and prioritize community/population problems and selecting appropriate interventions for an identified population health problem. Learners also will be introduced to selected principles and

theories that underlie population-focused interventions. Program planning and evaluation processes and strategies will be considered. Use the criteria of effectiveness, efficiency, equity, security, and liberty to analyze a public health policy.

Corequisite(s): NURS 465, **Corequisite(s):** NURS 467

Restriction(s):

Must be in the following Major(s): Nursing

NURS 467 Practice IV: Partner Pop Health Practicum credit(s): 2

This is a project-based practicum course. Students will work in an assigned community agency to develop a comprehensive plan for addressing an identified population health problem. This course will give students experience in working in evolving population-focused indirect, nursing roles as a project developer/leader and consultant. Practicum experiences will be intentionally designed to give students experience collaborating with professionals from a variety of other helping disciplines. Students will be expected to interact with their assigned agency and its clients on a regular basis.

Restriction(s):

Prerequisite(s): NURS 251, minimum grade: C and NURS 402, minimum grade: C and NURS 403, minimum grade: C and NURS 404, minimum grade: C

NURS 468 Practicum V: Member of Nurse Profess credit(s): 3

This capstone course is designed to facilitate the transition from the role of student nurse to that of a professional nurse through an intensive practicum experience in a clinical setting of the student's choice. With the guidance/supervision of an experienced registered nurse preceptor, the student has the opportunity to synthesize and apply knowledge and skills gained in the Bachelor of Science in Nursing (BSN) program, demonstrate competencies for entry level nursing practice, and practice nursing leadership within a complex adaptive system (CAS). There is continued emphasis on the significance of reflection as a way of gaining the insights needed to achieve safe, high quality, client-centered practice and effective, ethical leadership. Students examine their own clinical practice and leadership in light of the characteristics of servant leadership. Each student develops an individualized learning contract in collaboration with faculty and the clinical preceptor; the learning contract articulates the student's goals and specific strategies for meeting them. EACH STUDENT PRACTICUM REQUEST WILL BE SUBJECT TO REVIEW BY FACULTY TO DETERMINE FINAL CLINICAL PLACEMENT.

Restriction(s):

Must be in the following Major(s): Nursing

Prerequisite(s): NURS 315, minimum grade: S and NURS 352, minimum grade: S and NURS 403, minimum grade: S

NURS 469 Nursing Leadership and Management credit(s): 2

This course focuses on the professional nursing roles of the nurse leader/manager as a change agent, advocate, and role model for others in the health care setting. The course addresses the management skills of scheduling, budgets, delegation, and information technology, and explores health care policy, finance and regulatory environments. In addition, this course addresses the nurse leader's role in maintaining clinical expertise, effective communication, flexibility, collaboration and conflict resolution.

Prerequisite(s): NURS 418, minimum grade: C

NURS 490 Clinical Internship credit(s): 1-3

Course repeatable for 15 credit(s).

Assists nurses in period of transition from nursing student to registered nurse or from one practice setting to another. Adaptation to role transition fostered through preceptorship with

expert clinical RN and through interaction with faculty. Opportunities to both practice and master current knowledge and skills and acquire new ones.

School of Leadership Studies

Dean: Rosemarie Hunter

Mission

The School of Leadership Studies strives to create, educate, and support leaders; contribute to the health of people, communities, and organizations; and to be of service in meeting the learning needs of a complex society.

Our programs embody the University's Mission and the Ignatian spirit on which Gonzaga University is founded. Ethics, excellence, spirit, and community are guiding values for all aspects of the School. Faculty scholarship and research contribute positively to the professions, the global community, and the classroom.

Through a spirit of inquiry and lifelong learning, our students expand their capacity to transform thinking, and engage in ethical problem solving and decision making. New knowledge is acquired in a learning environment of respect and high standards.

Program in the School of Leadership Studies

Comprehensive Leadership Program

Comprehensive Leadership Program

Director: Josh P. Armstrong, Ph.D.

Program Coordinator: Kristin Telin, M.A.

The Comprehensive Leadership Program (CLP) at Gonzaga University provides selected undergraduate students with the opportunity to develop core knowledge and skills for leadership. The CLP fosters the development of individuals who lead for the common good. This interdisciplinary, experiential program exposes undergraduates to, and prepares them for, leadership experiences in the world. Students will explore power, authority and influence through three dimensions of leadership: self-awareness, relationship with others, and leadership for the common good.

Students who complete this undergraduate leadership minor will:

- gain knowledge and understanding of foundational leadership theories and demonstrate the ability to apply theories in the practice of leadership
- construct an evolving personal philosophy of leadership that demonstrates self-knowledge and theoretical understanding
- develop an understanding of organizational change processes, team dynamics, emotional intelligence, and conflict management within the practice of leadership
- acquire knowledge of diverse cultures, cross-cultural communication, the dynamics of privilege and oppression, and the uses of power between groups

Undergraduates take the Minor in Leadership Studies in conjunction with their chosen major in any academic field, including business, engineering, nursing, computer science, biology, chemistry, education and the liberal arts.

Admission to the Comprehensive Leadership Program is competitive and the application takes place during the fall of a student's first year, and is based on demonstrated leadership and desire to study leadership through written essays, individual interviews, and group interviews.

Requirements

Students in the Comprehensive Leadership Program complete the requirements for a Bachelor's degree in business, engineering, the arts and sciences, nursing and human physiology, or education, etc., along with a Minor in Leadership Studies. Students must satisfy the University and college core curricula relevant to their major.

The courses listed below constitute the Minor in Leadership Studies for undergraduate students. The program is designed flexibly so that students with any major can graduate in four years. Waivers and substitutions for department requirements may be granted to meet special academic needs. In addition, the University waives the fees for credits in excess of the usual eighteen-credit per semester limit for qualified students, up to 21 hours per semester when taking an LDRS course in that semester.

CLP students will complete the following Leadership Studies LDRS courses that amount to 15 credit hours, and select 6 credit hours from the interdisciplinary list of courses, one of which must be an LDRS course.

Master of Arts in Communication and Leadership Studies (COML) and Master of Arts in Organizational Leadership (ORGL) 4+1 Pathway Program:

Majors interested in pursuing a Master of Arts in Communication and Leadership Studies (COML) or a Master of Arts in Organizational Leadership (ORGL) may apply to the graduate program at the end of the academic year immediately preceding their final year of undergraduate study. Those who meet the COML or ORGL admissions standards will be granted provisional acceptance. During their final year of undergraduate study, these students will be able to enroll in up to six graduate-level COML or ORGL credits in addition to their undergraduate course load, with no additional or separate charge for graduate credits. "4+1" students will be limited to a maximum of 18 credits per semester, including graduate credits, in each of the two semesters of their final year of undergraduate study.

Courses:

LDRS 200 Foundations of Leadership credit(s): 3

This course is designed to engage students in essential foundational questions relating to the areas of knowledge and competence that are fundamental to the study and practice of leadership. Spring.

Restriction(s):

Must be in the following Major(s): Leadership Studies

LDRS 315 Theories of Leadership and Org credit(s): 3

This course explores leadership theory and organizational frames models as students develop and systematic theoretical leadership framework for personal and complex organizations. Fall.

Restriction(s):

Must be in the following Major(s): Leadership Studies

Prerequisite(s): LDRS 200

LDRS 325 The Practice of Leadership credit(s): 3

This course is designed to be a practical, skill-building leadership course. The focus of this course will be on developing and practicing key leadership skills such as managing conflict, team building, communication, decision making, ability to delegate, creativity, empathy and emotional intelligence, practice of presence, provide appropriate feedback, and listening. The

course will involve simulations, case studies, role plays, exercises and discussions designed to give students opportunities to practice and cultivate essential leadership skills. Spring.

Restriction(s):

Must be in the following Major(s): Leadership Studies

Prerequisite(s): LDRS 200

LDRS 350 Intercultural Perspective Leadership credit(s): 1

Understand and practice key concepts of leadership theory through an international experience. The leadership theories explored include servant leadership, social change model, and adaptive leadership in Zambia, Africa. Spring

LDRS 355 Intercultural Experience on Leadership credit(s): 3

This course seeks to understand and practice key concepts of leadership theory through an international experience, develop and promote an ethic of accompaniment through our community development projects, develop intercultural competencies as they strive to be global leaders, and develop self-awareness and critical thinking skills through experiential education and critical reflection of our international service. Summer

Fulfills the following degree requirement(s): Core: Global Studies

LDRS 375 Leading Across Cultures credit(s): 3

Through this course, students will gain knowledge of diverse cultures, cross-cultural communication, the dynamics of privilege and oppression, and the uses of power between groups. To develop cultural competency, leaders need to know: themselves, others, the relevant issues, and have an appreciation and curiosity for working with others. Students will connect global leadership concepts to practice and engage in a number of activities, discussions, and self-assessment instruments to increase their self-awareness of leadership styles, abilities, strengths, and limitations. Fall.

Restriction(s):

Must be in the following Major(s): Leadership Studies

Prerequisite(s): LDRS 315 and LDRS 325

LDRS 390 Outdoor Leadership credit(s): 3

Course repeatable for 6 credit(s).

This course is designed to look into the models of outdoor education known as Adventure Education and Expeditionary Learning. Both Adventure Education and Expeditionary Learning came out of the Outward Bound movement of the 1940's in England and later in the 1960's in the USA. While the concepts are based in the foundational tenants of outdoor education, Adventure Education and Expeditionary Learning focus on the concept of adventure and the context of the "expedition" as the container in which learning takes place. This is a leadership seminar, but it is also a seminar about risk, adventure, decision-making, education and outdoor competency - it will be about teaching, learning and leading through adventure.

Restriction(s):

Must not be in the following Major(s):

LDRS 392 Women and Leadership credit(s): 3

This course will look at gender differences in leadership styles and efficacy as well as specific issues women face in attaining and retaining leadership positions. Through readings, discussions, and projects that critically examine images and gender stereotypes of women leaders, the course is designed to give students practical skills they can use to be better communicators and leaders. Spring.

LDRS 394 Leadership and Storytelling credit(s): 3

Course repeatable for 6 credit(s).

This course offers students an opportunity to explore the growing synergy between two research areas: leadership, and narrative or story. Spring.

Restriction(s):

Must not be in the following Major(s):

LDRS 395 Service and Leadership credit(s): 0-3

Course repeatable for 9 credit(s).

In this course we will explore the links between community service, social action (activism) and public leadership, which we define as making a difference in one's community, organization, government, state and/or nation. The goal of the course is to bring students to a deeper understanding of their role as servant leaders in the communities they not only find themselves living and working in, but also those they wish to affect in humane ways. Spring.

Restriction(s):

Must not be in the following Major(s):

LDRS 396 Leadership and Social Change credit(s): 3

This course provides critical study and preparation for the East LA spring break immersion experience by exploring contemporary expressions of kinship, leadership, and social change. Readings, reflections, and assignments explore societal and structural issues related to homelessness, mass incarceration, gang violence and immigration reform. Students will understand and practice the skills and vision necessary to promote community engagement and social change both locally and in East LA. Students must go to East LA Spring Break, open to all undergraduates by application.

LDRS 397 Leadership and Film credit(s): 3

The course initiates a thoughtful consideration of the nature of leadership as depicted in film. Spring.

Restriction(s):

Must not be in the following Major(s):

LDRS 450 Contemporary Issues in Leadership credit(s): 3

Through exploring contemporary issues in leadership, this course is designed to be a capstone experience of integrating leadership knowledge and skills. This course will provide students with an understanding of the principles of Servant Leadership (Greenleaf, 1970, 1998, 2001) and an exploration of adaptive leadership theory and practice (Heifetz, 1994, 2001, 2009). These two leadership theories in tandem provide a uniquely Jesuit approach to leadership, with servant leadership cultivating the heart, while adaptive leadership provides an avenue for the head and hands. A focal point of the course is on helping students begin to develop a vision of their vocation as leaders by participating in real-time, case-in-point examples of adaptive leadership. As a capstone to the Minor in Leadership Studies, students will practice their leadership skills and knowledge in a legacy project and construct a learning portfolio from their coursework. Fall

Restriction(s):

Must be in the following Major(s): Leadership Studies

Prerequisite(s): LDRS 200

LDRS 489 Leadership Seminar credit(s): 1-3

Course repeatable 20 time.

Topic of course to be determined by department and instructor.

LDRS 490 Independent Study credit(s): 1-3

Course repeatable for 6 credit(s).

Course content to be determined by the instructor.

LDRS 497 Leadership Internship credit(s): 1 or 3

Course repeatable for 12 credit(s).

This course is designed to give students a hands-on experience in leadership. The course affords students the opportunity to use the skills and knowledge learned through the CLP in real-world internship context. The course materials cover theories behind experiential education, mentorship and internship education. The class time allow opportunity to process and reflect on the student' internship experience.

Community-Engaged Learning

In accordance with its Jesuit mission to educate men and women for others, community-engaged learning (also referred to as service-learning) at Gonzaga University encourages students to deepen their understanding of community and social justice through exploring links between service and academic work. Community-engaged learning has been incorporated into Gonzaga courses for over twenty-five years. One of the nation's most impressive movements in higher education, community-engaged learning unites classroom theory and rigor with direct experience and thoughtful action in the larger civic community.

Over 100 community-engaged learning courses sections are offered to Gonzaga students every year. Community-engaged learning courses can be found in almost every academic department and the Law School. Departments including business, philosophy, psychology, religious studies, education and others, are committed to integrating community service as an instrument to achieve academic goals. A typical community-engaged learning course involves 20 hours of outside service that reinforces the course content. Students interested in taking community-engaged learning courses can find them on ZAGWEB through the "community engaged learning" attribute search.

Academic community-engaged learning differs from community service in that the service is performed in the context of an academic course. This researched high impact teaching and learning practice contributes to success both inside and outside of the classroom. The students' community-based experiences enhance and build upon the learning that is being done in the classroom. These experiences both enhance student learning, as well as help to develop an ethic of service. Students are asked to reflect upon their experiences and to apply these insights to the course material.

Gonzaga's community-engaged learning program is managed by the Center for Community Engagement with guidance from the faculty-led Community Engaged Learning Advisory Board (CELAB). The Center provides resources for students and faculty, placements in the community, and a network of campus and community connections.

Gonzaga in Florence

Dean: Jason Houston, Ph.D.

Expand your global perspective. Enlarge your thinking. Make lifelong, life-changing memories. Study away with Gonzaga in Florence and let yourself be inspired by the people, culture, language, and history you'll come to love.

Gonzaga in Florence is the flagship off-site academic program of Gonzaga University. Established in 1963, our school offers comprehensive academic coursework with a particular emphasis on immersive learning. Participants come from Gonzaga as well as several approved, U.S. partner institutions. For over half a century, Gonzaga in Florence has led the way among American universities in Italy, and continues to play a key role in study away for both students and faculty.

Florence stands proud as a cultural capital of the world- the intellectual and artistic center of the Middle Ages and the Renaissance. The first Zag to study away in Florence was St. Aloysius Gonzaga, who lived here as a student in the 16th century. Today, Florence's many libraries, museums, churches and monuments give students a unique frame of reference with which to understand the historic influences that have shaped European civilization. Florence firmly holds its place as one of Europe's first global cities, drawing students, artists, and intellectuals for over 500 years.

Gonzaga in Florence is located in the center of Florence, just a stone's throw from the *Duomo* and looks onto the *Giardino dei Semplici*, a 16th-century garden created by the Medici family. We work and study just steps away from the San Marco monastery, filled with Fra Angelico's priceless frescoes, and the Galleria dell'Accademia, where Michelangelo's regal David stands.

Our *palazzo*, the Mozilo Center, provides the space and tools we need for intensive learning and activities. Faculty teach with updated technology; Wi-Fi is robust throughout the building. The Martin Library collection contains more than 10,000 volumes in a dedicated space and reading room. For research, students can connect to the Foley Library resources and databases on Gonzaga University's campus in Spokane. A student lounge and basic fitness center

are located on the lower level. The newly renovated grounds provide outdoor classroom, study, and recreation spaces in every season.

Consider a semester or year with us at Gonzaga in Florence. We can't wait to welcome you to your home away from home in Italy.

School of Leadership Studies

- Master of Arts in Communication and Leadership Studies
- Master of Arts in Organizational Leadership
- Doctor of Philosophy in Leadership Studies

Although graduate study involves a quantitative extension of knowledge, it is not a mere continuation of undergraduate or professional training. Intellectual achievement at the graduate level is different in kind, for the graduate student is expected to deepen and master knowledge by a personal and independent grasp of it in its sources and evidence, in its basic meanings and interrelationships.

In addition to offering the previously noted graduate degrees, the Provost & Senior Vice President may periodically approve a new or interdisciplinary graduate degree within an academic specialty. For detailed information on any graduate program, such as curriculum, tuition and admission procedures, students should consult the graduate catalog and contact the academic area responsible for that specific graduate program.

Health Professions Pathways Program

Faculty Lead: Kevin Measor

Staff Lead: Katherine Brackmann

The Health Professions Pathways Program (H3P) is a non-academic program that provides comprehensive resources and a support network for students interested in pursuing a career and graduate study in the health professions (Dentistry, Medicine, Occupational Therapy, Optometry, Pharmacy, Physical Therapy, Physician Assistant, Public Health, Veterinary Medicine, and other health professions). The Health Professions Pathways Program works collaboratively with various academic departments, faculty advisors, and with offices such as Career & Professional Development and Academic Advising & Assistance to ensure that students have the appropriate advising for their academic, co-curricular, and application needs. Resources available through the Health Professions Pathways Program include:

- Individualized support through 1:1 appointments
- Workshops and other events to help students gain knowledge about health professions
- Resources and connections for gaining experience in the health care field
- Tips for preparing for admission to graduate school programs in the health professions
- Engagement with the pre-health community at Gonzaga
- Mentorship opportunities within the Gonzaga alumni network
- Committee letters of recommendation for graduate and professional school

Along with the Health Profession Pathways Program, students are encouraged to engage and find support with one of the many pre-health or science-related student organizations on campus including the Health Sciences Club, Human Physiology Club, Pre-Dental Club, Gonzaga Science Scholars, Gonzaga Women in Medicine, Society for Advancement of

Chicanos/Hispanics and Native Americans in Science, and Health Equity Circle.

Academic Preparation

Most health professions graduate programs do not require specific undergraduate majors. Students are encouraged to choose a major that they are genuinely interested in studying. This will increase the likelihood of academic success, which is often a big factor in graduate school admissions.

Health professions programs each determine their own admissions prerequisite coursework, but most require a strong foundation in the basic sciences along with coursework in the humanities, which can be found in the University Core Curriculum. In consultation with their academic advisors, students can expect to complete a basic science curriculum that includes Biology, Chemistry, Physics, and Math. Additional science courses may be necessary based on specific program requirements.

Co-Curricular Preparation

Admission to health professions graduate programs is competitive. Schools look for candidates that have distinguished themselves in their academics, leadership, and service and gained the skills necessary to be effective members of their professions. Health professions graduate programs assess cognitive abilities primarily through GPA and standardized admission tests. Students have the opportunity to demonstrate a commitment to their chosen field and highlight personal attributes and experiences by submitting an application, writing several essay questions, requesting letters of recommendation, and participating in interviews. Hands-on experience in healthcare settings is vital to both the preparation and admission processes. This clinical experience exposes students to the complex duties expected of today's healthcare professionals and enables them to make informed career decisions.

At Gonzaga, students interested in pursuing a career in the health professions are encouraged to focus their academics, interests, co-curricular activities toward proficiency in six core competencies. These competencies reflect the qualities that health professions programs look for in candidates and embody the values of Gonzaga's Jesuit and humanistic tradition. The Gonzaga University Health Professions Pathways Program Core Competencies are: Application & Integration of Science, Healthcare, and Behavior; Critical Thought & Creative Inquiry; Cultivation of Collaborative Networks; Effective &

Professional Communication; Inclusive & Ethical Service to Others and Reflective Commitment to Growth.

Application Resources

As part of the Health Professions Pathways Program, the Committee on Health Science Careers provides committee letters as a service to eligible students and alumni seeking admission to health professions programs, most commonly medical and dental schools. While not required by Gonzaga University applicants, the committee letter is highly recommended as it serves as a holistic evaluation of the candidate's proficiency in the core competencies. The committee letter often fulfills multiple letters of recommendation requirements for admission, but it is important for applicants to confirm requirements for each school to which they apply.

Students may take the following course to assist them in their application to health professions graduate programs:

Hogan Entrepreneurial Leadership Program

Director: Dan Stewart, Ph.D.

The Hogan Entrepreneurial Leadership Program is a three-year undergraduate minor that immerses students in the fundamental concepts and practices of creating new enterprises in the private and public sectors. Students complete the Entrepreneurial Leadership minor in conjunction with their chosen major in any academic field, including business, engineering, computer science, biology, chemistry, math, education, and the liberal arts. The program has four distinguishing features:

1. An honors program model that attracts outstanding students.
2. Curriculum in the student's major and in entrepreneurial leadership
3. Co-curriculum that immerses students in entrepreneurial organizations and practices through guest lecturers, internships, site visits, mentor relationships, and a student-managed consulting lab
4. Emphasis on Jesuit educational ideals of ethical leadership and commitment to the common good

Admission to the Hogan Entrepreneurial Leadership Program is competitive and based on the student's grade point average, and demonstrated leadership, creativity, and community service.

Requirements

Students in the Hogan Entrepreneurial Leadership Program complete the requirements for a Bachelors degree in business, engineering, the arts and sciences, professional studies, or education, along with a minor in Entrepreneurial Leadership. Students must satisfy the University and college core curricula relevant to their major.

The courses listed below constitute the minor in Entrepreneurial Leadership for students majoring in arts and sciences, business administration or accounting, education, and engineering. The program is designed flexibly so that students with any major can graduate in four years. Waivers and

substitutions for department requirements may be granted to meet special academic needs. In addition, the University waives the fees for credits in excess of the usual eighteen-credit per semester limit for qualified students, up to 21 hours per semester.

An approved internship is required for completion of the minor in Entrepreneurial Leadership. Approved internships will consist of a minimum work requirement of 180 hours, and may be completed in any field and at any time, pending instructor approval. This requirement is fulfilled via the ENTR 497 course, which may be taken for credit or as a zero-credit option.

In addition to the Hogan ENTR courses, Hogan students must also complete coursework in accounting and economics. This coursework depends on the major field of study. These courses may be completed at any time prior to second semester of the student's junior year, including the pre-Hogan freshman year.

The following course requirements for the Entrepreneurial Leadership minor amount to 18 credit hours for business administration majors and up to 24 credit hours for all other majors, exclusive of double-counted or shared course content.

Second Year

ENTR 201 Idea to Solution 3 credits

ENTR 202 Solution to Execution 3 credits

Third Year

ENTR 301 Strategic Leadership 3 credits

ENTR 302 Strategic Thinking 3 credits

Fourth Year

ENTR 401 Senior Incubation* 3 credits

ENTR 402 Ethics and Moral Leadership 3 credits

*** Engineering majors fulfill this requirement with Senior Design.**

Co-Requisite courses (may be completed at any time during years 1-2)

Arts and Sciences and Engineering Students:

One of the following two Accounting courses: 3 credits

ACCT 260 Principles of Accounting I¹

ACCT 263 Accounting Analysis

One of the following three Microeconomics courses: 3 credits

ECON 200 Economic Analysis

ECON 270H Honors Economics

ECON 201 Microeconomics¹

Business Administration Students:

ACCT 260 Principles of Accounting I¹ 3 credits

ACCT 261 Principles of Accounting II¹ 3 credits

ECON 201 Microeconomics¹ 3 credits

¹ satisfies Business Administration common curriculum requirements

To maintain good standing in the Hogan Program, students must maintain a 3.0 or higher grade point average (GPA) both overall and in their Hogan (ENTR) courses.

In addition to the course work above, Entrepreneurial Leadership students participate in a variety of co-curricular activities introducing them to entrepreneurial organizations, leaders, and practices.

The Honors Program

Director: Linda Tredennick

Associate Director: Karen Petruska

The Honors Program at Gonzaga is an energetic community of students and scholars dedicated to flourishing in our new and changing world. The program provides students with innovative and immersive educational experiences designed to empower them to lead lives of meaning, service, and leadership into the future.

Academics

The Honors educational experience begins with a three-day immersion experience, in which students meet each other and begin to bond as a cohort, as well as learn to orient themselves in Spokane, at Gonzaga, and as Honors students. Students then take the Honors First Year Block, a rich, integrated, and interdisciplinary learning experience shared by all students entering the Honors program. Students are introduced to the complex structure and problems of contemporary society while also honing the foundational academic skills of critical reasoning, analysis, and communication. Ideas and experiences are shared across collaboratively-taught, student-centered, and interdisciplinary courses.

Throughout their time at Gonzaga, Honors students have reserved seats in Honors Designated courses: innovative and exciting courses taught by award-winning faculty. In addition, Honors Colloquia are designed for Honors students; these courses are collaboratively taught and interdisciplinary examinations of complex, timely, and urgent topics facing our global society. Examples of topics covered in Honors Colloquia are: identity formation and identity politics, race and representation, climate change, educational policy and advocacy, poverty, and homelessness.

Finally, Honors students complete their undergraduate career with the Honors capstone experience. Students imagine and then design a personalized project that both integrates their undergraduate learning and allows them experience which will meaningfully contribute to their future goals. These projects may take the form of researched, academic writing, an internship,

creative inquiry – whatever is best suited to the individual students interests and goals.

The Honors program has a wide experience with a number of study abroad programs catering to various fields of interest, including engineering, the physical sciences, and business. Honors students are strongly encouraged to spend a semester abroad.

Student Development

One of the most important elements of the Honors program is the community, friendship, and mentorship it provides. Crimont Hall is the home of the Honors Living-Learning Community, but also provides a quiet, library-style study lounge, a lounge for socializing and relaxing, kitchens, recreational equipment, academic space, and access to Honors Faculty. Throughout the year, the program hosts many events, including socials for the Bigs/Littles (student mentorship) program, open mic nights, lectures, open houses for families and the Gonzaga community, and the annual Haunted House. The two all-program retreats, Christmas party, and Senior brunch are always highlights of the academic year.

Admission

Students can apply for the Honors program as they apply for admission to Gonzaga. A few students are also accepted at the end of their first year at Gonzaga. Acceptance is based not only on evidence of previous academic achievement, but also on promise of future success. The application process values extra-curricular interests, intellectual curiosity and engagement, and ability to bring diverse perspectives and experiences to the program. For more information, one can contact the Honors Program office at 509-313-6547.

University Core Requirements

Honors students are responsible for completing the following University Core Requirements either through an Honors course or through the general catalogue: Literature, Christian and Catholic Traditions, World/Comparative Religion, Fine Arts, Scientific Inquiry, History, Math, Human Nature, Ethics. The completion of these course requirements with an HONS course subject will fulfill both the Honors program requirement and the University core requirement towards the completion of a students degree.

Honors Program Requirements

Students must take the following course to complete their Honors degree

<u>HONS 100</u> Multi-modal Communications	3 credits
<u>HONS 193</u> First Year Seminar	3 credits
<u>HONS 432</u> Honors Core Integration Seminar	3 credits
<u>HONS 499</u> Honors Senior Project	3 credits

In addition, students must complete five Honors Designated courses. These courses are cross-listed with regular University courses, and can fulfill core or major requirements.

HONS designated courses	15-16 credits

Military Science

Chairperson: Lieutenant Colonel Eduardo Rodriguez, Professor of Military Science

Assistant Professors: Captain Kyle Esquibel

The Military Science program at Gonzaga University is an element of the United States Army Reserve Officers' Training Corps (ROTC). This highly decorated and nationally recognized program is a cooperative effort between the U.S. Army, Gonzaga University, and Whitworth University. It provides training and qualification for leadership positions in the Regular Army, the U.S. Army Reserve, or the Army National Guard. Qualified students earn a commission as an Army Second Lieutenant while achieving a college degree in the academic discipline(s) of their choosing. Cadets incur no obligation during their first two years of ROTC and are not members of the U.S. Army (unless they are ROTC scholarship winners). Lower-division courses are open to all Gonzaga students.

The objectives of the program are to prepare academically and physically qualified scholar/athlete/leaders for the challenge of serving as commissioned officers in the world's best Army. To that end, the program strives to build leaders of character and competence to serve their country and community.

Description of the Program

The program meets the country's requirement for officer-leaders in the Army (active duty, National Guard, and Reserves). It is, therefore, multifaceted, with distinctive sub-elements to meet individual needs and requirements. For example, ROTC is traditionally a four-year program, but individuals with prior service, members of Reserve or National Guard units, participants of JROTC in high school and summer Cadet Initial Entry Training (CIET) participants may receive advanced-placement credit and may complete the program in two years. Students enroll in one military science class, leadership laboratory and the military physical fitness course per semester. The program consists of two phases: the basic course (lower division), normally taken during the freshman and sophomore years or completed through advanced-placement credit, and the advanced course (upper division).

Basic Course

First-year and second-year courses, MILS 101, MILS 102, MILS 201, and MILS 202 are designed for beginning students who want to qualify for entry into the advanced course and for those students who may want to try military science without obligations. In addition to their academic requirements, basic-course cadets may participate in a variety of extracurricular activities. Placement credit for the basic course may be granted to students who have completed initial entry training for the armed forces, three years of Junior ROTC in high school or the ROTC Leaders' Training Course. MILS 101 and MILS 102 concentrate on fundamental skills, concepts, values, and problem solving and provide an overview of how the military fits into society. MILS 201 and MILS 202 more thoroughly address problem solving, critical thinking, communications, conflict-resolution skills and leadership.

Advanced Course

The advanced course consists of MILS 301, MILS 302, MILS 401, and MILS 402. It is open only to students who have completed the basic course or earned placement credit (see above). Students must also enroll in leadership labs (MILS 301L, MILS 302L, MILS 401L, or MILS 402L) and Military Physical Fitness (MILS 303, MILS 304, MILS 403, or MILS 404). Students also attend the four-week ROTC Cadet Leader Course (CLC) during the summer between their junior and senior years. In addition to their academic requirements, advanced-course cadets provide student leadership for the Gonzaga Bulldog Battalion.

Completion of the basic course, advanced course, and CLC, coupled with a bachelor's degree from the college, qualify the cadet for a commission as a Second Lieutenant in the United States Army.

Financial Assistance

Freshman thru Senior cadets who are on scholarship and contracted will receive \$420 a month, respectively, for ten months each year. Advanced-course students receive a subsistence allowance.

Directories

President's Cabinet

Thayne M. McCulloh, D.Phil., President, was elected as interim President by the Board of Trustees in July 2009. On October 22, 2010, Gonzaga University formally inaugurated Dr. McCulloh as its 26th President, the first lay President elected to the post. He is Gonzaga's chief executive officer and oversees all administrative functions, operations and the general direction of the University. The president represents the University before the public, and is the University's ultimate administrative authority.

Deena J. González, Ph.D., became Provost and Senior Vice President in June 2019. She is Gonzaga's chief academic officer overseeing the complete student experience, combining academic and student life. In collaboration with the University President, she is responsible for implementation of academic priorities for Gonzaga University to provide high quality educational programs within and outside of the classroom setting. She supports the strategic direction of the University by supporting development of the "...whole person, intellectually, spiritually, culturally, physically, and emotionally."

Maureen McGuire, J.D., General Counsel, joined Gonzaga in 2013 and is the University's chief legal adviser and responsible for all legal affairs.

Charles J. Murphy, Chief Strategy Officer, was appointed to this position in 2018. After serving as the University's Vice President for Finance since 1985, he now works directly for the President in advancing institutional strategic initiatives, particularly in the area of diversifying the institution's revenue sources.

John D. Sklut, J.D., Senior Advisor to the President and Liaison for External & Government Affairs, was appointed in March 2021 having served as President McCulloh's Chief of Staff since September 2015. He leads several of Gonzaga's key relationships, currently serving as the Executive Director of the UW-GU Health Partnership. He also serves as administration liaison to various University boards and committees, and partners with the President in development and management of regional, state, and federal government affairs.

Joseph Poss, Vice President for University Advancement, was appointed to this leadership role in July 2013. He oversees the University's Development and Alumni Relations operations. He joined University Advancement in 1998.

Mike Roth, Athletic Director, assumed his post in 1997. He oversees all athletic programs, facilities and initiatives related to Gonzaga's participation in Division 1 intercollegiate athletics in NCAA and West Coast Conference competition, as well as Rudolf Fitness Center and intramural sports.

Charlita Shelton, Ph.D., Chief of Staff, serves Gonzaga University and the Office of the President as its primary advisor who provides guidance to the President on matters of strategic importance, and shares information with the President on key projects and initiatives taking place across the University. The Chief of Staff supports and optimizes the performance of the President by overseeing and managing the operational functions of the Office of the President; serving as the internal liaison between the Office of the President and various individuals, organizations, and constituencies; She supervises key departments, working to build more effective and collaborative relationships between members of the President's Cabinet, and is responsible for protecting, promoting, and advancing the interests of the University by supporting the vision and goals of the President.

Joseph P. Smith, Chief Financial Officer, joined Gonzaga in October 2010 after spending nine years in public accounting. He oversees accounting and financial record-keeping, operating and capital budgets, procurement, treasury (banking, financing, investments), and insurance. Joe is a Certified Public Accountant (CPA) and Chartered Global Management Accountant (CGMA).

Michelle Wheatley, D.Min., Vice President for Mission Integration, has served as the chief mission officer for the university since 2018 and oversees the Offices of Mission and Ministry and Tribal Relations. Her division supports Gonzaga University in animating its Catholic, Jesuit, and humanistic mission.

Board of Members

The Board of Members serves to ensure that Gonzaga University functions in vibrant relationship to the Society of Jesus and fulfills its apostolic mission as a work of the Society of Jesus and the Roman Catholic Church.

The Board of Members is composed of Jesuits who are members of the Gonzaga University Jesuit Community. The Board of Members meets regularly with the President to discuss matters specific to the Jesuit and Catholic mission and identity of the University, and works collaboratively with the Board of Trustees regarding matters of mutual concern to the Boards.
