Degrees: B.A. in Mathematics, B.S. in Mathematics and B.S. in Mathematics-Computer Science

Students graduating with a degree from the Mathematics department will be able:

1. To communicate mathematical ideas precisely and clearly.
2. To critically analyze mathematical arguments.
3. To demonstrate an appreciation of mathematics as an intellectual endeavor in its own right.
4. To develop the ability to reformulate and solve problems in an abstract context.
5. To prepare for careers and/or graduate school.
