

Gonzaga University Class of 2011

One-Year-Out Survey of Undergraduates

Summary

- **91%** were currently working (including volunteering, service, internship, or military service)
- **79%** thought they were not underemployed (i.e., they were working in a position requiring a college degree)
- **25%** were currently enrolled as a degree seeking student
 - **80%** were of the opinion that their post-graduate studies were “considerably” or “completely” related to their undergraduate studies at Gonzaga
- **53%** had at least one internship while attending college as an undergraduate
- **69%** used the Gonzaga Career Center & GAMP services and/or tools
- When asked “Which of the following **best describes** your current post-graduation status?” **Only 3.7%** selected the option “Not employed, seeking employment”
- **106** people selected “YES” to becoming a GAMP mentor and another 160 people selected “Maybe at a later date”

Methodology

In 2012, for the first time, the Career Center & GAMP office collected one-year-out career and further education outcomes data from the undergraduate class of 2011. Survey data were collected online between 6/5/2012 and 7/28/2012. The survey was administered online using Baseline by CampusLabs. Email messages containing a link to the online survey were sent to all 1,049 graduates, and a 33% (n=341) response rate was received. Percentages are based on the number of responses to each question.
