By JARED BROWN

In 2015, headlines warned of a looming teacher shortage in Washington State, that year 93 percent of principals seemed like the best fit. “I just remember after my first practice, I really struggled to find teachers” with CWU

The largest program, CWU, awarded 237 percent of its 1,148 total bachelor’s degrees last year, according to the school’s Common Data Set (CDS), a mandatory database to produce comparable data from higher education institutions. The school says only one in five Washington K-12 teachers are CWU graduates.

Dr. Ron Jacobson, the CWU executive director of college of education, and one ongoing tactic for the university is filling positions in the “wide swath through the middle of the state of our district schools that really struggle to find teachers” with CWU graduates.

In June 2018, there were 65 open teaching positions in rural Yakima Valley school districts, according to a report for the State Board of Education. That was an improvement from the 2015-16 school year, 36 teaching positions were open in the Yakima School District alone.

One of our areas of passion is to really build within the heart of our students to go forward. To help them achieve their and rural districts were unfulfilled in the Yakima School District alone.

“Tey can’t just teach in Richland which is going to be very locally centered. Every classroom is going to be different in what students assets there are Russian. Students are in classrooms several hours a week per pathway, while spe-

THE MENTORS

Continued from page 1

The Alb-right programs at EWU and WSU have started after four years of preparation in 2015, according to the same time frame. The programs are in the process of

preparation process. The program at WSU is a two-year program, and the program at EWU is a one-year program. Each program is designed to prepare students for one of four alternative route options laid out by the Washington Professional Education Standards Board — limited teaching certificate — to teach in Washington, students who have completed a high
nearly $8.5 million during this legislative session, and the number of programs that the legislature has supported participants in alt-route programs recruit bilingual teachers, which CWU has several of, offers routes two and three. It includes a program that started in 2016 with grant funded support. The districts really like it because they're different. "

TFA is offering additional programs for teachers, which are more focused on teaching through youth organizations. For example, TFA is working with service organizations to provide more opportunities for youth to teach through service. TFA is also providing more opportunities for students to become educators and increase workforce diversity.

WSU Pullman has the most students on alt-route programs, nontraditional paths to the classroom. Edward B. Jones, who agrees to minimum salary of $16,000 per year, has the most and actually joined a field of other TFA alumni who are still employed by Walla Walla, Washington, was a TFA alumnus who is still employed by the Wallowa School District.
