Your heart, intellect, and courage to change the world.
At Gonzaga, we believe you are called to live, learn, and explore, not comfortably at the center of the culture, but at the frontiers—the cutting edge, the margins, the places that require courage.

Thayne M. McCulloh, D.Phil.
President of Gonzaga University

How do you pursue knowledge and cultivate understanding? What does it mean to be human? What principles characterize a well-lived life? How will you use your gifts to improve the world?

We will ask you:
1. How do you pursue knowledge and cultivate understanding?
2. What does it mean to be human?
3. What principles characterize a well-lived life?
4. How will you use your gifts to improve the world?

Gonzaga educates students to embrace the challenges and opportunities of the 21st century and to lead meaningful and productive lives in an increasingly complex world.

The University Core Curriculum sits at the center of your educational experience and animates our Catholic, Jesuit, and humanistic heritage and mission.

As an intellectual community, Gonzaga will help you develop your creative potential by posing important questions through the University Core and helping you relate them to your academic pursuits. Ultimately, Gonzaga will encourage you to use your talents and education to positively impact the world.
Gonzaga expects students will occasionally be uncomfortable with different ideas as well as crave opportunities to discuss, research, and explore. More than half of Gonzaga students study abroad, spending time immersing themselves in new cultural and language experiences and exploring our ever-connected world. Gonzaga believes that international education is a part of the core academic experience, and the health and safety of students is the number one priority. Students also hone their intellectual, physical, spiritual, and emotional gifts in service for the common good. By engaging in their local, regional, and global communities, students grow in their understanding of complex societal issues, apply disciplinary knowledge to real-world challenges, and cultivate the desire and ability to address injustice in their own communities.

Gonzaga provides high-quality experiences that enrich and transform students both inside and outside of the classroom. Opportunities to challenge perspective and gain experience are also found closer to Gonzaga’s campus through internships, research positions, and community-engaged learning. Having a medley of these experiences inspires maturity, introduces new perspectives, and sets Gonzaga students apart.

Emerge with Meaning

The Core Details
The First-Year Seminar in the University Core helps you make the transition to university intellectual life, studying engaging topics such as leadership and community or Advertising and the Culture of Consumption, you can appreciate the depth of academic inquiry from multiple perspectives. The other first-year courses, organized around the theme of UNDERSTANDING AND CREATING, cultivate essential skills and habits of mind that are reinforced throughout your education. Second and third year courses explore the themes of BEING AND BECOMING and CARING AND DOING through courses in philosophy and religious studies. The core culminates as you IMAGINE THE POSSIBLE in the Core Integration Seminar, designed to help you pull together the threads of your Core experience alongside your major(s).

Broadening Courses + Designations
Broadening courses—one course each in fine arts & design, history, literature, and social & behavioral science—round out the University Core. Designations in the areas of global studies, social justice, and writing reinforce essential competencies and values. Designations are available throughout the Core and often in the major and usually double-count with Core or major requirements.

UNIVERSITY CORE
As students of a Catholic, Jesuit, and humanistic university, how do we educate ourselves to become people for a more just and humane global community?

This is the big question that anchors the University Core Curriculum. This question is progressively addressed by core themes and topics that create cohesiveness in your Core experience. As a four-year program committed by all Gonzaga students, the Core also grounds, extends, and enriches each student’s major areas of study.

YEAR 1
UNDERSTANDING AND CREATING
How do we pursue knowledge and cultivate understanding?
Fire-Year Seminar
Writing Reasoning
Math
Scientific Inquiry
Communication & Speech

YEAR 2
BEING AND BECOMING
Who are we and what does it mean to be human?
Philosophy of Human Nature
Christianity & Catholic Traditions

YEAR 3
CARING AND DOING
What principles characterize a well-lived life?
Ethics
World or Comparative Religion

YEAR 4
IMAGINING THE POSSIBLE
What is our role in the world?
Core Integration Seminar

PLUS
BROADENING COURSES
Fine Arts & Design
History
Literature
Social & Behavioral Science

DESIGNATIONS
Writing Enriched
Global Studies
Social Justice
Understanding and Creating

Today, the world isn't divided into scientists and artists or philosophers and mathematicians. We live in a world where someone can be both, and where all of these professions can work together toward a common goal.

In your first year at Gonzaga, you'll be part of a First-Year Seminar and other University Core classes in writing, reasoning, scientific inquiry, mathematics, and communication & speech that embrace this interdisciplinary mindset. By exploring new ideas and perspectives, enhancing your ability to make well-reasoned decisions, and engaging in introspection, you'll become a more capable and creative person who can impact the world.

The first year in the Gonzaga Core provides you with interdisciplinary and hands-on experiences while also teaching you the Jesuit approach to education called cura personalis—care for the whole person. You will learn to approach an idea from varied and contrary perspectives, collaborate with peers in other academic disciplines, explore how knowledge has been acquired over the years, and reflect on what experiences have informed your own understanding of the world. Broader courses intersect with Core themes to extend your appreciation for the arts, humanities, and social/behavioral sciences throughout the four years.

FIRST-YEAR SEMINAR EXAMPLES

- RELI 193: Indigenous Peoples & Global Issues
- PSYC 193: Risk & Resilience
- POLS 193: The Art of Rhetoric
- PHYS 193: Life on Mars
- ENVS 193: The Global Coffee Trade
- BIOL/THEA 193: Art & Science of Dance
- ENGL 193: The Rhetoric of Race
- COMM 193: Intergroup Dialogue: Promoting Racial Consciousness
- BIOL 193: Technology & Humanity
- PHIL 193: Loneliness and Community
- PHIL 193: Brewing Justice: The Global Coffee Trade

One First-Year Seminar, built around broadening perspectives and interdisciplinary connections, is a class co-taught by biology and dance professors. Art & Science of Dance invites students to learn scientific principles while weaving them into movement. For Sydney Schmidt '20, "The part of the waving flag dance where we represented the inner workings of an ear made me see more clearly how different pitched sounds can damage certain cells in the cochlea." As a result of this innovative class, students are able to think and act like both a dancer and a scientist.

Being and Becoming

What does it mean to be human?

At its core, Jesuit education is about being attentive, reflective, and compassionate. According to St. Ignatius, the founder of the Jesuits, when you practice these traits together you use discernment: a method of making good choices in the context of faith.

This second year is the time to more fully explore your passions, helping you to be who you are meant to be and to imagine just who you can become.

You will continue to make choices about your future, which can present some challenging questions:

1. What do I have to contribute to the world?
2. How might I make an impact?
3. What do I have to contribute to the world?

In addition to other Core and broadening courses this second year, you will take Philosophy of Human Nature and a course in Christianity & Catholic Traditions. These courses will introduce you to how great thinkers have tried to answer some of these questions over time and help you discern your own views and passions.

CLASS EXAMPLES
- PHYS 201: Philosophy of Human Nature
- RELI 220: Discipleship: Life & Teachings of Jesus
- RELI 215: Christian Diversity
- RELI 210: Catholicism
- RELI 225: African American Religions
- RELI 217D: Theology in Global Contexts
- RELI 311: Bible & Film in Dialogue
- RELI 226: Liturgy
- RELI 343: Christian Leadership
- RELI 390: Catholic Social Teaching
- WGST 215: Feminism and Christianity
- WGST 351: Feminism and Christianity
- RELI 220: Discipleship: Life & Teachings of Jesus
- RELI 215: Christian Diversity
- RELI 210: Catholicism
- RELI 225: African American Religions
- RELI 217D: Theology in Global Contexts
- RELI 311: Bible & Film in Dialogue
- RELI 226: Liturgy
- RELI 343: Christian Leadership
- RELI 390: Catholic Social Teaching
- WGST 215: Feminism and Christianity
- WGST 351: Feminism and Christianity

When asked if Gonzaga was the right choice, Simon replied, “When you look at Gonzaga’s Mission Statement, it has a lot to do with incorporating faith and service. Looking at the future, that’s everything we want to do—we want to combine our faith with what we’ve been through. We want to help and educate others so they can take our place when we’re gone.”

Caring and Doing

What principles characterize a well-lived life?

After contemplating what it means to be human and discerning your personal ambitions during the second year, your focus in your third year will shift outward.

As our Mission Statement boldly declares, “…we are an exemplary learning community that educates students for lives of leadership and service for the common good.”

To serve others, we must understand others. To serve others, we must understand others. To serve others, we must understand others.

This year will challenge you to see your academic discipline, and the world, through different perspectives than your own.

You will also ask yourself about what it means to live a well-lived life and how that life will lend itself to a well-lived life and how that life will lend itself to a well-lived life.

Among the courses you will take in this year are Ethics and a class in the area of World of Comparative Religion. These courses are designed to introduce you to new perspectives and will help you continue your journey of becoming more intentional in your decisions and actions.

CLASS EXAMPLES

• PHIL 301: Ethics
• RELI 110: Hebrew Bible
• RELI 200: Religion & Human Experience
• RELI 290: Religion & Violence
• RELI 350: Interreligious Dialogue
• RELI 351: Religions of Asia
• RELI 352: Native American Religions
• RELI 350: Christian-Muslim Relations
• RELI 390: Women in Jewish Traditions

Purposeful Ethics

“Why do we have to learn all of these ethical theories? Can’t you just teach me the right one?” is a question Dr. Ellen Maccarone, an applied ethicist, often hears at the beginning of her Ethics course.

The answer, of course, is no. Ethics isn’t a dualistic study of right and wrong. Even when one is very set in one’s beliefs or philosophical perspective, “It’s not just about finding the right one, the right ‘contender’ for a good moral theory,” Dr. Maccarone explains, “but it’s important to understand the others you don’t think are the right one because you will interact with people who do think that’s the right one, and if you don’t understand these theories, you won’t understand these people. You won’t know how to have disagreement with them, or to come to consensus, or to figure out when agreeing to disagree is the right thing.”

Your Ethics course will engage you in complex ethical theories while relating them to everyday things like conflicts with roommates and pertinent topics such as hate speech, capital punishment, and poverty. Dr. Maccarone’s class, for example, includes simulation games such as distributing the world’s wealth using pennies and experiencing the challenge of navigating social services and planning a food budget on a low income. After these simulated experiences, case studies, and many discussions, you’ll leave these classes having a better sense of your role in your community, your responsibility to others, and how to engage in meaningful dialogue with people with whom you disagree.

As Dr. Maccarone points out, “In Jesuit education, the role of ethics is not just to learn ethical theories but to actually incorporate them into one’s decision making so you better understand other people and interact with them to a better purpose.”

For an article on The Ethics of Food, a Core Integration Seminar Dr. Maccarone teaches, visit gonzaga.edu/ethicaleating
During your fourth year at Gonzaga, you’ll participate in The Core Integration Seminar, which will spur you to imagine how you will use your knowledge and abilities for the rest of your life.

After your years spent contemplating your connection to others and practicing your skills, you will leave college with a profound sense of who you are and your impact on the world. Although you might not implement everything you learned at Gonzaga, you will inherently understand how to think critically, ask vital questions, seek out experiences that challenge you, collaborate with those who may see things differently, practice discernment, and lead a life of leadership and service. You will have embraced the Jesuit ideal of magis, Latin for “more.” Living the magis implies striving for excellence that serves the greater good.

**CORE INTEGRATION SEMINAR EXAMPLES**
- HUSB 490: Fundamentals of Business Ethics
- ENGL 432: The American Dream
- ENVS 358: Environmental Ethics
- INGS 432: Fifty People Vote
- INST 432: Global Migration
