Career & Professional Development (CPD) would like to express sincere appreciation to all of our colleagues and stakeholders who helped collect and compile this information. Special thanks to:

- Maxwell Kwenda, Director of Institutional Research, who assisted in securing graduate school information from the National Student Clearinghouse.
- Mel McNair-Davis, Budget & Research Specialist in CPD, who scrubbed data, and kept the collection process on target for our December 31, 2020 deadline.
- Molly Ayers, Director in the Center for Community Engagement, for providing data related to graduates in volunteer service.
- Molly Spilker, Office Assistant in CPD, who tirelessly called graduates throughout the year to obtain their first destination information.
- Administrators, academic deans, academic department chairs, faculty and staff for providing information related to the first destinations of our graduates.

The Gonzaga University Career & Professional Development Team

- O. Ray Angle, Assistant Vice President for Career & Professional Development
- Katherine Brackmann, Assistant Director, Graduate & Professional School Engagement
- Jonathan Byers, Career Director
- Kareena Byrd, Recruitment Coordinator
- Karen Franks-Harding, Manager, School of Engineering & Applied Science
- Patty Hetu-Tkacik, Recruiter-in-Residence
- Vicki Hucke, Assistant Director, Employer Engagement
- Mel McNair-Davis, Budget & Research Specialist
- Erin Shields, Director, Alumni & Employer Engagement
- Molly Spilker, Office Assistant
- Gabby Zink, Graduate Counseling Intern
Executive Summary

The First Destination Survey Report is prepared annually by Career & Professional Development (CPD) using the guidelines developed by the National Association of Colleges and Employers (NACE).

The Outcomes Success Rate for students earning degrees between July 1, 2019 and June 30, 2020 is 89.0%. Please keep in mind, this data should be reviewed within the context of the COVID-19 global pandemic.

Data was collected on 1,531 of the 1,986 graduates in the class of 2019-2020 resulting in a Knowledge Rate of 77.1%. NACE suggests a 65% knowledge rate.
The Knowledge Rate of 77.1% exceeds the NACE suggested Knowledge Rate of 65% by 12.1 percentage points and was obtained through both graduating student survey responses and staff research.

Data collection strategies included:
• Surveying students in person at events, programs, and in classrooms,
• Surveying students via an online survey tool,
• Surveying students via telephone after graduation,
• Employing the assistance of colleges, schools, departments, faculty, staff and administrators to obtain and/or verify first destination data,
• Conducting online research on social media sites and organizational web pages, and,
• Obtaining graduate school attendance information from the National Student Clearinghouse (StudentTracker) database.

The 89.0% Outcomes Success Rate was obtained by combining Employment (full and part-time), Continuing Education, Volunteer Service, Military Service, and Not Seeking (employment or continuing education) categories. The outcomes success rate the previous year was 95.5%.

11.0% of graduating students were categorized as Still Seeking (employment or graduate school admission) on December 31, 2020. The Still Seeking rate for the previous year was 4.5%.

To understand the 6.5% decrease between the 2018-2019 Outcomes Success Rate (95.5%) and the 2019-2020 Outcomes Success Rate (89.0%), it is imperative to note the significant disruptive factors that impacted the U.S. Unemployment Rate throughout the year. Economic instability, political turmoil, cultural unrest, and the global pandemic had a major impact on employer confidence and the workforce. Many employers responded to these factors by initiating layoffs, shortening internships, rescinding job offers, and shrinking recruiting and hiring efforts.

The average national unemployment rate from April 30, 2020 (the month prior to the May degree completion date) to December 31, 2020 (the last date to collect First Destination data in compliance with NACE standards) was 9.5% (see unemployment chart on the right).

The 11.0% Still Seeking rate puts Gonzaga University graduates 1.5 percentage points higher than the average national unemployment rate from April 2020 to December 2020 (the time in which students typically begin to implement their post-graduation career and education plans). Traditionally, Gonzaga University graduates have outperformed the national Outcome Success Rate as calculated by NACE, which will be released later this year.

Career & Professional Development strives to ensure that graduating students achieve an annual Still Seeking (Unemployment) Rate that is no more than three percentage points above the

average national unemployment rate (calculated between April 31st and December 30th of the graduating year). While this year’s Outcomes Success Rate of 89.0% represents and 6.5% decrease from the previous year’s Outcomes Success Rate, given the extraordinary context of the global pandemic, the Outcomes Success Rate indicates strong performance in light of environmental conditions.

- The First Destination Survey Report includes employment information for some respondents that were employed in the same role prior to starting their education.

- Salary calculations are based on hourly and annual wage information converted into United States dollar values where applicable; monthly volunteer stipends are not included.

- Top cities are reported as “Metropolitan Statistical Areas,” following standards set by the U.S. Census Bureau.

- For the second year in a row, Seattle has displaced Spokane as the top first destination city. Washington remains the top first destination state.

- The top seven employers/organizations that hired Zags are Providence Health & Services/Swedish (46), Boeing (23), Deloitte (21), Gonzaga University and U.S. Armed Forces (tied at 17), and Jesuit Volunteer Corps and KPMG (tied at 15).

- The average salary for the 2019-2020 graduating class (both undergraduates and graduates) is $66,165. For undergraduate degrees, the average salary is $56,719. For graduate degrees, the average salary is $90,753.

The following graphs and tables provide outcomes success data for undergraduate and graduates by college or school. When available, CPD has also provided information on top geographic locations (city and state), top employers/organizations, and average salaries.

If you have any questions after reviewing this report, please contact Career & Professional Development at 509.313.4234 to speak with me.

Beyond Gonzaga
Bachelor of Science in Biology

I am currently working as a certified nursing assistant (CNA) at the Whitman Health and Rehabilitation Center in Colfax, Washington. I am also shadowing a physician at the Whitman Medical Group Clinic to prepare for my medical school applications this spring.

At Gonzaga university my life was full of science and extracurriculars. My extensive involvement in my studies and other activities revealed to me that I needed a fast-paced working environment that involved the study of the human body. My current job, as well as future aspirations of becoming a doctor, are deeply centered in my passion for helping people and my fascination with the human body and how it works.

The curriculum at Gonzaga not only prepared me for the vigor of the medical school application process but also instilled a need in me to help those around me. I am deeply passionate about the field I am a part of and hope that I can better the lives of my future patients while also working towards a world that is just and fair towards everyone in the realm of medicine.

Beyond Gonzaga
Bachelor of Business Administration

Justis
Associate Consultant
Slalom

Gonzaga has played a key role in my personal and professional development. Working for a business and technology consulting firm, I will encounter a high level of ambiguity, [and] I have developed a portfolio of skills at Gonzaga — both technical and intangible — to tackle business problems of all shapes and sizes.

GU has also taught me the importance of cultivating genuine relationships — an invaluable skill in business. People skills are the most important skills for a student to develop, regardless of major. Learning how to lead, to follow, to listen and to collaborate are the most critical skills for someone who is new to the workforce.

Gonzaga offers an excellent education that prepares students to be more flexible and face uncertainty post-graduation. I would encourage students to take chances at Gonzaga; to squeeze the most out of courses and get involved wherever possible outside of the classroom. More importantly, students should enjoy their time at a truly unique university.

- Still Seeking: 2 (6.1%)
I am fortunate to be building a career centered around the promotion of sustainable, healthy, and happy communities through work within government and urban planning. I work with my team to develop a coordinated response to the impacts of climate change across the State of California, with a focus on advancing social equity.

During my time at Gonzaga, experiences such as Walking School Bus and Model United Nations, and coursework such as Writing for Social Action and Interreligious Dialogue allowed me to explore how public policy and built infrastructure influence public health, economic development, and education outcomes.

I am deeply appreciative of those at Gonzaga I was fortunate to learn from – coworkers, professors, and classmates – who have given me a hunger for action and constantly remind me of the need to be committed to the shared ethics that bind us, including the Jesuit emphasis on human dignity and equity.

Gonzaga University has helped me grow in my faith, developing the skills I will need to be a doctor who seeks to serve all my patients with deep love and compassion.

Inside the classroom, I have been challenged to learn to care for the whole person. For example, in a class I took with Jesuit Father Tran M.D., I saw the value in caring for a patient’s physical, emotional, and spiritual needs through his stories.

Outside of the classroom, my involvement in the office of Mission and Ministry has helped me realize the ways in which I can care for all of a person’s needs when I am put in a position of trust. Whether it was simply being an active listener, giving a much needed hug, or helping a fellow student feel at peace, I found that my capacity to empathize and serve others grew immensely.

As an aspiring physician, I believe that my purpose in life is to love and serve God through my interactions with others. To do this, I believe I must approach each interaction with intentionality and attempt to emanate Jesus’s unconditional love.

- Continuing Education: 9 (12.0%)
- Still Seeking: 6 (8%)
Utilizing the services and sessions that the Career and Professional Development department provided was integral to my success in finding my first nursing job after graduating from Gonzaga University in December 2019.

In my final semester of college, I attended a presentation from Career and Professional Development about all of the services we have access to as students and alumni, and some of the nursing specific aspects that were available.

I utilized the online portal to sign up for a mock interview and a resume building session, which helped me feel very prepared to start applying for jobs. Additionally, I signed up to meet with a Career and Professional Development staff member to talk in depth about government jobs. I found this session extremely helpful, as I was interested in working for my local county, Seattle-King County Public Health, where I was later hired.

Each of these opportunities supported me greatly in my journey to become a Public Health Nurse.

Beyond Gonzaga
Master of Arts in Philosophy

Gonzaga University is a place where we are challenged to be the best all-around people we can be. We are taught Cura Personalis: mind, body, and spirit. We are taught contemplative, reflective, discernment. These values, and many others, were consistently grounding my academic work and experiences throughout my 6 years on campus.

GU opened up opportunities for me to fulfill academic leadership roles, such as helping run the Writing Center during my graduate years after finishing undergrad as a writing tutor. I was able to teach in various undergraduate courses under the guidance of incredible professors all across the College of Arts and Sciences.

These opportunities helped me realize how much I loved working with college students, being in the classroom, and sharing my passion for the Humanities. They were also places where I experienced amazing support from faculty and staff, helping me realize my dreams of earning a PhD and ultimately working as a professor.

Beyond Gonzaga
Master in Initial Teaching

I originally graduated from Gonzaga in 2010 and had spent eight years working in Spokane in Athletic Administration. Throughout that time, I felt my purpose narrow toward the elements of my roles involving teaching, training, and mentoring young personnel. I enjoyed empowering young people and helping them to build on their skills and abilities. Eventually, I felt called to serve my community in a more impactful role, resulting in my transition to becoming an educator.

Gonzaga’s MIT program helped to prepare me for today’s challenges facing both students and educators by offering a lens through which to view education beyond just Learning Targets and State Standards, focusing concurrently on our students’ lived experiences and realities that affect their learning. While high-level instruction is a key component to providing quality education, perhaps more critical is the embrace of the challenge of connecting with “real kids, in real time, with real problems.” This is where I now find my purpose, and I can engage in it confidently as a result of my experience in the MIT program that provided opportunities to learn from true professionals of this vocation daily.

*For majors where no responses were collected, a success rate of N/A has been reported since no information was gathered to provide an accurate reflection of outcome.*
The following pages provide aggregate reports to help understand the most reported locations (geographic and organizational). Please note the following:

- These reports include both undergraduate and graduate Gonzaga students from the 2019-2020 class.
- For locations (organizational and/or geographic) that tied with one or more additional locations, they are listed in alphabetical order and color coded as a group.
- For multi-year comparisons, we pull from reports generated using NACE standards (i.e. from the 2015-2016 class year onward). While outcome information was generated without NACE standards in previous years, because of the different parameters they are not used for comparison purposes.

### 2016-2019

Data for 2016-2019 suggest that graduates are well-equipped to enter the workforce and are successful in achieving their career and educational goals with a strong but gradual trend upward in the Outcomes Success Rates.

### 2020

In 2020, the global pandemic and subsequent disruptive factors had an adverse, negative impact on the overall Outcomes Success Rate with undergraduate students recognizing an almost 10% decrease in the Outcomes Success Rate. Graduate students, who are typically employed while earning their degrees, experienced only a slight 1% decrease to their Outcomes Success Rate.

### Salary Trends

Increase in the average salary for both undergraduate and graduates students has remained stable with a slight upward trend.
